PRACTICAL GRAMMAR

OF THE

SANSKRIT LANGUAGE,

ARRANGED WITH REFERENCE TO

THE CLASSICAL LANGUAGES OF EUROPE.

FOR THE USE OF

ENGLISH STUDENTS.

BY

MONIER WILLIAMS, M.A.

PROFESSOR OF SANSKRIT AT THE EAST-INDIA COLLEGE, HAILEYBURY;

MEMBER OF THE ROYAL ASIATIC SOCIETY, AND OF THE ORIENTAL SOCIETY OF GERMANY;

FORMERLY BODEN SCHOLAR IN THE UNIVERSITY OF OXFORD.

SECOND EDITION

OXFORD:
AT THE UNIVERSITY PRESS.
M.DCCC.LVII.

yr- syla

PREFACE.

IN 1846 I published a Grammar of the Sanskrit language, which I entitled 'An elementary Grammar, arranged according to a new Theory.' This work is now out of print, and a new edition is required. The increasing experience which, during the subsequent ten years, I have derived from my duties as Sanskrit Professor at the East-India College, where every student without exception is compelled by statute to acquire this language, has led me to modify some of the views I expressed in my first Grammar respecting the Indian grammatical system. I have consequently felt myself called upon to re-write the book; and although I have seen no reason to depart materially from the arrangement originally adopted, yet I am confident that the present enlarged and more complete work will be found even better adapted than its predecessor to the practical wants of the European student.

At the best, a grammar is regarded by an European as a necessary evil, only to be tolerated because unavoidable. Especially must it be so in the case of a language confessedly more copious, more elaborate and artificial, than any other language of the world, living or dead. The structure of such a language must of necessity be highly complex. To the native of Hindústán this complexity is a positive recommendation. He views in it an evidence and a pledge of the sacred and unapproachable character of the tongue which he venerates as divine. To him the study of its intricate grammar is an end, complete and satisfying in

itself. He wanders with delight in its perplexing mazes; and values that grammar most which enters most minutely into an abstract analysis of the construction of the language, apart from its practical bearing on the literature or even on the formation of his own vernacular dialect. But the matter-of-fact temperament of an European, or at least of an Englishman, his peculiar mental organization, his hereditary and educational bias, are opposed to all such purely philosophical ideas of grammatical investigation. A Sanskrit grammar intended for his use must be plain, straightforward, practical; not founded on the mere abstract theory of native grammarians, not moulded in servile conformity to Indian authority, but constructed independently from an examination of the literature, and with direct reference to the influence exercised by Sanskrit on the spoken dialects of India and the cognate languages of Europe. To the English student, as a general rule, all grammatical study is a disagreeable necessity—a mere means to an end—a troublesome road that must be passed in order that the goal of a sound knowledge of a language may be attained. To meet his requirements the ground must be cleared of needless obstacles, its rough places made smooth, its crooked places straight, and the passage over it facilitated by simplicity and perspicuity of arrangement, by consistency and unity of design, by abundance of example and illustration, by synoptical tables, by copious indices, by the various artifices of typography.

Before directing attention to the main features of the plan adopted in the present volume, and indicating the principal points in which it either differs from or conforms to the Indian system of grammatical tuition, I will endeavour to explain briefly what that system is; on what principles it is based; and in what relation it stands to the literature.

It might have been expected that in Sanskrit, as in

other languages, grammatical works should have been composed in direct subservience to the literature. without going the length of affirming that the rules were anterior to the practice, or that grammarians in their elaborate precepts aimed at inventing forms of speech which were not established by approved usage, certain it is that in India we have presented to us the curious phenomenon of a vast assemblage of purely grammatical treatises, the professed object of which is not so much to elucidate the existing literature, as to be studied for their own sake, or as ancillary to the study of the more abstruse work of the first great grammarian, Pánini. We have, moreover, two distinct phases of literature; the one, simple and natural that is to say, composed independently of grammatical rules, though of course amenable to them; the other, elaborate, artificial, and professedly written to exemplify the theory of grammar. The literary compositions which preceded the appearance of Pánini's aphorisms, probably about the 2d century B.C., belong of course to the first of these phases. Such are the Vedas, the code of Manu, and the two epic poems of the Rámáyana and Mahá-bhárata*. Vedas, indeed, which are referred back to a period as early as the 12th or 13th century B.C., abound in obsolete and peculiar formations, mixed up with the more recent forms of grammar with so much irregularity as to lead to the inference, that the language at that time was too unsettled and variable to be brought under subjection to a system of strict grammatical rules; while the simplicity of the style in the code of Manu and the two epic poems is a plain indication that a grammar founded on and intended to be a guide to the literature as it then existed, would have

^{*} That Pánini was subsequent to the Mahá-bhárata may be conjectured from the circumstance that in the chapter on patronymics the examples given in the Vártikas or supplementary rules (probably nearly as ancient as the Sútras) seem to be taken from the names of the chiefs and warriors of that poem.

differed from the Páṇiniya Sútras as a straight road from a labyrinth.

What then was the nature of Pánini's extraordinary work, which caused so complete a revolution in the character of Sanskrit literary composition? It consisted of about four thousand Sútras or aphorisms, composed with the symbolic brevity of the most concise memoria technica. These were to the science of Sanskrit grammar what the seed is to the tree, the bud to the full-blown flower. They were the germ of that series of grammatical treatises which, taking root in them, speedily germinated and ramified in all directions. Each aphorism, in itself more dark and mystic than the darkest and most mystical of oracles, was pregnant with an endless progeny of interpretations and commentaries, sometimes as obscure as the original. About one hundred and fifty grammarians and annotators followed in the footsteps of the great Father of Sanskrit grammar, and, professing to explain and illustrate his dicta, made the display of their own philological learning the paramount aim and purpose of their disquisitions.

It cannot be wondered, when all the subtlety of the Indian intellect expended itself in this direction, that the science of Sanskrit grammar should have been refined and elaborated by the Hindús to a degree wholly unknown in the other languages of the world. The highly artificial writings of later times resulted from such an elaboration, and were closely interwoven with it; and although much of the literature was still simple and natural, the greater part was affected by that passion for the display of philological erudition which was derived from the works of Páṇini and his disciples. Poetry itself became partially inoculated with the mania. Great poets, like Kálidása, who in the generality of their writings were remarkable for majestic simplicity and vigour, condescended in some of their works to humour the taste of the day by adopting

a pedantic and obscure style; while others, like Bhaṭṭi, wrote long poems, either with the avowed object of exemplifying grammar, or with the ill-concealed motive of exhibiting their own familiarity with the niceties and subtleties of speech.

Indeed it is to be regretted that the Pandits of India should have overlaid their system, possessing as it does undeniable excellencies, with a network of mysticism. Had they designed to keep the key of the knowledge of their language, and to shut the door against the vulgar, they could hardly have invented a method more perplexing and discouraging to beginners. Having required, as a preliminary step, that the student shall pass a noviciate of ten years in the grammar alone, they have constructed a complicated machinery of signs, symbols, and indicatory letters, which may be well calculated to aid the memory of the initiated natives, but only serves to bewilder the English tyro. He has enough to do, in conquering the difficulties of a strange character, without puzzling himself at the very threshold in a labyrinth of symbols and abbreviations, and perplexing himself in his endeavour to understand a complicated cipher, with an equally complicated key to its interpretation. Even Colebrooke, the profoundest Sanskrit scholar of his day, imbued as he was with a predilection for every thing Indian, remarks on the eight lectures or chapters, which, with four sections under each, comprise all the celebrated Páṇiniya Sútras, and constitute the basis of the Hindú grammatical system;—'The outline of Páṇini's arrangement is simple, but numerous exceptions and frequent digressions have involved it in much seeming con-The first two lectures (the first section especially, which is in a manner the key of the whole grammar) contain definitions: in the three next are collected the affixes by which verbs and nouns are inflected. Those which appertain to verbs occupy the third lecture; the fourth

viii PREFACE.

and fifth contain such as are affixed to nouns. The remaining three lectures treat of the changes which roots and affixes undergo in special cases, or by general rules of orthography, and which are all effected by the addition or by the substitution of one or more elements. The apparent simplicity of the design vanishes in the perplexity of the structure. The endless pursuit of exceptions and limitations so disjoins the general precepts, that the reader cannot keep in view their intended connexion and mutual relation. He wanders in an intricate maze, and the clue of the labyrinth is continually slipping from his hand.' Again; 'The studied brevity of the Pániníya Sútras renders them in the highest degree obscure; even with the knowledge of the key to their interpretation, the student finds them ambiguous. In the application of them, when understood, he discovers many seeming contradictions; and, with every exertion of practised memory, he must experience the utmost difficulty in combining rules dispersed in apparent confusion through different portions of Pánini's eight lectures.'

That the reader may judge for himself of the almost incredible brevity and hopeless obscurity of these grammatical aphorisms, it may be worth while here to furnish him with one or two examples. The closing Sútra at the end of the eighth lecture is as follows: ' $\mathbf{w} \mathbf{w} a a$.' Will it be believed that this is interpreted to mean, 'Let short a be held to have its organ of utterance contracted, now that we have reached the end of the work, in which it was necessary to regard it as being otherwise?'

Another example, taken from the third section of the eighth lecture, may be useful as showing that grammatical theory is sometimes not strictly carried out in practice. The Sútra (VIII. 3. 31) is as follows: ' \mathfrak{M} \mathfrak{g} \mathfrak{m} $\acute{\mathfrak{s}i}$ tuk.' This is interpreted to signify, that 'when \mathfrak{m} n comes at the end of a word, and \mathfrak{m} $\acute{\mathfrak{s}}$ follows, the augment \mathfrak{m} t may be inserted,

and न् भ may then be written in three ways, thus; ञ्च, ञ्च, न् भ. But if we examine the best MSS, and printed works throughout the whole compass of the literature, we shall find that in practice न् भ are constantly left unchanged. The same may be said of न् भ, which by another Sútra ought to pass into भ. See rr. 55, 56, a. pp. 30, 31, of this book

My aim has been, in the present work, to avoid the mysticism of Indian grammarians, without ignoring the best parts of their system, and without rejecting such of their technical symbols as I have found by experience to be really useful in assisting the memory.

With reference to my first chapter, the student will doubtless be impatient of the space devoted to the explanation of the alphabet. Let him understand at the outset, that a minute and accurate adjustment of the mutual relationship of letters is the very hinge of the whole subject of Sanskrit grammar. It is the point which distinguishes the grammar of this language from that of every other. In fact, Sanskrit, in its whole structure, is an elaborate process of combining letters according to prescribed rules. Its entire grammatical system, the regular formation of its nouns and verbs from crude roots, its theory of declension and conjugation, and the arrangement of its sentences, all turn on the reciprocal relationship and interchangeableness of letters, and the laws which regulate their euphonic combination. These laws, moreover, are the key to the influence which this language has exercised on the study of comparative philology. Such being the case, it is scarcely possible for a Sanskrit grammar to be too full, luminous, and explicit in treating of the letters, their pronunciation, classification, and mutual affinities.

With regard to the second chapter, which contains the rules of Sandhi or euphonic combination, I have endeavoured as far as possible to simplify a part of the grammar

which is the great impediment to the progress of beginners. There can be little doubt that the necessity imposed on early students of conquering these rules at the commencement of the grammar, is the cause why so many who address themselves energetically to the study of the language are compelled after the first onset to retire from the field dispirited, if not totally discomfited. The rules for the combination and permutation of letters form, as it were, a mountain of difficulty to be passed at the very beginning of the journey; and the learner cannot be convinced that, when once surmounted, the ground beyond may be more smooth than in other languages, the ingress to which is comparatively easy. My aim has been to facilitate the comprehension of these rules, not by omission or abbreviation, but by a perspicuous method of arrangement, and by the exhibition of every Sanskrit word with its equivalent English letters. The student must understand that there are two distinct classes of rules of Sandhi, viz. those which affect the final or initial letters of complete words in a sentence, and those which relate to the euphonic junction of roots or crude bases with affixes and terminations. Many of the latter class come first into operation in the conjugation of the more difficult verbs. In order, therefore, that the student may not be embarrassed with these rules, until they are required, the consideration of them is reserved to the middle of the volume. (See p. 124.)

As to the chapter on Sanskrit roots and the formation of nominal bases, the place which it occupies before the chapter on declension, although unusual, scarcely calls for explanation; depending as it does on the theory that nouns as well as verbs are derived from roots, and that the formation of a nominal base must precede the declension of a noun, just as the formation of a verbal base must be anterior to the conjugation of a verb. Consistency and clearness of arrangement certainly require that an enume-

ration of the affixes by which the bases of nouns are formed should precede their inflection. The early student, however, may satisfy himself by a cursory observation of the eight classes under which these affixes are distributed. Some of the most uncommon, which are only applicable to single words, have been omitted. Moreover, in accordance with the practical character of the present Grammar, the servile and indicatory letters of Indian grammarians, under which the true affix is often concealed, if not altogether lost, have been discarded. For example, the adjective dhana-vat, 'rich,' is considered in the following pages to be formed by the affix vat, and not, as in native Grammars, by matup; and the substantive bhoj-ana, 'food,' is considered to be formed with the affix ana, and not, as in native Grammars, by lynt.

In my explanation of the inflection of the base of both nouns and verbs, I have, as before, treated both declension and conjugation as a process of Sandhi; that is to say, junction of the crude base, as previously formed from the root, with the terminations. But in the present Grammar I have thought it expedient to lay more stress on the general scheme of terminations propounded by native grammarians; and in the application of this scheme to the base, I have referred more systematically to the rules of euphonic combination, as essential to a sound acquaintance with the principles of nominal and verbal inflection. On the other hand, I have in the present work deviated from the Indian system by retaining πs as a final in the declension of nouns and conjugation of verbs, for the practical reason of its being more tangible and easy to apprehend than the symbol Visarga or h, which is imperceptible in pronunciation. (See the observations under changes of final s, pp. 32, 33.) Even in native Grammars those terminations, the finals of which are afterwards changed to Visarga, are always regarded as originally ending in πs ;

and the subsequent resolution of s into h, when the termination is connected with the base, is a source of confusion and uncertainty. Thus s is said to be the termination of the nominative case; but the nominative of $\Re \widehat{r}_1$ agai, 'fire,' would according to the Indian system be written $\Re \widehat{r}_1$: agaih, which is scarcely distinguishable in pronunciation from the base agai. In the following pages, therefore, the nominative is given agais; and the liability of agais to become agaih and agair is explained under the head of changes of final s (at p. 33). This plan (which is that of Professor Bopp) has also the advantage of exhibiting the resemblance between the system of inflection in Sanskrit and Latin and Greek.

The difficulty experienced in comprehending the subject of Sanskrit conjugation has led me to give abundant examples of verbs conjugated at full. I have of course deviated from the Indian plan of placing the third person first. have, moreover, deemed it advisable to exhibit the English equivalents of Sanskrit words in the principal examples under each declension and conjugation, knowing by experience the thankfulness with which this aid is received by early students, not thoroughly familiar with the Devanágarí character. The numerous examples of verbs, primitive and derivative, will be found to include all the most useful in the language. In previous Grammars it has been usual to follow the native method of giving only the 3d pers. sing. of each tense, with an occasional indication of any peculiarities in the other persons. The present Grammar, on the other hand, exhibits the more difficult tenses of every verb in full, referring at the same time for the explanation of every peculiar formation to the rule, in the preceding pages, on which it depends. This is especially true of the 2d and 3d preterites, as these constitute the chief difficulty of the Sanskrit verb; and I have constantly found that even advanced students, if required to write out these tenses, will be guilty of inaccuracies, notwithstanding one or two of the persons may have been given for their guidance.

In the chapter on compound words I have again endeavoured, without ignoring the Indian arrangement, to disembarrass it of many elements of perplexity, and to treat the whole subject in a manner more in unison with European ideas. The explanations I have given rest on actual examples selected by myself from the Hitopadeśa and other standard works in ordinary use. Indeed this chapter and that on syntax constitute perhaps the most original part of the present volume. In composing the syntax, the literature as it exists has been my only guide. All the examples are taken from classical authors, so as to serve the purpose of an easy delectus, in which the learner may exercise himself before passing to continuous translation. The deficiency of native Grammars on this important subject is only to be accounted for on the supposition that their aim was to furnish an elaborate analysis of the philosophical structure of the language, rather than a practical guide to the study of the literature.

The exercises in translation and parsing, in the last chapter of this volume, will, it is hoped, facilitate the early student's first effort at translation. Two fables from the Hitopadeśa are given, as before, with a translation and grammatical analysis; but I have thought fit to omit the story of Vedagarbha and the selections from Manu, which I appended to my first Grammar. The Sanskrit of the former is too modern and interspersed with Bengálí idioms, while that of the latter is too advanced. I have therefore substituted for the one some easy sentences selected from classical sources; and for the other, a few simple fables from the Pańcha-tantra, the book from which a great part of the Hitopadeśa itself is drawn. Every word in these selections is explained either by notes at the foot of the page or by references to the preceding pages of the Grammar.

The separation of words by the free use of the Viráma, and the employment of a dot underneath to mark the division, whenever the blending of vowels or the association of crude bases in a compound make junction unavoidable, may offend the eve of the Oriental scholar, if habituated to the Indian system of writing; but the beginner can scarcely be expected to know which is the final and which the initial letter of words thus joined together. Why, therefore, refuse him a clue to guide him in his search for the word in the dictionary? and why, by uniting those parts of a sentence which admit of separation, superadd an unnecessary source of perplexity to the necessary difficulty, unknown in other languages, resulting from the blending of vowels and the composition of words? It may be quite true that, according to native authorities, the Viráma ought only to be employed when no Sandhi takes place; and that, according to the strict interpretation of the word Sandhi, actual contact ought to ensue whenever a law of euphony comes into operation. But does euphonic connexion necessarily imply contact? and may not words be mutually affected by euphonic laws, without being actually joined together?

The system of uniting words which are really distinct may commend itself to the natives of Hindústán, as tending to reduce the labour of writing; but in Europe, where abundant punctuation is deemed essential to facilitate reading, the absence of spaces must always be regarded as productive of unnecessary hindrance. The student has already sufficient obstacles to surmount in the Deva-nágarí character and the rules for the permutation of letters. The changes required by these rules will cause no embarrassment, provided separation be permitted, in accordance with the European method. Thus the Latin scholar, if acquainted with the laws of permutation, would not be embarrassed by the sentence *Uhy ad Dianæ renerir itav at sinistram*

(euphonically changed from ubi ad Dianæ veneris ito ad sinistram); but he would, to say the least, be unnecessarily hindered if this permuted sentence were linked together into two words, thus — Ubyaddianæ veneriritavatsinistram. Nor is it easy to understand why the slight spaces between the words in the first case should be deemed incompatible with the operation of euphonic laws. If such separation, therefore, is only to be effected in Sanskrit by extending the legitimate functions of the Viráma, the facilities afforded by modern typography ought to leave us free to do so. The only cases in which it is undesirable to separate distinct words, acted on by Sandhi, are when two vowels blend into one, and when final u and i are changed into their corresponding semivowels v and y.

In regard to the general scope of the book, it remains to state that my aim has been to minister to the wants of the earliest as well as the more advanced student. I have therefore employed types of two different sizes. The larger attracts the eye to those parts of the subject to which the attention of the beginner may advantageously be confined. The smaller generally contains such matter as offers no claim to immediate consideration.

Under the conviction that the study of Sanskrit ought to possess charms for the classical scholar, independently of its wonderful literature, I have taken pains to introduce in small type the most striking comparisons between this language and Latin and Greek. I am bound to acknowledge that I have drawn nearly all the materials for this important addition to the book from the English translation of Bopp's Comparative Grammar, by my friend and colleague Professor Eastwick.

One point more remains to be noticed. The want of an Index was felt to be a serious defect in my first Grammar. This omission is now supplied. Two full Indices have been appended to the present work, the one English, and the

other Sanskrit. The latter will enable the student to turn at once to any noun, verb, affix, idiom or peculiar formation explained in the foregoing pages.

In conclusion, I desire to take this opportunity of expressing to the Delegates of the Oxford University Press my grateful and respectful sense of the advantages the volume derives from their favour and patronage*.

M. W.

EAST-INDIA COLLEGE, HAILEYBURY, January 1857.

* Not the least of these advantages has been the use of a press which, in its appointments and general efficiency, stands unrivalled. The judgment and accuracy with which the most intricate parts of my MS, have been printed, have excited a thankfulness in my mind, which those only can understand who know the toil of correcting the press, when much Oriental type is interspersed with the Roman, and when a multitude of minute diacritical points, dots, and accents have to be employed to represent the Deva-nágarí letters. If many errors are discovered in the following pages, they must be laid at my own door; and I have nothing to urge in palliation, excepting that I have spared no pains to avoid inaccuracies, and that the work of one man, however careful and laborious, cannot be expected to be free from the imperfection incidental to all human performances.

INTRODUCTORY REMARKS.

SANSKRIT is the classical and learned language of the Hindús, in which all their literature is written, and which bears the same relation to their vernacular dialects that Greek and Latin bear to the spoken dialects of Europe. It is one of the family called by modern philologists Arian* or Indo-European; that is to say, it is derived, in common with the languages of Europe, from that primeval but extinct type, once spoken by a tribe in Central Asia, partly pastoral, partly agricultural, who afterwards separated into distinct nationalities, migrating first southwards into Aryávarta or Upper India—the vast territory between the Himálaya and Vindhya mountains—and then northwards and westwards into Europe.

In all probability Sanskrit approaches more nearly to this primitive type than any of its sister-tongues; but, however this may be, comparative philology has proved beyond a doubt its community with Greek, Latin, Gothic, Lithuanian, Slavonic, Keltic†, and through some of these with Italian, French, Spanish, Portuguese, German, and our own mother-tongue.

The word Sanskrit (मंस्कृत sanskrita) is made up of the preposition sam (मं = σvv , con), 'together,' and the passive participle krita (कृत = factus), 'made,' an euphonic s being inserted (see 53. a. and b. a. of the following Grammar). The compound means 'earefully constructed,' 'symmetrically formed' (confectus, constructus). In this

^{*} More properly written Aryan, from the Sanskrit আর্ঘ árya, 'noble,' 'venerable,' 'respectable,' the name assumed by the race who immigrated into Northern India, thence called Áryávarta, 'the abode of the Aryans.'

[†] Zand and old Persian might be added to the list, although the reality of Zand as any thing more than the vehicle of the sacred writings called Zand-Avastá (affirmed by the Parsí priests of Persia and India to be the composition of their prophet Zoroaster) has been disputed. Comparative philologists also add Armenian.

sense it is opposed to Prákrit (цтал prákrita), 'common,' 'natural,' the name given to the vulgar dialects which gradually arose out of it, and from which most of the languages now spoken in Upper India are more or less directly derived. It is probable that Sanskrit, although a real language-once the living tongue of the Aryan or dominant races, and still the learned language of India, preserved in all its purity through the medium of an immense literature-was never spoken in its most perfect and systematized form by the mass of the people. For we may reasonably conjecture, that if the language of Addison differed from the vulgar and provincial English of his own day, and if the Latin of Cicero differed from the spoken dialect of the Roman plebeian, much more must the most polished and artificial of all languages have suffered corruption when it became the common speech of a vast community, whose separation from the educated classes was far more marked. To make this hypothesis clearer, it may be well to remind the reader, that, before the arrival of the Sanskrit-speaking immigrants, India was inhabited by a rude people, called 'barbarians' or 'outcastes' (Mlechchhas, Nishádas, Dasyus, &c.) by Sanskrit writers, but probably the descendants of various Scythian hordes who, at a remote period, entered India by way of Bilúchistán* and the Indus. The more powerful and civilised of these aboriginal tribes appear to have retired before the Aryans into Southern India, and there to have retained their independence, and with their independence the individuality and essential structure of their vernacular dialects. But in Upper India the case There, as the Aryan race increased in numbers and was different. importance, their full and powerful language forced itself on the aborigines. The weak and scanty dialect of the latter could no more withstand a conflict with the vigorous Sanskrit, than a puny dwarf the aggression of a giant. Hence the aboriginal tongue gradually wasted away, until its identity became merged in the language of the Aryans; leaving, however, a faint and skeleton-like impress of itself on the purer Sanskrit of the educated classes, and disintegrating it into Prákrit, to serve the purposes of ordinary speech †.

^{*} The Brahuí, a dialect of Bilúchistán, still preserves its Scythian character.

[†] The cerebral letters in Sanskrit, and words containing cerebral letters, are probably the result of the contact of Sanskrit with the language of the Scythian

Prákṛit, then, was merely the natural process of change and corruption which the refined Sanskṛit underwent in adapting itself to the exigencies of a spoken dialect*. It was, in fact, the provincial Sanskṛit of the mass of the community; whilst Sanskṛit, properly so called, became, as it is to this day, the language of the Bráhmaṇs and the accomplishment of the learned †.

This provincial Sanskrit assumed of course different modifications, according to the circumstances of the district in which the corruption took place; and the various modifications of Prákrit are the intermediate links which connect Sanskrit with the dialects at present spoken by the natives of Hindústán.

They have been analyzed and assorted by Vararuchi, the ancient grammarian, who was to Prákrit what Páṇini was to Sanskrit grammar. The most noticeable varieties were the Mágadhí, spoken in Magadha or Bihár; the Maháráshtrí, spoken in a district stretching from Central to Western India; and the Śaurasení, spoken on the banks of the Jamná, in the neighbourhood of the ancient Mathurá‡. These patois modifications of Sanskrit are employed as the language of the inferior characters in all the Hindú dramas which have come

tribes: and a non-Sanskrit, or, as it may be called, a Scythian element, may be traced with the greatest clearness in the modern dialects of Hindústán. In all of these dialects there is a substratum of words, foreign to Sanskrit, which can only be referred to the aboriginal stock. See the last note at the bottom of p. xxii.

- * It would be interesting to trace the gradual transition of Sanskrit into Prákrit. In a book called the Lalita-vistara, the life and adventures of Buddha are narrated in pure Sanskrit. It is probably of no great antiquity, as the Buddhists themselves deny the existence of written authorities for 400 years after Buddha's death (about B. C. 543). But subjoined to the Sanskrit version are gáthás or songs, which repeat the story in a kind of mixed dialect, half Sanskrit, half Prákrit. They were probably rude ballads, which, though not written, were current among the people soon after Buddha's death. They contain Vaidik as well as more modern formations, interspersed with Prákrit corruptions (ex. gr. अग्राहि for अग्रु, which is Vaidik; and धरेनि for धारधिन, which is Prákrit), proving that the language was then in a transition state.
- † The best proof of this is, that in the Hindú dramas all the higher characters speak Sanskrit, whilst the inferior speak various forms of Prákrit. It is idle to suppose that Sanskrit would have been employed at all in dramatic composition, had it not been the spoken language of a section of the community.
 - [†] Arrian (ch. VIII) describes the Suraseni as inhabiting the city of Methoras.

down to us, some of which date as far back as the 2d century B. C., and the first of them is identical with $P\acute{a}li$, the sacred language of the Ceylon Buddhists*. Out of them arose Hindi (termed $Hindist\acute{a}n\acute{a}$ or $Urd\acute{a}$, when mixed with Persian and Arabic words), $Mar\acute{a}t\acute{h}i$, and $Gujar\acute{a}t\acute{h}i$, the modern dialects spread widely over the country. To these may be added, $Beng\acute{a}li$, the language of Bengal, which bears a closer resemblance to its parent, Sanskrit, than either of the three enumerated above; Uriya, the dialect of Orissa, in the province of Cuttack; $Sindh\acute{i}i$, that of Sindh; $Paij\acute{a}b\acute{i}i$, of the Paij\acute{a}b; $K\acute{a}s\acute{m}irian$, of $K\acute{a}s\acute{m}ir$; and $Nip\acute{a}lese$, of $Nip\acute{a}l\uparrow$.

The four languages of Southern India, viz. 1. Tamil ‡, 2. Telugu (the Andhra of Sanskrit writers) §, 3. Kanarese (also called Kannadi or Karnátaka), and 4. Malayálam (Malabar) ||, although drawing largely from Sanskrit for their literature, their scientific terms, their religion, their laws, and their social institutions, are proved to be distinct in their structure, and are referred, as might have been expected from the previous account of the aborigines, to the Scythian, or, as it is sometimes termed, the Tatar or Turanian type ¶.

^{*} Páli, which is identical with the Mágadhí Prákrit, is the language in which the sacred books of the Buddhists of Ceylon are written. Buddhist missionaries from Magadha carried their religion, and ultimately (after the decay of Buddhism in India) their language, into that island. Páli (meaning in Singhalese 'ancient') is the name which the priests of Ceylon gave to the language of the old country, whence they received their religion.

[†] For an account of some of these dialects, see Prof. H. H. Wilson's very instructive Preface to his 'Glossary of Indian Terms.'

[†] Often incorrectly written Tamul, and by earlier Europeans erroneously termed
Malabar. The cerebral l at the end has rather the sound of rl.

[§] Sometimes called Gentoo by the Europeans of the last generation.

[∥] A fifth language is enumerated, viz. Tulu or Tuluva, which holds a middle position between Kanarese and Malayálam, but more nearly resembles the former. It is spoken by only 150,000 people. Added to this, there are four rude and uncultivated dialects spoken in various parts of Southern India, viz. the Tuda, Kôta, Gônd, and Ku or Khond; all of which are affiliated with the Southern group.

[¶] This is nevertheless consistent with the theory of a remote original affinity between these languages and Sanskrit and the other members of the Indo-European family. The various branches of the Scythian stock, which spread themselves in all directions westward, northward, and southward, must have radiated from a common centre with the Aryans, although the divergence of the latter took place at a much

Sanskrit is written in various Indian characters, but the character which is peculiarly its own is the Nágarí or Deva-nágarí, i. e. that of 'the divine, royal, or capital city.' The earliest form of this character cannot be traced back to a period anterior to the 3d century B. c.*; and the more modern, which is the most perfect, comprehensive, and philosophical of all known alphabets, is not traceable for several centuries after Christ. The first is the corrupt character of the various inscriptions which have been discovered on pillars and rocks throughout India, written in Mágadhí Prákrit, spoken at the time of Alexander's invasion over a great part of Hindústán. These inscriptions are ascertained to be addresses from the Buddhist sovereigns of Magadha to the people, enjoining the practice of social virtues and reverence for the priests. They are mostly in the name of Piya-dasi† (for Sanskrit Priya-darsí), supposed to be an epithet of Asoka, who is known to have reigned at some period between the 2d and the 3d century B.C. by his being the grandson of Chandra-gupta, probably identical with Sandrakottus, described by Strabo as the most powerful Rájá, immediately succeeding Alexander's death. He was one of the kings of Magadha (Bihár), whose court was at Pálibothra or Pátali-putra (Patna), and who claimed the title of Samráts or universal monarchs; not without reason, as their addresses are found in these inscriptions at Delhi, and at Kuttack in the south, and again as far west as Gujarát, and again as far north as the Panjáb. The imperfect form of Nágarí which the corrupt character exhibits is incompatible with Sanskrit orthography. It may therefore be conjectured that a more perfect alphabet existed, which bore

later period. It is to be observed, that in the South-Indian dialects the Scythian element constitutes the bulk of the language. It may be compared to the warp, and the Sanskrit admixture to the woof. In the Northern dialects the grammatical structure and many of the idioms and expressions are still Scythian, but the whole material and substance of the language is Sanskrit. See, on this subject, the able Introduction of the Rev. R. Caldwell to his 'Comparative Grammar of the Dravidian or South-Indian Languages,' lately published.

^{*} Mr. James Prinsep, whose table of modifications of the Sanskrit alphabet follows these Remarks, placed the earliest form, apparently on insufficient grounds, as far back as the 5th century B. C.

[†] The regular Prákrit form would be Pia-dassi. Probably the spoken Prákrit of that period approached nearer to Sanskrit than the Prákrit of the plays.

the same relation to the corrupt form that Sanskrit bore to Prákrit. Nor does it militate against this theory that the perfect character is not found in any ancient inscription, as it is well known that the Bráhmans, who alone spoke and understood the pure Sanskrit, and who alone would therefore need that character, never addressed the people, never proselytized, never sought political power, and never cared to emerge from the indolent apathy of a dignified retirement.

A table of the various modifications of the Deva-nágarí alphabet, both ancient and modern, from the date of the earliest inscriptions to the present time, follows this page. The perfection of the modern character, and the admirable manner in which it adapts itself to the elaborate and symmetrical structure of the Sanskrit language, will be apparent from the first chapter.

SANSKRIT GRAMMAR.

CHAPTER I.

LETTERS.

1. THE Deva-nágarí character, in which the Sanskrit language is written, is adapted to the expression of almost every known gradation of sound; and every letter has a fixed and invariable pronunciation.

There are fourteen vowels and thirty-three simple consonants. To these may be added the nasal symbol, called *Anuswára*, and the symbol for a final aspirate, called *Visarya* (see No. 6). They are here exhibited in the dictionary order *. All the vowels, excepting a, have two forms; the first is the initial, the second the medial or non-initial.

VOWELS.

अ a, आ। \acute{a} , इि, दी \acute{t} , उुu, ऊू \acute{u} , ऋ $_{\it e}$ $\it ri$, छ $_{\it e}$ $\it ri$, $\it ri$,

Nasal symbol, \cdot n or m. Symbol for the final aspirate, \cdot h.

CONSONANTS.

The compound or conjunct consonants (see No. 5) may be multiplied to the extent of four or five hundred. The most common

^{*} The character to is not given, as being peculiar to the Vedas. See 16. a.

2 LETTERS.

are given here; a fuller list will be found at the end of the volume; and some varieties in a different type are exhibited at the end of the Table of Modifications, opposite to page 1.

THE MORE COMMON OF THE COMPOUND OR CONJUNCT CONSONANTS.

OF THE METHOD OF WRITING THE VOWELS.

Observe—In reading the following pages for the first time, it is recommended that the attention be confined to the large type.

- 2. The short vowel अ a is never written unless it begin a word, because it is supposed to be inherent in every consonant. Thus, ak is written अक, but ka is written क; so that in such words as कनक kanaka, नगर nagara, &c., no vowel has to be written. The mark \ under the k of अक, called Viráma (see No. 9), indicates a consonantal stop, that is, the absence of any vowel, inherent or otherwise, after the consonant.
- a. The other vowels, if written after a consonant, take the place of the inherent a. They assume two forms, according as they are initial or not initial. Thus, ik is written x, but ki is written x.
- b. Observe here, that the short vowel i, when not initial, is always written before the letter after which it is pronounced. Hence, in writing the English word sir, the letters in Sanskrit would be arranged thus, isr fax.
- c. The only assignable reason for this peculiarity is, that the top of the non-initial $\hat{t}i$, if written in its right place, might occasionally interfere with a subsequent

LETTERS.

Actter, especially with the letter r, as the first member of a conjunct consonant. This will be evident to any one who tries in writing the word kirk in Sanskrit to retain the i in its proper place.

- a. The vowels pi, pi, lpi and lpi are peculiar to Sanskrit. See No.11.c. ত lpi occurs in only one word, viz. জুত্ 'to make.' The long ত lpi is not found in any word in the language, and is useless excepting as contributing to the completeness of the alphabet.
- b. The vowels e and ai, not initial, are written above the consonants after which they are pronounced; thus, $\frac{1}{3}$, ke, $\frac{1}{3}$, kai. The vowels o and au (which are formed by placing and over $\frac{1}{4}$), like $\frac{1}{4}$, take their proper place after their consonants; thus, $\frac{1}{3}$, ko, $\frac{1}{3}$, kau.

OF THE METHOD OF WRITING THE CONSONANTS.

4. The consonants have only one form, whether initial or not initial. And here note this peculiarity in the form of the Devanágarí letters. In every consonant, excepting those of the cerebral class, and in some of the initial vowels, there is a perpendicular stroke; and in all the consonants without exception, as well as in all the initial vowels, there is a horizontal line at the top of the letter. In two of the letters, **y** dh and **y** bh, this horizontal line is broken; and in writing rapidly, the student should form the perpendicular line first, then the other parts of the letter, and lastly the horizontal line. The natives, however, sometimes form the horizontal line first.

OF THE COMPOUND CONSONANTS.

5. Every consonant is supposed to have the vowel $\ \pi$ a inherent in it, so that it is never necessary to write this vowel, excepting at the beginning of a word. Hence when any simple consonants stand alone in any word, the short vowel $\ \pi$ a must always be pronounced after them; but when they appear in conjunction with any other vowel, this other vowel of course takes the place of short $\ \pi$ a. Thus such a word as $\ \pi$ $\$

4 LETTERS.

be pronounced klántyá, how are we to know that kl and nty have to be uttered without the intervention of any vowel? This occasions the necessity for compound consonants. Kl and nty must then be combined together; thus, क्र, न्य, and the word is written क्रान्या. And here we have illustrated the two methods of compounding consonants; viz. 1st, by writing them one above the other; 2dly, by placing them side by side, omitting in all, except the last, the perpendicular line which lies to the right. Observe, however, that some letters change their form entirely when combined with other consonants. Thus \(\tau\), when it is the first letter of a compound consonant, is written above the compound in the form of a semicircle, as in the word कर्म kúrma; and when the last, is written below in the form of a small stroke, as in the word क्रमेश kramena. So again in स * ksha and ज † jia the simple elements क प and ज म are hardly traceable. In some compounds the simple letters slightly change their form; as, जा śa becomes ज in द्य ścha; द d with प y becomes द्य dya; द d with भ dh becomes इ ddha; ह d with भ bh becomes इ dbha; त t with र r becomes $\exists tra$ or $\exists tra$; क k with $\exists t$ becomes $\exists kta$. Most of the other compound consonants are readily resolvable into their component parts. The student should direct his first attention to the compound consonants given in the list opposite to page 1. should afterwards study the list at the end of the book.

Observe—Two aspirated letters never occur in the same compound. When an aspirated letter has to be doubled, the first is expressed by the unaspirated letter of the same species.

OF THE SYMBOLS AND MARKS.

6. The Sanskrit alphabet possesses certain symbols and indicatory marks. Of these the most useful are the nasal symbol Anuswára and the symbol for a final aspirate called Visarga.

Anuswára, 'after-sound,' (called so because it is always the final or closing nasal sound of a syllable, and can never be used like a consonant or any nasal letter to begin a syllable,) is denoted by a dot placed over the horizontal line of a letter. It is a weaker and

^{*} Sometimes formed thus হা, and pronounced ky in Bengálí. In Greek and Latin it always passes into ξ and x. Compare द्वाराण, dexter, $\delta\epsilon\xi\iota\delta\varsigma$.

[†] This compound is sometimes pronounced gya or nya, though it will be more convenient to represent it by its proper equivalent ina.

thicker nasal than the five consonantal nasals. Although it is properly the nasal of the semivowels, sibilants, and h, and is then expressible by the English n, yet it is ordinarily used as a short substitute for any of the five nasals, ङ n, ज \dot{n} , ख \dot{n} , न n, and म m, when no vowel intervenes between these letters and a following consonant. Thus the five English words ink, inch, intrust, ant, imp, which illustrate the five nasal sounds, might either be written इङ्ग, इञ्च, इग्रहस्त, ञ्चान्त, इम्प, or with Anuswara इंक, इंच, इंट्रस्त, ञ्चांत, इंप्. It is most conveniently used as a substitute for the π m which is the original final of accusative cases singular, nominative cases neuter, and some indeclinable words *; (thus एनं enam, 'him,' for एनम्; दानं dánam, 'a gift,' for दान्म; सं sam, ' with,' for सम; इदानीं idáním, ' now;') passing, however, again into म m when followed by a vowel; (as, दानम মামীনৈ dánam ápnoti, 'he receives a gift;') and passing optionally into इ, न, ए, न or न when followed by consonants of the guttural, palatal, cerebral, dental, and labial classes respectively; (as, दानं ददाति or दानन ददाति 'he gives a gift,' संडीन or सग्डीन 'flight.') Hence it appears, that as the final of a complete word it may generally be represented by the English m.

- a. It is never admitted as a substitute for a final $\overline{\P}$ n when originally the final of a word, (as in accusative cases plural, in the locative cases of pronominals, in the 3d pers. plur. and present participles of verbs,) unless the next word begin with t or ch, when by the laws of euphony a sibilant is interposed before the initial t or ch. See 53 and 54.
- b. It must never be forgotten that it is peculiarly the nasal of the aspirate ह h, the semivowels य y, र r, ल l, य v, and the three sibilants श s, य sh, स s; and it must always take the place of any other nasal that has to precede these letters in the same word †. Thus the preposition सम sam and the participle म्मृत smrita, when united in one word, are written संस्मृत; सम् sam and हार hára, संहार; सम् sam and राम rága, संराम; but in each of these cases the Anuswara takes the sound of the nasal of the class to which the following letter belongs. Thus संस्मृत is sounded as if written सन् स्मृत; संहार as if written सङ्हार; संलाप as if written मन् लाप. In these cases Anuswara not being the final of a complete word will be most conveniently transliterated by the English n.
 - 7. Another nasal symbol called Chandra-rindu (lunar mark) or Anunásika, written

^{*} Prof. Bopp objects to this practice; but by Panini (VIII. 3, 23) a final \P m is convertible to Anuswara before *any* consonant. See Bopp's Comparative Grammar, Eastwick's translation, p. 7, note.

[†] ममान, 'an universal monarch,' is the only word that violates this rule. The word मम्यन, 'just,' is compounded of मिन and अन्.

over a letter thus $\stackrel{\ \ }{=}$, is sometimes employed. It is rather the sign of the nasality of the letter over which it is written, than the representative of any actual nasal sound. Thus in the rules of combination, when final $\exists n$ assimilates with $\overline{\otimes} l$, the mark $\stackrel{\ \ \ }{=}$ placed over l, though not pronounced, indicates the nasal origin of the $\overline{\otimes}$. It is a kind of silent Anuswára.

8. The symbol Visarga, 'rejection,' (called so because often rejected,) usually written thus:, but more properly in the form of two small circles o, is used to represent a weaker aspiration than the letter ϵh , and that at the end of a word. It expresses an euphonic transition of final πs and τr into a kind of imperceptible breathing. But this symbol, although never the representative of ϵh , but rather of a weak and almost imperceptible final aspirate, which, under certain circumstances, takes the place of final s and r, may nevertheless be conveniently transliterated by the English h at the end of a word, and that without danger of being confounded with E, which can never occur as a final letter. At the same time it should be borne in mind that Visarga is less than h, and is in fact no consonant, but only a symbol for s and r whenever the usual consonantal sound of these letters is deadened at the end of a sentence or through the influence of a k, p or s commencing the next word. Observe, however, that all those inflections of nouns and persons of verbs, which as standing separate from other words are by some made to end in Visarga, may most conveniently be allowed to retain their final स s; only bearing in mind that this s is liable at the end of a sentence, or when followed by certain consonants, to pass into an imperceptible breathing, as in the French les or the English isle, viscount; in all which cases it might be expressed by Visarga, thus के: &c. So again, in French infinitives, such as aller, the final r is silent; and in many English words, such as bar, tar, the sound of r is very indistinct; and these also might be written in Sanskrit with Visarga, अल्ले:, बा: &c.

a. An Ardha-risarga, 'half-visarga,' or modification of the symbol Visarga, in the form of two semicircles \varkappa , is sometimes employed before k, kh and p, ph. Before the two former letters this symbol is properly called $Jihv\acute{a}-m\acute{u}l\acute{v}ja$, and the organ of its enunciation said to be the root of the tongue. Before p and ph its proper name is $Upadhm\acute{u}n\acute{v}ja$, and its organ of utterance is then the lips.

The following are other marks:

9. The Viráma or 'stop,' placed under a consonant (thus a k),

indicates the absence of the inherent ∇a , by help of which the consonant is pronounced.

- 10. The mark s, sometimes called Ardhákára, 'half the letter a,' placed between two words, denotes the elision of an initial ञ a after ए e or जो o final preceding. It corresponds to our apostrophe. Thus, तेडिए te'pi for ते जिए te api.
- a. The half pause ι is a stop or mark of punctuation, usually placed at the end of the first line of a couplet or stanza.
- b. The whole pause $\mathbb N$ is placed at the end of a couplet, and corresponds to a full stop.
 - c. The mark of repetition o indicates that a word or sentence has to be repeated.

PRONUNCIATION OF SANSKRIT VOWELS AS COMPARED WITH THOSE OF OTHER LANGUAGES.

- 11. The vowels in Sanskrit are pronounced for the most part as in Italian or French, though occasional words in English may exemplify their sound.
- a. Since \mathbf{w} is inherent in every consonant, the student should be careful to acquire the correct pronunciation of this letter. There are many words in English which afford examples of its sound, such as vocal, cedar, zebra, organ. But in English the vowel u in such words as fun, bun, sun, frequently represents this obscure sound of a; and even the other vowels may occasionally be pronounced with this sound, as in her, sir, son.
- b. The long vowel $\exists i \in I$ is pronounced as u in the English last, bard, cart; ξ i as the i in pin, sin; ξ i as the i in marine; \exists u as the u in push; \exists i as the u in rude.

^{*} There does not, however, seem to be much difference practically between the pronunciation of the vowel i and the syllable $\hat{\tau}$ i, though grammarians assert that the i of the vowel is less distinctly counciated.

8 Letters.

कुष् klrip, 'to make;' and its long form is not found in any word in the language. As to the Vaidik 🏂 Ira, see 16. a.

- d. Hence it appears that every simple vowel in Sanskrit has a short and a long form, and that each vowel has one invariable sound; so that the beginner can never be in doubt what pronunciation to give it, as in English, or whether to pronounce it long or short, as in Latin.
- e. Note, however, that Sanskrit possesses no short \check{e} and \check{o} in opposition to the long diphthongal sounds of e and o.
- f. In comparing Sanskrit words with Greek and Latin, it will be found that the Sanskrit \mathbf{N} a usually answers to the Greek \mathfrak{o} ; sometimes to \mathfrak{e} (especially in vocative cases); and rarely to α . In Latin, the Sanskrit \mathbf{N} a is represented by a as well as by a, e, and a. Again, the Sanskrit \mathbf{N} a is generally replaced by the Greek η or α , rarely by a long alpha. In Latin it is represented by long a or even by long a. See Bopp's Comparative Grammar, Eastwick's translation, a, a, &c.
- g. Although for all practical purposes it is sufficient to regard vowels as either short or long, it should be borne in mind that native grammarians give eighteen different modifications of each of the vowels a, i, u, ri, and twelve of lri, which are thus explained:—Each of the first four vowels is supposed to have three prosodial lengths, a short (hrasra), a long (dirgha), and a prolated (pluta): the long being equal to two, and the prolated to three short vowels. Each of these three modifications may be uttered with a high tone, or a low tone, or a tone between high and low; or in other words, may have the acute, or the grave, or the circumflex accent. This gives nine modifications to a, i, u, ri; and each of these again may be regarded either as nasal or non-nasal, according as it is pronounced with the nose and mouth, or with the mouth alone. Hence result eighteen varieties of every vowel, excepting l_Ti , e, ai, o, au, which have only twelve, because the first does not possess the long and the last four have not the short prosodial time.

PRONUNCIATION OF SANSKRIT CONSONANTS AS COMPARED WITH THOSE OF OTHER LANGUAGES.

In the first arrangement of the alphabet most of the consonants are distributed under the five heads of gutturals, palatals, cerebrals, dentals, and labials, according to the organ principally employed in pronouncing them, whether the throat, the palate, the top of the palate, the teeth, or the lips. This classification of letters is more fully explained at No. 18.

12. $a_1 ka_1 \pi ya_1 = cha_1 \pi ja_1 \pi ta_1 \xi da_1 \pi pa_1 = ba$. These consonants are pronounced as in English, but π has always the sound of g in gun, give, never of g in gin. Observe; π cha is a simple consonantal sound, and not an aspirate: it is pronounced as ch in

church, and is a modification or softening of ka, just as ja is of ga, the organ of utterance being in the palate, a little in advance of the throat. Hence, in Sanskrit and its cognate languages, the palatals ch and j are often exchanged with the gutturals k and g. See note, p. 13.

Observe, that ξ d often passes into θ in Greek.

- a. The Sanskrit $\forall th$ generally becomes τ in Greek, and $\forall dh$ becomes θ , while $\overline{\otimes} chh$ generally passes into $\sigma \kappa$. Again, Sanskrit $\forall bh$ generally passes into ϕ and f, or sometimes in Latin into b.
- b. With a view to the comparison of Sanskrit words with Greek and Latin, it is important to remember that the aspirates of the different classes are easily interchangeable in different languages; thus dh and bh in Sanskrit may become f (or ph) in Latin; gh in Sanskrit may become θ in Greek &c.
- 14. \overline{c} ta, \overline{c} tha, \overline{c} da, \overline{c} dha. The sound of these cerebral letters is in practice hardly to be distinguished from the sound of the corresponding dental consonants. Properly, however, the cerebrals should be uttered with a duller and deeper intonation, produced by turning back the tip of the tongue towards the palate, or top of the head (cerebrum). Thus a Hindú would distinguish the pronunciation of the t and d in the English words trust and drip from that of the same letters in the words tun and din. He would write the former with the cerebral t and d, \overline{c} , $\overline{$
- a. In Bengal the cerebral \mathbf{z} da and \mathbf{c} dha have nearly the sound of a dull r. Thus থিৱানে: vidálah, 'a cat,' is pronounced virálah. In all corruptions of Sanskrit (especially in Prákrit) the cerebral letters often take the place of dentals. In Sanskrit the cerebrals are rarely found at the beginning of words.
- 15. इ. ก.ล, พ.ก.ล, พ.ก.ล, พ.ก.ล, พ.ก.a. Each of the five classes of consonants in Sanskrit has its own nasal sound, represented by a separate nasal letter. In English and most other languages the same fivefold division of nasal sounds might be made, though we have only one nasal letter to express the guttural, palatal, cerebral.

and dental nasal sounds. The truth is, that in all languages the nasal letters take their sound from the organ employed in uttering the consonant that follows them. Thus in English it will be found that guttural, palatal, cerebral, dental, and labial nasals are followed by consonants of the same classes, as in ink, sing, inch, intrust, ant, imp. If such words existed in Sanskrit, the distinction of nasal sounds would be represented by distinct letters; thus, इक्, भिक्न, इस्ट्, आन्, इस्ट्. Compare 6.

- a. The guttural nasal \overline{s} is rarely found by itself at the end of a word in Sanskrit, never at the beginning. In the nominative cases সাহে, সমহ &c. it probably has the sound of ng in sing, where the sound of g is almost imperceptible. The palatal \overline{s} is only found in conjunction with palatal consonants, as in \overline{s} iich, \overline{s} iij, \overline{s} chii, and \overline{s} jii. This last may be pronounced like ng, or like gn in the French campagne. In Bengal, however, it always has the sound of gg: thus \overline{s} tis pronounced ragya. The cerebral nasal \overline{s} is found at the beginning of words and before vowels, as well as in conjunction with cerebral consonants. It is then pronounced, as the other cerebrals, by turning the tip of the tongue towards the palate. The dental and labial nasals \overline{s} in and \overline{s} in are pronounced with the same organs as the class of letters to which they belong. [See 21.]
- 16. ম ya, ম ra, ল la, ম va, are pronounced as in English. Their relationship to the vowels i, pi, lpi, u, respectively, should never be forgotten. See No. 22. a. When ম v is the last member of a conjunct consonant it is pronounced like w, as স্থায় dwara; but not after r, as মুর্ব sarva.
- a. The character ₹ hra is peculiar to the Vedas. It is a form of the semivowel ₹ h, and represents a liquid sound formed by curving back the tongue against the roof of the mouth.
- b. The semivowels are so soft and vowel-like in their nature that they readily flow into each other. Hence l and r are sometimes exchangeable.
- 17. $y_1 \le a$, $y_2 \le a$, $y_3 \le a$, $y_4 \le a$. Of these, $y_3 \le a$ is a palatal sibilant, and is pronounced as an aspirated s. $y_3 \le a$ is a cerebral, and is a more strongly aspirated sibilant, but its pronunciation is hardly to be distinguished from that of the palatal. The dental $y_3 \le a$ is pronounced as the common English s. The same three sibilants exist in English, though represented by one character, as in the words $y_3 \le a$ is pronounced as in English, and is guttural.
- a. The guttural origin of \mathbf{z} ha is proved by its passing into k at the end of Sanskrit words, and into χ . κ , and c, in Greek and Latin; as, हृद्य, $\kappa \alpha \rho \delta i \alpha$, cor.
- b. Note that য় śơ, although a palatal, might be called half a guttural. It is certainly guttural in its origin, as all the palatals are. This is well illustrated by

its constant transition into κ and c in Greek and Latin words. Compare অসু δάκρυ, অস্থ equus, স্থান্ κύων. It is moreover interchanged with ক k in Sanskrit words.

OF THE CLASSIFICATION OF LETTERS.

- 18. In the first arrangement of the alphabet all the consonants, excepting the semivowels, sibilants, and h, were distributed under the five heads of gutturals, palatals, cerebrals, dentals, and labials. We are now to show that all the forty-seven letters, vowels, semi-vowels, and consonants, may be referred to one or other of these five grand classes, according to the organ principally concerned in their pronunciation, whether the throat, the palate, the top of the palate, the teeth, or the lips.
- a. We are, moreover, to point out that all the letters may be regarded according to another principle of division, and may be all arranged under the head of either HARD or SOFT, according as the effort of utterance is attended with expansion (vivára), or contraction (samvára), of the throat.
- b. The following tables exhibit this twofold classification, the comprehension of which is of the utmost importance to the study of Sanskrit grammar.

	VOWE	LS AND	DIPHT	HONGS.		ARD ONANTS,	ING	SPOND- SOFT ONANTS.	NASALS	ASPIRATE AND SEMI- VOWELS.	SIBI- LANTS.
Gutturals	ম a	ञ्चा \acute{a}			क ka	ख kha	म ga	च gha	₹ n·a	ਵ ha	
Palatals	₹ <i>i</i>	ξí	ए e	è ai	च cha	छ chha	ज ja	क jha	ञ ѝа	य ya	ज śa
${\bf Cerebrals}$	₹ ri	च् र्?			z ta	ठ tha	ड da	ਫ dha	ग ग़व	T ra	प sha
Dentals	ल lṛi	æþrí			त ta	ष tha	द da	ਖ dha	न na	ਲ la	स <i>8a</i>
Labials	∃ <i>u</i>	ज ú	ञो0	ऋौ वय	प pa	फ pha	ब ba	ਮ bha	म ma	च ra	

The first two consonants in each of the above five classes and the sibilants are hard; all the other letters are soft, as in the following table:

HARD	OR SURD	LETTERS.				sor	r or so	NANT LE	TTERS.		
Gutturals,	क ka*	ख kha*		ख a	ञ्जा \acute{a}			ग <i>ya</i> *	घ gha*	इ ∙ <i>n</i> − <i>a</i>	ह hu
Palatals,	च <i>cha</i> *	ਤ chha*	ञ śa	इ i	ŝí	र 🕐	रे क्षां	ज ja^*	$exjhu^*$	ञ गेत	ष गुत
Cerebrals,	₹ !a*	₹ha*	प sha	$\mp i$	₹!i			ड da^*	ह dha*	स गृत	τra
Dentals,	त <i>ta</i> *	ष tha*	म <i>sa</i>	ॡ lṛi	æļrí			द da^*	ध dha*	न ॥॥	ल /व
Labials,	प <i>pa*</i>	फ pha∗		उ ₹	$\Im i$	জী০	$\overline{\mathbf{w}}$ ा u	<i>च ba</i> *	ਮ bha*	म ma	च va

I2 LETTERS.

- c. Observe, that although $\mathbf{v} \in \mathbf{v}$ ai, are more conveniently connected with the palatal class, and $\mathbf{v} = \mathbf{v} = \mathbf{v} = \mathbf{v}$, with the labial, these letters are really diphthongal, being made up of a+i, a+i, a+u, a+u, respectively. Their first element is therefore guttural.
- d. Note also, that it is most important to observe which hard letters have kindred soft letters, and *rice versa*. The kindred hard and soft are those in the same line marked with a star in the above table; thus g, gh, are the corresponding soft letters to k, kh; j, jh, to ch, chh, and so with the others.

In order that the foregoing classification may be clearly understood, it is necessary to remind the student of the proper meaning of the term vowel and consonant, and of the relationship which the pasals, semiyowels, and sibilants, hear to the other letters.

- 19. A vowel is defined to be a vocal emission of breath from the lungs, modified and modulated, but not interrupted by the play of one or other of five organs, viz. the throat, the palate, the tongue, the teeth, or the lips*.
- a. Hence \(\mathbb{g} \) $(a, \mathbb{g} \)$ i, $(a, \mathbb{g} \)$ i, $(a, \mathbb{g} \)$ is the guttural, palatal, labial, cerebral, and dental classes respectively, according to the organ principally concerned in their modulation. But $(a, \mathbb{g} \)$ e, $(a, \mathbb{g} \)$ and $(a, \mathbb{g} \)$ are diphthongal or compound vowels, as explained above at 18. $(a, \mathbb{g} \)$ so that $(a, \mathbb{g} \)$ and $(a, \mathbb{g} \)$ so that $(a, \mathbb{g} \)$ are half guttural, half labial.
 - b. The vowels are of course considered to be soft letters.
- 20. A consonant is not the modulation, but the actual stoppage, of the vocal stream of breath by one or other of the five organs, and cannot be enunciated excepting in conjunction with a vowel.
- a. All the consonants, therefore, are arranged under the five heads of gutturals, palatals, cerebrals, dentals, and labials, according to the organ concerned in *stopping* the vocal sound.
- b. Again, the first two consonants in each of the five classes, and the sibilants, are called *hard* or *surd*, because the vocal stream is

^{*} See Proposals for a Missionary Alphabet, by Prof. Max Müller.

[†] If the two vowels a and i are pronounced rapidly they naturally form the sound e pronounced as in *prey*, or as a and i in sail; and so with the other diphthongs. The sound of ai in aisle may readily be resolved into a and a, and the sound of au in au au au au au.

abruptly and completely interrupted, and no murmuring sound (aghosha) allowed to escape: while all the other letters are called soft or sonant, because the vocal sound is less suddenly and completely arrested, the effect of stopping it being attended with a low murmur (ghosha).

- c. Observe, that the palatal stop is only a modification of the guttural, the point of contact being moved a little more forward from the throat towards the palate*. The cerebral (múrdhanya) stop is a modification of the dental, the difference being, that whereas in the dental consonantal sound the tip of the tongue is brought into direct contact with the teeth; in the cerebral it is first curled back, so as to strike the dome of the palate, thus producing a more obtuse sound.
- d. The name cerebral is retained in deference to established usage. Perhaps a more significant translation of múrdhanya would be supernal. The head or brain is certainly not the organ of enunciation of any letter. Múrdhan here denotes the upper part of the palate. But the inaccuracy involved in the word cerebral hardly justifies the substitution of supernal.
- 21. A nasal or narisonant letter is a soft letter, in the utterance of which the vocal stream of breath incompletely arrested, as in all soft letters, is forced through the nose instead of the lips. As the soft letters are of five kinds, according to the organ which interrupts the vocal breathing, so the nasal letters are five, guttural, palatal, cerebral, dental, and labial. See 15.
- 22. The semivowels y, r, l, v (called antahstha because in the first arrangement of the alphabet they stand between the other consonants and the sibilants) are formed by a vocal breathing, which is only half interrupted, the several organs being only slightly touched by the tongue. They are, therefore, soft or sonant consonants, approaching nearly to the character of vowels; in fact, half vowels, half consonants.
- a. Each class of soft letters (excepting the guttural) has its own corresponding semivowel to which it is related. Thus the palatal soft letters \mathbf{z} i, $\mathbf{\dot{z}}$ i, \mathbf{v} e, $\mathbf{\dot{v}}$ ai, \mathbf{v} j, have \mathbf{v} y for their kindred semi-vowel. (Compare Sanskrit yuvan with Latin juvenis &c.) Similarly

^{*} The relationship of the palatal to the guttural letters is proved by their frequent interchangeableness in Sanskrit and in other languages. See 176, and compare church with kirk, Sanskrit chatwar with Latin quatuor, Sanskrit cha with Latin que and Greek καί, Sanskrit jánu with English knee, Greek γόνυ, Latin genu. Prof. Müller proposes to represent the palatals \mathbf{T} and \mathbf{T} by k and g in Italics.

- 23. The sibilants or hissing sounds (called *winds* by the native grammarians) are hard letters, which, nevertheless, strictly speaking, have something the character of vowels. The organs of speech in uttering them, although not closed, are more contracted than in vowels, and the vocal stream of breath in passing through the teeth experiences a friction which causes sibilation.
- a. Sanskrit does not recognise any guttural sibilation, though the palatal sibilant is really half a guttural. See 17. a. The aspirate $\overline{\epsilon}$ h might perhaps be regarded as a guttural flatus or wind without sibilating sound. The labial sibilation denoted by the letter f, and the soft sibilation denoted by z, are unknown in Sanskrit.

ACCENTUATION.

24. Accentuation in Sanskrit is confined to the Vedas. In common pronunciation the tone or intonation of vowels in all Sanskrit words is equal. This general monotonous intonation is called by Pánini eka-śruti, the one level, as it were, of pronunciation. But in the Vaidik hymns a rise and fall of the voice seems to have been recognised †. Hence arose the three tones or accents. First, the low tone, common to all vowels in ordinary speech. This tone is marked by the grave accent, and a syllable thus uttered is said to be anudátta (unacute, grave). Next, the high tone, produced by the sudden raising of the voice. This tone is marked by the acute accent, and is described by grammarians as the result of employing in the enunciation of the vowel what they call the upper half of the organ of utterance, whether the throat, palate, teeth, or lips. A syllable thus uttered is said to be udátta (acutely accented). Lastly, the mixed tone, a tone half high, half low, which is thus produced. In pronouncing the syllable immediately following the high-toned syllable, the voice, unable to lower itself abruptly to the level of the low intonation, passes into a tone partly high, partly low. A syllable uttered with this mixed intonation is said to be swarita, or marked with a combination of the acute and grave accent, commonly called the circumflex accent.

Practically, therefore, there are only three tones or accents recognised in Sanskrit, the anudátta, the udátta, and the swarita.

^{*} That \vec{o} l is a dental, and kindred to $\vec{\epsilon}$ d, is proved by its interchangeableness with d in cognate languages. Thus lacryma, $\delta \acute{\alpha} \kappa \rho \nu \mu \alpha$. Compare also $\vec{\epsilon} \uparrow \vec{q}$ with $\lambda \alpha \mu \pi$.

[†] According to Professor Bopp, accentuation in the Vedas has nothing to do with chanting, but is etymological, like the Greek accent.

25. Nevertheless, there is yet another tone noticed by Páṇini, and called by him sannatara or anudáttatara, i. e. more grave than the common grave intonation. It is thus explained: the exertion of the voice required to produce the acute or high tone (udátta) is so great that in order to attain the proper pitch the voice is obliged to lower the tone of the preceding syllable as much below the ordinary low intonation as the syllable that bears the udátta is raised above it. Consequently the syllable preceding another that bears the acute accent, and which is originally pronounced with the grave tone (anudátta), becomes more than grave (anudáttatara)*.

* The three accents are thus marked in the Rig-veda.

A small horizontal stroke under a syllable marks the anudátta or low tone; and in the Pada, if it extend under all the syllables of the same word, it indicates that the whole word is anudátta unaccented or pronounced in the low tone (thus **HH**:). But in the Sanhitá, where the distinction of anudáttatara is admitted, the stroke under a syllable is always the mark of the anudáttatara, never of the anudátta, the mere absence of accent not being marked at all.

When a syllable having the horizontal mark underneath is followed by one bearing no mark, the latter is considered to be *udátta*, acutely accented; and when followed by two syllables, bearing no mark, both are considered to be *udátta*.

The swarita or circumflex accent is denoted by a small perpendicular stroke above the syllable. Thus in the word चुकार the syllable $\overline{\mathbf{q}}$ is anudáttatara, का is udátta, and $\overline{\mathbf{t}}$ is swarita.

All the syllables (in a single word or sentence) which follow a syllable bearing the swarita are supposed to be anudátta unaccented or pronounced in the same tone, until the horizontal stroke, or anudáttatara mark under a syllable, appears again. In fact, the anudáttatara mark is the beginning of a series of three accents, of which the swarita is the end; and the appearance of this mark prepares the reader for the occurrence of an udátta immediately following, and of a swarita. The latter, however, may sometimes be retarded by a new udátta syllable, which shows that the accents have nothing to do with chanting. Nevertheless a swarita mark does not necessarily imply an anudáttatara mark preceding, as in the word अकेन्द्र at the beginning of a line, where the swarita merely shows that the first syllable is udátta. Again, in the Pada, where each word stands separately, there may be no swarita following an udátta, as पद्या। जाते. It must also be borne in mind that frequently where a swarita is immediately followed by an udátta syllable, the swarita becomes changed to anudáttatara: thus in दिचा पत्रचेत the swarita of \mathbf{T} becomes so changed, because of the udátta following.

With regard to the swarita mark, it may either indicate a dependent swarita, produced by an udátta immediately preceding, or an independent, i. e. either a swarita as such, or a swarita produced by the suppression of a syllable bearing the udátta, as in तन्यों contracted from तन्या, where the middle syllable is properly udátta. In the latter case, if the syllable bearing the swarita is long, and another

16 Letters.

OF THE INDIAN METHOD OF WRITING.

26. According to Hindú grammarians every syllable ought to end in a vowel*, and every final consonant ought to be attracted to the beginning of the next syllable; so that where a word ends in a consonant, that consonant ought to be pronounced with the initial letter of the next word. Hence in some Sanskrit MSS, all the syllables are separated by slight spaces, and in others all the words are joined together without any separation. Thus the two words चासीद राजा ásíd rájá would in some books be written जासी द्राजा and in others आसीदाजा. In Sanskrit works printed in Europe, the common practice is to separate only those words the final or initial letter of which are not acted on by the rules of combination. such books ásíd rájá would be written together, आमीदाना, because the final $\overline{\epsilon}$ is the result of an euphonic change from $\overline{\epsilon}$, caused by the following \(\tau\) r. There seems, however, but little reason for considering the mere spaces left between the words of a sentence to be incompatible with the operation of euphonic laws; especially as the absence of such spaces must always cause more or less impediment Therefore in many books recently even to the fluent reader. printed in Europe, every uncompounded word capable of separation by the use of the Viráma is separated. Thus pitur dhanam ádadáti is written पितुर धनम् आददाति, and not पितुर्धनमाददाति. The only cases in which separation is undesirable, are where the final vowel of one word blends with the initial vowel of the next into one long similar or dissimilar vowel, and where final u and i are changed into their corresponding semivowels v and y.

The following words and passages in the Sanskrit and English character, are given that the Student, before proceeding further in the Grammar, may exercise himself in reading the letters and in

word follows beginning with an udátta, then that syllable and all preceding syllables in the same word receive the anudáttatara mark, and the figure 3 is inserted to carry the swarita, having also the anudáttatara mark beneath; thus तन्या अमर्ग. If the syllable bearing the independent swarita be short, then the figure 9 carries the swarita, with an anudáttatara under it; thus अवंतत.

^{*} Unless it end in Anuswara or Visarga h, which in theory are the only consonantal sounds allowed to close a syllable. That Anuswara is not a full consonant is proved by the fact that it does not impede the operation of rule 70.

transliteration; that is to say, in turning Sanskrit letters into the English equivalents, and *vice versa*.

Observe, that m at the end of a word may most conveniently be transliterated

by the symbol Anuswara, and vice versa; thus, brahmapurákhyam nagaram बायुराख्यं नगरं. Strictly, however, the first of these Anuswaras, being influenced by the following n, is equivalent in sound to n, and the two words might have been written brahmapurákhyan nagaram बायुराख्यन् नगरं. Similarly, pratikshanam before ghantárávas is written प्रतिक्षणं, though equivalent in sound to प्रतिक्षणङ्, in consequence of the following प.

CHAPTER II.

SANDHI OR EUPHONIC COMBINATION OF LETTERS.

WE are accustomed in Greek and Latin to certain euphonic changes of letters. Thus rego makes, in the perfect, not regsi, but reksi (rexi), the soft q being changed to the hard k before the hard s. Similarly, veho becomes veksi (vexi). In many words a final consonant assimilates with an initial; thus συν with γνώμη becomes $\sigma v \gamma \gamma v \dot{\omega} \mu \eta$; $\dot{\epsilon} v$ with $\lambda \dot{\alpha} \mu \pi \omega$, $\dot{\epsilon} \lambda \lambda \dot{\alpha} \mu \pi \omega$. Suppressus is written for subpressus; appellatus for adpellatus; immensus for inmensus; affinitas for adfinitas; colloquium for conloquium; irrogo for inrogo. These laws for the euphonic junction of letters are applied throughout the whole range of Sanskrit grammar; and that, too, not only in uniting different parts of one word, but in combining words in the same sentence. Thus, if the sentence "Rara avis in terris" were Sanskrit, it would require, by the laws of Sandhi or combination, to be written Rarávir ins terrih; and might even be joined together thus, Rarávirinsterrih. The learner must not be discouraged if he is unable to understand all the laws of combination at first. recommended, after reading those that are printed in large type, to pass at once to the declension of nouns and conjugation of verbs. To attempt to commit to memory a number of rules, the use of which is not fully seen till he comes to read and construct sentences, must only lead to a loss of time and patience.

SECT. I.—CHANGES OF VOWELS.

27. Nevertheless, there are some changes of letters which come into immediate application in the formation and declension of nouns, and the conjugation of verbs; and amongst these, the changes of vowels called Guna and Vriddhi should be impressed on the memory.

- 28. Let the student, therefore, never forget the following rules. There is no Guṇa substitute for ज a, but जा á is the Vṛiddhi substitute for ज a; ए e is the Guṇa, and ऐ ai the Vṛiddhi, for इ i and ई i; जो o is the Guṇa, and जो au the Vṛiddhi, for ज u and जा ú; जार ar is the Guṇa, and जार ár the Vṛiddhi, for ज ri and जार ar ar is the Guṇa, and जार ár the Vṛiddhi, for or ri and or ri जार al is the Guṇa, and जार ál the Vṛiddhi, for or ri and o
- a. Observe—It will be convenient in describing the change of a vowel to its Guna substitute, to speak of that vowel as gunated; and in the case of the Vriddhi change, to speak of it as vriddhied.
- b. In the conjugation of verbs the vowels of roots cannot be gunated or vriddhied, if they are followed by double consonants, i. e. if they are long by position; nor can a vowel long by nature be so changed, unless it be final. The vowel \mathfrak{A} is of course incapable of Guna.
- 29. Again, let him bear in mind that the Guṇa sounds ए e, जो o, and जर् ar, are diphthongal, that is, composed of two simple vowel sounds. Thus, ए e is made up of ज a and इ i; जो o of ज a and ज u; जर् ar of ज a and ज ri; so that a final ज a will naturally coalesce with an initial इ i into ए e; with an initial ज u into जो o; with an initial ज ri into जर ar. Compare 18. c.
- a. Similarly, the Vriddhi diphthong $\hat{\mathbf{v}}$ ai is made up of \hat{a} and i; and $\hat{\mathbf{w}}$ an of \hat{a} and u. Hence, a with e will blend into ai (for e=a+i and a+a+i will equal $\hat{a}+i$ or ai). Similarly, a will blend with $\hat{\mathbf{w}}$ a into $\hat{\mathbf{w}}$ au. Compare 18. c.
- b. Since the sound ai is composed of a and a, it may be asked, How is it that long a as well as short a blends with a into a (see 32), and not into ai? In answer to this, Professor Bopp (Comparative Grammar, p. 2) maintains that a long vowel

^{*} गुख guaa in Sanskrit means 'quality,' and वृद्धि vriddhi, 'increase.' It will be convenient to Anglicise these words, and write Guna, Vriddhi.

at the end of a word naturally shortens itself before an initial vowel. His opinion is, that the very meaning of Guṇa is the prefixing of short a, and the very meaning of Vriddhi, the prefixing of long a, to a simple vowel. He therefore holds that the Guṇa of i is originally a i, though the two simple vowels blend afterwards into e. Similarly, the original Guṇa of u is a u, blending afterwards into o; the original Guṇa of r is a r i, blending into a r.

In order to impress the above rules on the mind, the substance of them is embodied in the following table:

Simple vowels, Guṇa substitute,	a or á		$\overline{}$	ri or rí	lṛi or lṛi
Vṛiddhi substitute,	á	ai	au	ár	ál
Simple vowels,		i or í	$u \text{ or } \acute{u}$	ri or rí	lṛi or lṛi
Semivowel substitute,		y	r	r	Ì
Guņa,		e	0		
Guņa resolved,		a + i	a + u		
With semivowel substitute	,	ay	av		
Vṛiddhi,		ai	au		
Vṛiddhi resolved,		a + i	a + u		
With semivowel substitute	,	áy	ár		

The succeeding rules will now explain themselves.

31. If a word ends in $\overline{\mathbf{w}}$ a or $\overline{\mathbf{w}}$ if, when the similar vowels $\overline{\mathbf{w}}$ a or $\overline{\mathbf{w}}$ if follow, then the final and initial vowel blend into one long similar vowel: thus

न + जस्ति na + asti becomes नास्ति násti, 'there is not.'

जीवा + ज्ञान $jiv\acute{a} + anta =$ जीवान $jiv\acute{a}nta$, 'the end of life.'

a. The same rule applies to the other vowels, इ i, उ u, छ ri, short or long: thus

স্থাধি + ইয়াং adhi + iśwara becomes স্থাধীয়াং adhiśwara, ' the supreme lord.'

चृतु + उत्सव ritu + utsava = चृतृत्सव ritútsava, 'the festival of the season.'

पितृ + सृद्धि pitri + riddhih = पितृद्धि pitriddhi, 'the father's prosperity.'

32. If a word ends in $\overline{\mathbf{w}}$ a or $\overline{\mathbf{w}}$ i, when the dissimilar vowels $\overline{\mathbf{z}}$ i, $\overline{\mathbf{v}}$ u, $\overline{\mathbf{w}}$ pi, short or long, follow, then a or a blends with i or i into $\overline{\mathbf{v}}$ e; with u or a into $\overline{\mathbf{w}}$ into $\overline{\mathbf{v}}$ into $\overline{\mathbf{w}}$ into $\overline{\mathbf{v}}$ into $\overline{\mathbf{w}}$ into $\overline{\mathbf{v}}$ into $\overline{$

परम + ईश्वर parama + iśwara becomes परमेश्वर parameśwara, 'the mighty lord.'

हित + उपदेश hita + upadeśa = हितोपदेश hitopadeśa, ' friendly instruction.'

गङ्गा + उदक $gan \cdot g\acute{a} + udaka = गङ्गोदक <math>gan \cdot godaka$, 'Ganges water.'

तव + सृद्धि tava + riddhi = तवि tavarddhi, 'thy growth.'

Similarly, तव + स्ट्रकार tava+lṛikára becomes तवन्कार tavalkára, 'thy letter lṛi.'

33. If a word ends in ज a or जा \acute{a} , when the dissimilar vowels \mathbf{v} e, जो o, \mathbf{v} ai, or जो au, follow, then a or \acute{a} blends with e into ai; with ai also into ai; with au also into au: thus

पर + रिधत para + edhita becomes परिधत paraidhita, 'nourished by another.'

विद्या + एव $vidy\acute{a} + eva =$ विद्येच vidyaiva, 'knowledge indeed.'

देव + ऐम्बर्प्य deva + aiśwarya = देवेम्बर्प्य devaiśwarya, ' divine majesty.'

स्रत्य + स्रोजम् alpa + ojas = ऋत्योजम् alpaujas, 'little energy.'

मङ्गा + स्रोघ $gan \cdot ga + ogha = \pi$ स्रोघ $gan \cdot gaugha$, 'the torrent of the Ganges.'

^{*} The blending of a and i into the sound e is recognised in English in such words as sait, nait, &c.; and the blending of a and u into the sound o is exemplified by the French faute, baume, &c.

- चर + खोषध jwara + aushadha = च्चरोषध jwaraushadha, ' fever-medicine.'
- 34. If a word ends in ξ i, $\exists u$, $\exists p$ i, short or long, when any dissimilar vowel follows, the former letters pass into their kindred semivowels; viz. i or i into y^* ; u or u into v^* ; p or p into p thus

र्षाग्न + सम्द्र agni + astra becomes साम्यस्त्र agnyastra*, ' firearms.'

प्रति + उवाच prati + uvácha = प्रत्युवाच pratyuvácha, 'he spoke in reply.'

तु + इदानों $tu + id\acute{a}n\acute{m} =$ निवदानों $twid\acute{a}n\acute{m}^*$, 'but now.'

मातृ + ज्ञानन्द mátri + ánanda = भातानन्द mátránanda, 'the mother's joy.'

35. If a word ends in ∇e or $\vec{\mathbf{w}}$ i o, when the next begins with $\vec{\mathbf{w}}$ a, then e and o remain unchanged, and the initial $\vec{\mathbf{w}}$ a is cut off: thus

ते + अपि te + api becomes तेडिप te 'pi, 'they indeed!' [See 10.]

गृहे + अस्ति grihe + asti = गृहे इस्ति grihe 'sti, ' he is in the house.'

सो + छपि so + api = सोऽपि so 'pi, 'he indeed!'

हतो + श्रस्म hato + asmi = हतोऽस्म hato 'smi, 'I am undone!'

- 36. If a word ends in \mathbf{v} e or \mathbf{w} o, when the next begins with any other vowel except \mathbf{w} a, then e is changed to ay, and o to av; and if both the words are complete words, the y of ay, and more rarely the v of ar, may be dropped, leaving the a uninfluenced by the following vowel: thus
 - ते + आगता: $te + \acute{a}gat\acute{a}h$ becomes तयागता: $tay \acute{a}gat\acute{a}h$, and then त आगता: $ta \acute{a}gat\acute{a}h$, 'they have come.'

Similarly, विष्णो + इह vishqo + iha becomes विष्णविह vishqaviha, and then विष्णा इह vishqa iha, 'O Vishnu, here!'

a. But if \mathbf{v} e and \mathbf{w} o be the finals of roots or nominal bases, and these have to be joined with the initial vowels of terminations, affixes, &c., even though the initial vowel be \mathbf{w} a or \mathbf{v} e or \mathbf{w} o, then final e must still be changed to ay, and final o to av, and both y and v must be retained: thus

जे + ऋति je + ati becomes जयित jayati, ' he conquers †.'

^{*} So in English we pronounce a word like million as if written millyon; and we write evangelist for evangelist.

[†] In English we respect this law in writing, though not in pronouncing such words as saying, playing, &c.

स्थाने + ए agne + e = स्थानिये agnaye, 'to fire.'

भो + जाति bho + ati = भवति bhavati 'he is.'

गो + ईम्बर go + iswara = गवीम्बर gaviswara, 'owner of kine.'

गो + श्रोकम् go + okas = गवोकम् gavokas, 'the abode of cattle.'

37. If a word ends in $\hat{\mathbf{v}}$ ai or $\hat{\mathbf{w}}$ au, when any vowel, similar or dissimilar, follows, ai is changed to ay, and au to au: thus

कम्मे + ऋषि kasmai + api becomes कम्मायपि kasmáyapi, 'to any one whatever'

रै + ज: rai + ah =राय: ráyah, 'riches.'

दरी + अनं dadau + annam = दरावनं dadávannam, ' he gave food.'

नौ + स्त्रौ nau + au = नावौ návau, 'two ships.'

a. If both the words be complete words, the y and v are occasionally dropped, but not so usually as in the case of e at 36: thus कसमा आपि kasmá api for कसमायपि kasmáyapi, and ददा अतं dadá annam for ददावनं dadávannam.

38. There are some exceptions (pragrihya) to the above rules. The most noticeable is that of nominative and accusative cases dual, ending in i, i, or e. These are never acted on by following vowels: thus,

हरी एती harí etau, 'these two Haris.'

विष्णु इमी vishnú imau, 'these two Vishnus.'

सुते रते sute ete, 'these two daughters.'

The same applies to अमी amí, nom. pl. m. of the pronoun अदस्.

- a. A vocative case in o, when followed by the particle iti, may remain unchanged, as विष्णो इति vishno iti, or may follow 36.
- b. Particles, when simple vowels, and সা á and সা ó, as the finals of interjections, remain unchanged, as সা তেই á eram, 'Ah, indeed!' সহী হৃদ্ধ aho indra, 'Ho, Indra'
- c. The will o of मो go, 'a cow,' may become अव ava in certain cases, as मो + इन्द्र go+indra becomes मेबेन्द्र gavendra, 'lord of kine.'

The following table exhibits all the combinations of vowels at one view. Supposing a word to end in u, and the next word to begin with au, the student must carry his eye down the first column (headed "final vowels") till he comes to u, and then along the top horizontal line of "initial vowels," till he comes to au. At the junction of the perpendicular column under au and the horizontal line beginning u, will be the required combination, viz. v au.

* If the initial	from the initial;	Observe, mar
If the initial a belong to a termination, affix, &c., and not to a complete word, then a is not cut off, and o becomes an before it. See 36. a.	from the initial; except in those cases where the blending of the two vowels made this impossible.	Observe, that in the above table the infat letter, in its changet state, has been printed, for greater clearness, set
re it. See 36.		Cicarinces,

SECT. IL-CHANGES OF CONSONANTS.

39. Before proceeding to the combination of consonants, let the letters be again regarded as divided into two grand classes of Hard and Soft, as explained at 20. b.

HA	RD OR SU	RD.			s	OFT OR	SONANT			
k	kh		g	gh	$n \cdot$	h	а	ά		
ch	chh	ś	j	jh	ù	y	i	í	e	ai
ţ	th	sh	d	dh	ņ	r	ŗi	ri		
t	th	s	d	dh	n	l	lŗi	lŗí		
p	ph		b	bh	m	v	u	ú	o	au

Note—In the following rules it may generally be observed, that final consonants have a tendency to adapt themselves to initial, rather than initial to final.

GENERAL RULES.

40. If two hard or two soft consonants come together, one at the end and the other at the beginning of a word or affix, there is generally no change; and similarly, if a soft consonant ends a word, when a vowel follows: thus.

विद्युत् प्रकाञ्चते vidyut prakášate, 'the lightning shines.'

कुषुत विकसति kumud vikasati, 'the lotus blossoms.'

दृशद् अधोगकाति drisad adhogachchhati, 'the rock descends.'

विद्युत् + सु vidyut + su = विद्युत्सु vidyutsu, ' in lightnings.'

- a. Observe, however, that the unaspirated form of a final letter is substituted for the aspirated. as चित्रलिख् + करोति chitralikh + karoti becomes चित्रलिक् करोति chitralik karoti.
- 41. If any hard letter ends a word, root, or crude base, when any soft initial letter follows, the hard (unless affected by some special rule) is changed to its own unaspirated soft: thus

वाक् + देवी $v\acute{a}k + dev\acute{i}$ becomes चान्देवी $v\acute{a}gdev\acute{i}$, 'the goddess of eloquence.'

चाक् + ईश $v\acute{a}k + i\acute{s}a =$ चामीश $v\acute{a}g\acute{s}a$, 'the lord of speech.'

चिह्नलिख् + लिखित chitralikh + likhati = चित्नलिग् लिखित chitralig likhati, 'the painter paints.'

विद् + भव vit + bhava = विद्भव vidbhava, 'generated by filth.'

a. There is an option allowed before nasals; that is, when any nasal begins the next word, the final of the last word is usually (though not necessarily) changed to the nasal of its own class; thus

```
वाक् + मय vák + maya becomes वाङ्मय ván maya, 'full of words.' विद् + मय vit + maya = विकास vin maya, 'full of filth.' तत् + मात्र tat + mátra = तात्मात्र tanmátra, 'that element.' तत् + नेत्रं tat + netram = तन् नेत्रं tan netram, 'that eye.' ञ्चप + मूळं ap + múlam = ञ्चलळं ammúlam, 'water and roots.'
```

- b. Rule 41 applies to terminations of nouns or verbs beginning with consonants, but not to terminations beginning with vowels. In the latter case, the final hard consonant is supposed to attract the initial vowel, and thus, losing its character of a final letter, is not made soft: thus ৰাজ্ + মিল্*vák+bhis* becomes মাণ্টিম্*rágbhis*, 'by words;' but ৰাজ্ + আ *vách+á* becomes বালা *ráchá*, 'by a speech;' not বালা *vájá*. 'चित्रलिख् + मु chitralikh+su is चित्रलिख् सु chitraliksu, 'in painters;' but चित्रलिख् + आ chitralikh+á remains जित्रलिखा chitralikhá. 'by a painter.'
- c. Of course, rule 41 does not apply to final sibilants, as they have no corresponding soft letters. The rules for sibilants are given at 61.
- 42. If a soft letter ends a word, root, or crude base, when any hard initial letter follows, the soft is changed to its own unaspirated hard: thus
 - कुषुर् + फुञ्चित kumud + phullati becomes जुमुत् फुञ्चित kumut phullati, 'the lotus blossoms.'
 - सनिध् + प्रदीष्यते samidh + pradipyate = समित् प्रदीष्यते $samit\ pradipyate$, 'the fuel is ignited.'

Note—Similarly in Latin, a soft guttural or labial often passes into a hard before s and t; thus reg + si becomes recsi (rexi), scrib + si becomes scripsi.

- a. The same may take place at the end of a sentence or before a pause, as फूझति कुमृत् phullati kumut.
- b. Soft letters, which have no corresponding hard, such as the nasals, semi-vowels, and Ξh , are changed by special rules.
- c. If the final be an aspirated soft letter, and belongs to a root whose initial is πg , πd , or πb , then the aspirate, which is suppressed in the final, is transferred back to the initial letter of the root; as $\pi \psi + \pi \psi$ and $\pi budh + karoti$ becomes भुत् करोति bhut karoti, 'he who knows acts;' द्र्भ + तम् dadh + tas becomes भूत् ahattas, 'they two place;' and see 306. a, 299. a.

Note—Greek recognises a similar principle in $\theta \rho i \xi$, $\tau \rho i \chi \delta \varsigma$, $\tau \rho \epsilon \chi \omega$, $\theta \rho \epsilon \xi \omega$, &c.

43. The following consonants are not allowed to remain unchanged at the end

of words *, under any circumstances: that is to say, they undergo modifications, even at the end of a sentence; and when they are combined with the initial letters of succeeding words, or with the initial consonants of affixes, these modifications must take place before rules 41 and 42 are applied. 1st, A conjunct consonant of any kind; 2d, an aspirated consonant; 3d, the aspirate $\mathbf{E}(h)$; 4th, the palatal letters $\mathbf{E}(h)$; $\mathbf{E}(h)$, $\mathbf{E}(h)$

- a. With regard to 1, when a word ends in a single or conjunct consonant, and a termination to be affixed consists of a single consonant, then, to avoid the concurrence of silent consonants at the end of a word, the first only of the conjunct consonants is allowed to remain, and the termination is dropped: thus चरन् + स् charant+s leaves चरन् charan, 'going;' अवेह + स् aved+s leaves अवेन् avet or अवेह aved. So in Latin, mulsi is written for mulg-si; sparsi for sparg-si, &c.
 - b. With regard to 2, the unaspirated form is substituted for the aspirated.
- c. With regard to 3, a final $\overline{\epsilon}$ h (which is of very rare occurrence) is usually changed either to $\overline{\epsilon}$ k or $\overline{\epsilon}$ l. See 17. a.
- d. With regard to 4, palatals, as being derived from gutturals (see 20. c.), generally revert to their originals; i. e. final च ch and कि jh are usually changed to क् (see 12), but Ξchh may become ξt ; πj becomes Πg , but sometimes ξt or ξd .
- e. With regard to 5, final \mathfrak{N} s and \mathfrak{T} sh usually pass into either \mathfrak{R} to \mathfrak{T} \mathfrak{T} . (See 17. b.)

The above changes must hold good, whatever may be the initial letter of a following word; but rules 41 and 42 must be afterwards applied. They also hold good before all terminations or affixes beginning with strong consonants; but before vowels (except the affix a at 80. I.) and weak consonants (i. e. nasals and semivowels) the finals remain unchanged. See 41. b, and $v\acute{a}ch$ at 176.

44. The special rules for the changes of consonants are very numerous, but since few words in Sanskrit end in any other consonants than π t and π d, the nasals π n and π m, the dental sibilant π s, and the semivowel τ r, it will be sufficient for all practical purposes to notice these special rules under four heads; 1st, the changes of final π and π ; 2dly, the changes of the nasals; 3dly, the changes of final π ; 4thly, the changes of final τ .

CHANGES OF FINAL τ t AND τ d.

45. By the general rule (41), final π t becomes $\bar{\epsilon}$ d before soft consonants, and before all vowels (as महत्+ चाति marut + váti becomes महत् चाति marud váti, 'the wind blows').

^{*} Excepting in roots, standing by themselves, or, if used as nouns, before terminations beginning with vowels.

- a. There is an exception in the case of vidyut+vat, making vidyutwat, 'possessed of lightning.'
- 46. And final ह d becomes त्t before hard consonants (as दृशह + पनित drisad + patati becomes दृशत् पनित drisat patati, 'the stone falls'). See 42.
- 47. And final $\pi(t)$ or $\pi(t)$ decomes $\pi(t)$ before all nasals, See 41. a. But final $\pi(t)$ or $\pi(t)$ defore initial $\pi(t)$ or $\pi(t)$, $\pi(t)$, $\pi(t)$, $\pi(t)$, $\pi(t)$, and $\pi(t)$, undergoes special changes: thus—

Final त्t or द्d before च ch, ज j, ल l.

48. If π t or π d ends a word, when an initial π ch, π j, or π l, follows, then π t or π d assimilates with these letters: thus

भयात् + लोभात् + च bhayát + lobhát + cha becomes भयाल् लोभाच् च bhayál lobhách cha, 'from fear and avarice.'

तद् + जीवनं tad + jivanam = तज् जीवनं taj jivanam, 'that life.'

- a. A final त्t or ह d also assimilates with a following छ chh, फ jh, but as, by 43.b, an aspirate is not allowed at the end of a word, the combination will be ch chh, j jh. They also assimilate with the cerebral letters द t, द d: thus तत् + दीनं tat+ dinam becomes तह दीनं tad dinam.
- b. Observe—When **छ** chh is the original initial letter of a word, and a previous word ends in a short vowel (or even a long vowel), then त्t, changeable to च ch by 48.a, may be inserted: thus वि + छेद vi+chheda may be written विकेद vichchheda.

Final त्t or द d before श s.

49. If त्t or ह d ends a word, when an initial जा s follows, then त्t or ह d is changed to च्ch, and the initial जा s is usually changed to च chh: thus तत्+ शुन्ता tat + srutwá becomes तच् चुना tach chhrutwá, 'having heard that.'

Final त्t or द् d before ह h.

- 50. If π t ends a word, when initial π t follows, the final π t is changed to π d (by 41), and the initial π t to π dh: thus π π + π t tat + harati becomes π π utility (or π π π tad dharati, 'he seizes that.'
- 51. By a similar rule, and on the same principle, are written words ending in ক্k, followed by initial হ h; thus বাক্ + হানি vák+harati becomes বান্ ঘানি vág gharati, 'speech captivates.' Similarly, roots ending in ट t, followed by a termination beginning with হ h; thus ৱিহ + হি dwit+hi becomes ৱিহুটি dwiddhi.

CHANGES OF THE NASALS.

Changes of final न n.

- 52. If the letter $\overline{\eta}$ n, preceded by a *short* vowel, ends a word, when the next begins with any vowel, the n is doubled: thus
 - আমন্ + স্থার ásan + atra becomes আমন্ স্থার ásann atra, ' they were there.'
 - तिसन् + उद्याने tasmin + udyáne = तिसम् उद्याने tasminn udyáne, 'in that garden.'
- 53. If $egin{array}{l} \eta$ ends a word, when an initial $egin{array}{l} \pi t$, $egin{arra$
 - स्त्रिमन् + तडागे asmin + tadáge becomes स्राप्तिस्ताडागे or स्त्रिमंस् तडागे asmins tadáge, 'in this pool.'
 - किस्सन् + चित् kasmin + chit = किस्मिं द्यित् kasminschit *, 'in a certain person.'
 - महान् + दङ्गः mahán + ṭan kah = महांष्ट्रङ्गः mahánshṭan kah, 'a large axe.'
- a. A similar euphonic s is inserted between the prepositions sam, ava, pari, prati, and certain words which begin with k, as মাজেন sanskára, মানিম্মাই pratishkára, &c. (see 70); just as in Latin, between the prepositions ab and ob, and c, q, and p.
- b. न् n at the end of a root, or incomplete word, is not amenable to this rule: thus हन् + ति han+ti is हन्ति hanti, 'he kills.' The word प्रशान् praśán (nom. of praśán) is also an exception; as, प्रशान् तनोति 'the peaceful man spreads.'
- 54. Rule 53 describes the only cases in which न् n, when originally the final of a word, can pass into Anuswára: thus, combinations like तान् जानाति or तान् ददाति can never be written तां जानाति, तां ददाति.
- 55. If ল্n ends a word, when the next begins with মা ś, then both ল্n and মা ś may remain unchanged or be combined in either of the two following ways: 1st, the final ল্n may be changed to ম n; thus महान् + মু: mahán+śúrah may be written महाস্ মু: 'a great hero:' 2dly, the মা ś may be changed to অ chh; thus মহাস্ তু::
- 56. If न n ends a word, when the next begins with ਲ l, the n assimilates with the l, and the mark v is placed over the preceding vowel: thus पद्मान् + सुनाति pakshán+lanáti becomes पद्माँ जुनाति or पद्माँ सुनाति के elips the wings.' See 7. Similarly, è with λάμπω becomes ἐλλάμπω; and con with ligo, colligo.

^{*} The same holds good before \(\mathbf{v} \) chh, and before \(\mathbf{v} \) th; but the two latter are never likely to occur.

- a. Final न n, before ज j or क jh, is sometimes (but very rarely) written in the palatal form न; and before ड d, ढ dh, in the cerebral form ख.
- 57. $\overline{8}$ n as the final of crude bases is rejected before terminations and affixes beginning with consonants: thus
 - धनिन् + भिम् dhanin + bhis becomes धनिभिम् dhanibhis, 'by rich people.'
 - धानन् + त्व dhanin+twa=धानित्व dhanitwa, 'the state of being rich.'
- a. As the final of a root it is rejected before those terminations beginning with consonants (excepting nasals and semivowels), which have no symbol indicative of Guna. (See 307 and 318.)
- b. Also, when the word ending in $\overline{\P}$ n is the first (or any but the last) member of a compound word, even though the next member of the compound begins with a vowel: thus
 - राजन् + पुरुष rájan + purusha becomes राजपुरुष rája-purusha, 'the king's servant.'
 - राजन् + इन्दु rájan + indra = राजेन्दु rájendra, 'the chief of kings.'
 - खानिन् + छर्च swámin + artham = खाम्यर्घ swámyartham, 'on account of the master.'

Change of न n, not final, to ए n.

58. If $\exists n \ (not \ final)$ follows any one of the three cerebral letters, छ ri, τr , τsh , in the same word, then τn must be changed to the cerebral स n, even though क k, म g, प p, च b, (or their aspirates,) ह h, य y, व v, or म m, intervene. Thus the nom. plur. of ज्ञाप्कं पूर्ण 'a withered flower,' is अप्रकारिए पप्पारिण śushkáni pushpáni (not अप्रकानि पुट्पानि). Similarly, the accus. case of ब्रह्म brahmahan, 'a brahman slaver,' is ब्रह्म ; the imperative of द्विष् kship, 'to throw,' is द्विपारिए; the nom. plur. of वर्मन rarman, 'armour,' is वर्मारिए; the instrum. sing. of मृग mriga, 'a deer,' is मृगेख. But the intervention of a dental, or cerebral consonant, or of any palatal except y, or of any letter whatever (excepting a nasal, a semivowel, or ϵh) if conjunct with the nasal, prevents the operation of this rule. Thus the instrum. case of ज्ञाल śrigála, 'a jackal,' is ज्ञालेन; the nom. plur. of बत्सेन vartman, 'a word,' is वर्त्सान; and in further illustration of the same law, may be taken सर्जन sarjana, 'abandoning;' क्रीडन krídana, 'playing;' प्राप्नोति prápnoti, 'he obtains;' राजा rájná, 'by a king.' But युद्ध is sometimes written वृक्षा.

Changes of final # m.

59. If π m ends a word or root, when any consonant follows, then π m may pass into Anuswára, or may optionally, before those consonants which have a corresponding nasal, be changed to this nasal:

thus गृहम् + जगाम griham + jagáma is written either गृहं जगाम or गृहम् जगाम 'he went home:' so also sam + dina becomes either संद्रीन or समुद्रीन 'flight;' sam + chaya, either संद्रीन or मद्राय 'collection;' sam + nyása, either संन्यास or सह्यास 'abandonment;' $gam + t\acute{a}$, either गंता or गन्ता. But although म् m may in these cases pass into Anuswára, the latter must always take the sound of the nasal to which it may optionally be changed.

60. When the next word begins with a vowel, then म् m must always be written: thus गृहमायाति or गृहम् आयाति gṛiham âyáti, 'he comes home.'

CHANGES OF FINAL स् 8.

61. Nearly every nominative case, and many other cases of nouns, in Sanskrit, besides many inflections of verbs, end in \mathbf{x} , which is changeable to \mathbf{x} , \mathbf{s} , and is liable to be represented by: Visarga (i. e. the symbol for a final aspirate), or to pass into \mathbf{x} , or to be liquefied into \mathbf{x} u, or to be dropped altogether, according to the nature of the initial letter following *. At every step these changes will meet the eye: therefore let the student master the following five rules, before he attempts to read a single sentence of the most elementary Sanskrit work.

Observe—The following rules are designated by Indian grammarians, "rules for the changes of Visarga." This exaltation of a mere symbol to the place of the letter which it represents, tends, however, to embarrass the subject unnecessarily, and imparts to Visarga itself a nature so Protean, that the student is continually foiled in his effort to apprehend a character which is liable to become now s, now r, now u, now y, now to be dropped, and now to return to its original form. It seems a simpler and preferable course (the result being in the end equivalent) to start from the tangible character \mathbf{H} , which Visarga, under certain circumstances, represents; or, in other words, to regard Visarga as no letter at all, but a mere symbol for final \mathbf{H} , and, as we shall afterwards see at 71, for final \mathbf{T} , when these letters are pronounced with an imperceptible aspiration (compare rule 8), as they are always pronounced before \mathbf{H} , \mathbf{H} , \mathbf{H} , \mathbf{H} , \mathbf{S} , \mathbf{H} , and at the end of a sentence.

^{*} The interchangeableness of s with r and h is not unknown in other languages. Thus the Latin flos becomes in the genitive floris; genus becomes generis: and many other Latin words, such as labor, robur, were originally written either labor or labos, robur or robus. Again, the initial aspirate in many Greek words passes in Latin into s; as, $\xi \xi$, sex, &c.

First Rule.—When does final \(\mathbf{t} \) s remain unchanged, or become \(\mathbf{y} \) s, \(\mathbf{t} \) sh?

- 62. Before π t, π ch, and τ t, respectively. Before π t, and its aspirate, it remains unchanged. Before π ch, and its aspirate, it passes into the palatal sibilant π sh. Similarly, before τ t, and its aspirate, it passes into the cerebral sibilant π sh. But this latter change can rarely occur, as very few words in Sanskrit begin with τ t or τ th.
- a. In some books final म्s is allowed to remain unchanged before π s, and to assimilate with initial π s.

SECOND RULE.—When does final \(\mathbf{H} \) s pass into Visarga (:)?

- 63. Before क k, प p, and their aspirates, and before the sibilants स s, ज \dot{s} .
 - a. Before a pause, i. e. at the end of a sentence.
- b. Observe—When a word stands by itself, final s properly passes into Visarga; and this is why, in native grammars, the terminations of nouns and verbs, which appear first in the tabular scheme, as ending in s, are made to end in Visarga, when they appear again in declension and conjugation. In the following pages, however, s will be preserved as a final, in declension and conjugation, for two reasons: 1st, because it is more tangible, and easy to apprehend, than a symbol which is imperceptible in pronunciation: 2dly, because it enables the classical student to keep in view the resemblance between Sanskrit and Greek and Latin terminations.

Third Rule.—When does final মৃs blend with a preceding আ a into the vowel আ o?

- 64. When preceded by short $\overline{\mathbf{w}} u$, before all soft consonants, it is treated as if liquefied into $\overline{\mathbf{w}} u^*$, and blends with the u into $\overline{\mathbf{w}} u$.
 - a. Similarly, before short \(\frac{1}{2} a, \) which a is then cut off.

FOURTH RULE. - When does final # s become Tr?

65. When preceded by any other vowel but vartial a or vartial

^{*} That is, it is first changed to r, as at 65, and r is then liquefied into a vowel; just as l is often changed to u in French. The plural of animal is animaux, not animals.

a. Unless ξ r itself be the soft letter following, in which case, to avoid the conjunction of two r's, final ξ is dropped, and the vowel preceding it (if short) is lengthened.

FIFTH RULE. - When is final स s dropped?

- 66. When preceded by short $\overline{\mathbf{w}}$ a, before any other vowel except short $\overline{\mathbf{w}}$ a. NB. The $\overline{\mathbf{w}}$ a, which then becomes final, opens on the initial vowel without coalition \dagger .
- a. When preceded by long ष्या \acute{a} , before any soft letter, consonant or vowel. NB. If the initial letter be a vowel, the ष्या \acute{a} , which then becomes final, opens on it without coalition.
- b. When preceded by any other vowel but \mathbf{w} a or \mathbf{w} i á, before the letter r, as noticed at 65. a.
- c. Observe—Although it simplifies the subject to speak of final s as dropped in these cases, yet, according to native grammarians, it would be more correct to say that final s first passes into Visarga, which is then dropped: otherwise the term Visarga is without meaning. Indian grammarians, however, hold that Visarga undergoes another change before it is dropped, viz. to y; and that this y is rejected in accordance with 36, 37.

The above five rules are illustrated in the following table, in which the nominative cases $\pi \iota \pi$ naras, 'a man;' $\pi \iota \pi$ narás, 'men;' $\pi \iota \pi$ haris, 'the god Vishnu;' $\iota \pi$ ripus, 'an enemy;' and $\iota \pi$ naus, 'a ship'—are joined with the verbs karoti, 'he does;' kurvanti, 'they do;' khanati, 'he digs;' khananti, 'they dig;' pachati, 'he cooks;' pachanti, 'they cook;' sarati, 'he goes;' sochati, 'he grieves;' tarati, 'he crosses;' charati, 'he moves;' gachchhati, 'he goes;' jayati, 'he conquers;' rakshati, 'he preserves;' atti, 'he eats;' adanti, 'they eat;' eti, 'he goes;' áyáti, 'he comes;' edhate, 'he prospers.'

^{*} That is, it blends with a into a, as in a, and a becoming av before any vowel but a, the v is rejected by a6. Indian grammarians hold that final a6 or Visarga here becomes a7, which would also be rejected by a6. This, however, seems rather to apply to a6.

[†] This is one of the three cases in which a hiatus of two vowels is admissible in Sanskrit. The three cases are, 1, when final s is rejected from as or ás (66); 2, when a complete word, ending in e, is followed by any other vowel but a (see 36); 3, when the dual terminations $\hat{\Xi}$ i, \mathbf{v} e, are followed by vowels (see 38).

CHANGES OF CONSONANTS.	00
नरम् तर्रति naras tarati हरिम् तर्रति naris tarati हरिम् तर्रति naris tarati नौम् तर्रति nans tarati नौम् तर्रति nans tarati नर्राण् चर्रति nans charati नर्राण् चर्रति nans charati नर्राण् चर्रति nans charati नौण् चर्रति nans charati नौण् चर्रति nans charati नौण् चर्रति nans charati नौण् चर्रति naras charati नौण् चर्रति naras sarati नरम् मर्रति naras sarati नरम् मर्रति naras sarati नर्राण् भोचिति naras sochati नर्राण् भोचिति naras sochati	Final As remains unchanged, or passes into As.
नराः अरोति narah karoti नराः अरोति narah karoti हरिः अरोति harih karoti नराः अनित narah khanati नराः अनित narah pachati नराः अनित narah pachati नराः पनित narah pachati नराः पनित narah sarati नराः सर्गत narah sarati नराः सर्गत narah sarati नराः सर्गत narah sarati नराः अभिति narah sarati हरिः अभिति narah sochati हरिः अभिति narah sochati हरिः अभिति narah sochati हरिः अभिति तत्राः अभिति narah sochati हरिः अभिति तत्राः अभिति narah sochati	Second Rule. Final #(s passes into Visarga.
नरो मर्जीत naro gachchhati रिपुर श्लीक harir att नरो नरो नित्र कार्य naro jayati नरो पाति naro yati नरो पाति naro yati नरो पाति naro yati नरो पाति naro rakshati शिपुर श्लीत harir eti रिपुर श्लीत harir eti शिपुर श्लीत harir eti शिपुर श्लीत harir yati कार्य मर्जीत harir yati त्यां शिपुर पाति naro yati naro quay vowel but a fore all soft letters e r, when final s also l r is rejected, and the ing vowel lengthene हरी रथाति naro raks	Тигр Веле. Final स्s blends with a into जो o.
नरो मद्यति naro gachehhati त्युद् श्रांच ripur atti नरो चाति naro jayati नरो चाति naro yatti नरो चाति naro yatti हिर्द् श्रांच ripur eti नेद् श्रामाति naro dyati हिर्द् श्रांच ripur eti नेद्द श्रांच ripur eti नेद्द श्रांच naro eti श्रांच हिर्द् श्रांच naro eti नेद्द श्रांच naro eti नेद्द श्रांच naro dyati नेद्द श्रांच naro gachehhati स्प्रद चाति nari yati नेद्द चाति naro yati नेद्द चाति naro yati नेद्द चाति naro yati नेद्द चाति naro yati श्रांच चाति yany vowel but a or a, before all soft letters excepting r, when final s also becoming r is rejected, and the preceding vowel lengthened: thus, हरी दश्रांच hari rakshati दृष् दश्रांच ripu rakshati	Fourth Rule. Final \(\pi_s\) becomes \(\xi\)r.
हिर् सुन्ति harir atti तेषु स्राचि naur dydti नेषु स्राचि naur dydti नेषु स्राचि harir eti तेषु स्राचि naur eti नेषु स्राचि naur eti नेषु स्राचि naur eti नेषु स्राचि naur gachchhati नेषु राचि harir ydti नेषु स्राचि naur ydti हिर्मु साचि naur ydti नेष्म स्राचि माम ydti हिर्मु साचि naur dishate हिर्मु स्राच साच स्रिकेता। हिर्मु साचि naur dishate हिर्मु साच साच स्रिकेता। हिर्मु साच	FirrH RULE. Final \(\pi\ \) is dropped.

67. There is one common exception to 62,63,64: सस् sas, 'he,' and एपस् eshas, 'this,' the nominative cases of the pronouns तर् tad and एतर् etad (220, 223), drop the final s before any consonant, hard or soft; as, स करोति sa karoti, 'he does;' स गन्छित sa yachchhati, 'he goes;' एप पचित esha pachati, 'this man cooks.' But rules 64. a, 66 and 63. a, are observed: thus, सोइिंप so 'pi, 'he also;' स एप: sa eshah, 'he himself.' Sometimes sa may blend with a following vowel, as सेप: for स एप:

A remarkable agreement is observable here in the Greek δ for δs . Compare also the Latin qui for quis, and ille, iste, ipse, for illus, istus, ipsus. Bopp considers that the reason why sa dispenses with the termination s is, that this termination is itself derived from the pronoun sa.

- a. There is an option allowed when an initial sibilant is compounded with another hard consonant. In that case, the preceding final s may be dropped; as, हरि स्कन्दित hari skandati, 'Hari goes.'
- b. A rare exception to the first rule occurs, when an initial त t is compounded with a sibilant. In that case, the preceding final s becomes Visarga; as, हरि: तसर्ह मुस्तार्गि harih tsarum grihyáti, 'Hari grasps the hilt of his sword.'
- 68. The preceding rules are most frequently applicable to स्s, as the final of the cases of nouns and inflections of verbs; but they come equally into operation in substantives or adjectives, whose base or crude form ends in सम्as, इस् is, and उस् us: thus, by 64, च सुम् + ईस्रत chakshus+ikshate becomes च सुर् ईस्रत chakshur ikshate, 'the eye sees;' and च सुम् + भिम् chakshus + bhis = च सुभिम् chakshurbhis, 'by eyes.' Similarly, by 65, मनम् + जानाति manas + jánáti = मनो जानाति mano jánáti, 'the mind knows;' and मनम् + भिम् manas + bhis = मनोभिम् manobhis, 'by minds.'
- a. Observe—All nouns ending in इम is and उस us may be regarded as ending in इप ish and उप ush, which is the form they necessarily assume in declension before the terminations beginning with vowels (see 70, and compare 41. b): thus चंद्रास + आ chakshus + ú becomes चंद्रापा chakshushú, 'by the eye;' but before consonants they must be treated as ending in the dental sibilant. See 165.
- 69. स्s at the end of the first member of a compound word, before hard letters of the guttural or labial classes (कs, पp, or their aspirates), may follow 63, or is more usually retained, passing sometimes into पsh, according to 70: thus तेनस् + कर tejas + kara becomes either तेनस्कर or तेनःकर 'causing light;' प्राहुस + कृत prádus + krita becomes प्राहुस्कृत prádushkrita, 'made manifest;' दिवस + पित divas + pati = दिवस्पति 'the lord of day.'
- a. Again, in opposition to 64 and 65, a final स्s is usually retained before affixes beginning with य v and म m, passing sometimes into प sh, according to 70: thus तेजस् + चिन् tejas+vin becomes तेजस्मिन् tejaswin, 'full of light;' भास् + चर bhás+vara=भास्वर bháswara, 'radiant;' and अचिंस् + मन् archis+mat=अचिंप्सन् archishmat, 'possessing flame.'
- 70. सs, not final, passes into $\mathbf{u} s h$ when preceded by any other vowel but $\mathbf{w} a$ or $\mathbf{w}(a)$ also when preceded by the semivowel $\mathbf{v}(a)$ or $\mathbf{w}(a)$

thus खिन + मु agni + su becomes खिनमु agnishu, 'in fires;' करो + सि karo + si =करोिप karoshi, 'thou doest;' विभर् + सि bibhar + si =दि-भिष् bibharshi, 'thou bearest;' वाक् + मु $v\acute{a}k + su =$ वाह्य $v\acute{a}kshu$, 'in words.' See 60. and 60. a.

a. An intervening Anuswara or Visarga does not prevent the operation of this rule: thus, हवींपि, चक्ष्मि, हवि:पु, चक्ष्मु:

CHANGES OF FINAL ξr .

- 71. Most of the changes of final τ r are the same as those of final π s.
- a. Thus, by 63, प्रांतर् + काल prátar + kála becomes प्रात:काल prátahkála, 'the time of morning;' and प्रांतर् + स्नान prátar + snána = प्रात:स्नान prátahsnána, 'morning ablution.' But r as the final of a root, or as a radical letter, remains unchanged before a sibilant: thus, चर् + सु = चर्षे (No.70); विभर् + सि = विभिष्
- b. By 62, प्रातर् + तु $pr ext{d}tar + tu$ becomes प्रातस्तु $pr ext{d}tastu$; and प्रातर् + च $pr ext{d}tar + cha =$ प्रातस्त्र $pr ext{d}tascha$.

Note, that the transition of r into s before t is exemplified in Latin by gestum from gero, ustum from uro, &c. On the other hand, r in the middle of words is preserved before t in Sanskrit, as in kartum, &c.

- c. By 65, निर्+ उक्त nir+ukta remains निरुक्त nirukta, 'described;' निर्+ दय nir+daya remains निर्म nirdaya, 'without pity;' and निर्+ रस nir+rasa is नीरस nírasa, 'without flavour.'
- d. After the analogy of 65. a, final ar before initial r drops its own r, and lengthens the preceding a; as पुनर् + মেনি punar + rakshati becomes पुना মেনি puna rakshati, 'again he preserves.'
- e. But in opposition to 64 and 66, final खर् ar, unlike स्नस् as, remains unchanged before any soft letter (consonant or vowel): thus प्रातर् + साज्ञ prátar + áśa remains प्रातराज्ञ prátaráśa, 'morning meal ;' पुनर् + याति punar + yáti remains पुनर् याति punar yáti, 'again he goes.'
- 72. र r at the end of the first member of a compound, before क k, प p, and their aspirates, may either become Visarga, by 63, or more usually follows 69, and passes into स्s, which is liable to become प sh by 70: thus निर् म फल nir + phala becomes निष्मल nishphala, 'without fruit.' In the case of दुर् म ख dur + kha, दुःख is more common than दुष्य.
- 73. र r may optionally double any consonant, except ϵ h, that immediately follows it: thus निर् + दय nir + daya may be written निर्देश nirddaya.

The following table exhibits the more common combinations of consonants at one view. Observe, that in the top line of initial letters the aspirated consonants have been omitted, because it is an universal rule, that whatever change takes place before any consonant, the same holds good before its aspirate.

† A final n before j is very rarely written in the palatal form $\overrightarrow{\mathbf{A}}$ ii.

CHAPTER III.

ON SANSKRIT ROOTS, AND THE FORMATION OF NOMINAL BASES.

Before treating of Sanskrit nouns, it will be advisable to point out in what respect the peculiar system adopted in their formation requires an arrangement of the subject different from that to which we are accustomed in other languages.

74. In Sanskrit nouns (including substantives, adjectives, pronouns, and numerals) there is this great peculiarity, that every one of them has two distinct states prior to the formation of the nominative case; viz. 1st, a root; 2dly, coming directly from the root, a state which is sometimes called the crude form; that is to say, a state antecedent to inflection, and anterior to any of the cases, even the nominative. This form of the noun is more properly termed the nominal base, or the inflective base of the noun; that is, the changed form of the root, which serves as the basis on which the system of cases is constructed. In the first place, then, let us inquire what is the root?

There are in Sanskrit about two thousand elementary sounds, out of which, as out of so many blocks, are carved and fashioned, not only all the nouns, but all the verbs which exist in the language.

- a. Though the root may be compared to a rough block, or to the raw material, out of which nouns and verbs are constructed, yet the student must understand that in the dialect of the Vedas, and even in modern classical Sanskrit, roots are not unfrequently used by themselves as substantives and adjectives, and are very commonly so used at the end of compounds. See 84, 87, and 172.
- b. Every one of these roots or primary sounds conveys some simple idea, which appears under different modifications in the derivatives from it. Thus—to mention a few of the most common—the root f ख्रष् kship conveys the idea of 'throwing;' क् kri, of 'doing;' making;' क्री kri, of 'buying;' ह hri, of 'seizing,' 'taking;' पुज yuj, 'joining;' क्री as, वृत vrit, 'being;' भू bhú, 'becoming;' जीव jív, 'living;' नी ní, 'leading;' जि ji, 'conquering;' गम् yam, या yá, चर् char, क्रम् kram, इं. म् sri, स्कन्द skand, 'going;' चर् vad, चच् vach.

वृ brú, 'speaking;' वुष् budh, ज्ञा jhá, 'knowing;' दुज्ञ driś, 'seeing;' इप ish, कम kam, 'wishing;' म mṛi, 'dying;' दा dá, 'giving;' जन् jan, 'producing;' भा dhá, 'placing;' अह ad, भुज् bhuj, भक्ष bhaksh, 'eating;' पा pá, 'drinking;' पच् pach, 'cooking;' हन् han, 'killing;' पत् pat, 'falling;' वस vas, 'dwelling;' विज्ञ viś, 'entering;' स्या sthá, 'standing;' श्रू sru, 'hearing;' म्यूज़ spris, 'touching;' सिथ् sidh, साथ् sádh, 'accomplishing;' कृष् kup, कृष् krudh, 'being angry;' चि chi, 'collecting;' ब्रा ghrá, 'smelling;' स्था khyá, 'relating;' नज्ञ naś, 'perishing;' त्यज् tyaj, रह rah, 'quitting;' द्विष् dwish, 'hating;' निन्द nind, 'blaming;' द्र dru, 'running;' द्युत् dyut, दीप् díp, भा bhá, जुभ śubh, 'shining;' पू $p\acute{u}$, 'purifying;' प्रक् prachchh, 'asking;' जाप् $\acute{a}p$, लभ् labh, 'obtaining;' म्नु stu, श्रांस् śans, 'praising;' यत् yat, 'striving;' यम् yam, 'restraining;' ज्ञाक śak, 'being able;' तप tap, 'heating;' दह dah, 'burning;' मुच् much, 'liberating;' मुह् muh, 'being foolish;' युथ् yudh, 'fighting;' रह ruh, 'growing;' हम् has, 'laughing;' खप् swap, 'sleeping;' हुए hṛish, नन्द nand, ह्वाद hlád, 'being glad;' स्ना sná. 'bathing;' रभ् rabh, 'beginning;' खर् swar, 'sounding;' सह sah, वह vah, 'bearing;' सम् smri, 'remembering;' अर्च arch, 'honouring.'

c. Observe, that it will be convenient, in the following pages, to express the idea contained in the root by prefixing to it the infinitive sign to. But the student must not suppose that the sound kship denotes any thing more than the mere idea of 'throwing;' nor must be imagine that in deriving nouns from it, we are deriving them from the infinitive, or from any part of the verb, but rather from a simple original sound, which is the common source of both nouns and verbs.

75. A cursory glance at the above list of common roots will serve to shew that there are two particulars in which they all agree. Every one of them is monosyllabic, and every one of them contains a single vowel, and no more. In other respects they offer considerable diversity. Some consist of a single vowel only; some begin with one or two consonants, and end in a vowel, but none end in either \overline{x} a or \widehat{x} au; some begin with a vowel, and end in one or two consonants*; and some begin and end with one or two

^{*} Rule 43, which requires that if a word ends in a conjunct consonant, the last member shall be rejected, is not applicable to roots, unless they are used as complete words in a sentence. Nevertheless, in the case of roots ending in a consonant, preceded by a nasal, the latter is often euphonically dropped, as

44 becomes 44.

consonants*, inclosing a medial vowel; so that a root may sometimes consist of only one letter, as इ i, 'to go;' and sometimes of five, as स्कान्द skand, 'to move;' प्रस्क pracheth, 'to ask.'

- a. There are a few polysyllabic words recognised as roots, but they are generally the result of the accidental conjunction of a preposition with a monosyllabic root; that is to say, the preposition has been so constantly used in conjunction with the root, that it has at length come to be regarded as part of the root: thus in the roots महाम san grám, 'to fight,' and অবধীয় avadhír, 'to despise,' the prepositions मं sam and अव ava have combined with the root in this manner. A few other polysyllabic roots are the result of a reduplication of the radical syllable; (as, दिद्रा daridrá, 'to be poor;' जागृ jágri, 'to be awake;' चलाम chakás, 'to shine;' चेची veví, 'to go,' 'pervade;') and a few are derived from nouns; as, कुमार 'to play,' from कुमार kumára, 'a boy.'
- b. Roots beginning with \mathbf{q} n and \mathbf{q} s are liable, according to 58 and 70, to be changed to \mathbf{q} n and \mathbf{q} sh. Hence these roots are invariably exhibited in Native Grammars as beginning with \mathbf{q} and \mathbf{q} , because the Indian system requires that in exhibiting any general type of a class of words, that form should be taken which may occur even under the rarest circumstances. But in this Grammar, roots of which the initials are \mathbf{q} n and \mathbf{q} s will be exhibited as beginning with these letters, by reason of their more frequent occurrence.
- c. Indian grammarians attach certain symbolical letters and syllables (called anubandhas or 'appendages') to particular roots to indicate peculiarities in their conjugation. Thus the letter \mathbf{x} i, placed after a root, marks the insertion of a nasal; as in the root nid, which could be written $\widehat{\mathbf{fnfc}}$ nidi, to shew that in conjugation \mathbf{q} n is inserted (pres. $nind \acute{a}mi$, &c.). Similarly, $\widehat{\mathbf{x}}\widehat{\mathbf{x}}$ ir marks two forms of the 3d preterite; thus \acute{suchir} shews that \acute{such} may make either $a\acute{sochisham}$ or $a\acute{sucham}$ in that tense. So also, $\widehat{\mathbf{xn}}$ au indicates a root which rejects the inserted (isee $a\emph{soc}$); $\widehat{\mathbf{xn}}$ o marks the substitution of na for ta in the pass. participle; \mathbf{x} u, the optional insertion of i in the indeclinable participle; \mathbf{xn} u, the optional insertion of i in the two futures, &c.
- 76. The learner is recommended to study attentively the commonest of these roots, or elementary sounds, as given at 74. b. He may rest assured, that by pausing for a time at the root, his progress afterwards will be more rapid, when he ascends to the branches which spring from it. For it must never be forgotten, that every word in Sanskrit, whether substantive, adjective, verb, or adverb, stands in close filial relationship to some radical sound. In fact, every root is a common bond of union for a large family of words, which might otherwise appear unconnected; and words

^{*} One root, ऋतु śchyut, 'to drop,' begins with three consonants.

which, when viewed apart from the root, are isolated symbols, demanding a separate effort of memory for each separate idea which they express, fasten themselves readily on the mind when regarded as so many parts of one original idea, so many branches of a common stock.

Thus, to take any one of the foregoing roots—as, for example, budh, 'to know'—we shall find that from it may be drawn out with great regularity, 1st, a set of simple substantives; 2dly, of simple adjectives; 3dly, of simple verbs: thus, bodha or bodhana, 'knowledge;' buddhi, 'intellect;' bodhaka, 'an informer;' bauddha, 'a Buddhist;' budha, 'wise;' buddhimat, 'intellectual;' and the following verbs, bodhati, 'he knows;' budhyate, 'it is known;' bodhayati, 'he informs;' bubhutsate or bubodhishati, 'he wishes to know;' bobudhyate, 'he knows well.' And the simple idea contained in the root may be endlessly extended by the prefixing of prepositions; as, prabodha, 'vigilance;' prabudhyate, 'he awakes.'

77. In the next place we are to inquire what is the base or crude form of the noun. The student should understand, at the outset, the meaning and use of this form. It is an intermediate state between the root and nominative case, the naked form of the noun, which serves as the basis on which to construct its eight cases, beginning with the nominative. In a Greek or Latin dictionary we look for the noun under the nominative case, but in Sanskrit we look for it under its crude state. Thus, bodha, bodhana, tat, panchan, bhavat, are the crude bases under which the nominative cases bodhas, bodhanam, sas, pancha, bhaván, are to be sought. here it may be observed, that the base of a noun is no mere grammatical invention. It is, perhaps, more practically useful than the cases derived from it. It is that form of the noun which is always used in the formation of compound words, and in this respect may be regarded as the most general of cases. And since every Sanskrit sentence contains more compound words than simple, it may with truth be said, that the crude base is the form under which the noun most usually appears.

We may conceive it quite possible that Greek and Latin grammarians might have proceeded on a similar plan, and that they might have supposed a root $\lambda\epsilon\gamma$, from which was drawn out the nouns $\lambda'\epsilon\xi_{I\xi}$, $\lambda\epsilon\xi_{I\kappa}\delta_{5}$, $\lambda\epsilon\kappa\tau\delta_{5}$, $\kappa\alpha\tau\alpha\lambda\delta\gamma\dot{\gamma}$, $\epsilon\lambda\delta\gamma$, $\epsilon\lambda\delta\gamma$, and the verbs $\lambda'\epsilon\gamma\omega$, $\kappa\alpha\tau\alpha\lambda'\epsilon\gamma\omega$, $\epsilon\lambda\delta\gamma'\epsilon\omega$: so also, a root scrib, from which was derived the nouns scriptio, scriptum, scriptor, scriptura; and the verbs scribo, perscribo, ascribo: or a root nan, from which would come nanta, navis, nauticus, navalis, navigo, &c. Again, they might have supposed a crude base to each of

these nouns, as well as a root; as, for instance, $\lambda \epsilon \xi t$ and $\lambda \epsilon \xi \iota \kappa \delta$ of $\lambda \epsilon \xi \iota \xi$ and $\lambda \epsilon \xi \iota \kappa \delta \varsigma$, and navi of navis; and they might have required the student to look for $\lambda \epsilon \xi \iota \varsigma$ under $\lambda \epsilon \xi \iota$, $\lambda \epsilon \gamma \omega$ under $\lambda \epsilon \gamma$, navis under navi, and navigo under nau. Further than this, they might have shewn that the base was the form used in the formation of compound words, as in $\lambda \epsilon \xi \iota \kappa \delta \gamma \rho \Delta \phi \delta \varsigma$, naviger. But Greek and Latin are too uncertain in their construction to admit of such an analysis being completely carried out.

- 78. It will be perceived from the foregoing remarks that the consideration of Sanskrit nouns must divide itself into two heads: 1st, the formation of the base; 2dly, the inflection or declension of the base; that is, the adaptation of the base or modified root to a common scheme of case-terminations.
- a. In fact, it will appear in the sequel, that the same system applies both to nouns and verbs. As in verbs (see 248) the formation of a verbal base from a root precedes the subject of verbal inflection or conjugation, so in nouns it is necessary to the clear elucidation of the subject that the method of forming the nominal base from the root should be explained antecedently to declension.
- b. Indeed, it must be remembered that nouns, substantive and adjective, in Sanskrit are classified into separate declensions, according to the finals of their bases, not according to the finals of their cases; and it becomes essential to determine the form of the final syllable of the nominal base before the various declensions can be arranged.
- 79. The bases of nouns, substantive and adjective, are formed either by adding certain affixes to the root, the vowel of which is liable, at the same time, to be gunated or vriddhied (see 28. a); or by adding certain affixes to the bases of nouns already formed. When, however, the root itself is used as a noun, no affix is required, but the root is then also the base. Hence it follows that the final syllable of nominal bases will end in almost any letter of the alphabet. Those bases, however, that end in vowels may be conveniently separated under four classes, each class containing masc., fem., and neuter nouns; the 1st ending in $\frac{1}{2}i$, $\frac{1}{2}i$, and $\frac{1}{2}i$; the 2d in $\frac{1}{2}i$; the 3d in $\frac{1}{2}i$; and the 4th in $\frac{1}{2}i$. Those that end in consonants may also be arranged under four classes; the 1st, 2d, and 3d, ending in $\frac{1}{2}i$ or $\frac{1}{2}i$, $\frac{1}{2}i$, $\frac{1}{2}i$, respectively (compare 44); and the 4th comprising all other final consonants.
- a. It will be afterwards shewn, that the first class of nouns, comprising bases in a, a, and i, is by far the most numerous and important. See 109.

Bearing in mind, therefore, that Sanskrit declension consists in building up a system of cases on a base, by attaching the case-terminations to that base—bearing in mind, moreover, that the whole distinction of declensions depends on the distribution of the bases of nouns under eight classes, according to their final syllables—we are now to explain more precisely, under each of these classes, the method of forming the nominal inflective base by regular derivation from the root.

Observe—It is not intended that the student should dwell long on the following pages printed in small type. He is recommended to read them over rapidly, and to note carefully the final letters of the base under each of the eight classes.

Observe, moreover, that although all the bases of Sanskrit nouns, without exception, are derived from roots, there are many in which the connection between the noun and its source, either in sense or form, is not very obvious *. The following rules have reference only to those bases whose formation proceeds on clear and intelligible principles.

FORMATION OF THE BASE OR CRUDE FORM OF NOUNS.

80. First Class.—Comprising Masculine and Neuter bases in জাa;
Feminine in জা á and ই í.

Formed by adding to ROOTS-

- I. $\overline{\mathbf{M}}$ a, forming, 1st (nom. -as), after Vriddhi of medial a of a root, and Guṇa of any other vowel, a large class of masculine substantives; as, from the root div, 'to sport,' deva, 'a deity.' If a root ends in ch or j, these letters are changed to k and g respectively; as, from pach, 'to cook,' paka, 'cooking;' from yuj, 'to join,' yoga, 'joining.' See 43. d.
- II. \(\formall a\), forming, 2dly (nom. masc. -as, fem. -\(\delta\), neut. -am), after Guna of a final, and sometimes Guna of a medial vowel, nouns of agency and adjectives; as, from plu, 'to swim,' plava, 'what swims;' from srip, 'to creep,' sarpa, 'what creeps.' See 580. Adjectives of this form generally occur at the end of compounds; as, arin-dama, 'foe-taming;' bhayan-kara, 'fear-causing.' Compare corresponding formations in Greek and Latin; as, 'ππό-δαμος, veri-dicus, grandiloquus, omni-vorus, &c. When \(\formall \) ev and \(\formall \) \(\formall \) \(\formall \) \(\formall \) and \(\formall \) \(\formal

^{*} Thus purusha, 'a man,' is said to come from pur, 'to precede;' śrigála, 'a jackal,' from srij.' to create.'

they are susceptible of a passive sense, both in Sanskrit and Greek; as, मुकर 'easy to be done;' συσκτ'hard to be done,' &c. Similarly, εὐφορος, δύςτομος, &c.

- IV. সন্ধ aka (nom. -akas, $-ak\acute{a}$ or $-ik\acute{a}$, -akam), after Vriddhi of a final vowel or medial a, and Guṇa of any other vowel. Still more common than a to form adjectives and nouns of agency (see 582.b); as, from tap, 'to burn,' $t\acute{a}paka$, 'inflammatory;' from kri, 'to do,' $k\acute{a}raka$, 'a doer.' Observe, $-ak\acute{a}$ is generally taken for the feminine of the adjectives, and $-ik\acute{a}$ for the feminine of the agents; as, $t\acute{a}pak\acute{a}$, $k\acute{a}rik\acute{a}$. Compare Greek forms like $\phi\acute{\nu}\lambda \alpha \kappa \varsigma$.
- V. ञान ana (nom. -anam), after Guṇa of the root, forming, 1st, a large class of neuter substantives; as, from ní, 'to guide,' nayana, 'the eye,' 'guidance;' from dá, 'to give,' dána, 'a gift;' from drip, 'to make proud,' darpaṇa, 'a mirror.' Compare analogous Greek formations in ανο; as, "οργανον, δρέπανον, &c.

ञ्चन ana, forming, 2dly (nom. -anas, -aná, -anam), nouns of agency (see 582. c) and adjectives; as, from nṛit, 'to dance,' nartana, 'a dancer;' from śubh, 'to shine,' śobhana, 'bright.' Compare Greek forms like ἰκανός, &c. The feminine of the agents is sometimes in -ani.

- VI. $\vec{\tau}$ na. A few abstract nouns are formed with na; as, yajna, 'sacrifice,' from yaj; yatna, 'effort,' from yat; swapna, 'sleep,' from swap. Compare "τηνος, somnus.
- VII. \overline{a} tra (nom. -tram), after Guṇa of the root; as, from pá, 'to drink,' pátra, 'a vessel;' from \overline{a} śru, 'to hear,' śrotra, 'the organ of hearing.' This affix is used to form neuter nouns denoting some instrument or organ, and corresponds to the Latin trum in aratrum, plectrum, &c.; and the Greek τρου, θρου in νίπτρου, βάκτρου, βάθρου, &c.
- VIII. There are other uncommon affixes to roots to form adjectives and a few substantives in ষ a (nom. -as, -á, -am); as, ব ra, লা la, ষল ala, ষা ara, বা vara, দা mara, হল ila, হা ira, বা ura, বাল ula, দা ma, বা va, বা tra, মান áka, দা era, বা wka, কা ika, কা ka. The following are examples of nouns formed with these affixes: dipra, 'shining' (compare Greek formations like λάμπ-ρος, &c.; and Latin pu-rus, &c.); chandra, 'the moon;' śukla, 'white;' chapala, 'fickle;' tarala, 'trembling' (compare Greek forms like τρόχ-αλος, τράπ-ελος; and Latin tremulus, &c.); vatara, 'unsteady' (compare Greek forms like φανερος, &c.); jitwara, 'victorious;' ghasmara, 'voracious;' anila, 'wind;' pathila, 'a traveller' (compare Latin forms like agilis, &c.); chhidira, 'an axe;' bhidura, 'brittle;' harshula, 'a lover;' bhima, 'terrible;' gharma, m., 'heat;' yugma, n., 'a pair;' dhúma, m., 'smoke' (compare forms like θύ-μος, ἄνεμ-ος, fumus, animus, &c.); aśwa, m., 'a horse' (equus); chitra, 'variegated;' jalpáka, 'talkative' (compare forms like loquacs, loquac, and φένακς for φένακος); patera, 'moving;' varshuka, 'rainy;'

jágarúka, 'watchful' (added especially to frequentative or reduplicate forms; as, from vávad, 'to speak often;' vávadúka, 'loquacious'); śushka, 'dry' (from śush, 'to dry.' Compare Latin siccus).

Formed by adding to the bases of NOUNS-

- IX. $rac{rac}{rac}$ (nom. -twam), forming neuter abstract substantives from any noun in the language; as, from purusha, 'a man,' purushatwa, 'manliness.' In adding this affix to bases ending in nasals, the nasal is rejected; as, from dhanin, 'rich,' dhanitwa, 'the state of being rich.' (See 57.)
- X. ष ya, forming, 1st (nom. -yam), neuter abstract substantives and a few collectives, the first syllable of the noun taking Vriddhi; as, from सुद्द् suhrid, 'a friend,' बोह्ड suhridya, 'friendship.' When the base ends in a vowel, this vowel is rejected before ya is affixed; as, from vichitra, 'various,' vaichitrya, 'variety.'
- XI. ∇ya , forming, 2dly (nom. -yas, -yá, -yam), adjectives expressing some relationship to the noun; as, from dhana, 'wealth,' dhanya, 'wealth.' Sometimes Vriddhi takes place; as, from soma, 'the moon,' saumya, 'lunar.' In this case the fem. is -yi. Compare Greek adjectives in 165, and Latin in ius.
- XII. ষ্ঠ a (nom. -as, -i, -am), after Vriddhi of the first syllable of the noun, forming innumerable adjectives expressing some relationship to the noun. When the base ends in a, no further affix is required, and the only change is the Vriddhi of the first syllable; as, from purusha, 'a man,' चींच्य paurusha, 'manly;' from Vasishtha, Vásishtha, 'a descendant of Vasishtha.' When in á or i, this á or i must be rejected; as, from sikatá, 'sand,' saikata, 'sandy.' When in u, this u is gunated, and becomes av before this and the three following affixes; as, from Vishuu, 'the god Vishnu,' Vaishuava, 'a worshipper of Vishnu,' from dáru, 'wood,' dárava, 'wooden;' from manu, mánava, 'a descendant of Manu.' When the initial letter of a word is compounded with v or y, these latter are resolved into uv and iy, which are vriddhied; as, सीचर sauvara, 'relating to sound,' from swara, 'a note;' चेयाघ vaiyáyhra, 'relating to a tiger,' from vyáyhra, 'a tiger.' Observe—This applies to the two next affixes also.

Sometimes the neuter form of these adjectives is taken as an abstract substantive; thus, nominative case, paurusham, 'manliness;' śaiśavam, 'childhood,' from śiśu, 'a child;' or, as a collective; thus, kshaitram, 'fields,' collectively, from kshetra. Observe—This applies to the two next affixes also.

- XIII. ξ¾ ika (nom. -ikas, -ikí, -ikam), after Vriddhi of the first syllable of the noun, forming numerous adjectives. Before this affix is added, the final vowel of the base must be rejected; as, from dharma, 'religion,' dhármika, 'religious;' from venu, 'a flute,' vainavika, 'a flute-player;' from घम śwas, 'to-morrow,' शाविस्तिक śauvastika, 'relating to to-morrow.' Compare Latin forms like bellicus, nauticus, &c.; and Greek πολεμικός, &c.
- XIV. ₹4 eya (nom. -eyas, -eyí, -eyam), after Vriddhi of the first syllable of the noun, forming many adjectives. The final vowel of the base must be rejected; as, from purusha, 'a man,' paurusheya, 'manly;' from agni, 'fire,' ágneya, 'fiery.' Compare forms like λεόντειος, λεόντειος; and Latin igneus, &c.

- XV. \$\frac{\pi}{a} iya (nom. -iyas, -iya, -iyam), without any change of the noun, except the rejection of final a; as, from parvata, 'a mountain,' parvatiya, 'mountainous.' Sometimes there is Vriddhi; as, from sukha, 'pleasure,' saukhiya, 'pleasurable.' When the final of the base remains, k is prefixed to this and the last affix; as, from para, 'another,' parakiya, 'belonging to another.'
- XVI. There are other uncommon affixes to nouns forming adjectives in ∇a (nom. -as, -\alpha, -am); such as \(ina, ina, rala, tana; \) forming, from \(gr\alpha ma, \) a village, \(gr\alpha mina, \) rustic; from \(rathina, \) having a chariot; from \(sikha, \) a crest, \(sikhavala, \) crested; from \(siwas, \) to-morrow, \(swastana, \) future. This last answers to the Latin \(tinus, \) and has reference to \(time. \) Compare \(crastinus, \) &c.
- XVII. \Re ka (nom. -kas, $-k\acute{a}$, -kam), added to words to form adjectives and collective nouns, or to express depreciation: thus, madhuka, 'sweet,' from madhu, 'honey;' aswaka, 'a hack,' from aswa, 'a horse.' It is often redundant.
- XVIII. स्व maya (nom. -mayas, -mayi, -mayam), added to words to denote 'made of,' 'full of;' as, from loha, 'iron,' lohamaya, 'made of iron;' from tejas, 'light,' tejomaya, 'full of light.'
- XIX. AT tara (nom.-taras, -tará, -taram), AH tama (nom.-tamas, -tamá, -tamam), W ishta (nom.-ishtas, -ishtá, -ishtam), added to adjectives to express the degrees of comparison. See 191, 192.
- XX. दम daghna (nom. -daghnas, -daghní, -daghnam), ह्रयस dwayasa (-dwayasas, -dwayasa, -dwayasam), and माल mátra (-mátras, -matrí, -mátram), added to words to denote 'measure' or 'height;' as, jánu-daghnam jalam, 'water up to the knees.'
- XXI. देशीय deśiya (nom. -deśiyas, -deśiyaś, -deśiyam) and कस्प kalpa (nom. -kalpas, -kalpá, -kalpam), added to words to denote 'similitude,' but with some inferiority; as, kavi-kalpa or kavi-deśiya, 'a sort of poet:' or denoting 'nearly,' about;' as, mṛita-kalpa, 'nearly dead;' vinśati-varsha-deśiya, 'about twenty years of age.'
- a. Observe—The affixes π ta and $\mathfrak{T}\pi$ ita (nom. -tas, -ta, -tam), forming innumerable passive participles—as, jita, 'conquered,' from ji, 'to conquer,' &c.—fall under the first class of bases. See 530.
- b. So also many other participles formed with m'ana, 'ana, tavya, an'iya, ya, &c. See 526, 527, 568.
- c. इत ita is said to be added to nouns to form adjectives; as, phalita, 'fruitful,' from phala, 'fruit;' but these may be regarded as passive participles from nominal verbs. See 551.

By adding to roots—

XXII. WI \acute{a} (nom. $-\acute{a}$), with no change of the root, forming feminine substantives; as, from $j\acute{v}$, 'to live,' $j\acute{v}a$, 'life;' from $orall \xi$ sprih, 'to desire.' Compare Greek formations like $\phi\acute{o}\rho\alpha$, $\phi\acute{v}\gamma\eta$; and Latin fuga, &c. Occasionally there is Guna; as in $lekh\acute{a}$, 'a line,' from likh, 'to write;' $jar\acute{a}$, 'old age,' from jri, 'to grow old.' This affix is frequently added to the desiderative form of a root; as, from $pip\acute{a}s$, 'to desire to drink,' $pip\acute{a}s\acute{a}$, 'thirst;' and rarely

to the frequentative or intensive; as, from lolúy, 'to cut much,' lolúyá, 'cutting much.'

A few abstract nouns are formed with না ná; as, tṛishná, 'thirst,' from tṛish: compare Greek nouns in খন.

By adding to the bases of nouns-

XXIII. π Π $t\acute{a}$ (nom. $-t\acute{a}$), forming feminine abstract substantives; as, from purusha, 'a man,' purushat\'a, 'manliness.' This affix may be added to any noun in the language, and corresponds to the Latin tas in celeritas, &c.; and the Greek της in κακότης, π λατύτης (\P ΕπΠ).

Also forming collectives; as, बन्धुता 'a number of relations,' from बन्धु 'a relation.'

XXIV. ता trá (nom.-trá), forming a few substantives, derived from neuters in tra (see VII), and like them denoting 'the instrument' or 'means;' as, देश' a tooth,' 'the instrument of biting,' from dans, 'to bite;' याता 'provisions,' 'the means of going,' from yá, 'to go.'

XXV. $\frac{2}{3}i$ (nom. -i), forming a large class of feminine substantives, usually derived from masculines in a, by changing a to i; as, from nada, 'a river,' fem. nadi; from putra, 'a son,' fem. putri; from nartaka, 'a dancer,' fem. nartaki. An affix $\acute{a}n\acute{i}$ is used to denote 'the wife of;' as, from Indra, $\frac{1}{3}$ - \frac

XXVI. ई í (nom. -í), forming, 2dly, the feminine of nouns of agency, like दातृ dátṛi, 'a giver' (129. b), and kárin, 'a doer' (160).

XXVII. \(\frac{\frac{2}{3}}{\cdot}\) (nom. -\(\epsilon\)), forming, 3dly, the feminine of many adjectives; as of \(tanu\), 'thin' (118. a), of \(dhanavat\), 'rich', and \(dh\)(mat\), 'wise' (140. b); of \(dhanin\), 'rich' (160), and of comparative degrees like \(baliyas\) (167). Observe—The feminine of some adjectives formed with the affixes \(a\), \(ya\), ika, and \(eya\) (XI. XII. XIII. XIV), and of some adjectives like \(sundara\), 'beautiful,' is also formed with \(\ell\).

XXVIII. A few roots standing by themselves as substantives, or with prepositions prefixed, or at the end of compounds, may come under this class; as, $bh\acute{t}$, 'fear,' $\acute{a}jn\acute{a}$, 'an order,' from \mathfrak{M} 'to know;' $sen\acute{a}n\acute{t}$, 'a general,' from $sen\acute{a}$, 'an army,' and $n\acute{t}$, 'to lead,' &c. It will be more convenient, however, to consider the declension of monosyllabic nouns in \acute{t} under the 2d class. See 123.

81. SECOND CLASS.—Masculine, Feminine, and Neuter bases in \(\xi\)i. Formed by adding to ROOTS—

I. ₹ i, forming, 1st (nom. -is), a few masculine substantives; as, agni, 'fire,' from an·k, 'to mark;' kavi, 'a poet,' from ku, 'to sound;' ahi, 'a snake' (εχις, anguis), from anh, 'to move;' dhwani, 'sound,' from dhwan; peshi, 'a thunderbolt,' from pesh, 'to crush,' &c. When this affix is added to the root dhά, 'to place,' 'to hold,' á is dropped, and various prepositions are prefixed; as in sandhi, vidhi, nidhi, &c.

Also a few feminine nouns; as, krishi, 'ploughing,' from krish: lipi, 'writing,' from lip, &c. Compare Greek forms like $\chi \alpha \rho \iota \varsigma$, $\epsilon \lambda \pi \iota \varsigma$, $\mu \tilde{\gamma} \nu \iota \varsigma$ (मन्युस्).

- 11. ₹ i, forming, 2dly (nom. -i), one or two neuter substantives; as, from vri, 'to surround,' vári, 'water;' from aksh, 'to pervade,' akshi, 'an eye' (oculus, ὄκος).
- III. ₹ i, forming, 3dly (nom. -is, -is, -i), a few adjectives; as, from śuch, 'to be pure,' śuchi, 'pure;' from budh, 'to know,' bodhi, 'wise.'
- IV. Я mi (nom.-mis), forming a few nouns; as, bhúmi, f., 'the earth,' from bhú, 'to be' (humus); raśmi, m., 'a ray,' &c.
- V. fa ti (nom.-tis), forming abstract substantives feminine. This affix bears a great analogy to the passive participle at 531. The same changes of the root are required before it as before this participle; and, in fact, provided the passive participle does not insert i, this substantive may always be formed from it, by changing ta into ti. But if i is inserted before ta, no such substantive can be formed *: thus, from vach, 'to speak,' ukta, 'spoken,' ukti, 'speech;' from man, 'to imagine,' mata, 'imagined,' mati, 'the mind;' from dá, 'to give,' datta, 'given,' datti, 'a gift.' And when ua is substituted for ta of the passive participle, ni is substituted for ti; as, from glai, 'to be weary,' glána, 'wearied,' gláni, 'weariness;' from lú, 'to cut,' lúna, 'cut,' lúni, 'cutting:' but not always; as, from \(\frac{\pi}{\pi}\) 'to fill,' púrna, 'full,' púrtti, 'fulness.' This affix corresponds to the tio of the Latin, added in the same way to passive participles; as, actus, actio; junctus, junctio (uuktis). Greek exhibits analogous forms in \(\xi\)evictis, \(\pi\)(\pi\)evictis.

A few masculine nouns are formed with ti; as, yati, a sage, from yam, to restrain; judii, a relation, from judi; pati, a husband $f(tor\ pati)$, from pati.

Formed by adding to the bases of a few nouns ending in a-

VI. इ i (nom. -is), after Vriddhi of the first syllable, and after rejection of the final vowel. This affix forms a few patronymics; as, दीषानि daushyanti, 'the son of Dushyanta,' from हुष्यन्त dushyanta.

82. Third Class.—Masculine, Feminine, and Nenter bases in **\(\frac{1}{3}\)** u. Formed by adding to roots—

- 1. $\exists u$, forming, 1st (nom. -us), substantives of the masculine, and one or two of the feminine gender; as, from bandh, 'to bind,' bandhu, m., 'a kinsman;' from kri, 'to do,' $k\acute{a}ru$, m., 'an artificer;' from bhid, 'to cleave,' bhidu, m., 'a thunderbolt;' from tun, 'to stretch,' tunu, f., 'the body.'
- II. \Im u, forming, 2dly (nom. -u), one or two neuter substantives; as, $d\acute{a}ru$, 'wood,' from $dr\acute{t}$, 'to cleave' $(\delta\acute{\rho}v)$; madhu, 'honey' $(\mu\acute{e}\theta\nu)$, &c.

^{*} Nevertheless, गृहीित from गृहीत occurs, though not given in the Dictionary.

Latin has added an i to all adjectives formed with u in the cognate languages; as, *tenuis* from *tanus*; gravis (for garvis) from gurus. It has, however, substantives in u; as, currus, acus, &c.

- IV. $\overline{\mathbf{g}}$ nu (nom. -nus, -nus, -nu), forming adjectives and substantives; as, from tras, 'to fear,' trasnu, 'timid;' from $bh\acute{u}$, 'to shine,' $bh\acute{u}nu$, m., 'the sun;' from dhe, 'to drink,' dhenu, f., 'a cow;' from $s\acute{u}$, 'to bear,' $s\acute{u}nu$, m., 'a son.' (Compare Greek forms like $\lambda t\gamma \nu \nu \acute{v} \varsigma$.)
- V. **\(\)** \(\) ishyu (nom. -ishyus, -ishyus, -ishyu), with Guna of the root, forming adjectives; as, from kshi, 'to perish,' kshayishyu, 'perishing.'
- VI. There are many other affixes to roots, forming nouns in u (nom. -us, -us, -u); as, ϵ ru, ϵ ru, r

There are a few nouns in long u, which may conveniently be placed under this class. They consist chiefly of roots standing by themselves as substantives, or at the end of compounds: thus, $\frac{1}{2}$ f. 'the earth,' स्वयम्भू m. 'the self-existent,' &c. See 125, a, 126, b.

83. Fourth Class.—Masculine, Feminine, and Neuter bases in आ ri.

Formed by adding to ROOTS-

- I. तृ tṛi, forming, ist (nom. -tú, -tṛi), nouns of agency of three genders, the same change of the root being required which takes place in the first future, and the same euphonic changes of t (see 386 and 581): thus, from kship, 'to throw,' ksheptṛi, 'a thrower;' from dá, 'to give,' dátṛi, 'a giver;' from चुए 'to know,' बोच्च boddhṛi, 'a knower;' from सह 'to bear,' सोच्च 'patient.' This corresponds to the Latin affix tor, and the Greek τηρ: compare dator, δοτήρ.
- II. 7 tri, forming, 2dly (nom. -tú), nouns of relationship, masculine and feminine; as, pitri, 'a father,' mátri, 'a mother.'

84. Fifth Class.—Masculine, Feminine, and Neuter bases in 7 t and 7 d.

Formed by adding to ROOTS-

I. $\overline{\eta}(t)$ (nom.-t, in all genders), if the root ends in a short vowel: forming nouns of agency, substantives and adjectives, of three genders; as, from k_Ti , 'to do,' k_Tit , 'a doer;' from ji, 'to conquer,' jit, 'a conqueror.' This class of nouns are never used, except as the last member of a compound: thus, $karmak_Tit$, 'a doer of work.'

Roots already ending in t or d, taken to form adjectives or nouns of agency, fall under this class; as, from rid, 'to know,' dharmarid, 'one who knows his duty;'

from ऋदु 'to eat,' क्रव्याद् 'an eater of flesh.' There are also a few nouns falling under this class, formed by prefixing prepositions to roots ending in t or d or a short vowel; as, from vid, 'to know,' संविद् f. 'an agreement;' from युत् dyut, 'to shine,' vidyut, 'lightning;' from pud, 'to go,' sampad, 'success.' So also, सिमत् 'battle,' from इ' to go;' उपनिषद 'a theological work,' from सह sad.

One or two roots ending in त् or द् may stand by themselves as substantives: thus, मुद्द mud, f., 'joy;' चित् chit, f., 'the mind.'

The practice of using roots at the end of compounds prevails also in Greek and Latin; as in $\chi \not\in \rho$ - $\nu \iota \psi$ (- $\nu \iota \beta$), $\beta o \nu - \pi \lambda \gamma \not\in (-\pi \lambda \gamma \gamma)$, &c., arti-fex (-fic), carni-fex (-fic), prae-ses (-sid), &c. And there is a very remarkable agreement between Sanskrit and Latin in the practice of adding t to roots ending in short vowels: thus, com-it (comes), 'a goer with;' eqn-it (eqnes), 'a goer on horseback;' al-it (ales), 'a goer with wings;' super-stit (superstes), 'a stander by,' &c. Greek adds a similar t to roots with a long final vowel; as, $\alpha - \gamma \nu \omega \tau$, $\alpha - \pi \tau \omega \tau$, &c. (See Bopp's Comparative Grammar, Eastwick, 1293.)

- II. इत्it (nom. -it, in all genders), after Guṇa of the root, forming a few substantives and adjectives; as, from मृ sṛi, 'to flow,' सरित् sarit, f., 'a stream;' from ह 'to seize,' हरित् 'green,' 'Vishnu.'
- III. There are a few other nouns in त्t and ह d, of uncertain derivation; as, मरुत् m. 'the wind,' शरह f. 'autumn,' दूशह f. 'a stone,' कुमुद् n. 'a lotus.'

By adding to the base of Nouns-

- 1. বπ vat (nom. -ván, -vatí, -vat), if the base ends in a or d*, forming innumerable adjectives; as, from dhana, 'wealth,' dhanavat, 'possessed of wealth.' This and the next affix are universally applicable, and are of the utmost utility to form adjectives of possession. Sometimes vat is added to bases in s and t; as in ππεπ tejaswat (compare 69. a) and vidyutwat (see 45). Compare Greek forms in εις, εντ; as, χαρίεις, χαρίεντ, δακρυόεις, δακρυόεντ, &c.
- II. मत् mat (nom. -máu, -matí, -mat), if the base ends in i, i, or u, to form adjectives like the preceding; as, from dhí, 'wisdom,' dhímat, 'wise;' from auśu, 'a ray,' auśumat, 'radiant.'

85. Sixth Class.—Masculine, Feminine, and Neuter bases in স্থান and হ্ন in.

Formed by adding to ROOTS-

1. जन् an (nom. -a), forming a few masculine nouns; as, $r\'{ajan}$, 'a king,' from $r\'{aj}$, 'to be glorious;' takshan, 'a carpenter,' from taksh, 'to cleave;' ukshan, 'a bull' (compare English oxen), from nksh, 'to impregnate;' snehan, 'a friend,' from suih, 'to love,' &c. Greek and Latin have similar formations in $\omega\nu$, $\varepsilon\nu$, $\eta\nu$, $\alpha\nu$, on and in; as, $\tau\'{\epsilon}\kappa\tau\sigma\nu = \overline{a}$ ह्य $(\tau\'{\epsilon}\kappa\tau\omega\nu)$, $\epsilon\'{i}\kappa\'{o}\nu$ ($-\kappa\omega\nu$), homin (homo), &c.

^{*} Vat is not often found added to feminine bases. It occurs, however, occasionally; as, कानायत 'having a wife,' शिखायत 'crested.'

- 11. मन् man (nom. -ma), after Guna of the root, forming neuter substantives; as, from kṛi, 'to do,' karman, 'a deed.' This affix corresponds to the Latin mēn, in regimen, agmen, stamen, &c.; and to the Greek μων, in μνήμων, τλήμων, &c.: but adjectives in man, like शर्मन् 'prosperous,' are very rare in Sanskṛit. A few nouns in man are masculine; as, átman, 'soul' (nom. -má); उपन् 'the hot season;' श्र्मन 'fire;' पाप्पन् 'sin;' सीमन 'a border;' वेमन् 'a loom.'
- III. वन् ran (nom. -rá, -rá, -ra), forming a few substantives and adjectives; as, दृश्चन् `seeing,' `a looker,' from driś, `to see.'

By adding to roots or to the base of Nouns-

IV. इसन iman (nom.-imá), forming masculine abstract substantives. If the noun ends in a or n, these vowels are rejected; as, from kála, 'black,' káliman, 'blackness;' from laghu, 'light,' laghiman, 'lightness;' from mṛidu, 'soft,' mradiman, &c. If it ends in a consonant, this consonant, with its preceding vowel, is rejected; as, from muhat, 'great,' mahiman, 'greatness.' A medial ri before a simple consonant is changed to ra, but not before a double consonant; as, from कृष्ण 'black,' कृष्णिमन् 'blackness.' A final ri is gunated; as, sariman from sṛi; stariman from sṛi; compare stramen); hariman, 'time,' from hṛi, &c. Iman is generally added to adjectives, and the same changes take place before it, that take place before the affixes iyas and ishṭha (see 192): thus, gariman, preman, drúghiman, bhúman, prathiman, &c.

By adding to ROOTS-

V. $\xi \overline{\eta}$ in (nom. -i, -ini, -i), after Vriddhi of a final vowel and medial a, and Guṇa of any other medial vowel, forming nouns of agency of three genders (see 582. b); as, from $k_{I}i$, 'to do,' $k\acute{a}rin$, 'a doer.' Compare Greek and Latin formations in \wp and on; as, $\tau' \in \mathcal{K} \tau \wp \wp' (-\mathcal{K} \tau \wp \wp)$, $edon\ (edo)$, &c.

By adding to the base of Nouns-

- VI. ξτ in (nom. -i, -ini, -i), forming innumerable adjectives of possession. The final of a base is rejected before this affix; as, from dhana, 'wealth,' dhanin, 'wealthy;' from málú, 'a garland,' málin, 'garlanded;' from vríhi, 'rice,' vríhin, 'having rice.' Compare Greek and Latin formations in ων and on; as, γνάθ-ων, 'having cheeks;' nason (naso), 'having a nose.'
- VII. विन् vin (nom. -ví, -viní, -vi), if the base ends in á or as, forming a few adjectives; as, from medhá, 'intellect,' medhávin, 'intellectual;' from tejas, 'splendour,' tejaswin, 'splendid.' Compare 69. a.
 - 86. Seventh Class.—Masculine, Feminine, and Neuter bases in अस as, इस is, and उस us.

Formed by adding to ROOTS-

1. 函刊 as (nom. -as), after Guna, forming a great many neuter substantives; as, from man, 'to think,' manas, 'the mind;' from sri, 'to go,' saras, 'water.' It also forms one or two masculine and feminine nouns; as, redhas, m., 'Brahmá;'

chandramas, m., 'the moon;' apsaras, f., 'a nymph;' ushas, f., 'the dawn,' from ush, 'to glow:' but in these the nominative is long (-ús).

II. इस is or उस us (nom. -is, -us). In place of as, the neuter affixes is or us are occasionally added; as, from hu, 'to offer,' havis, 'ghee;' from chaksh, 'to speak,' chakshus, 'the eye.' See 68. a. With as compare the Latin es in nubes (नभस nabhas), sedes (सदस sadas), &c.; but especially the us and ur of words like genus, scelus, robur. Compare also the Greek formations πάθ-ος, ἔδ-ος, μέν-ος, ψεῦδ-ος, &c.

87. Eighth Class.—Masculine, Feminine, and Neuter bases in any Consonant, except त्t and ह d, न् n, स्s.

Formed by using ROOTS as adjectives, substantives, or nouns of agency-

Any root may be used to form an adjective or a noun of agency, provided it be the last member of a compound word: thus, from शक् 'to be able,' sarvaśak, 'omnipotent.' Those roots which end in t or d, or in a short vowel, having t affixed, have been already noticed as falling under the fifth class. This eighth class is intended to comprise all other roots, ending in any consonant; as, भुन् bhuj (nom. bhuk); रान् rój (nom. राट्); प्राच्छ (nom. पाट्); चुप (nom. भुन्); पुर (nom. पूर्स); निर् (nom. gís); दिच् (nom. dyaus); स्पुश (nom. sprik); विश् (nom. विट्); तिह् (nom. किट्); तुह (nom. पुक्); पिपस (nom. pipak). There are also one or two other nouns derived from roots falling under this class; as, तृष्णान् 'thirsty' (nom. तृष्णाक्); श्वित्व 'a priest' (nom. श्विक्); श्रमून n. 'blood' (nom. स्मृक्); and a few substantives formed by prefixing prepositions to roots; as, सिम्प ('fuel' (nom. सिम्त्), from the root इन्य 'to kindle' (see 43 and 75, with note).

A few roots standing by themselves as substantives may fall under this class: thus, $\mathbf{g}\mathbf{v}$ f. 'battle' (nom. $\mathbf{g}\mathbf{v}$); $\mathbf{g}\mathbf{v}$ f. 'hunger' (nom. $\mathbf{g}\mathbf{v}$); $\mathbf{g}\mathbf{v}$ f. 'speech' (nom. $\mathbf{g}\mathbf{v}$), from vach, 'to speak,' the medial a being lengthened. Greek and Latin use a few monosyllabic roots in the same manner; as, $\delta \mathbf{v}$ ($\delta \mathbf{\pi}$), $\phi \lambda \delta \xi$ ($\phi \lambda \delta \gamma$), &c.; and Latin vox (voc), lex (leg), dux (duc).

CHAPTER IV.

DECLENSION; OR INFLECTION OF THE BASE OF NOUNS, SUBSTANTIVE AND ADJECTIVE.

GENERAL OBSERVATIONS.

88. Having explained how the base of nouns is generally formed, we have now to shew how it is inflected.

As, in the last chapter, nouns, substantive and adjective, were arranged under eight classes, according to the final of their bases (the first four classes comprising those ending in vowels, the last four those ending in consonants), so it will be the object of the present chapter to exhibit their declension or inflection under the same eight classes. Moreover, as every class comprised adjectives as well as substantives, so it is intended that the declension of a masculine, feminine, and neuter substantive, exhibited under each, shall serve as the model for the declension of masculine, feminine, and neuter adjectives coming under the same class.

89. The learner will have already gathered that the noun has three genders, and that the gender is, in many cases, determinable from the termination of the base. Thus, all bases in \acute{a} , \acute{a} , and those formed with the affix ti (No. 81. V), are feminine: nearly all nouns whose crudes end in ana, twa, ya, tra (see under 80), as, is, us (86), and man (85. II), are neuter; all in iman (85. IV) are masculine; but those in a, i, u, and ri, are not reducible to rule. The nominative case is, however, in the first of these instances a guide to the gender; as, devas, 'a deity,' is masculine; but $d\acute{a}nam$, 'a gift,' neuter. And in other cases the meaning of the word; as, pitri, 'a father,' is masculine; and $m\acute{a}tri$, 'a mother,' feminine.

90. In Sanskrit, all the relations between the words in a sentence are expressed by inflections. A great many prepositions exist in the language, but they are rarely used alone in government with any case, their chief use being as prefixes to verbs and nouns. The dearth of such useful syntactical auxiliaries leads to the necessity for eight cases, which are regularly built upon the base. These are called, 1. nominative; 2. accusative; 3. instrumental; 4. dative; 5. ablative; 6. genitive; 7. locative; 8. vocative*. Of these, the third and seventh are new to the classical student. The instrumental denotes generally the instrument by which a thing is done; as, tena kritam, 'done by him.' The locative generally refers to the place or time in which any thing is done; as, Ayodhyáyám, 'in Ayodhyá;' púrvakále, 'in former time;' bhúmau, 'on the ground †.' Hence it follows that the ablative is restricted to the sense from,

^{*} These cases will sometimes be denoted by their initial letters. Thus N. will denote nominative; I., instrumental.

 $[\]dagger$ Both these cases are used to denote various other relations. See the Chapter on Syntax.

and cannot be used, as in Latin and Greek, to express by, with, in, at, on, &c.

91. According to the Indian system of teaching, each of these eight cases has three numbers, singular, dual, and plural; and to each belongs a termination which is considered to be peculiarly its own, serving alike for masculine, feminine, and neuter nouns. Again, according to the native system, some of the terminations may be combined with memorial letters to aid pronunciation or assist the memory. Thus the proper termination of the nominative singular is π s (expressible by Visarga before k, p, and the sibilants, or at the end of a sentence, see 63); but the memorial termination is π su, the letter u being only memorial. Similarly, the termination of the nominative plural is jas, the j being memorial. The two schemes of termination, with and without the memorial letters, are here exhibited. The first is given in small type, as being of no importance excepting as subservient to the second.

Terminations with memorial letters.

92. Observe—The vocative is not given in the above general scheme, as it is held to be only another aspect of the nominative, and always coincides with the nom. in the dual and plural. In the singular it is often identical with the base, and has no termination.

a. Observe also—The terminations beginning with vowels will often be called *vowel-terminations*; those beginning with consonants, including the nom. sing., will be called *consonantal-terminations*.

Similarly, those cases which take the vowel-terminations will sometimes be called *vowel-cases*; and those which take the consonantal, *consonantal-cases*.

93. Having propounded the above scheme, which for convenience will be called the memorial scheme of terminations, as the general type of the several case-affixes in the three numbers, Indian grammarians proceed to adapt them to every noun, substantive and adjective, in the language, as well as to pronouns, numerals, and participles, whether masculine, feminine, or neuter. In fact, their theory is, that there is but one declension in Sanskrit, and that the base of a noun being given, and the regular case-terminations being given, the base is to be joined to those terminations according to the usual rules for the combination of final and initial letters, as in the following examples of the two bases, नो nau, f., 'a ship' (navi, vau), and हरित harit, m. f., 'green.'

94.

- 96. Unfortunately, however, it happens, that of nouns whose bases end in vowels, $\widehat{\Pi}$ nau, 'a ship,' is nearly the only one that admits of this regular junction of the base with the case-endings; and, although nouns whose bases end in consonants are numerous, and are generally declined as regularly as harit, yet they are numerically insignificant, compared with nouns in a, \acute{a} , \acute{i} , \acute{i} , u, and $r\acute{i}$, whose declension requires frequent changes in the final of the base, and various modifications, or even substitutions, in the terminations.
- 97. Thus in the first class of nouns ending in a (which will be found to comprise more nouns than all the other seven classes together; compare 80 with 81-87), not only is the final a of the base liable to be lengthened and changed to e, but also the termination ina is substituted for \acute{a} , the proper termination of the instrumental sing. masc.; ya for e of the dative; t for as of the ablative; sya for as of the genitive; n for as of the accus. plural; ais for bhis of the instrum. plural. And in many other nouns particular changes and substitutions are required, some of which are determined by the gender.

The annexed table exhibits synoptically the terminations, with the most usual substitutions, throughout all the classes of nouns. Those substitutions marked * are mostly restricted to nouns ending in a, and are therefore especially noticeable.

```

- a. Comparing the above terminations with those of Latin and Greek, we may remark that s enters into the nom. sing. masc., and m or n into the neuter, in all three languages. In regard to the Sanskrit dual au, the original termination was \acute{a} , as found in the Vedas; and \acute{a} equals the Greek α , ω , and ϵ . In nom. pl. masc. the s appears in many Latin and Greek words. In acc. sing., Sanskrit agrees with Latin, and frequently with Greek, as the Sanskrit m may be euphonically changed to $n(\nu)$, if influenced by a dental following (see note to page 18). In the acc. pl. s appears in all three languages; and when the Sanskrit ends in n, as in the first class of nouns, this n is probably for ns, since a preceding a is lengthened to compensate for the rejection of s. In inst. pl. bhis is preserved in the Latin nobis, vobis, and the Greek $\phi_{\ell}(\nu)$ for $\phi_{\ell}(\nu) = \nu = \nu = \nu$. The ais which belongs to Sanskrit nouns in a is probably a contraction of ábhis, since in the Vedas aśwebhis for aśwábhis is found for aśwais, and rrikebhis for rrikais. The dat. pl. bhyas answers to the Latin bus. In the gen. sing. all three languages have preserved the s (návas, navis, $\nu\alpha Fo\varsigma$ for $\nu\gamma \acute{o}\varsigma$); and in the gen. pl. ám is equivalent to the Greek $\omega \nu$, and the Latin um ($\mathbf{q} \mathbf{c} \mathbf{i} = \pi \circ \delta \tilde{\omega} \nu$, pedum). In loc. sing, the Sanskrit i is preserved in the dative of Greek and Latin words (fais) = $\nu \nu \kappa \tau i$ — Compare the expression $\tau \tilde{\eta}$ מטל $\tilde{\tau} \tilde{\eta}$ $\nu \nu \kappa \tau i$ — नावि = nari). In loc. pl. su answers to the Greek $\sigma \iota$ ($\exists i = \nu \alpha \nu \sigma \iota$). Sanskrit bases in a prefix i to su; so that vrikaishu (29, b) = λυκοῖσι. The voc. sing. in Greek is generally identical with the base, and the voc. dual and pl. with the nom., as in Sanskrit: thus λόγε is the voc. sing. of λόγος, τριήρες of τριήρης, χαρίεν of χαρίεις, βασιλεῦ of βασιλεύς, &c. See Bopp's Comparative Grammar, Eastwick, passim.
- 98. In the following pages no attempt will be made to bring back all nouns to the general scheme of terminations by a detailed explanation of changes and substitutions in every case. But under every one of the eight classes a model noun for the masculine, feminine, and neuter, serving for adjectives as well as substantives.

will be declined at full; and under every case of every noun the method of joining the final letter of the base with the proper terminations will be indicated in English letters.

- 99. The student must, however, understand, that the division into eight classes, which here follows, is not meant to imply the existence of eight separate declensions in the sense understood by the classical scholar, but is rather intended to shew, that the final letters of the inflective bases of nouns may be arranged under four general heads for vowels, and four for consonants; and that all Sanskrit nouns, whatever may be the final of their bases, are capable of adaptation to one common scheme of nearly similar ease-terminations.
- a. In the same manner it will appear in the sequel, that the ten classes into which verbs are divided do not imply ten different conjugations, but rather ten different ways of adapting the bases of verbs to one common scheme of tense-terminations. There is no reason why the same system of generalisation should not have been carried out in Latin and Greek, had the inflection of nouns and verbs in these languages been built upon roots and crude bases.
- 100. The classical scholar may, if he please, satisfy his own ideas of declension, by regarding masculine and neuter nouns in a, like siva of the first class, as his 1st declension; feminine nouns in a and i, like siva and nudi of the first class, as his 2d declension; masculine and feminine nouns in i and u, like kavi, mati, bhánu, and dhenu, of the second and third classes, as his 3d declension; and all the remaining nouns, including the neuters of those in i and u, and all those contained in the last five classes, as his 4th declension. These four declensions may be traced in regular order in the following pages, and will be denoted by the capital letters A at 103; B at 105; C at 110; D at 114.
- 101. Observe, that in declining the model nouns, under every inflection, the crude base with the sign +, and after it the termination, will be exhibited in English letters. Moreover, the number of the rule of Sandhi which must come into operation in joining the final of the base with the initial of the termination will generally be indicated. For it is most important to remember, that the formation of every case in a Sanskrit noun supposes the application of a rule of Sandhi or 'junction;' and that the very meaning of declension is the junction of the final syllable of the crude base with the terminations.
- 102. Not unfrequently, however, in some of the cases, the original final of the base is changed to its Guna or Vriddhi equivalent (see 27), or to some other

letter (see 43. b. c. d. e), before the termination is affixed; and not unfrequently the original termination of the scheme is changed for some other termination, as indicated at 97.

In order, therefore, that the student, without forgetting the original final of the crude base, or the original termination of the memorial scheme, may at the same time observe, 1st, whether in any particular instances the final of the base undergoes any or what modification—2dly, whether the original termination suffers any change—it will be desirable that, whenever in exceptional cases the final vowel of the base is to be gunated or vriddhied, or otherwise changed, this changed form of the base be exhibited in place of the original form: thus, at 103, under the genitive dual sivayos, sive + os denotes, that before the base siva is joined to the termination os, the final letter a is to be changed to e; and the number indicates the rule of Sandhi which must come into operation in joining sive and os together. Similarly, whenever the original termination has to be modified, it will be desirable that the termination be exhibited in its altered form: thus, at 103, under the accus. sing. sive + m denotes, that the base is to be joined with m, substituted for the original termination am. See the table, page 58.

SECTION L

DECLENSION OF NOUNS, SUBSTANTIVE AND ADJECTIVE, WHOSE BASES END IN VOWELS, OR OF THE FIRST FOUR CLASSES OF NOUNS.

FIRST CLASS OF NOUNS DECLINED.

Masculine and neuter bases in आ a; feminine bases in आ á and ई í.

Note, that this class comprises by far the greater number of nouns, substantive and adjective, in the language. It answers to a common class of Latin and Greek words in us and os, um and ov, a and α ; such as lupus, $\lambda \acute{\nu} \kappa o_5$ (= Sans. vrikas, nom. of vrika); donum, $\delta \check{\omega} \rho o \nu$; terra, $\chi \acute{\omega} \rho \alpha$ (= $\Psi \tau I$); and to adjectives like bonus, $\mathring{\alpha} \gamma \alpha \theta \acute{\nu} \delta_5$, &c.

103. (A) Masculine bases in a, declined like দ্বিৰ śiva, m., 'the god Siva,' or as an adjective, 'prosperous.'

The final of the base is lengthened in D. Ab. sing., I. D. Ab. du., G. pl.; and changed to e in G. L. du., D. Ab. L. pl.: n is euphonically affixed to the final in G. pl.

्. ∫ शिवम् śivas	शिवो śivau	शिवास् śivás
$N. \ \begin{cases} $ शिवम् $\acute{s}ivas \\ \acute{s}iva + s \end{cases}$	siva + au. See 33.	$\dot{siv}a + as$. See 31.
$Ac.$ $\begin{cases} $ शिवं $sivam$ $\\ siva + m \end{cases}$	śirau	शिवान् $\dot{siv} \dot{an}$
Ac. $\int \dot{siv}a + m$		$\sin a + n$. 31.
1. $\begin{cases} \text{जावेन } sivena \\ sira + ina. \\ 32. \end{cases}$	शिवाभ्यां śivábhyám	शिवैम् śivais
1. $\int \sin a + i n a$. 32.	$\dot{siv}\acute{a} + bhy\acute{a}m$	siva + ais. 33.

104. Neuter bases in a, declined like হিন্নৰ śiva, n., 'prosperous.'
The final of the base is lengthened and assumes n in N. Ac. V. pl.

$$N.Ac. \begin{cases}$$
 রিষ is sive and sive in the six in the six

The vocative is श्रिव śiva, श्रिव śive, श्रिवानि śiváni; all the other cases are like the masculine.

105. (B) Feminine bases in á, declined like शिवा śivá, f., 'the wife of Siva,' or as an adjective, 'prosperous.'

The final of the base is changed to e before I. sing., N. G. L. V. du.; and to $\acute{a}y\acute{a}$ before D. Ab. G. L. sing.; and assumes n in G. pl.

106. Feminine bases in í, declined like नही nadí, f., 'a river.'

The final of the base becomes y before the vowel-terminations, by 34; is changed to $y\acute{a}$ in D. Ab. G. sing.; is shortened in V. sing.; and assumes n in G. pl.

$N.\begin{cases} $	नद्यौ nadyau	नद्यस् nadyas
nadí (s rejected)	nadi+au. 34.	nadi+as. 34.
$Ac.\begin{cases} $ नदीं $nadím \\ nadí+m \end{cases}$	nadyau	नदीस् nadís
Ac. $\int nadi+m$		nadi+s
, ∫ नद्या nadyá	नदीभ्यां nadíbhyám	नदीभिस् nadíbhis
I. $\begin{cases} \mathbf{\textbf{nad}} y \hat{a} \\ nad \hat{i} + \hat{a} \end{cases}$ 34.	nadí+bhyám	nadi + bhis
$D. \begin{cases} \mathbf{\vec{n}} \equiv nadyai \\ nadya' + e. 33. \end{cases}$	— nadíbhyám	नदीभ्यम् nadíbhyas
D. \ \ nadyá+e. 33.		nadí+bhyas
Ab. Tell H nadyás	— nadíbhyám	— nadíbhyas
$nady\acute{a} + as. 31.$		
G. { — nadyás	नद्योस् nadyos	नदीनां nadínám
(i.)	nadi + os. 34.	nadín + ám
L. $\begin{cases} \textbf{+} \mathbf{z} \mathbf{i} & nady \acute{a} m \\ nad\acute{t} + \acute{a} m. & 34. \end{cases}$	- nadyos	नदीषु nadishu
$nadi+\acute{a}m.$ 34.		nadi+su. 70.
$V. \begin{cases} $	नद्यौ nadyau	नद्यम् nadyas
nadi (final shortened)	nadí+au. 34.	nadí+as. 34.

The classical student will recognise in the terminations of siva and nadí many resemblances to the terminations of nouns in Latin and Greek, remembering that the Sanskrit a corresponds to the Latin u and the Greek o; the Sanskrit m to the Latin m and the Greek v; the Sanskrit á or i to the Latin a and the Greek η or α , or in the gen. plur. ω ; the Sanskrit bh or bhy to the Latin b. See 11. f, and 97. a.

- 107. In accordance with 58, such words as मृग mriga, m., 'a deer;' पुरूष purusha, m., 'a man;' भाषा bháryá, f., 'a wife;' कुमारी kumárí, f., 'a girl'—must be written, in the inst. sing. m. and the gen. pl. m. f., with the cerebral ख n. thus, मृगेख mrigena, पुरूपेख, मृगाखां, पुरूपाखां, भाषांखां, जुनारीखां. When n is final, as in the acc. pl. m., it remains unchanged.
- a. Observe, monosyllabic nouns in ई í, like श्री 'fortune,' भी 'fear,' &c., vary from nadí in the manner cyplained at 123.
- b. Observe also, that feminine nouns in \mathfrak{F}_u are declined analogously to nadí, excepting in the nom. sing., where s is not rejected. See 125.
- 108. When a feminine noun ending in α is taken to form the last member of a compound adjective, it is declined like \hat{sira} for the masculine and neuter. Thus, taking the feminine noun $vidy\hat{a}$, 'learning;' whence may be formed the compound $alpacidy\hat{a}$, 'little learning.' When this is used as a compound adjective, it becomes, in the nom. mase, fem. and neut., alpavidyas, $alpavidy\hat{a}$, alpavidyam, 'possessed of little learning.' On the same principle, a masculine noun takes the feminine and

neuter terminations, when forming the last member of a compound adjective; and a neuter noun, the masculine and feminine.

- a. When roots ending in \acute{a} , such as $p\acute{a}$, 'to drink' or 'to preserve,' are taken for the last member of compound words, they form their neuter like the neuter of \acute{siva} ; and for their masculine and feminine assume the memorial terminations regularly, rejecting, however, the final of the base in the Ac. pl. and remaining vowel-cases: thus, सोमपा $soma-p\acute{a}$, 'a drinker of Soma juice;' N. -पास, -पास, -पास, -पास, -पास, . पास, .
- b. हाहा háhá, 'a Gandharba,' assumes the terminations regularly throughout: thus, D. sing. हाहै. See 33.
 - c. The voc. c. of সন্ত্ৰা amba, 'a mother,' is সন্ত amba.
 - d. जरा jará, 'decay,' forms some of its cases from jaras, at 171.

109. To convince the student of the absolute necessity of studying the declension of this first class of nouns, he is recommended to turn back to rule 80. He will there find given, under twenty-eight heads, the most usual forms of nouns, substantive and adjective, which follow this declension. All the masculine and neuter substantives in this list are declined like siva, and all the feminine either like śivá or nadí. Again, all the adjectives in this list follow the same three examples for their three genders. Again, according to śiva masc. and neut., and śivá fem., are declined all present participles (see 526, 527, 528); all passive past participles, which are the most common and useful of verbal derivatives (see 530); all future passive participles (see 568); all participles of the second future (see 578); many ordinals, like prathama (208). Lastly, according to nadí feminine, are also declined the feminines of innumerable adjectives, see 80. XIII. XIV; the feminines of active participles, like kritavat (553, and 140. a); the feminines of participles of the 2d preterite, like vividwas (see 554 and 168); the feminines of many ordinals, like chaturtha (209).

SECOND AND THIRD CLASSES OF NOUNS DECLINED.

Observe, that the declension of the 2d and 3d classes of nouns (see 81 and 82) is exhibited together, that their analogy may be more readily perceived.

2d class —Masculine, feminine, and neuter bases in ₹ i.

3d class - Masculine, feminine, and neuter bases in \(\mathbf{T} u. \)

Note, that the 2d class answers to Latin and Greek words like ignis, turris, πόλις, πίστις, mare, μέλι; and the 3d, to words like gradus, βότρυς, ήδυς, μέθυ.

110. (C) Masculine bases in इ i and उ u, declined like अगिन agni, m. (ignis), 'fire,' and भानु bhánu, m., 'the sun.'

The final of the base is gunated in D. Ab. G. V. sing., N. pl.; lengthened in N. Ac. du., Ac. G. pl.; dropped in L. sing.; and assumes n in 1. sing., G. pl.

	$N. \begin{cases} rac{n}{2} & \text{शिवा } qgnis \\ qgni + s \end{cases}$	ऋग्नी $agni$	ज्ञग्नयम् agnayas
	agni+s	agní (au rejected)	agne+as. 36.
	$\operatorname{Ac.}\left\{ egin{align*}{l} oldsymbol{xi} if it is a gnim \ agni+m \end{array} ight.$	— agní	ख्रमीन् $agnin$ $agni+n$

- 116. The declension of neuter nouns in i and u follows the analogy of nouns in in. Hence, $v\acute{a}ri$ serves also as the model for the neuters of adjectives and nouns of agency in in, like dhanin and $k\acute{a}rin$ (150); and the neuters of nouns of agency in ri, like $d\acute{a}tri$, and nouns of relationship like $m\acute{a}tri$ (130).
- 117. Although there are not many substantives declined like agni and rári (81), yet nouns like mati are numerous (81. V). Moreover, adjectives like śuchi, and compound adjectives ending in i, are declined like agni in the masc.; like mati in the fem.; and like rári in the neuter.
- 118. Again, although there are but few substantives declined like *dhenu* and madhu, yet it is important to study their declension, as well as that of the masc noun $bh\acute{a}nu$; for all simple adjectives like tanu, and all like $pip\acute{a}su$ (82), and all other simple adjectives in u, and all compound adjectives ending in u, are declined like $bh\acute{a}nu$ in the masc.; dhenu in the fem.; and madhu in the neut.
- a. Many adjectives in u, however, either optionally or necessarily follow the declension of nadí in the fem.; as, tanu, 'thin,' makes its nom. fem. either tanus or tanui: মূর, 'tender,' makes nom. f. mṛidwi: and some optionally lengthen the u in the feminine; as, bhíru, 'timid,' makes fem. भीर or भीर, declinable like nouns in ú, 125.
- 119. When feminine nouns ending in i and u are taken to form the last member of a compound adjective, they must be declined like agni in the masc., and vári in the neut. Thus the compound adjective alpamati, 'narrow-minded,' in the acc. plur. masc. would be alpamatin; fem. alpamatis; neut. alpamatini. The same holds good if a masc. or neut. noun be taken to form the last member of a compound.
- a. Although adjectives in i and u are declined like vári and madhu for the neuter, yet in the D. Ab. G. L. sing., and in the G. L. du., they may optionally follow the masculine form: thus the adjectives śuchi and tanu will be, in the D. sing. neut., ज्ञिने or ज्ञांचे, तन्ने or तन्ने; and so with the other cases.
- 120. There are some useful irregular nouns in इ i, declined as follows: बिंख m. 'a friend:' N. मखा, सखायो, मखायम्; Ac. मखायं, मखायो, सखायं, क्ट.; D. सख्यं, &c.; Ab. सख्युम्, &c.; G. सख्युम्, सख्योम्, &c.; L. सख्यं, &c.; V. सखे, &c. In some cases it assumes the memorial terminations at 91 more regularly than agni.
- 121. पति m. 'a master,' 'lord' (मर्ठगड़), when not used in a compound word, follows sakhi in I. D. Ab. G. L. sing. (thus, I. पत्या, D. पत्रे, Ab. G. पत्रहा); in the other cases, agni. But this word is generally found at the end of a compound, and then follows agni throughout (thus, अ्पतिना 'by the lord of the earth').
- 122. A few neuter nouns, अस्य n. 'a bone' (ἐστέον), अखि n. 'an eye' (oculus, ὀκός), सिक्य n. 'a thigh,' दिप n. 'ghee,' drop their final i in some of their cases, and are declined in those cases as if they were derived from obsolete forms in an; such as अस्यन्, &c. (compare 148): thus, N. Ac. अस्य, अस्यिन, अस्यीन; І. अस्य्ना, अस्यिम, अस्यान, अस्यान,

Hence, according to 58, आहि akshi will make in I. sing. अस्पा; in D. अस्पे, &c.

- 123. There are a few useful monosyllabic words in long ई i primitively feminine, (i. e. not derived from masculine substantives, see nadí and putrí at 80. XXV, and not the feminine forms of adjectives or participles, 80. XII. &c..) whose declension may conveniently be noticed here. Those in long ई i vary from the declension of नहीं (106) by retaining स in the nom., and changing the final to iy before the vowel-terminations: thus, श्री f. 'prosperity:' N.V. श्रीस, श्रियो, श्रियम; Ac. श्रियो, श्रियम; 1. श्रिया, श्रीभ्यां, श्रीभिस; D. श्रिये or श्रियो, श्रीभ्यां, श्रीण्यां, श्री
 - a. Similarly are declined भी f. 'fear,' ही f. 'shame,' and भी f. 'understanding.'
- b. When these words occur at the end of compound adjectives, the first inflection only of the two exhibited above, in the D. Ab. G. and L. cases sing., and G. plur., is admissible both for m. and f.: thus, N. गतभीम् m. f., 'fearless,' is गतभिये only in D. sing. The compounds shorten the final i for the neut. gender, and follow the declension of rair (114), but only optionally in the I. D. Ab. G. and L. cases: thus, N. Ac. गतभिय; I. गतभिया or गतभिया; D. गतभिये or गतभिये.
- c. स्त्री f., 'a woman,' is like श्री, but follows नदी in the nom.; and makes स्त्री as well as स्त्रियम् in the Ac. sing.; स्त्रीम् as well as स्त्रियम् in the Ac. plur. V. स्त्रि
- 124. There are a few primitively feminine words not monosyllabic, such as लक्ष्मी, तस्वी, तस्वी, which, like श्री, take s in the nom. sing., but in other respects follow नदी: thus, nom. लक्ष्मीस, लक्ष्म्यों, लक्ष्म्यांस. When, however, they occur at the end of compounds (as, श्रासलक्ष्मी m.f. 'deprived of fortune'), they may optionally be declined as masculines in the D. Ab. G. and L. cases: thus, D. -लक्ष्म्य; Ab. G. -लक्ष्म्यस; L. -लक्ष्म्य, &c. The neuter of such compounds follows the rule for गतभी, 123. b.
- 125. Feminine nouns ending in long জ ú are declined analogously to feminine nouns ending in ई.í.i.e. like नदी, excepting in the N. sing., where s is retained. ज ú is changed to r, wherever ई.í is changed to y (see 34): thus, वधू 'a wife:' N. वधूस्, वध्वो, वध्यस्; Ac. वधूं, वध्वो, वधूस्, वध्वो, वधूस्स; D. वध्वे; Ab.G. वध्वास; L. वध्यां; V. वधुं. Similarly, चमू f.'a host;' खाळू f.'a mother-in-law.'
- a. Again, monosyllabic words in ú primitively feminine are declined analogously to छी f. (110); ú being changed to uv, wherever í is changed to iy: thus, मू f. 'the earth:' N.V. भृस, भुवो, भुवम; Ac. भुवं, भुवो, भुवम; I. भुवा, &c. Similarly, भृ bhrú, f., 'the eyebrow' (ἀρρύς); N.V. भृस, भुवो, भुवम, &c.
- b. And the same rule holds good with regard to such words at the end of compounds; see 123.b: thus, सुमू m.f. having beautiful eyebrows: N.V. sing. सुभूस; Ac. सुभुवं: 1. सुभुवा; D. सुभुवं. &c. Similarly, the neuter will be N. Ac. सुभु: I. सुभुवा or सुभुवा, &c.
- 126. When a root like नी, 'to lead,' comes at the end of a compound, it assumes the memorial terminations at 91 more regularly than नही, though like नहीं it takes आ for the termination of loc. sing.: thus, सेनानी m. 'one who leads an army.' 'a general:' N. सेनानी म., सेनानी, सेनान्या, सेनान्या, &c.; L. सेनान्या,

मेनानीभ्यां, &c.; D. मेनात्ये, &c.; Ab. मेनात्यम्, &c.; G. मेनात्यम्, -त्योम्, -त्यां; L. सेनात्यां, &c.; V. मेनानीम, &c.

a. In the same way are declined ग्रामणी 'the chief of a village,' जलपी 'a water-drinker,' &c., for both m. and f. The neuter shortens the vowel for the N. Ac. sing., and follows vári (114); but in the I. D. Ab. G. L. sing., G. L. du., G. pl., it may optionally agree with the m. and f.

b. Similarly, roots like पू 'to purify,' in a compound like N.V. खलपूम् 'a sweeper;' Ac. खलणं, &c. The L. case, however, is खलण्य. In the same manner, पुनर्भू 'twice-born:' N. पुनर्भूम; Ac. पुनर्भ्व, &c.

c. खयम्भू, m. f. 'self-existent,' follows the declension of भू 'the earth,' 125. a.

FOURTH CLASS OF NOUNS DECLINED.

Masculine, feminine, and neuter bases in on ri.

Note, that this class answers to Latin and Greek words like pater, πατήρ, δοτήρ, &c.; the vowel ri being equivalent to ar.

127. Masculine bases in ri, declined like त्रातृ dátri, m., 'a giver,' and पितृ pitri, m., 'a father.' The former is the model of nouns of agency (83); the latter, of nouns of relationship.

In nouns of agency like $d dtilde{n}t$ the final t is vriddhied (28), and in nouns of relationship like $pit_{T}i$ (excepting $napt_{T}i$, 'a grandson') gunated, in N. sing. du. pl., Ac. sing. du.; but the t of d and d is dropped in N. sing., and to compensate in the last case d is lengthened. In both nouns of agency and relationship the final t is gunated in L.V. sing., and very anomalously changed to u in Ab. G. sing. In Ac. G. pl. it is lengthened, and assumes t in G. pl.

It is remarkable, that dátáram, dátáras, &c., bear the same relation to pitaram, pitaras, &c., that δοτῆρα, δοτῆρες, δοτῆρι, &c., bear to πατέρα, πατέρες, πατέρι, &c. Compare also the Latin datoris from dator with patris from pater.

$N. \begin{cases} $	दातारों dátárau dátár+au	दातारम् $d\acute{a}t\acute{a}ras$ ($\delta o au \hat{\eta} ho \epsilon s$) $d\acute{a}t\acute{a}r + as$
$ ext{Ac.} egin{cases} ext{cinit} \ dcute{a}tcute{a}ram \ dcute{a}tcute{a}r+am \end{cases}$	— dátárau	दातृन् $d\acute{a}t$ \ref{t} \acute{a} $\acute{a}t$ \ref{t} \acute{a} \acute{a} \acute{t} \acute{t} \acute{a} \acute{t} \acute
$I. \ \left\{ egin{aligned} rac{ ext{cial}}{ ext{d} ext{d}tr ext{i}} & ext{d} ext{d}tr ext{i} \ ext{d} ext{d} ext{d} ext{f} & ext{34}. \end{aligned} ight.$	दातृभ्यां dátṛibhyám dátṛi+bhyám	दानृभिम् dátṛibhis dátṛi+bhis
D. $\begin{cases} $	— dátribhyám	दानुभ्यम् dátribhyas dátri+bhyas
$\operatorname{Ab.} \left\{ egin{align*} rac{ extsf{ciig}}{ extsf{th}} rac{d extsf{d}tus}{d extsf{d}tu+s} ight. ight.$	— dátribhyám	— dátribhyas
G. { — dátus	दात्रोम् dátros dátṛi+os. 34.	दातृषां dátrínám dátrín+ám

	$ ext{L.} egin{cases} ext{ cinft } dlpha tari \ dlpha tar+i \end{cases}$	दात्नोस् $d\acute{a}tros$ $d\acute{a}tri + os. 34.$	दानृषु dátrishu dátri+su. 70.
	$V. \; egin{cases} ag{f cinc} dlpha tar \ dlpha tar \end{cases}$	दातारी dátárau dátár + au	दातारम् dátáras dátár+as
128.	$N. \begin{cases} $	पितरौ pitarau pitar + au	िषतरम् $pitaras$ $(πατέρες)$ $pitar + as$
	$ ext{Ac.} egin{cases} egin{cases} ext{ Fural } pitar am \ pitar + am \end{cases}$	— pitarau	पितृन् $pitrin$ $pitri+n$
	I. $\begin{cases} $ fपत्ना $pitrlpha \\ pitri+lpha \end{cases}$ 34.	पितृभ्यां pitṛibhyám pitṛi + bhyám	पितृभिस् $pitribhis$ $pitri+bhis$
	D. $\begin{cases} \mathbf{f}\mathbf{q}\hat{\mathbf{a}} \ pitre \\ pitri+e. \ 34. \end{cases}$	— pitṛibhyám	पितृभ्यस् $pitribhyas$ $pitri+bhyas$
	$Ab. egin{cases} { t fu तुम} \ pitus \ pitu+s \end{cases}$	— pitṛibhyám	— pitribhyas
	$_{\mathrm{G.}}$ $\left\{ \begin{array}{c} \hspace{0.1cm} \mathit{pitus} \end{array} \right.$	पितोम् pitros pitri + os. 34.	पितृ्णां pitṛíṇá m pitṛín+ám
	L. $\left\{egin{array}{l} ext{ \text{Fut}} ari \ pitar+i \end{array} ight.$	— pitros	पितृषु pitṛishu pitṛi+su. 70.
	${ m V.} \ egin{cases} { m Funt} pitar \ pitar \end{cases}$	पितरो pitarau pitar + au	पितरस् $pitaras$ $pitar + as$

Observe—Pitri seems to be corrupted from pidri, 'a protector' (pid, 'to protect'). The cognate languages have preserved the root in $\pi \alpha \tau \eta \rho$, pater, 'father,' &c. The Latin Jupiter, however, is literally Dyu-pitar ($rac{1}{3}$ - $rac{1}$

- a. Observe— नमृ naptṛi, 'a grandson *,' although a noun of relationship, is declined like दान dútṛi, requiring the final to be vriddhied in the same cases.
- b. There are a few nouns, which neither express relationship nor agency, falling under this class. नृ nṛi, m., 'a man,' is declined like pitṛi (N. ना ná, Ac. नरं, I. जा, D. चे, Ab. G. तुस्, &c.), but usually makes नृष्णं nṛiṇám in the gen. plur.
- c. क्रोष्ट्र, 'a jackal,' takes some of its inflections from a form क्रोष्ट: thus, N. क्रोष्टा, -ष्टारी, -ष्टारम; Ac. -ष्टारं, -ष्टारी, -ष्टून or -ष्ट्वन; L. -ष्टा or -ष्टुना, -ष्टुभ्यां, &c.; D. -प्टे or -ष्टे, &c.; Ab. -ष्टुस or -ष्टोस, &c.; G. -ष्टुस or -ष्टोस, -ष्ट्रोस or -ष्टोस, -ष्ट्रां : L. -ष्टरि or -ष्टो, &c.; V. -ष्टर or -ष्टो.
- 129. Feminine bases in $\overline{\mathfrak{A}}_{ri}$ belong only to nouns of relationship, like $m\acute{a}tri$, 'a mother' (from $m\acute{a}$, 'to create,' 'the producer'); and their declension only differs from pitri, 'a father,' in the acc. plur.,

^{*} Derived from na and pitri, i. e. 'not the father;' as if any member of the family but the father.

which takes the termination s instead of n: thus, $\pi i \eta \pi$. Compare the Greek $\mu \dot{\eta} \tau \eta \rho$, $\mu \eta \tau \dot{\epsilon} \rho a$, voc. $\mu \dot{\eta} \tau \dot{\epsilon} \rho$.

- a. खम् swasri, 'a sister,' however, follows दातृ dátri; but the Ac. pl. is still खमूम्. The lengthening of the penultimate is probably caused by the loss of the t from tri, preserved in the English sister. So soror for sostor.
- b. The feminine base of nouns of agency is formed by adding $\frac{x}{3}$ i to the final $\frac{x}{3}$ i thus, दातृ $+\frac{x}{3}$, दाती dátri, f., 'a giver;' and कर्तृ $+\frac{x}{3}$, कर्ती f. 'a doer.' See 80. XIX. Their declension follows nadi at 106.
- 130. Neuter bases in चृ r^i belong only to nouns of relationship or of agency, when used at the end of compound adjectives, such as दिव्यमानृ divya-mátri, agreeing with कुळ, i. e. 'a family having a divine mother,' or डिमानृ 'having two mothers' (compare διμήτωρ). They follow the declension of $v\acute{a}ri$ at 114: thus, N. Ac. मानृ, मानृथी, मानृथि; दानृ, दानृथी, दानृथि.
- 131. Before passing to the declension of nouns ending in consonants, it will be necessary to notice a few monosyllabic nouns, whose bases end in \hat{v} , \hat{w} , and \hat{w} , not sufficiently numerous to form a separate class. They are thus declined:
- 132. रैं rai, m. f., 'substance,' 'wealth' (Lat. res): N. voc. राम्, रायो, रायम्; Ac. रायं, &c.; I. राया, राभ्यां, राभिम् (rebus); D. राये, &c.; Ab. रायम्, &c.; G. रायम्, रायोम्, रायों; L. रायि, &c.
- 133. गो go, m. f., 'a cow' or 'ox' (bos, $\beta \tilde{\nu}\tilde{\nu}_s$): N. voc. गौस्, गावौ, गावस्; Ac. गां, गावौ, गास; I. गवा, गोभ्यां, गोभिस; D. गवे, &c.; Ab. गोस्, &c.; G. गोस्, गवोस्, गवां; L. गवि (bovi), गवोस्, गौपु. Compare गां with $\gamma\tilde{\gamma}\nu$; go meaning also 'the earth.'
- 134. $\widehat{\pi 1}$ nau, f., 'a ship' (cf. navis, $\nu \alpha \widetilde{\nu} \varsigma$), is declined at 94, being the most regular of all nouns. With the N. pl. návas, compare naves, $\nu \widetilde{\alpha} \epsilon \varsigma$ ($\nu \widetilde{\eta} \epsilon \varsigma$). The gen. $\nu \eta \delta \varsigma$ for $\nu \widetilde{\alpha} \delta \varsigma$ or $\nu \widetilde{\alpha} \delta \varsigma = n \acute{\alpha} \nu a s$.
- a. These nouns may occur at the end of compounds; as, बहुरे 'rich,' उपगो 'near a cow,' बहुनों 'having many ships.' In that case the neuter is बहुरि, उपगु, and बहुनु; of which the inst. cases will be बहुरिया or बहुराया, उपगुना or उपगवा, बहुनुना or बहुनावा; and so with the other vowel-cases: but बहुरि becomes बहुरा before all consonantal-cases, except the nom. sing.

SECTION II.

DECLENSION OF NOUNS, SUBSTANTIVE AND ADJECTIVE, WHOSE BASES END IN CONSONANTS, OR OF THE LAST FOUR CLASSES OF NOUNS.

135. Observe—The first four classes of nouns, whose declension has just been considered, comprise many more substantives than adjectives. On the other hand, the last four classes, though com-

prehending a few substantives, consist chiefly of adjectives, participles, or roots used as adjectives at the end of compound words. All the nouns under these remaining classes take the memorial terminations at 91 with perfect regularity.

a. In the anomalies the acc. pl., and in neuter anomalies the inst. sing., is generally the guide to the form assumed before the remaining vowel-terminations.

FIFTH CLASS OF NOUNS DECLINED.

Masculine, feminine, and neuter bases in त्t and द् d.

This class answers to Latin words like comes (from a base comit), eques (from a base equit), ferens (from ferent); and to Greek words like $\chi \alpha \rho \iota \iota \iota$ (from a base $\chi \alpha \rho \iota \iota \iota$), $\kappa \epsilon \rho \alpha \iota$ (from $\kappa \epsilon \rho \alpha \iota$), $\chi \alpha \rho \iota \epsilon \iota \iota$ (from $\chi \alpha \rho \iota \epsilon \iota \iota$).

136. Masculine and feminine bases in π t, declined like π f., 'green' (declined at p. 57); and π f. 'a river.'

Observe—The nom. case sing. is properly harits, but s is rejected by 43. a. The same applies to all nouns ending in consonants. It is remarkable, that Latin and Greck, when the final consonant of the base refuses to combine with the s of the nom., prefer rejecting the base-final: thus, $\chi \acute{\alpha} \rho \iota \iota$ for $\chi \alpha \rho \iota \iota \tau$, comes (comis) for comits. But in these languages the final of the base often combines with the s of the nominative; as in lex (for leks), $\phi \lambda \circ \xi$ (for $\phi \lambda \circ \kappa \varsigma$).

N X	$T = \begin{cases} \begin{cases} $	मरितौ saritan	मरितम् saritas
14. V	$\int sarit + s (s \text{ rejected. } 43.a.)$	sarit + au. 41. b .	sarit + as. + 1.b.
Δ c	$\begin{cases} $ मरितं $saritam \\ sarit + am. 41. b. \end{cases}$	saritau	saritas
ALC,	$\begin{cases} sarit + am. & 41.b. \end{cases}$		
1	∫ सरिता saritá sarit+á	मरिद्धां saridbhyám	सरिद्गिस् saridbhis
1.	$\begin{cases} sarit + \acute{a} \end{cases}$	$sarit + bhy\'am$. 41.	sarit+bhis. 41.
n	∫ मरिते sarite sarit+e	— saridbhyám	सरिद्राम् saridbhyas
ъ.	$\begin{cases} sarit + e \end{cases}$		sarit + bhyas
4.1	∫ मरितम् saritas sarit+as	— saridbhyám	— saridbhyas
Ab.	$\int sarit + as$		
C	{ — saritas	मरितोस् saritos	मरितां saritám
G.		sarit + os	$sarit + \acute{a}m$
,	\int मरिति $sariti$	saritos	सरित्मु saritsu
1.	्र मरिति sariti sarit+i		sarit + su. 40.

137. Neuter bases in त् t, declined like इरित् harit, n., 'green.'

These only differ from the masculine and feminine in the N. du. pl., Ac. sing. du. and pl., the usual neuter terminations \mathfrak{T} i (see 97), being required.

and an euphonic n being inserted before the final of the base in N. Ac. pl.: thus,

N. Ac. हरित् harit, हरिती harití, हरिन्त harinti; I. हरिता haritá, हरिद्धां haridbhyám, &c.

138. Masculine and feminine bases in द् d, like धर्मैविद् dharma-vid, m. f., 'knowing one's duty'—a compound composed of the substantive dharma, 'duty,' and the root vid, 'knowing.' See 84.1.

139. Neuter bases in ξ d, declined like धर्मेचिह् dharma-vid, n., 'knowing one's duty.'

These differ from the masculine and feminine forms in the same cases, and in the same manner, as neuter bases in $\overline{\mathfrak{q}} t_i$ see 137: thus,

N. Ac. धर्मवित्, धर्मविदी, धर्मविन्दी.

a. So also, कुमुद्द n. 'a lotus:' N. Ac. कुमुत्, कुमुद्दी, कुमुद्दि; I. कुमुद्दा, &c.
 Observe—All the nouns whose formation is explained at 84. I.
 II. III. follow the declension of हरित् and धर्मचिद.

140. Possessive adjectives formed with the affixes चत् vat and मत् mat, like धनवत् dhanavat, 'rich,' and धीमत् dhimat, 'wise,' are declined like harit for the masculine; but in the Nom. Voc. sing. du. pl., Ac. sing. du., n is inserted before the final of the base, and the preceding a is lengthened in N. sing.

N.
$$\begin{cases} \mbox{ \begin{tabular}{lll} \begin{tabular}$$

The remaining cases follow हरित: thus, I. धनवता, &c.; but the vocative singular is धनवन dhanavan.

- a. In the same manner are declined active past participles of the form कृतयत; thus, N. कृतयान, कृतयन्तो, कृतयनम्, &c. Similarly, धीमत् 'wise:' N. धीमान्, धीमन्ती, धीमन्तस; Ac. धीमन्ती, धीमन्ती, धीमन्तस; Ac. धीमन्ती, धीमन्ती, धीमन्ति, क्ट.
- b. The feminine bases of adjectives like धनवत् and धीमत्, and participles like कृतवत्, are formed by adding ई í to the masculine base; thus, धनवती, धीमती, कृतवती: declined after नदी at 106; thus, Nom. धनवती, धनवत्या, धनवत्या, धनवत्या,
- c. The neuter is declined like the neuter of harit: thus, N. Ac. धनवत्, धनवती, धनवन्ति
- 141. Present participles like पचत् pachat, 'cooking' (524), are declined after dhanavat (140), excepting in the N. sing., where a is not lengthened before n: thus, N. sing. पचन् pachan (for pachants or pachans), and not पचान् pachán: N. du. pl. पचनो, पचनो, पचनो, पचनो, पचनो, एट. Compare the declension of Latin participles like ferens, ferentis, ferentem, &c.
- a. Observe, however, that all reduplicated verbs, such as verbs of the 3d conjugation—all verbs from polysyllabic roots (75. a)—and some few other verbs, such as जर्स 'to eat,' ज्ञाम् 'to rule'—which reject the nasal in the 3d pl. of the Parasmai-pada, reject it also in the declension of the pres. participle. Hence the pres. participle of such verbs is declined like harit, the N. case being identical with the base: thus, from dá, 'to give,' 3d conj., N. sing. du. pl. dadat, dadatau, dadatas; Ac. dadatam, &c.: from bhṛi, 'to bear,' 3d conj., N. sing. du. pl. bibhrat, bibhratau, bibhratau, So also, jágrat (from jágri), śásat (from śás). The rejection of the nasal is doubtless owing to the encumbrance of the syllable of reduplication.
- b. In present participles derived from verbs of the 1st, 4th, and 1oth conjugations, a nasal is inserted for the feminine base: thus, पचनी from पच्, 1st conj. (declined like nadi at 106); and this nasal is carried through all the inflections, not merely, as in the masculine, through the first five. So दीयनी from dir, 4th conj.; and चोरयनी from chur, 1oth conj. In the 6th conj., and some few verbs of the 8th and 9th, the insertion of the nasal is optional. The same conjugations also insert a nasal in the dual neuter: thus, पचन, पचनी, पचनिन.
- c. The other conjugations, viz. the 2d, 3d, 5th, 7th, 8th, and most verbs of the 9th, follow 140. b. c, and insert no nasal for the feminine and neuter; although all but the 3d assume a nasal in the first five inflections of the masculine: thus, adat (from ad, 2d conj.); N. masc. adau, adantau, adantas; fem. adati: juhwat (from hu, 3d conj.); N. masc. juhwat, juhwatau, juhwatas; fem. juhwatí: rundhat (from rudh, 7th conj.); N. masc. rundhan, rundhantau, rundhantas; fem. rundhatí. But kurvat (from kri, 8th conj.) makes either kurvatí or kurvantí.
- 142. The adjective महत्, 'great,' is properly a pres. part. from the root mah, 'to increase;' but, unlike present participles, it lengthens the a of at before n in the N. sing. du. pl., Ac. sing. du.: thus, N. महान्, महान्ती, महान्ती; Ac. महान्तं, महान्ती, महान्ती, I. महान्तं, &c.; V. महन्, &c.: N. fem. महती, &c., see 140. a. b.: N. neut. महत्, महती, महान्ति,

a. वृहत् m.f.n. 'great,' नगत् m.f.n. 'moving,' and पृषत् m.f. 'a deer,' follow the declension of pres. part.: thus, N. वृहन्, वृहन्ती, वृहनाम्, &c. The feminine is वृहती, &c.

143. When the present participle of भू, 'to be,' is used as an honorific pronoun, it follows धनवत् (at 140), making the a of at long in the N. sing.: thus, भवान 'your honour,' and not भवन्. The vocative is भवन्. As a present participle it follows the declension of पचत्, at 141. The feminine of the pronoun is भवती.

144. यकृत 'the liver' ($\tilde{\eta}\pi\alpha\rho$, jecur), and ञाकृत 'ordure,' both neuter nouns, are declined in some of their cases as if their bases were सकन् and जाकन्: thus, N.V. यकृत्, यकृती, यकृति ; Ac. यकृत्, यकृती, यकृति or सक्ता, दि. सकृता or सक्का, सक्ता or सक्त

145. पार्, 'a foot,' at the end of compounds is contracted into पर् before the Ac. pl. and remaining vowel-terminations: thus, Ac. pl. सुपदम्, from सुपार्, 'having beautiful feet.'

SIXTH CLASS OF NOUNS DECLINED.

Masculine, feminine, and neuter bases in अन an and इन in.

Note, that this class answers to Latin and Greek words like sermo (for sermon), homo (for homin), $\delta \alpha i \mu \omega \nu$ (for $\delta \alpha i \mu \omega \nu$).

146. Masculine and feminine bases in ञ्चन् an, declined like ञात्मम् átman, m. f., 'soul,' 'self;' यञ्चन् yajwan, m., 'a sacrificer;' राजन् rájan, m., 'a king;' and पीवन pívan, m. f., 'fat.'

If an be preceded by m or v (w), at the end of a conjunct consonant, as in átman, yajwan, the a of an is retained before all the terminations: but if an be preceded by any other consonant, whether conjunct or not, than m or v, or even by m or v if not conjunct, as in rájan and pícan, the a of an is dropped in the Ac. plur. and before all the other vowel-terminations, and the remaining n is compounded with the preceding consonant. All masc, and fem. nouns, without exception, ending in an, lengthen the a in the N. sing, du. pl., Ac. sing. du.; and drop the n before all the consonantal-terminations (see 57).

Observe—Latin follows Sanskrit in suppressing the n in the N. masc. and fem., but not in neut.: thus homo is the N. of the base homin, the stronger vowel o being substituted for i, just as i is substituted for i in Sanskrit; but nomen is the N. of the neuter base nomin.

```

Compare the Latin rex, regem, reges, &c.

150. According to rájan may be declined पीवन् pívan, m. f., 'fat:' N. पीवा, पीवानो, पीवानस्; Ac. पीवानं, पीवानो, पीवूस्; I. पीवूा, &c. सीमन् m. 'a border;' वेमन् m. 'a loom' (85. 1).

So also, मूर्ज्जन् múrddhan, m., 'the head,' makes in the inst. c. सूर्ज्जा; and तद्यन् m. 'a carpenter,' तह्या (58); and लिघमन् laghiman, m., 'lightness,' लिघमा.

- a. When a feminine base in $\S i$ is formed from words like **राजन**, it follows the same rule for the rejection of the a of an: thus, **राज्ञी** $r\acute{o}jn\acute{i}$, 'a queen.'
- 151. There are no simple feminine nouns in an; but when masculine nouns are taken to form the last member of a compound adjective, they take a feminine and neuter form; as in mahátman, m. f. n., 'magnanimous.' The feminine form is declined precisely like the masculine, and the neuter follows the declension of neuter nouns, 152.
- a. But when rájan is taken to form a compound of this kind, it is declined like śiva (103); as, N. sing. m. mahárájas; Ac. mahárájam, &c.
- 152. Neuter bases in अन् an, declined like कर्मन 'an action,' and नामन 'a name' (nomen, ὄνομα*). The retention or rejection of a in an before the inst. c. sing. and remaining vowel-terminations, as well as optionally before the nom. acc. du., is determined by the same rule as in masculines (146); and the only difference between masculine and neuter nouns is in the nom. and acc. cases, sing., du., and pl.: thus,

N. Ac. कर्मन्, कर्मणी, कर्माणि; I. कर्मणा, &c.; D. कर्मणे, &c., like आत्मन्. N. Ac. नामन्, नाझी or नामनी, नामानि; I. नाझा, &c.; D. नाझे, &c., like राजन्. With námnám compare Latin nominum.

- 153. So also the neuter nouns जन्मन्, वेशमन्, खश्मन्, यमैन्, वर्मन्, चमैन्, छमन्, follow the declension of karman; but दामन्, सामन्, धामन्, व्योमन्, रोमन् (for रोखन् rohman, from ruh), प्रेमन्, that of náman.
- 154. When neuters in an compose the last member of compound adjectives, they may take the masc. or fem. form: thus, विष्णुशर्मनामा परिदतः 'a Pandit named Vishnusarma.'
- 155. There are a few anomalous nouns in an: म्नन् m. 'a dog' (canis, κύων); युवन् m. 'a youth;' मधवन् m. 'a name of Indra:' thus declined:
- N. श्वा, श्वानी, श्वानस्ं Ac. श्वानं, श्वानी, श्रुनस्ः I. श्रुना, श्वभ्यां, श्वभिस्ः D. श्रुने, &c.; Ab. श्रुनस्, &c.; G. श्रुनस् ($\kappa \nu \nu \delta \varsigma$), श्रुनोस्, श्रुनां; L. श्रुनि, श्रुनोस्, श्वस्ः See 135. a. Fem. श्रुनी, &c. (like $nad \delta$).
- N. युवा, -वानौ, -वानस्; Ac. -वानं, -वानौ, यूनस्; I. यूना, युवभ्यां, युविभस्; D. यूने, &c.; Ab. यूनस्, &c.; G. यूनम्, यूनोस्, यूनोः; L. यूनि, यूनोस्, युवसु. See 135. a. Fem. यूनी or युवती (like nadí). Neut. युव, यूनी, युवानि, &c.
- N. मघवा, -वानी, -वानस्; Ac. -वानं, -वानी, मघोनस्; I. मघोना, मघवन्यां, -वभिस्; D. मघोने, मघवन्यां, &c.; Ab. मघोनस्, &c.; G. मघोनस्, मघोनोस्, मघोनां; L. मघोनि, मघोनोस्, मघवस् Fem. मघोनी

The last may also be declined like a noun in vat. See 140.

^{*} Greek has a tendency to prefix vowels to words beginning with consonants in the cognate languages. Compare also nakha, 'nail,' $\delta n \xi$; loghu, 'light,' $\epsilon \lambda \alpha \chi \nu$; $\epsilon \lambda \alpha \chi \nu$; 'brow,' $\delta \phi \rho \nu$.

ु ∫ धनी dhaní

156. স্থার n., 'a day,' takes its form, before the consonantal-terminations, from an obsolete base, अहम ahas: thus, N. Ac. अहम (43. a), अही or अहनी, सहानि ; I. सहा, सहोभ्यां, सहोभिम् ; D. सहे, सहोभ्यां, सहोभ्यम् ; Ab. सहम्, &c.; G. अहूम्, अहोम्, अहां; L. अहि or अहिन, अहोम्, अहःसु.

a. दिवन m., 'a day,' in those cases where the a of an is rejected, lengthens the i: thus, Ac. pl. दीवुस्; I. दीवुा, &c.

157. अर्थमन् m. 'the sun,' पूपन् m. 'the sun,' and ब्रह्मन् m. 'the murderer of a Brahman,' are analogous in not lengthening the a of an before the N. du. pl., Ac. sing. du.: thus, N. अर्यमा, अर्यमणी, अर्यमणम्; Ac. अर्यमणां, अर्यमणी, अर्थम्णम्; I. अर्थम्णा, &c. Similarly, N. पूपा, &c.; but the acc. pl., and remaining vowel-terminations, may be optionally formed from a base पूप: thus, Ac. pl. पूषाम् or पूपम्. Similarly, N. ब्रह्महा, ब्रह्महर्णी, &c.; but in Ac. pl. ब्रह्मझ् I. ब्र**सन्ना, ब्रसहभ्यां**, &c.

158. अर्वन् m. 'a horse,' or m. f. n. 'low,' 'vile,' is declined like nouns in vat at 140, excepting in N. sing.: thus, N. अवी, अर्वनती, अर्वनतम्; Ac. अर्वनं, &c.

159. Masculine bases in इन् in, declined like धनिन् dhanin, m., 'rich.'

The i of in is lengthened in N. sing., and the n rejected before all the consonantal-terminations. धनिनौ dhaninau

धनिनम् dhaninas

N. $\begin{cases} dhani(n \text{ and } s \text{ rejected.43.} a,57.) \end{cases}$	dhanin + au	dhanin + as
$Ac.$ $\left\{egin{array}{l} \mathbf{vf}\mathbf{f}\mathbf{\dot{f}}\ dhaninam \ dhanin+am \end{array} ight.$	— dhaninau	- dhaninas

dhanin+i		dhani(n dropped.57) + su.70.
$V. \begin{cases} $ धनिन् $dhanin \\ dhanin. 92. \end{cases}$	धनिनौ dhaninau	धनिनस् dhaninas
dhanin. 92.	dhanin + au	dhanin + as

Observe—A great many adjectives of the forms explained at 85. VI. VII. are declined like धनिन for the masculine: thus, मेधाविन medhávin, 'intellectual;' N. मेथावी, -विनमे, -विनम्, &c. Also a vast number of nouns of agency, like कारिन् 'a doer,' at 85. V: thus, N. कारी, कारिया (58), कारियस, &c.

TERR Chandramagae

- 160. The feminine base of such adjectives and nouns of agency is formed by adding $\frac{1}{3}$ i to the masc. base; as, from धानन, धाननी f.; from कारिन्, करिशी f.; declined like nadi at 106: thus, N. धाननी, -त्यो, -त्यम, &c.
- 161. The neuter conforms in every respect to the declension of vári at 114: thus, N. Ac. খনি, খনিনী, খনীনি.
- 162. पियन् m. 'a road,' मियन् m. 'a churning-stick,' and सृभुधिन् m. 'a name of Indra,' are remarkable as exhibiting both affixes, an and in, in the same word. They form their N. sing. from the bases पन्यस्, मन्यस्, सृभुध्यस्; their N. du. pl., Ac. sing. du., from the bases पन्यस्, मन्यन्, सृभुध्यन्; their Ac. pl., and remaining vowel-terminations, from the bases पप्, मथ्, सृभुध्यः; thus, N. पन्यास् (163), पन्यानी, पन्यानस्; Ac. पन्यानं, पन्यानी, पथस्; L. पथा, पिथभ्यां, पिथिभिस्; D. पथे, &c.

The compound मुपियन्, 'having a good road,' is similarly declined for the masc.; the nom. fem. is सुपयी, -प्यो, -प्यम्, like nadí at 106; the nom. neut. मुपिय, -पथी, -पन्यानि, &c.

SEVENTH CLASS OF NOUNS DECLINED.

Masculine, feminine, and neuter bases in अस् as, इस् is, and उस् us.

Note, that this class answers to Greek and Latin words like $\pi \acute{a}\theta \circ \varsigma$, $\mu \acute{e}v \circ \varsigma$, genus, scelus, &c.

163. Masculine and feminine bases in ऋम् as, declined like चन्द्रमस् chandramas, m., 'the moon.'

चल्छा chandramasau

The a of as is lengthened in N. sing.

चिल्याम chandramás

N. 3	chandramás (s rejected. 43.a.)	chandramas + au	chandramas + as
Ac.	्रचन्द्रमसं chandramasam chandramas + am	chandramasau	— chandramasas
I. 4	्रचन्द्रमसा chandramasá chandramas + á	चन्द्रमोभ्यां chandramobhyám chandramas + bhyám. 65.	
D.	चन्द्रमसे chandramase chandramas + e	— chandramobhyám	चन्द्रमोभ्यम् chandramobhyas chandramas + bhyas. 65.
Ab. •	्रचन्द्रमसस् chandramasas chandramas + as	chandramobhyám	- chandramobhyas
G. <	— chandramasas	चन्द्रमसोम् chandramasos chandramas + os	चन्द्रमसां chandramasám chandramas + ám
L. •	$\left\{egin{array}{l} egin{array}{l} egin{arr$	— chandramasos	चन्द्रम:सु chandramahsu or -स्तु chandramas + su. 62. a, 63.
v. •	्र चन्द्रमस् chandramas chandramas. 92.	चन्द्रमसौ chandramasau chandramas + au	चन्द्रमसस् chandramasas chandramas + as

- a. After the same manner is declined जपारम apsaras, f., 'a nymph.'
- 164. Neuter bases in श्रस्*as*, declined like जनस् manas, n., 'the mind' (μένος, mens).

These only differ from the masc, and fem. in the N. and Ac. The a of as is lengthened in the N. plur. instead of the N. sing. $\exists t$ is inserted before s in the N. plur.

N.
$$\Lambda c.V.$$
 $\left\{ egin{array}{ll} \mbox{\it H-n-H} & \mbox{\it M-n-H} & \mbox$

- I. मनमा manasá, &c., like the masc. and fem.
- a. Observe—Nearly all simple substantives in as are neuter like manas; but when these neuters are taken to form a compound adjective, they are declinable also in the masculine and feminine like chandramas. Thus, when manas is taken to form the compound adjective mahámanas, 'magnanimous,' it makes in the nom. (masc. and fem.) mahámanás, mahámanasau, mahámanasas. In the same way are formed sumanas, 'well-intentioned,' durmanas, 'evil-minded' (nom. sumanás, durmanás, &c.); to which a remarkable analogy is presented by the Greek εὐμενής and δυσμενής, m. f., making in neut. εὐμενές, δυσμενές, derived from μένος *.
- 165. Neuter bases in इस् is and उस् us (see 68. a) are declined analogously to मनस् manas at 164, i and u being substituted for a throughout; and therefore u sh for स s (70), and ∇r for ओ o (64): thus, हिवस् havis, n., 'ghee:' N. Ac.V. हिवस, हिवपी, हवींपा; I. हिवपा, हिवप्या, हिवप्य, हिवप्य,
- a. Similarly, चह्युम् chakshus, n., 'the eye:' N. Ac. V. चह्युम्, चह्युपी, चह्युपि; I. चह्युपा, चह्युपी, चह्यु
- 166. All nouns formed with the affixes is and us are neuter. There are two, however, in which the final sibilant is part of the root itself, and not of an affix; viz. आशिस कंड, f., 'a blessing' (from the root आस), and समुस् m.f. 'an associate' (from जुस्). These follow the analogy of masc. and fem. nouns in as (163) in the N. Ac. cases; and, moreover, before the consonantal-terminations, where the final sibilant is changed to r, unlike nouns formed with is and us, they lengthen the i and u (compare nouns ending in r at 180): thus, N. आशीस, -शियो, -शियस; Ac. -शियो, -शियम, !िश्यो, -शियम, -शियो, -शियम, -शियो, -शियम, -शियो, -शियम, -सिश्यो, -शियो, -शियम, अति कंड, शिया, -शियो, -शियो, क्षियो, क्षियो

^{*} Bopp's Comparative Grammar, § 146.

- a. Observe—When neuter nouns in is or us are taken for the last member of compound adjectives, they are declinable in the mase, and fem. according to the analogy of chandramas at 163: thus, उत्पलचह्यम् m.f.n., 'having lotus cyes,' makes N. mase, and fem. उत्पलचह्यम्, उत्पलचह्यपे, उत्पलचह्यपम्; and ग्रुचिरोचिम्, ग्रुचिरोचिम्, ग्रुचिरोचिम्, ग्रुचिरोचिम्, श्रुचिरोचिम्, &c.
- b. दोस् dos, m., 'an arm,' follows the declension of nouns in is and us; but in Ac. pl., and remaining vowel-cases, optionally substitutes doshan for its base: thus, N. दोस्, -मो, -पम्; Ac. -मं, -पो, -पस् or -प्पास्; I. दोषा or दोष्णा, दोम्बीं, &c.
- 167. Adjectives in the comparative degree formed with the affix ईयम् iyas, m.f.n.(192), follow chandramas at 163, but the a of as is lengthened, and n inserted in N. sing. du. pl., Ac. sing. du.: thus, baliyas, 'more powerful,' makes N. चलोयान् (for baliyáns, s rejected by 43. a), -यांसी, -या
- 168. Participles of the 2d preterite, formed with ras, are similarly declined in N. sing. du. pl., Ac. sing. du. But in Ac. pl., and remaining vowel-cases, ras becomes ush, and in the consonantal-cases rat; so that there are three forms of the base, viz. in ráns, ush, and rat *: thus, विविद्य (part. of 2d pret., from विद् 'to know'): N. विविद्वान्, विविद्वांसौ, विविद्वांसन्; Ac. विविद्वांसं, विविद्वांसौ, विविद्मम; I. विविद्मा, विविद्धां, विविद्धां, D. विविद्मे, &c. When this participle is formed with ivas instead of vas, the vowel i is usually rejected in the cases where ras becomes ush: thus, जिम्बस् (from gam, 'to go'): N. जिम्बान्, &c.; Ac. जिम्बांसं, जिम्बांसी, जम्मुपस्, &c.; I. जम्मुपा, &c. Similarly, tenivas (from tan, ' to stretch'): N. teniván, tenivánsau, &c.; Ac. tenivánsau, teniránsau, tenushas, &c. But not when the i is part of the root: thus, चिचियस् (from चि), निनीयस् (from नी), चक्रवस् (from कृ), make in the Ac. pl. चिच्युपस्, निस्युपस्, चक्रुपस्. The N. feminine of these participles is formed from ush; and the N. Ac. neuter, sing., du., and plur., from vat, ush, and vas, respectively: thus, N. fem. विवित्मी. &c., declined like nadí at 106. Similarly, from the root तुप् comes तुतुपुषी (compare τετυφυία). The neuter is N. विविद्यत्, -दुर्भी, -इांसि. Those formed with ivas do not retain i in the feminine: thus, tenivas; N. masc. fem. neut. teniván, tenushí†, tenivas.
- a. The root चिह, 'to know,' has an irregular pres. part. चिडम vidwas, used commonly as an adjective ('learned'), and declined exactly like चिविद्यम् above, leaving out the reduplicated vi. With reference to 308. n, it may be observed, that as a contracted 2d pret. of vid is used as a present tense, so a contracted participle of the 2d pret. is used as a present participle.

^{*} Vat is evidently connected with the Greek $\sigma\tau$. Compare tutupvat (from tup) with $\tau \epsilon \tau \nu \phi - (\tau) \sigma\tau$, and tutupvatsu with $\tau \epsilon \tau \nu \phi - \sigma(\tau) \sigma\iota$.

[†] There seems, however, much difference of opinion as to the rejection of i; and some grammarians make the feminine tenyushi, and the I. masc. tenyushi.

- 169. पुंस् m., 'a male,' forms N. sing. du. plur., Ac. sing. du., from पुमस्; but Ac. pl., and remaining vowel-cases, from पुंस्; and I. du., and remaining consonantal-cases, from पुष्: thus, N. पुमान्, पुमांसी, पुमांसी, दुमांस, Ac. पुमांस, पुमांसी, पुंसस्; I. पुंमा, पुभ्यां, पुम्भिम; D. पुंसे, &c.; Ab. पुंमस्, &c.; G. पुंसस्, पुंसोस, पुंसो; L. पुंसि, पुंसोस, पुंस; V. पुष्ट, &c.
- 170. उज्ञानस् m., 'a name of the planet Venus,' forms N. sing. उज्ञाना from a base उज्ञान (147). Similarly, पुरुदंशस् m. 'a name of Indra,' and खनेहस् m. 'time.' The other cases are regular. उज्ञानस्, however, may be optionally उज्ञानन् in the vocative.
- 171. जरस्, f. 'decay' ($\gamma\tilde{\eta}\rho\alpha\varsigma$), forms its consonantal-cases from a base जरा; thus, N. sing. जरा (105); I. sing. du. जरमा, जराभ्यां, &c.

EIGHTH CLASS OF NOUNS DECLINED.

Masculine, feminine, and neuter bases in any consonant, except π t and π d, π n, π s.

Note, that examples of Latin and Greek nouns answering to this class are common. See 87.

- 172. Observe—This class consists principally of roots used as nouns, either alone or at the end of compounds, or preceded by prepositions and adverbial prefixes. Roots ending in π t and ξ d, employed in this manner, are of common occurrence; but their declension falls under the fifth class at 136. Roots ending in other consonants are not very frequently found, and the only difficulty in their declension arises from their combination with the consonantal-terminations. See 92. a.
- 173. Whatever change, however, takes place in the nom. sing is preserved before all the consonantal-terminations; remembering only, that before such terminations the rules of Sandhi come into operation.
- 174. Before the vowel-terminations the final consonant of the root, whatever it may be, is always preserved (41. b). If in one or two nouns there may be any peculiarity in the formation of the acc. pl., the same peculiarity runs through the remaining vowel-cases. The terminations themselves undergo no change, but the s of the nom. sing. is of course rejected by 43. a. There is but one form of declension for both masc. and fem.; the neuter follows the analogy of other nouns ending in consonants at 137.
- 175. Masculine and feminine bases in क् k, ख kh, ग् g, घ् gh, declined like मर्वशक् sarva-śak, m.f., 'omnipotent' (from sarva, 'all,' and शक् 'to be able'),

and चिद्रालिख् m. 'a painter' (from चित्र 'a painting,' and लिख् 'to write').
N.V. -शक् (43.a), -शकी (41.b), -शकस्; Ac. -शकं, -शकं, -शकं, : १.-शकं, -शन्मां
(41), -शिम्भस्, &c.; L. pl. -शक्सु (40) or -शस्यु (70). N.V. -लिक् (43.b, 43.a),
-लिखी (174), -लिखस्; Ac. -लिखं, &c.; L. -लिखा, -लिग्भ्यां (41), -लिग्भिम्, &c.;
L. pl. -लिक्सु (40).

a. The neuter is N. Ac.V. -शक्, -शक्, -शक्कि, &c.; -लिक्, -लिखी, -लिह्नि, &c.: the rest like the masc. and fem.

176. Masculine and feminine bases in च्ch, छ chh, ज् j, क् jh, declined like याच् vách, f., 'speech' (from चर् 'to speak'); मांसभुज्ञ mánsa-bhuj, m.f., 'flesh-eater' (from मांस mánsa, 'flesh,' and भुज्ञ 'to eat'); प्राङ्क práchh, m.f., 'an asker' (from प्रङ्क 'to ask'). A final च्ch is changed to ज् k, a final ज् j to ग् g, a final ट्ch to ट्t, before the consonantal-terminations (43. d, 92. a). Compare the declension of vách with that of the Latin vox, and the Greek v v or on for For.

N. V. वाक् (for $v\acute{a}ks$, 43, a; rox, $\delta \psi$), वाक् ($\delta \pi \epsilon$), वाक् τ (roces, $\delta \pi \epsilon s$); Ac. वाकं (vocem), वाको, वाक्स ($\delta \pi a s$); I. वाका, वाम्यां, वाम्भस; D. वाके, वाम्यां, वाम्भस; Ab. वाकस, वाम्भां, वाम्भस; G. वाकस, वाकोस, वाकां; L. वाकि ($\delta \pi i$), वाकोस, वाकस or वाह्य.

N. V. -भुक, -भुजी, -भुजम्; Ac. -भुजं, &c.; 1. -भुजा, -भुग्भ्यां, -भुग्भिम्, &c.

N. V. प्रार्, प्रान्छो, प्रान्छम्; Ac. प्रान्छं, &c.; I. प्रान्छा, प्राइन्यां, &c.; L. pl. प्रार्सु.
The last optionally substitutes श् र्ड for its final स् chh before the vowel-terminations: thus, N. du. प्रान्धों or प्राशों, &c. प्योमुच्, 'a cloud,' is declined like याच्

a. The neuter is N. Ac. वाक्, वाची, वाचि, &c.; भुक्, भुनी, भुद्धि, &c.; प्राट्, प्राञ्ची, प्रान्च्यि, &c.

b. The root সৰ্ anch, 'to go,' preceded by certain prepositions and adverbial prefixes, forms a few irregular nouns; such as, মাৰ্ 'eastern;' স্বাৰ্ 'southern;' মাৰ্ 'western;' স্বাৰ্ 'northern;' মাৰ্ 'going with,' 'fit,' 'proper;' নিম্ৰ্ 'going crookedly, as an animal;' and a few others less common. These reject the nasal in the acc. pl. and remaining cases masculine. In nom. sing. the final ৰ্ch being changed to ক্k, causes the preceding nasal to take the guttural form, and the ক্ is rejected by 43. a. In the acc. plur., and remaining vowel-cases, there is a further modification of the base in all, excepting মাৰ and স্বাৰ্.

N.V. masc. प्राङ्, प्राञ्चो, प्राञ्चम्; Ac. प्राञ्चे, प्राञ्चो, प्राचम्; I. प्राचा, प्राग्न्यां, प्राग्निम्; D. प्राचे, &c.; L. pl. प्राष्टु. Similarly, अयाञ्

N.V. प्रतरङ, प्रत्यश्ची, प्रत्यश्चस्; Ac. प्रत्यश्चं, प्रत्यश्चो, प्रतीचम्; I. प्रतीचा, प्रत्यन्थां, प्रतामिन्, D. प्रतीचा, प्रत्यन्थां, प्रतामिन्, &c. Similarly, उद्दश्च and सम्यश्च, which make in acc. pl., and remaining vowel-cases, उदीचम्, समीचम्. But तिर्यश्च makes in acc. pl., &c., तिरश्चम्.

The feminine, and the neut. dual of these nouns follow the analogy of the acc. pl.: thus, N. fem. प्राची &c., खवाची &c., प्रतीची &c., उदीची &c., ममीची &c., तिरष्ठी &c., declined like नदी. The neuter is N. Ac.V. प्राक् प्राची, प्रान्ति, &c.; प्रत्यक् प्रतीची, प्रताच, &c.

- c. प्राच्, when it signifies 'worshipping,' retains the nasal throughout; but ch is rejected before the consonantal-terminations, and the nasal then becomes guttural: thus, N. प्राङ, प्राची, &c.; Ac. प्राचं, &c.; I. प्राचा, प्राङ्भ्यां, &c.
- d. अमृत् n., 'blood,' is regular: thus, N. Ac. अमृक, अमृत्ती, अमृत्ति, &c.; but it may optionally take the acc. plur., inst. and dat. sing.; and, according to some authorities, all its other inflexions from an obsolete base, असन् asan. thus, Ac. pl. अमृद्धि or असानि; I. sing. अस्ता or अन्ता, &c.
- e. Nouns formed with the roots यन् 'to worship,' रान् 'to shine,' मृन् 'to rub,' भान् 'to shine,' बन् 'to wander,' मृन् 'to create,' change the final न् to द or इ before the consonantal-terminations (43. d). In some, however, the final optionally becomes क् k or ग् g: thus, देवेज् m. 'a worshipper of the gods' (यन् becoming इन्); N. sing. देवेद् or देवेद: रान् m. 'a ruler;' N. sing. राह, I. dual राहभ्यां: परिमृन् 'a cleanser;' N. sing. परिमृट्: विभान् m. f. 'splendid;' N. sing. विभार्: परिवान् m. 'a religious mendicant;' N. sing. परिवाद: विश्वमृन् 'the creator of the world;' N. sing. विश्वमृद् or विश्वमृद् . च्हात्वन् m., 'a priest,' is regularly चृत्विक.
- f. ऋवयज् m., 'an inferior sacrificer,' lengthens the a of yaj in the N. sing. and in the vowel-cases, and forms the consonantal-cases from an obsolete base, ऋवयम्; N. sing. du. pl. ऋवयाम्, -याज्ञी, -याजम्; Ac. -याजं, &c.; I. -याजा, -योभ्यां, &c.
- g. अस्त्र or भजा, 'one who fries,' makes N.V. भृट्, भृजाी, भृजास्; Ac. भृजां, &c. Similarly, ब्रख्य 'one who cuts.'
- h. কর্ন্ধ্ন m.f., 'strong.' makes N.V. কর্ন্ধ্, &c.; Ac. কর্ন্ধা, &c.; I. কর্ন্ধা, ক্যন্দা, &c. The neuter is N. Ac. V. কর্ন্ধ্ন, ক্রিন্ধা narjji.
- 177. Masculine and feminine bases in ष्th, ष्dh, declined like कष् m.f. one who tells,' युर्ग f. battle.' The final aspirate is changed to its unaspirated form before the consonantal-terminations (43. b, 41), but not before the vowel (41. b). N.V. कत्, क्यो, कथस; Ac. कथं, &c.; I. कथा, कद्यां, &c. N.V. युत, युर्थो, युधस; Ac. युर्थ, &c.; I. युधा, युद्यां, &c. In the case of a root like वुध् m.f., one who knows,' the initial ब b becomes भ bh wherever the final \(\frac{1}{2}\) dh becomes t or d, by 42. c: thus, N.V. भूत, वुर्थो, वृथम; Ac. वुर्थ, &c.; I. वुधा, भुद्यां, &c.
 - a. The neuter is N. Ac. V. कत्, कथी, कन्यि, &c.; युत्, युधी, युन्धि, &c.
- 178. Masculine and feminine bases in प् p, फ् ph, ब् b, भ् bh, declined like गुप् m. f. 'one who defends,' लभ् m. f. 'one who obtains.' N.V. गुप्, गुपी, गुपम; Ac. गुपं, &c.; I. गुपा, गुञ्चां, गुञ्चिस, &c. N.V. लप्, लभी, लभम; Ac. लभं, &c.; I. लभा, लञ्चां, लञ्चां, लञ्चां, &c.
 - a. The neuter is N. Ac. V. युप्, युपी, युम्पि, &c.; लप्, लभी, लम्भि, &c.
- b. অঘ্ f. 'water,' declined only in the plural, is irregular: thus, N.V. সাম্ম; Ac. অঘ্য; I. অদ্নিদ; D. Ab. অহাদ; G. অম্ ; L. অম্
- 179. Masculine and feminine bases in म् m, declined like शम् m.f. one who pacifies.' The final m becomes n before the consonantal-terminations: thus, N.V. शन, शमा, शमम, Ac. शमं, &c.; I. शमा, शम्म, शि. शम्म, &c.; L. pl. शम्म

- a. Similarly, प्रशाम् m. f., 'quiet,' makes N. प्रशान्, -शामी, -शामस्; Ac. प्रशामं, &c.; I. प्रशामा, प्रशान्थां, &c. Compare 53. b.
 - b. The neuter is N. Ac. V. शन्, शमी, शमि, &c.; प्रशान्, -शामी, -शामि, &c.
- 180. Masculine and feminine bases in र्r, declined like चर् m.f. 'one who goes,' गिर् f. 'speech.' If the vowel that precedes final r be i or u, it is lengthened before the consonantal-terminations (compare 166); and final r, being a radical letter, does not become Visarga before the s of the loc. pl. (71. a). N.V. चर्, चरी, चरम्, दि. चरं, &c.; I. चरा, चम्बीं, चिभिम्, &c.; L. pl. चर्षु. N.V. गीर्, गिरीं, गिरम्, दि. गिरं, &c.; I. गिरा, गीर्भां, गीर्भम्, &c.; L. pl. गीर्षु.
 - a. The neuter is N. Ac. V. चर्, चरी, चरि, &c.; गीर्, गिरी, गिरि, &c.
- b. There is one irregular noun ending in the semivowel व् v, viz. दिव् f. 'the sky,' which makes its base द्यों in N. sing., and द्यु in the other consonantal-cases: thus, N.V. द्योस, दिवी, दिवस; Ac. दिवं or द्यां, दिवी, दिवस; I. दिवा, द्युभ्यां, द्युभिस, &c.
- 181. Masculine and feminine bases in श्रं and प्sh, declined like विश् m.f. one who enters,' दिश् f. 'a quarter of the sky,' डिप् m.f. one who hates,' मृप् m.f. one who endures.' N.V. विट् (43. e), विशो, विशास; Ac. विशं, &c.; I. विशा, विड्म्यां, &c. N.V. दिक् (43. e, 17. b), दिशो, दिशम; Ac. दिशं, &c.; I. दिशा, दिगम्यां, &c. N.V. डिट् (43. e), डिपो, डिपम; Ac. डिपं, &c.; I. डिपा, डिड्म्यां, &c. N.V. मृक् (43. e), मृपो, मृपस; Ac. मृपं, &c.; I. मृपा, मृग्यां, &c.
- a. The neuter is N. Ac. V. विट्, विशी, विंशि, &c.; दिक्, दिशी, दिंशि, &c.; डिट्, डिपी, डिंपि, &c.; मुक्, मृपी, मृंपि, &c.
- 182. Masculine and feminine bases in ह h, declined like लिह m.f. one who licks; दु ह m.f. one who milks.' In roots beginning with द d, the final aspirate becomes क k or म g (see 17. a), in other roots \(\bar{\epsilon}\) to \(\bar{\epsilon}\) d, before the consonantal-terminations; but in roots whose initial is d, the h, which disappears as a final, is transferred to the initial d, which becomes dh wherever final h becomes k or g (compare 42. c). N.V. लिट् (43. c), लिहो, लिहम; Ac. लिहं, &c.; I. लिहा, लिहमां, &c. N.V. भुक्, तुहो, तुहम्, ति. तुहं, &c.; I. तुहा, भुग्मां, भुग्मां, भुग्मां, &c. But दुह् m.f., one who injures, makes N. भुक् or भुट्; and मुह् m.f., foolish, N. मुक् or मुट्.
 - a. The neuter is N. Ac. V. लिट, लिही, लिंहि, &c.; धुक, हुही, हुंहि, &c.
- b. उपिणाइ f., 'a particular kind of metre,' changes its final to k or g before the consonantal-terminations, like roots beginning with d. N. उपिणाक, उपिणाही, &c.
- c. वाह, 'bearing' (from the root वह 'to bear'), changes वा to ज \acute{u} in the acc. plur. and remaining vowel-cases, and before the \S \acute{z} of the fem.; and if the word that precedes it in the compound ends in a or \acute{u} , then a or \acute{u} combines with \acute{u} into $\~{u}$ $\~{u}$ (instead of $\~{u}$) o, by 32): thus, भारवाह $\~{u}$. $\~{u}$ or $\~{u}$ one who bears a burden:' $\~{v}$ $\~{v}$

श्वेतवाह m., 'Indra' (who is borne by white horses), may optionally retain वा in Ac. plur. &c.; and in consonantal-cases is declined as if the base were श्वेतवस्: thus, N.V. श्वेतवास्, श्वेतवाहों, श्वेतवाहम्; Ac. श्वेतवाहं, श्वेतवाहों, श्वेतीहम् or श्वेतवाहम्; I. श्वेतीहा or श्वेतवाहम्; I. श्वेतीहा or श्वेतवाहम्; श्वेतवाहम्; Ac.

- d. अनदुह m., 'an ox' (for अनोवाह, from अनम् 'a cart,' and वाह् 'bearing'), forms the N.V. sing. from अनदुत्; and N. du. plur., Ac. sing. du., from अनदुाह: thus, N. अनदुान, अनदुाही, अनदुाहम; Ac. अनदुाहं, अनदुाही, अनदुहस्; I. अनदुहा, अनदुद्धां, अनद्धां, अनद्धां,
- e. नह, 'binding,' 'tying,' at the end of compounds, changes the final to त् or ह, instead of ट् or इ: thus, उपानह f., 'a shoe,' makes N. उपानह, उपानहों, उपानहम; Ac. उपानहें, &c.: 1. उपानहों, उपानहों, &c. Compare 306. b.
- 183. Masculine and feminine bases in more than one final consonant, declined like वस्प m.f., 'one who leaps:' N.V. वल् (43. a), वस्पी, वस्पा, 'Ac. वस्पं, &c.; I. वस्पा, वस्पां, &c.
 - a. The neuter is N. Ac.V. वल, वस्मी, वस्मि, &c.
 - b. गोरख, 'a cow-keeper,' makes N.V. गोरक or गोरढ, &c.

SECTION III.

ADJECTIVES.

- 184. The declension of substantives includes that of adjectives; and, as already seen, the three examples of substantives, given under each class, serve as the model for the three genders of adjectives falling under the same class. Simple adjectives, coming immediately from roots, and not derived from substantives, are not common. Such as do occur belong chiefly to the first, second, and third classes of nouns; 80, 81, 82.
- 185. Adjectives formed from substantives are very numerous, as may be seen by a reference to 80, 84, 85. They belong chiefly to the first, fifth, and sixth classes of nouns.
- 186. Compound adjectives, whether formed by using roots or substantives at the end of compounds, are most abundant under every one of the eight classes.

The following table exhibits examples of the most common kind of adjectives in the nom. case masc., fem., and neut., and indicates the class to which their declension is to be referred.

187.	Examples	of simple ac	ljectives.	
	BASE.	NOM, MASC.	NOM. FEM.	NOM. NEUT.
	प्रिय ' dear'	प्रियम्*	प्रिया	प्रियं
IST CLASS.	जुभ ' fortunate'	ગુમમ્	गुभा	ગુમં
	जुभ ' fortunate' ्मुन्दर ' beautiful'	मुन्दरम्	मुन्दरा or मुन्दरी	मुन्दरं
2D CLASS.	ু সুचি ' pure'	शुचिम्	गु चिम्	गुचि
	पागडु ' pale'	पाग्डुम्	पागडुम्	पाग्दु
20.01.488	साधु 'good'	माधुम्	माधुम् or माध्वी 106.	साधु
3D CLASS.	मृदु 'tender'	मृदुस्	मृद्वी	मृदु
į	पारहु 'pale' साधु 'good' मृदु 'tender' भीरु 'timid'	भीरुम्	भीहम् or भीहम् 125.	भीरु
	Examples of adject			NOW NEWS
	BASE.	NOM. MASO	NOM. FEM.	NOM. NEUT.
1ST CLASS.	मानुष 'human' धार्मिक 'religious'	मानुपम् धार्मिकम्		मानुषं धार्मिकं
1	बलवत 'strong'			बलवत्
5TH CLASS.	िबलयत् 'strong' . श्रीमत् 'prosperous'	श्रीमान्	`	श्रीमत्
6TH CLASS.	मुखिन् 'happy'	मुखी	मुखिनी 106.	मुखि े
189.	Examples of	f compound	adjectives.	
	BASE.	NOM. MASC.	NOM. FEM.	NOM. NEUT.
IST CLASS.	बहुविद्य 'very learned'	बहुविद्यस्	बहुविद्या	बहुविद्यं
2D CLASS.	[ਫ਼ੁਬ੍ਰੀਜ਼ ' foolish'	दुर्द्वेद्यम्	दुर्बृद्धिम्	दुर्बुद्धि
3d class.	ञ्चित्पतनु 'small bodied'	ऋट्यतनु स्	ञ्जल्पतनुम्	ञ्चल्पतनु
4TH CLASS.	बिहुदातृ ('very liberal'	बहुदाता	बहुदाती 106.	बहुदातृ
5TH CLASS.	[सर्वेजित् [' all-conquering'	सर्वजित्	मर्वेजित्	सर्वजित्

^{*} When it is remembered that a is equivalent in pronunciation to u, the three genders of this adjective might be written priyus, priyá, priyum; thus offering a perfect similarity to Latin adjectives in us.

190. Examples of some other compound adjectives.

शह्नमा 'a shell-blower' (108. a.)	शङ्घमाम्	शङ्घधाम्	शङ्घमं
नष्टश्री 'ruined' (123. b.)	नष्टश्रीस्	नष्टश्रीस्	नष्टिष्य
खलपू 'a sweeper' (126. b.)	खलपूस्	खलपृस्	खलपु
दिव्यमातृ ' having a divine mother' (130.)	दिव्यमाता	दिव्यमाता	दिव्यमातृ
बहुरै 'rich' (134. a.)	वहुरास्	बहुराम्	बहुरि
बहुमो 'having many cattle' (134. a.)	वहुगीम्	बहुगीम्	बहुगु
बहुनौ 'having many ships' (134. a.)	बहुनीम्	वहुनौस्	बहुनु

- 191. The degrees of comparison are formed in two ways; 1st, by adding to the base तर tara (nom. -taras, -tará, -taram, cf. Greek τεροs) for the comparative; and तम tama (nom. -tamas, -tamá, -tamam, cf. Latin timus, Greek τατος) for the superlative: thus, gua punya, 'holy,' पुरुषतर punyatara, 'more holy,' पुरुषतम punyatama, 'most holy,' declined like nouns of the first class at 103. So also, dhanavat, 'wealthy,' dhanavattara, 'more wealthy,' dhanavattama, 'most wealthy.' A final न is rejected; as, dhanin, 'rich,' dhanitara, 'more rich,' dhanitama, 'most rich' (57). विदस्त, 'wise,' makes विदसर, विदस्तम. Compare 168. a.
- 192. 2dly, by adding ईयस íyas (nom. -íyaín, -íyasí, -íyas, Greek $\bar{\iota}\omega\nu$, see declension at 167) for the comparative; and इष्ट ishtha (nom. -ishthas, -ishtha, -ishtham, declined at 103, cf. Greek $\iota\sigma\tau$ os) for the superlative.
- a. Note, that while the base of the Sanskrit comparative affix strictly appears to end in n and s (iyans), the Greek has adhered to the n throughout (N. $iyán = \iota\omega\nu$, voc. $iyan = \iota\sigma\nu$); and the Latin has taken the s for its neuter (iyas = ins, neuter of ior; r being changed to s, which so frequently happens). Compare Sanskrit gariyas with gravius.
- 193. In general, before *iyas* and *ishtha*, the base disburdens itself of a final vowel, or of the more weighty affixes *in*, vin, vat, mat: thus, बिलन् 'strong,' aलीयम् 'more strong' (declined at 167), बिलष्ठ 'strongest' (declined at 103); लघु 'light,' लघीयम् 'lighter,' लघिष्ठ 'lightest;' मेथाविन् 'intelligent,' मेथीयम् 'more intelligent,' मेथिष्ठ 'most intelligent.'

Compare स्वादीयान् (N. of swádíyas) from swádu with ήδίων from ήδύ; and स्वादिष्टम् with ἥδίστος.

194. But besides the rejection of the final, the base often undergoes considerable change, as in Greek (compare $\epsilon \chi \theta i \omega \nu$, $\epsilon \chi \theta i \sigma \tau \sigma_{\mathcal{S}}$, from $\epsilon \chi \theta \rho \delta_{\mathcal{S}}$); and its place is sometimes supplied by a substitute (compare $\beta \epsilon \lambda \tau i \omega \nu$, $\beta \epsilon \lambda \tau i \sigma \tau \sigma_{\mathcal{S}}$, from $\alpha \gamma \alpha \theta \delta_{\mathcal{S}}$). The following is a list of the substitutes:

POSITIVE.	SUBSTITUTE,		JPERLATIVE.
ञ्चिनिक antika, ' near'	नेद neda	नेदीयस्	नेदिष्ठ
ञ्चल्प alpa, 'little'	करण kaṇa	कगाीयम्	किंगष्ठ
वर् uru, 'large'	वर vara	वरीयस्	वरिष्ठ (ळॅрाठ र ०)
कृश kṛiśa, 'thin'	क्रम kraśa	क्रशीयम्	ऋशिष्ठ
िहाम kshipra, 'quick'	द्योप kshepa	द्योपीयस्	क्षेपिष्ठ
खुद्र kshudra, 'small,' 'mean'	छोद kshoda	छोदीयम्	छोदिष्ठ
गुरु guru, ' heavy'	गर gara	गरीयस्(gravius)	गरिष्ठ
तृष्र tṛipra, 'satisfied'	वष trapa	व्रपीयम्	व्रिषष्ठ
दीर्घ dírgha, 'long'	द्राघ drágha	द्राघीयस्	द्राधिष्ठ
हर dúra, ' distant'	दव dava	दवीयस्	दविष्ठ
दृढ dṛiḍha, ' firm'	द्रंड draḍha	द्रढीयम्	द्रदिष्ठ
परिवृह parivriha, 'excellent'	परिव्रह parivraha	परिव्रहीयस्	परिव्रहिष्ठ
पृषु prithu, 'broad'	प्रय pratha	प्रधीयम्	प्रथिष्ठ
प्रशस्य praśasya, ' good'	∫ श्र* śra	श्रेयम्	ष्येष्ट
ARTH prasasya, good	े ज्या * <i>jyá</i>	ज्यायम्	न्ये ष्ठ
प्रिय priya, ' dear'	¶* pra	प्रेयस्	प्रेष्ट
बहु bahu, ' much'	भू * bhú	भूयम्	भृयिष्ठ
बहुल bahula, ' much'	बंह banha	वंहीयम्	बंहिष्ठ
भूश bhriśa, 'excessive'	भश् bhrasa	भशीयस्	भ्रशिष्ठ
मृदु mridu, 'soft'	म्रद mrada	म्रदीयम्	म्रदिष्ठ
युवन् yuvan, 'young'	यव yava	यवीयम्	यविष्ठ
वाढ váḍha, ' firm,' ' thick'	साध sádha	साधीयम्	साधिष्ठ
वृद्ध vṛiddha, ' old'	∫ वर्षे varsha	वर्षीयस्	वर्षिष्ठ
24 vinana, ou	े ज्या * <i>jyá</i>	ज्यायम्	ज्ये ४
वृन्दारक vṛindáraka, 'excellent'	वृन्द vṛinda	वृन्दीयम्	वृन्दिष्ठ
स्थिर sthira, 'firm,' 'stable'	स्य stha	स्येयस्	स्थेष्ठ
स्यूल sthúla, 'gross, 'bulky'	स्थव sthava	स्यवीयम्	स्थविष्ठ
म्प्पर sphira, 'turgid'	स्पा spha	स्फेयम्	स्फेष्ट
हस hraswa, 'short'	ह्स hrasa	हसीयस्	ट्रसिष्ट

^{*} In the case of \mathbf{z} and \mathbf{z} the final vowel is not rejected, but combines with iyas and ishtha agreeably to Sandhi. In $\mathbf{z}\mathbf{z}$ and \mathbf{z} , yas is affixed in place of iyas.

- 195. Sometimes, but very rarely, degrees of comparison may be formed from feminine bases ending in the vowels ई i and ऊ i, which may either be retained before tara and tama, or be shortened: thus, from मती, 'a faithful wife,' सतीतर, सतीतर or सतितर, सतितर.
- 196. Tara and tama may sometimes be added to inseparable prepositions; as, বন্'up,' বন্ধ' higher,' বন্ধ 'highest.' Compare in Latin extimus, intimus, &c.
- α . They are sometimes added to pronominal bases (236), and to numerals (209, 211).
- 197. They may even be added, in conjunction with the syllable जो óm, to the inflexions of verbs; as, जञातितरां 'he talks more than he ought.'

SECTION IV.

NUMERAL ADJECTIVES.

CARDINALS.

198. The cardinals are, एक 1; द्वि 2; ति 3; चतुर् 4; पञ्चन् 5; पष् 6; ममन् 7; अष्टन् 8; नवन् 9; दशन् 10; एकादशन् 11; द्वादशन् 12; त्वयोदशन् 13; चतुर्देशन 14; पञ्चदशन् 15; मोडशन् 16; सप्तदशन् 17; अष्टादशन् 18; नवदशन or जनविंशति 19; विंशति 20; एकविंशति 21; द्वाविंशति 22; त्वयोविंशति 23; चतुर्विज्ञाति 24; पचविंज्ञाति 25; पडिंज्ञाति 26; सप्तविंज्ञाति 27; अष्टाविंज्ञाति 28; नवविंशति or जनविंशत् 29; विंशत् 30; एकविंशत् 31; द्वाविंशत् 32; वयस्त्रि-शत 33; चतुस्तिंशत 34; पचितिंशत 35; पट्तिंशत 36; सप्ततिंशत 37; अष्टार्ति-शत् 38; नवितंशत् or जनचत्वारिंशत् 39; चत्वारिंशत् 40; एकचत्वारिंशत् 41; डिचलारिंशत् or डाचलारिंशत् 42; विचलारिंशत् or वयग्रनारिंशत् 43; चतुग्र-त्वारिंशत् 44; पञ्चचत्वारिंशत् 45; पट्चत्वारिंशत् 46; सप्तचत्वारिंशत् 47; अष्टा-चत्वारिंशत् or अष्टचत्वारिंशत् 48; नवचत्वारिंशत् or जनपञ्चाशत् 49; पञ्चाशत् 50; एकपचाशत् 51; द्विपचाशत् or द्वापचाशत् 52; तिपचाशत् or तयःपचाशत् 53; चतुःपचाशत् 54; पचपचाशत् 55; षट्पचाशत् 56; सप्तपचाशत् 57; अष्टपचाशत् or ज्ञष्टापञ्चाज्ञात् 58; नवपञ्चाज्ञात or जनमष्टि 59; मष्टि 60; स्कपप्टि 61; द्विपष्टि or हापष्टि 62; तिपष्टि or तयःषष्टि* 63; चतुःपष्टि* 64; पञ्चपष्टि 65; यट्पष्टि 66; समपष्टि 67; अष्टपष्टि or अष्टापष्टि 68; नवपष्टि or अनुसम्रति 69; सम्रति 70; एकसमित 71; द्विसमित or द्वासमित 72; विसमित or व्यासमित 73; चतुःसमित 74; पञ्चमन्नति 75; पट्मन्नति 76; सन्नसन्नति 77; अष्टसन्नति or अष्टासन्नति 78; नवसप्रति or जनाशीति 79; अशीति 80; एकाशीति 81; द्वाशीति 82; त्र्यशीति 83; चतुरशीति 84; पत्राशीति 85; पडशीति 86; मनाशीति 87; अष्टाशीति 88; नवाज़ीति or जननवति 80; नवति 90; स्कनवति 91; द्विनवति or द्वानवति 92;

^{*} These may also be written त्वयप्पष्टि, चतुष्पष्टि. In fact, rules 62. a. and 63. apply equally to initial **प**; but **पप्** and **पष्टि**, and their derivatives, are the only words beginning with **प** ever likely to occur.

विनवित or व्योनवित 93; चतुर्नवित 94; पद्मनवित 95; परावित 96; समनवित 97; अष्टनवित or अष्टानवित 98; नवनवित or अनशत 99; शत n. or एकशत n. 100; सहस n. or एकसहस n. 1000.

199. The numbers between 100 and 1000, and those above 1000, are usually expressed by compounding the adjective अधिक adhika, 'more,' 'plus,' with the cardinal numbers: thus, 101 may be expressed by रकाधिकं आतं, i. e. 'a hundred plus one,' or more concisely रकाधिकं आतं or even आताधिकंक. Similarly, द्वाधिकं आतं or द्वाधिकंशत 102; व्यधिकं आतं or व्यधिकंशत 103; व्रिश्तदिधकंशत 130; पत्राश्वदिधकंशत or साईशत 150; द्विशत or हे अते N. du. neut. 200; पिंड्रंशतधिकद्विशत 226; व्विशत or तीणि आतानि N. pl. neut. 300; व्यशीतधिकविशत 383; चतुःशत or चत्विति शतानि N. pl. 400; पत्राशीतधिकचतुःशत 485; पत्रशत 500; पर्यव्यधिकपत्रशत 596; पर्शत 600; पर्यव्यधिकपर्शत 666; समझत 700; अष्टशत 800; नवशत 900; सहस्र or दशशत n. or दशशती 1000; पोडशञत or पर्शताधिकसहस्र 1600; पर्यव्यधिकपोडश्रत 1666.

a. The ordinals are sometimes joined to the cardinals to express 111 and upwards: thus, रकादशं शतं 111; विशे महसं 1020; तिशे शतं 130, &c.

b. Single words are used for the highest numbers: thus, अयुत n. 'ten thousand;' लख n. or लखा f. 'a lac,' 'one hundred thousand;' नियुत or प्रयुत m. n. 'one million;' कोटि f. 'a krore,' 'ten millions;' अर्चुत m. n. 'one hundred millions;' महावुद m. n. 'one thousand millions;' पस m. n. or अन्त n. 'ten thousand millions;' महापस m. n. 'one hundred thousand millions;' खर्च m. n. 'a billion;' महाखर्च m. n. or शहु m. 'ten billions;' शहु m. n. or ममुद्र m. 'a hundred billions;' महाशह 'a thousand billions;' हाहा m. or अन्त m. 'ten thousand billions;' महाहा m. or पराई m. 'one hundred thousand million;' भुन n. 'one million billion;' महाभुन n. 'ten million billion;' अर्थोहिस्पी f. 'one hundred million billion;' महास्त्री 'one thousand million billion.'

DECLENSION OF CARDINALS.

200. एक 1, द्वि 2 (duo, $\delta \acute{vo}$), दिव 3 (tres, $\tau \rho \epsilon \hat{is}$, $\tau \rho \iota a$), चतुर् 4 (quatuor), are declined in three genders.

रक eka, 'one' (singular only), follows the declension of pronominals (see 237): nom. m. ekas; dat. m. ekasmai; nom. f. eká; dat. f. ekasyai; nom. n. ekam. It may take the affixes tara and tama: thus, ekatara, 'one of two;' ekatama, 'one of many;' which also follow the declension of pronominals.

201. द्वि dwi, 'two' (dual only), is declined as if the base were द्व dwa: thus, N. Ac. V. m. हो dwau, f. n. द्वे dwa; I. D. Ab. m. f. n. द्वास्या; G. L. द्वयोस.

202. दि tri, 'three' (plural only), is declined in the masculine like the plural of nouns whose bases end in इ i at 110, excepting in the gen.: thus, N.V. masc. त्यम्; Ac. तीन्; I. तिभिम्; D. Ab. तिभ्यस्; G. त्याणां; L. तिनु. The feminine forms its cases from a base तिनृ: thus, N. Ac. V. fem. तिसस; I. तिनृभिम्; D. Ab. तिनृभ्यस्; G. तिमृणां; L. तिनृभु. The N. Ac. neut. is तीणि; the rest as the masculine.

203. चतुर chatur, 'four' (plural only), is thus declined: N.V. masc. चतारम् ($\tau \acute{\epsilon} \tau \tau \alpha \rho \epsilon s$, $\tau \acute{\epsilon} \sigma \sigma \alpha \rho \epsilon s$); Ac. चतुरम्; I. चतुर्भिम्; D. Ab. चतुर्भम्; G. चतुर्णो; L. चतुर्भुः. N. Ac. V. fem. चतमम्; I. चतमृभिम्; D. Ab. चतम्भम्; G. चतम्णां; L. चतमृषु. N. Ac. V. neut. चतारि; the rest as the masculine.

204. पचन् panchan, 'five' (plural only), is the same for masc., fem., and neut. It is declined after the analogy of nouns in an (147), excepting in N. Ac. The gen. lengthens the penultimate: thus, N. Ac.V. पच ($\pi\acute{e}\nu\tau\acute{e}$); I. पचिमम्; D. Ab. पचभ्यम्; G. पचानां; L. पचमु. Similarly are declined, सप्तन् 'seven' (septem, $\acute{e}\pi\tau\acute{a}$), नचन् 'nine' (novem), द्यान् 'ten' (decem, $\acute{o}\acute{e}\kappa a$), एकाद्यान् 'eleven' (undecim), द्वाद्यान् 'twelve' (duodecim), and all other numerals ending in an, excepting ऋष्टन् 'eight.'

205. पप shash, 'six,' and अष्टन् ashtan, 'eight,' are the same for masc., fem., and neut., and are thus declined: N. Ac.V. पर; I. पर्भिस; D. Ab. पर्भ्यम; G. पर्यां shannám; L. पर्मु. N. Ac.V. अष्ट or अष्टी (octo, ὀκτώ); I. अष्टभिस् or अष्टाभिस्; D. Ab. अष्टभ्यस् or अष्टाभ्यस्; G. अष्टानां; L. अष्टम्

206. All the remaining cardinal numbers, from जनविश्वात 'nineteen' to शत 'a hundred,' and महस 'a thousand,' are declined in the singular only, and are the same whether joined with masculine, feminine, or neuter nouns*. Those ending in ति ti are declined like the singular of the feminine noun मित mati at 112; and those in त् t are declined like the singular of मिरत sarit at 136: thus, विश्वाय पुरुष: 'with twenty men;' तिश्वा पुरुष: 'with thirty men.' शत 'a hundred' and महस 'a thousand' are neuter, and are declined like the neut. singular of शिव sira at 103: thus, शतं पितरस 'a hundred ancestors;' एकाधिकशतं

^{*} Although these numerals, when joined with nouns, are declined in the singular, yet when used alone as substantives, to express more than one hundred, or more than one thousand, they may take a dual or plural; as, चिंशाती 'two twenties;' विंशाती 'two thirties;' विंशातम् 'many thirties;' शते 'two hundred;' शतानि 'hundreds;' सहसाणि 'many thousands.'

पितरम् 'a hundred and one ancestors;' सहसेख पितृभिम् 'with a thousand ancestors.'

207. The adjective জন 'less,' 'minus,' may be placed before a cardinal number, to denote one less than that number, एक 'one' being either expressed or understood: thus, জনবিয়ানি or एकोनবিয়ানি 'twenty minus one' or 'nineteen' (compare the Latin undeviginti, i. e. unus de viginti). And other cardinals, besides एक 'one,' are sometimes prefixed to জন, to denote that they are to be deducted from a following number; as, पञ्चोनं शतं or पञ्चोनशतं 'a hundred less five' or 'ninety-five.'

ORDINALS.

- 208. The ordinals are, प्रथम 'first'* (compare $\pi\rho\hat{\omega}\tau$ os, primus); द्वितीय 'second' ($\delta\epsilon\acute{v}\tau\epsilon\rho a$); तृतीय 'third' (tertia); declined like pronominals at 237, or like $\acute{siv}a$ at 103.
- 209. चतुर्ष 'fourth' † (τέταρτος); पद्मम 'fifth;' पष्ट 'sixth;' सप्तम 'seventh' (septimus); जष्टम 'eighth;' नवम 'ninth' (nonus); द्र्यम 'tenth' (decimus); declined like śiva at 103, 104, for the masc. and neut.; and like nadí at 106. for the feminine. In saptama and ashṭama the superlative affix (196. a) may be recognised.
- 210. The ordinals from 'eleventh' to 'twentieth' are formed from the cardinals by rejecting the final n: thus, from एकादशन् 'eleven,' एकादश 'eleventh' (Nom. m. f. n. एकादशम्, -शी, -शं, 103, 106, 104).
- 211. 'Twentieth,' thirtieth,' fortieth,' and 'fiftieth,' are formed either by adding the superlative affix tama (196. a) to the cardinal, or by rejecting the final of the cardinal; as, from चिंग्राति 'twenty,' चिंग्रातितम or चिंग्रा 'twentieth' (Nom. m. f. n. -मस्, -मी, -मं; -शस्, -शी, -शं, 103, 106, 104). Similarly, तिंश्रात्तम or तिंग्रा 'thirtieth,' &c. The intermediate ordinals are formed by prefixing the numeral, as in the cardinals: thus, एकचिंग्रातितम or एकचिंग्रा 'twenty-first,' &c.
- a. Some grammarians admit a third form of ordinal, ending in in: thus, दशिन् 'tenth,' एकादशिन् 'eleventh,' विशिन् 'twentieth,' तिंशिन् 'thirtieth,' चतारिंशिन् 'fortieth,' पञ्चाशिन् 'fiftieth.'
- 212. The other ordinals, from 'sixtieth' to 'ninetieth,' are formed by adding tama, or by changing ti to ta: thus, from पष्टि 'sixty,' पश्चितम or पष्ट 'sixtieth;' from नवित 'ninety,' नवितितम or नवित 'ninetieth.'

^{*} Other adjectives may be used to express 'first;' as, আহঃ, -হা, -হা; আহিন:,
-দা, -দা; অহা:, -হা; অহিন:, -দা, দা.

[†] तुरीय:, -या, -यं; तुर्य:, -यी, -यीं - are also used for 'fourth.'

- 213. 'Hundredth' and 'thousandth' are formed either by adding tama to ज्ञात and सहस्र, or simply by converting these ordinals into adjectives, declinable in three genders: thus, ज्ञाततम or ज्ञात 'hundredth' (Nom. m. f. n. ज्ञाततमस्, -मी, -मं; ज्ञातस्, -ती, -तं). Similarly, सहस्रतमस्, -मी, -मं, or सहस्र; -सी, -सं, 'thousandth.'
- 214. The aggregation of two or more numbers is expressed by modifications of the ordinal numbers: thus, इयं 'a duad,' त्यं 'a triad,' चतुष्ट्यं 'the aggregate of four.'
- 215. There are a few adverbial numerals; as, सकृत 'once,' द्विम् 'twice,' दिस् 'thrice,' चतुम् 'four times.' कृत्वम् may be added to cardinal numbers, with a similar signification; as, पचकृत्वम् 'five times.' The neuter of the ordinals may be used adverbially; as, प्रथम 'in the first place.'

	9	2	3	8	ч	Ę	9	t	e	90
	I	2	3	4	5	6	7	8	9	10

CHAPTER V.

PRONOUNS.

FORMATION OF THE BASE.

217. Pronouns have no crude base analogous to that of nouns; that is, no state distinct from all inflexion, serving as the basis on which all the cases are constructed. The reason of this may be, that the pronouns in Sanskrit, as in all languages, are so irregular and capricious in their formation, that no one base would be equally applicable to all the cases. Thus in the 1st personal pronoun, the base of the nom. sing. would be ah, while that of the oblique cases sing. would be ma. In the 2d, the base of the sing. is practically twa, while that of the dual and plural is yu. The 3d would have sa for the base of the nom. sing., and ta for the other cases.

The question then arises, What form of the pronoun is to be used in the formation of compound words? In the pronouns of the first and second persons, the ablative cases, singular and plural, and in the other pronouns, the nominative and accusative cases singular neuter, are considered as expressive of the most general and comprehensive state of the pronoun. These cases, therefore, discharge the office of a crude base in respect of compound words.

DECLENSION OF THE PERSONAL PRONOUNS.

Observe—In Sanskrit, as in other languages, to denote the general and indefinite character of the first two personal pronouns, no distinction of gender is admitted. For the same reason, the formation of the nom. case of pronouns is made to resemble the neuter, as the most general state. This may also be the reason why the 3d pronoun sa drops the s of the nom. case before all consonants.

218.	मत् mat or ज्ञस्मत् asmat, '	I.'
N. अहं aham, ' I'	স্থাৰা ávám, ' we two'	वयं vayam, ' we'
Ac. मां mám or मा má, 'me'	— ávám or नौ nau, 'us two	' अस्मान् asmán or नस् nas, 'us'
I. मया mayá	जावाभ्यां ávábhyám	ज्रस्माभिस् asmábhis
D. मसं mahyam or मे me	— ávábhyám or नौ nau	ञ्जस्मभ्यं asmabhyam or नम् nas
Ab. मत् mat	— ávábhyám	अस्मत् asmat
G. нн mama or нे me	ञ्जावयोम् <i>ávayos</i> or नौ nau	ग्रस्माकं asmákam or नम् nas
L. मिय mayi	— ávayos	ऋस्मामु asmásu
219.	वत् twat or युप्मत् yushmat, '	thou.'
N. त्वं twam, 'thou'	पुर्वा yurám, 'you two'	यूर्य yúyam, 'you' or 'ye'
Ac. त्वां twám or त्वा twá	— yuvám or वां vám	युष्मान् yushmán or वस् vas
I. त्वया twayá	युवाभ्यां yuvábhyám	युप्माभिस् yushmábhis
D. तुभ्यं tubhyam or ते te		युप्मभ्यं yushmabhyam or वस् vas
Ab. न्वत् twat	— yuvábhyám	युष्मत् yushmat
G. तव tava or ते te	युवयोम् yuvayos or वां vám	युष्माकं yushmákam or वम् vas
\mathbf{L} . त्विष $twayi$	— yuvayos	युप्मासु yushmásu
220.	तत् tat or तद् tad, 'he,' 'tl	hat.'
	MASCULINE.	S
N. सस् sas, 'he'		ते te, 'they'
Ac. ர் tam	— tau	तान् t $\acute{a}n$
I. तेन tena	ताभ्यां tábhyám	तैस् $tais$ ($ au o i \varsigma$, $ au a i \varsigma$)
D. तस्मै tasmai	— tábhyám	तेभ्यस् tebhyas
Ab. तस्मात् tasmát		— tebhyas
G. तस्य tasya	तयोम् tayos	तेषां teshám
L. तस्मिन् tasmin	— tayos	तेषु teshu
	FEMININE.	
N. सा sá, 'she'	्ते te	तास् tás
Ac. तां tám	— te	— tás
I. तया tayá	ताभ्यां tábhyám	ताभिस् tábhis
D. तस्यै tasyai	— tábhyám	ताभ्यम् tábhyas

Ab. तस्याम tasyás ताभ्यां tábhyám ताभ्यम् tábhyas
G. — tasyás तयोम् tayos तामां tásám
L. तस्यां tasyám — tayos तामु tásu

NEUIER

N. Ac. तत् tat, ते te, तानि táni; the rest like the masculine. Compare the Greek article with the above pronoun.

- a. The above pronoun tat is sometimes used emphatically with the other pronouns, like ille and ipse: thus, मोडहं 'ille ego;' ते वयं 'illi nos;' म न्वं 'ille tu;' ते यूयं 'illi vos;' स रुप: 'ille ipse;' तह रुतत् 'id ipsum.'
- 221. There is a modification of the pronoun tat (rarely used), formed by inserting y: thus, N. स्यस्, न्यों, त्ये.
- a. Observe the resemblance of the Sanskrit personal pronouns to those of the dead and living cognate languages. Aham or ah is the Greek $\dot{\epsilon}\gamma\dot{\omega}$ (Æolic $\dot{\epsilon}\gamma\dot{\omega}\nu$), Latin ego, German ich, English 'I:' mám or má (the latter being the original form found in the Vedas) equals $\dot{\epsilon}\mu\dot{\epsilon}$, me: mahyam=mihi: mayi=mei: the mat of the abl. sing. and of asmat, yushmat, corresponds to the Latin met in memet, nosmet, &c.: vayam or va is the English 'we;' asmán=us: nas=nos; twam=tu, 'thou;' twám or twá=te, 'thee;' tubhyam=tibi: twayi=tui; yúyam=vµ\varepsiloni\varepsilon

REFLEXIVE PERSONAL PRONOUNS.

222. The oblique cases of जात्मन् átman, 'soul,' 'self' (declined at 147) are used reflexively, in place of the three personal pronouns, like the Latin ipse.

Thus, átmánam (me ipsum) anáhárena hanishyámi, 'I will kill inyself by fasting;' átmánam (te ipsum) mritavad darśaya, 'show thyself as if dead;' átmánam (se ipsum) nindati, 'he blames himself.'

DEMONSTRATIVE PERSONAL PRONOUNS.

223. The third personal pronoun $\pi\pi$ tat, 'he,' declined above at 220, is constantly used in a demonstrative sense, to signify 'that' or 'this;' and by prefixing \mathbf{v} e to it, another common pronoun is formed, more proximately demonstrative: thus, $\mathbf{v}\pi\pi$ etat or $\mathbf{v}\pi\pi$ etad, 'this.' Observe—The first t of etat may optionally be changed to n in the Ac. sing. du. pl., I. sing., G. du., in all three genders: thus,

रतत् etat or रतद् etad, 'this.'

MASCULINE.

N. ष्टमस् eshas. 70. स्ती etau स्ते ete Ac. स्तं etam or स्नं enam — etau or स्नी enau स्तान etán or स्नान enán

I. एतेन etena or एनेन enena	रताभ्यां etábhyám	रतेम् etais
D. एतसी etasmai	— etábhyám	एतेभ्यम् <i>etebhyas</i>
Ab. एतस्मात् etasmát	— etábhyám	- etebhyas
G. एतस्य etasya	रतयोस्etayos or रनयोस्enayos	रतेषां eteshám
L. एतस्मिन् etasmin	— etayos or — enayos	रतेषु eteshu

The feminine is N. एपा eshá, रते ete, एताम् etás; Ac. एतां वर एनां, एते वर एने, एते वर एनाम्; I. एतया वर एनया, एताभ्यां, एताभिम्; D. एतस्थै, &c.

The neuter is N. एतत, एते, एतानि; Ac. एतत् or एनत्, एते or एने, एतानि or एनानि, &c.

With the above pronoun compare the Latin iste, ista, istad: etam = istum, etasya = istius, etat = istud.

224. There is another common demonstrative pronoun, of which इदं idam, 'this,' the N. neuter, is considered to be the base (compare the Latin is, ea, id). The true base, however, might rather be said to be the vowel ξ i, which serves also as the source of certain pronominals, such as $\xi \pi \tau$, $\xi \xi \pi$, $\xi \tau \pi$. See 234, 236, and 234. b.

MASCULINE.

N. ऋषं ayam, 'this'	इमो imau, 'these two'	इमे ime, 'these'
Ac. इमं imam	— imau	इमान् imán
I. अनेन anena	ज्ञाभ्यां ábhyám	एभिस् ebhis*
D. जस्मे asmai	— ábhyám	एभ्यम् ebhyas
Ab. जस्मात् asmát	— ábhyám	- ebhyas
G. ज्ञस्य asya	ञ्जनयोस् anayos	एषां eshám
${ m L.}$ अस्मिन् $asmin$	- anayos	रषु eshu
,	FEMININE.	
N. इयं iyam	इमे ime	इमाम् imás
Ac. इमां imám	— ime	— imás
I. अनया anayá	ज्ञाभ्यां ábhyám	ञ्चाभिम् ábhis
D. ग्रस्ये asyai	— ábhyám	ञ्जाभ्यस् ábhyas
Ab. ग्रस्यास् asyás	— ábhyám	— ábhyas
G. — asyás	ञ्जनयोम् anayos	स्रासां ásám
L. अस्यां asyám	— anayos	ज्ञामु ásu
	NEUTER.	
N. Ac. इदं idam	इमे ime	ड्मानि $im\acute{a}ni$

^{*} This is an example of the old form for the instr. pl. of masculine nouns of the first class, preserved in the Vedas.

225. There is another demonstrative pronoun (rarely used, excepting in nom. sing.), of which खदम, 'this' or 'that,' is taken as the base, though the true base is खमु amu, and in N. sing. खमु asu. It is thus declined: Masc. N. खमी, खमृ, खमी; Ac. खमुं, खमू, खमून; I. खमुना, खम्भ्यां, खमीम्म; D. खमुप्मां, खमीम्मम; Ab. खमुप्मां, खम्मम्म; Ab. खमुप्मां, खमीम्मम, खमीपु. Fem. N. खमी, खम्, खमृम; Ac. खमूं, खमू, खमृम; I. खमुपां, खम्भ्यां, अमृश्यां, अस्थां, अस्थ

RELATIVE PRONOUN.

226. The relative is formed by substituting \mathbf{u} y for the initial letter of the pronoun tat, at 220: thus,

यत् yat or यह् yad, 'who,' 'which.'

MASCULINE.

N. यस् yas	यौ yau	ये ye, 'who' or 'which'
Ac. यं yam	— yau	यान् $ycute{a}n$
I. येन yena	याभ्यां yábhyám	यैस् yais
D. यस्मै yasmai	— yábhyám	येभ्यस् yebhyas
Ab. यस्मात् yasmát	— yábhyám	— yebhyas
G. यस्य yasya	ययोस् yayos	येमां yeshám
L. यस्मिन् yasmin	yayos	येषु yeshu

The feminine and neuter follow the fem. and neut. of tat, at 220. Fem. N. या $y\acute{a}$, ये ye, यास् $y\acute{a}s$; Ac. यां $y\acute{a}m$, &c. &c. Neut. N. Ac. यत् yat, ये ye, यानि $y\acute{a}ni$; the rest like the masculine.

With the above pronoun compare the Greek relative \tilde{s}_{S} , $\tilde{\eta}$, \tilde{s} ; the Sanskrit y being often represented in Greek words by the *spiritus asper*.

INTERROGATIVE PRONOUNS.

227. The interrogative differs from the relative by substituting k instead of y for the initial letter of the pronoun tat, at 220: thus, Masc. N. कस् kas, को kau, के ke, 'who?' 'which?' 'what?' Ac. के kam, 'whom?' &c. Fem. N. का $k\acute{a}$, के ke, काम $k\acute{a}s$, &c. The N. Ac. Neut. are कि kim, के ke, कानि $k\acute{a}m$, not kat *, ke, $k\acute{a}m$. kim is also taken for the base, and occurs in a few compounds; such as किमपें 'on what account?' 'why?'

^{*} Kat, however (= Latin quod), was the old form, and is retained in a few words; such as kachchit, 'perhaps;' kadartha, 'useless' ('of what use?'); kadadhwan, 'a bad road' ('what sort of a road?').

Pronouns. 99

a. The true base, however, is ka_i and to this may be affixed ti, to form $\sqrt[4]{n}$ they many? (quot). The same affix is added to tu, the proper base of the third personal pronoun, to form tati, 'so many' (tot). The Latin quot and tot, which drop the final i, take it again in composition; as, quotidie, totidem, &c.

INDEFINITE PRONOUNS.

228. The indeclinable affixes *chit*, *api*, and *chana*, affixed (in accordance with the rules of Sandhi) to the several cases of the interrogative pronouns, give them an indefinite signification; as, কহিনা, *kaśchit*, 'somebody,' 'some one,' 'any one,' 'a certain one:' thus declined:

MASCULINE.

केचित kechit, 'some persons' N. कश्चित् kaśchit. 62. कौचित् kauchit Ac. कचित kanchit. 59. कांश्चित kánšchit. 53. kauchit I. केनचित kenachit काभ्याञ्चित kábhyánchit केन्द्रित kaiśchit. 62. D. कस्मैचित kasmaichit केभ्याश्चित् kebhyaśchit kábhyánchit kebhuaśchit Ab.कस्माचित kasmáchchit kábhyánchit केपाञ्चित keshánchit G. कस्यचित kasyachit कयोग्नित kayośchit नेपुचित keshuchit L. कस्मिंच्चित kasminschit kayośchit

Similarly, Fem. Nom. काचित्, केचित्, काश्चित्; Ac. काखित्, &c.: and Neut. Nom. Ac. किखित 'something,' 'any thing,' केचित, कानियित, &c.

229. So also by affixing छपि; as, Masc. Nom. कोऽपि (64. a) 'some one,' 'a certain one,' कायपि, केऽपि (37, 35); Ac. कमपि, &c.; I. केनापि, &c. (31); D. कस्मा-पि, &c. (37); Ab. कस्मादिप, &c.; G. कस्पापि, &c.; L. कस्मिन्नपि, &c. (52). Fem. Nom. कापि, &c.; Ac. कामपि, &c.; I. कपापि, &c. &c. Nent. Nom. किमपि 'something,' 'any thing,' &c. The affix chana is rarely found, excepting in the Masc. Nom. कश्चन 'some one,' 'any one;' and in the Neut. Nom. किञ्चन 'something.'

230. In the same way interrogative adverbs are made indefinite: thus, from kati, 'how many?' katichit, 'a few;' from kadá, 'when?' kadáchit, 'at some time;' from katham, 'how?' kathanchana, 'some how.'

POSSESSIVE PRONOUNS.

231. These are formed by affixing iya (80. XV) to those cases of the personal pronouns, ending in t, which are used for crude bases: thus, from मन् and अस्मत '1,' मदीय madiya (45), 'mine,' and अस्मतीय asmadiya, 'our;' from नव 'thou,' त्वदीय twadiya, 'thine;' from नद् 'he,' नदीय tadiya, 'his.' They are declined like nouns of the first class at 103.

Observe, however, that the genitive case of the personal pronouns is more usually used for the possessive: thus, तस्य पुद्धः 'his son;' मम पुद्धी 'my daughter.'

REFLEXIVE OR POSSESSIVE PRONOUNS.

232. स्व swa (suus) is used reflexively, in reference to all three persons, and may stand for 'my own' (meus), 'thy own' (tuus), 'his own,' 'our own,' &c. (compare σφός, σφή, σφόν). It often occupies the first place in a compound: thus, सगृहं गद्धित 'he goes to his own house.' The gen. case of स्नात्मन átman at 147, or often the crude base, is used with the same signification; as, सात्मनो गृहं or सात्मगृहं गद्धित *. In modern Sanskrit, निज्ञ nija is often used in place of स्व and स्नात्म. स्व is declined like tat at 220; but the Ab. L. sing. masc. neut, and N. pl. masc. may follow śiva at 103.

HONORIFIC OR RESPECTFUL PRONOUN.

233. भवत् bhavat, 'your honour,' requiring the 3d person of the verb, is declined like dhanavat at 140: thus, N. masc. भवान् bhaván, भवन्तो bhavantau, भवन्तम् bhavantas; N. fem. भवती bhavatí, भवतो bhavatyau, भवतम् bhavatyas, &c.; Voc. भवति (140.b). It is constantly used in place of the 2d personal pronoun: thus, भवान् गृहं गच्छतु 'Let your honour go home' for 'Go thou home.'

DERIVATIVE PRONOUNS OF QUANTITY AND SIMILITUDE.

- 234. Modifications of the demonstrative, relative, and interrogative pronouns may take the affix चत् rat to express 'quantity,' and the affix दृष्ण drisa or दृष्ण dris' to express 'similitude:' thus, ताचत् távat, एताचत् etávat, 'so many,' 'so much' (tantus); याचत् (quantus) 'as many,' 'as much' (declined like dhanavat at 140); तादृष्ण tádrisa or तादृष्ण tádrisa or तादृष्ण tádrisa or तादृष्ण tádris, 'such like' (talis, τηλίκος); एतादृष्ण etádrisa or एतादृष्ण etádris,' like this or that' (following siva, at 103, for the mase. and neut.; uadí, at 106, for the fem. of those ending in भा sa; and dis, at 181, for the mase fem. neut. of those in भा s'). Similarly, यादृष्ण or यादृष्ण 'as like,' 'how like?' (qualis,' γλίκος); ইবৃষ্ 'so like;' कीदृष्ण or कीदृष्ण 'how like?' (qualis?').
- a. Note, that the affix \(\frac{1}{2} \) \(\text{is derived from the root } \) \(d_{t}(s), \' \text{to see,' appear,' and is in fact our English 'like,' } \) \(d \) being interchangeable with \(l \), and \(s \) with \(k \).
 - b. कियत् 'how much,' 'how many,' and इयत् 'so much,' are declined like भवत् at 233.

' WHOSOEVER,' ' WHATSOEVER.'

235. Expressed by prefixing the relative to the interrogative: thus, य: कश्चित् 'whosoever.' यत् किञ्चित् 'whatsoever:' or by repeating the relative; as, यो य:, यह यह.

^{*} Prof. Lassen cites an example from the Rámáyana, in which átman refers to the dual: Putram átmanah sprishtwá nipetatuh, 'They two fell down after touching their son.' Anthol. p. 171.

[†] दृक्ष driksha, declined like siva (103), is also used.

PRONOMINALS.

236. There are certain common adjectives which partake of the nature of pronouns, and follow the declension of *tat* at 220.

These are, श्रन्य 'other,' 'another;' इतर 'other' (cf. Latin iterum); श्रन्यतर 'one of two;' एकतर 'one of two' (έκάτερος); एकतम 'one of many;' जतर 'which of the two?' (πότερος for κότερος); कतम 'which of many?' ततर 'that one of two;' ततम 'that one of many;' यतर 'who or which of two;' यतम 'who or which of many.' The above are mostly formed by adding the comparative and superlative affixes to pronominal bases (196. a). They are declined like तत् throughout, and make the N. Ac. neut. sing. in at.

- 237. There are others, however, which make am instead of at in the N. Ac. neuter. The model of these is मर्च sarva, 'all:' thus, Masc. N. मर्चम sarvas, मंद्री sarvau, मर्चे sarve; Ac. मर्चे sarvam, मर्चे sarvau, मर्चे sarvan, मर्चे sarvau, मर्चे sarvay, सर्वे स्वां sarvay, सर्वे संवं sarva, सर्वे s
- 238. Like sarva are declined उभय 'both' (no sing.); विम्न 'all;' नेम 'half;' अधर 'inferior;' पर 'other;' अपर 'other;' अपर 'posterior;' उत्तर 'superior,' 'north;' दिश्चण 'south,' 'right;' पृष्ठ 'east,' 'prior;' एक 'one;' अनर 'other:' but (with the exception of the first three) these may optionally follow siva, at 103, in the abl. loc. sing. masc. and neut., and the nom. pl. masc.; as, अधरस्मात् or अधरात्, &c.
- 239. द्वितीय 'second,' तृतीय 'third,' may either follow sarva at 237, or siva at 103, and make their feminine in a.
- 240. अस्य 'a few,' अर्ड 'half,' कितप्य 'how few?' 'few,' प्रप्स 'first,' generally follow sira at 103; but may make their nom. plur. in e_j as, अस्पे 'few.' उभ, 'both' $(ambo, \ddot{\alpha}\mu\phi\omega)$, is declined only in the dual; उभी, उभागां, उभयोम् .

CHAPTER VI.

VERBS.

GENERAL OBSERVATIONS.

241. Although the Sanskrit verb offers the most striking and interesting analogies to the Greek, nevertheless so peculiar and artificial is the process by which it is formed, that it would be impossible, in treating of it, to adopt an arrangement which would be likely to fall in with the preconceived notions of the classical student.

There are ten tenses. Seven of them are of common occurrence; viz. 1. the present, 2. the potential, 3. the imperative, 4. the first preterite, 5. the second preterite, 6. the first future, 7. the second future. Three are of rare occurrence; viz. 8. the third preterite, 9. the benedictive, 10. the conditional. There is also an infinitive mood, and several participles. Of these tenses, the present, the three preterites, and the two futures, belong properly to the indicative mood; and the imperative, potential, benedictive, and conditional, are more properly moods than tenses. Since, however, these latter moods do not comprehend other tenses under them, but are susceptible of all times, present, past, and future, it can lead to no embarrassment to consider them as tenses, and to arrange them indiscriminately with the tenses of the indicative. Four of the tenses, viz. the present, potential, imperative, and first preterite, are called conjugational tenses, and are placed first in order, because to them alone (as will be hereafter explained at 248) the rules of conjugation have reference.

242. Although the three preterites are used without much distinction, yet it should be observed, that they properly express different degrees of past time. The first preterite corresponds in form to the imperfect of Greek and Latin verbs, and properly has reference to an event doing at some time past, and not ended: it is often, however, used like the Greek agrist. The second preterite is said to have reference to an event done and past at some definite period: it answers in form to the Greek perfect, but may also be used like the aorist. The third preterite refers to an event done and past at some indefinite period: it corresponds in form and sense to the Greek 1st and 2d aorist*. So also, the two futures properly express, the first definite, the second indefinite futurity: the second, however, is the most used, and answers to the Greek future. The potential may generally be rendered in English by some one of the auxiliaries, 'may,' 'can,' 'would,' should, 'ought.' The conditional is used after the conjunction yadi, 'if:' it occurs, however, but very rarely, and the potential usually supplies its place in conditional sentences. The benedictive or precative is a tense sometimes used in praying and blessing. There is no pluperfect in Sanskrit: the sense of this tense is expressed by the indeclinable participle or by the locative absolute; as, tasminn apakránte, 'after he had departed.' See Syntax.

^{*} The fact is, that neither one of the three perfects is very commonly used to represent the completeness of an action. This is generally done by employing the passive participle with an instr. case; or by adding rat to the pass. part., and combining it with the present tense of as, 'to be;' as, vktaván asmi, 'I have said.' See Syntax.

The infinitive mood generally has an active, but is capable of a passive signification.

243. Every tense has three numbers, singular, dual, and plural.

To each tense belong two sets of terminations; one for the active or transitive voice, the other for the reflexive voice. The former of these voices is called by Indian grammarians Parasmaipada ('words for another'), because the action is supposed to pass parasmai, 'to another;' the latter is called A'tmane-pada ('words for oneself'), because the action is supposed to revert átmane, 'to oneself.' This distinction, however, is rarely observed, and we find verbs, transitive or intransitive, conjugated indifferently in the Parasmai-pada or Atmane-pada or both. Some verbs, however, are conjugated only in the Atmane, and are restricted to either a neuter · or reflexive signification; or sometimes, when a verb takes both voices, the Atmane may yield its appropriate meaning, and give a sense directing the action in some way towards the agent *. Thus, $d\hat{a}$, 'to give,' with the preposition \hat{a} , 'to,' prefixed, when conjugated in the Atmane-pada, means 'to give to oneself,' 'to take;' the causal verb darśayati, 'he shows,' becomes in the Atmane darśayate, 'he shows himself,' 'appears;' the roots mud and ruch, meaning 'to be pleased, 'please oneself,' are confined to the Atmane; and yách, 'to ask,' although possessing both voices, is more commonly used in the reflexive, the act of asking generally tending to the advantage of the asker.

a. Passive verbs are invariably conjugated in the Atmane-pada. Indeed, in all the tenses, excepting the first four, the passive is generally undistinguishable from the Atmane-pada of the primitive verb. But in the present, potential, imperative, and first preterite (unlike the Greek, which exhibits a perfect identity between the middle and passive voices in those tenses), the Sanskrit passive, although still employing the Atmane-pada terminations, has a special

^{*} In Sanskrit grammar, the term voice has reference to the scheme of terminations; so that there are only two voices in Sanskrit, and they are used indiscriminately. Although the Atmane-pada, in a few instances, has a middle sense, yet it cannot be said to correspond entirely with the Greek middle voice, the characteristic of which is that it takes a middle inflection, partly active, partly passive. The passive is a distinct derivative from the root, using the Atmane terminations.

structure of its own, common to all verbs, and distinct from the conjugational form of the Λtmane-pada. Thus the Greek ἀκούω makes for both the middle and passive of those four tenses, 1st sing. ἀκούομαι, ἀκουοίμην, ἀκούου, ἢκουόμην. But the Sanskrit śru, 'to hear,' makes for the conjugational form of the Λtmane, সূমন, সূমনী, সূমনী, সামান, স

244. As in nouns the formation of an inflective base out of a root precedes the subject of declension, the root requiring some change or addition before the case-terminations can be affixed; so in verbs the formation of a verbal base out of a root must be antecedent to conjugation. Again, as in nouns every case has its own termination, so in verbs each of the three persons, in the three numbers of every tense, has a termination (one for the Parasmaipada, and one for the Atmane-pada) which is peculiarly its own. Moreover, as in nouns, so in verbs, some of the terminations may be combined with memorial letters, which serve to aid the memory, by indicating that where they occur peculiar changes are required in the root. Thus the three terminations which belong to the 1st, 2d, and 3d persons of the present tense, Parasmai-pada, respectively, are mi, si, ti; and these are combined with the letter P (thus, miP, si P, ti P), to indicate that the roots of certain verbs must be modified in a particular way, before these terminations are affixed.

245. The annexed tables exhibit, 1st, the memorial scheme of terminations for Parasmai and A'tmane-pada, in all the tenses (the four conjugational being placed first); and 2dly, the same scheme without the memorial letters. Since, however, a very large number of roots require changes in the terminations of some of the tenses, it will be convenient, in the second table, to indicate the conjugations in which these changes occur.

246. Terminations with memorial letters.

PARASMAI-PADA.

ATMANE-PADA.

247. The same terminations without memorial letters.

			Present	tense.		
PER	S. SING.	DUAL.	PLURAL.	SING.	DUAL.	PLURAL.
Ι.	मि	वस्	मस्	इ 1,4,6,10. ए 2, 3, &c.	बहे	महे
2.	सि or पि	थम्	য	से or पे	{ इषे 1, 4,6,10. साथे 2,3,7,5,8,9.	ब्रिं
3.	ति	तम् {	ाना 1, 4, 0, 10. जना 2,7,5,8,9. जिता 3.	ते	DUAL. विहे इथे 1, 4,6,10. आये 2,3,7,5,8,9. इते 1, 4, 6, 10. आते	िनो 1, 4, 6, 10. चित्रे 2,3,7,5,8,9.
			_	ntial.		

In 1, 4, 6, 10.

. इसं इव इम

. इस् इतं इत In all the conjugations.

. इत् इतां इयुम् 1. ईय ईयहि ईमहि

In 2, 3, 7, 5, 8, 9.

. यां याव याम 3. ईत ईयातां ईरन्

. यास् यातं यात

. यात् यातां युम्

In 9, ána is substituted for the hi of the 2d sing, after roots ending in consonants. A form $\pi \Pi \bar{\eta}$ $t\acute{a}t$ (cf. Latin to, Greek $\tau \omega$) may be substituted for hi and tu, and even for ta, to imply benediction, chiefly used in the Vedas.

First preterite (requiring the augment a).

Second preterite.

1.	ত্ম	[*] इ व	* इम	ਦ	* इवहे	* इमहे
2.	इथ or थ	ञ्जयुम्	হ্ম	* इपे	ञ्जाये	*इध्बे or *इद्वे
3.	স্থ	छतुम्	उम्	र	खाते	इरे

* Only eight roots, viz. $orall_i$, $orall_i$, or

First future.

1.	तास्मि	ताखम्	तास्मम् 📗	ताहे	ताखहे	तास्महे
2.	तासि	तास्यम्	नास्य	तासे	तासाचे	ताध्वे
3 •	ता	तारी े	तारस्	ता	तारी	तारम्

Many roots prefix i to the terminations of the above tense throughout: thus.

1. इतास्मि itásmi, 2. इतासि itási, &c.

Second future.

1.	स्यामि	स्यावम्	स्यामस्	स्ये	स्यावहे	स्यामहे
2.	स्यसि	स्यथस्	स्यथ	स्यसे	स्येथे	स्यध्वे
3.	स्यति	स्यतम्	स्यन्ति	स्यते	स्येते	स्यने

Many roots prefix i to the terminations of the above tense throughout: thus,
1. ইআদি ishyámi, 2. ইঅদি ishyasi, &c.

Third preterite (requiring the augment a).

FORM I .- Terminations of the memorial scheme.

I.	मं	ख	सम	सि	खहि	स्महि
2.	सीम्	स्तं or तं	स्तorत	स्थास् or थास्	मा थां	ध्वं or द्वं
3.	सीत्	स्तां or तां	मुम्	स्त or त	मातां	सत

The same terminations with i prefixed, excepting in 2d and 3d sing., where initial s is rejected.

ı.	इपं	इप्व	इप्म	इ िं	इप्वहि	इप्महि
2.	ईस्	इष्टं	इष्ट	इष्टाम्	ड्षाथां	इ ध्वं or इद्वं
3.	ईत्	द्रष्टां	इपुस	इष्ट	ड्पातां	इपत

FORM II .- Terminations resembling those of 1st preterite.

ı.	सम्	स्राव or व	ञ्जाम or म	ए or इ	ञ्चावहि	ञ्चामहि
2.	ञ्चस् or स्	अतं or तं	अत or त	ञ्जषाम्	र्षां or आप	यां ऋध्वं
3.	ञ्चत् or त्	अतां or तां	छन् or उस्	खत	দনা or স্থান	iं अनं or अत

Benedictive.

ī.	यासं	याख	यास्म	सीय	सोवहि	मीमहि
2.	यास्	यास्तं	यास्त	सीष्टाम्	मीयास्थां	सीध्वं (-दुं)
3.	यात्	यास्तां	यामुस	सीष्ट	सीयास्तां	सीरन्

Many roots prefix i to the Atmane, but not to the Parasmai, of the above tense: thus, 1. इपीय ishiya, 2. इपीष्ठास् ishishthás, &c.

Conditional (requiring the augment a).

ı.	स्यं	स्याव	स्याम	स्ये	स्यावहि	स्यामहि
2.	स्यम्	स्यतं	स्यत	स्यथाम्	स्येषां	स्यध्वं
3.	स्यत्	स्यतां	स्यन्	स्यत	स्येतां	स्यन

Many roots prefix i to the terminations of the above tense throughout: thus, 1. इ.पं ishyam, 2 इपस् ishyas, &c.

- a. As an aid in committing the above terminations to memory, observe that the letter m generally enters into the 1st sing. Parasmai; s into the 2d sing. Parasmai and Atmane; and t into the 3d sing, du, and pl. Parasmai and Atmane of all the tenses. Moreover, that the letter v occurs in the 1st dual, m in the 1st plural of all the tenses, and dhw in every 2d plural Atmane-pada. In the potential and 1st preterite Atmane, and in the 2d preterite Parasmai, th is admitted, instead of s, into the 2d sing.; and in the 2d pl. of the last tense, th has been dropped, owing to the influence of the heavy reduplication. For the same reason the t is dropped in the 3d sing. of the 2d pret. Observe also - When the 1st dual Parasmai is vas, the 2d and 3d end in as, and the 1st plural is mas. When the 1st dual Parasmai is va, the 2d and 3d end in tam, tam, and the 1st plural in ma. When the 1st dual Atmane is vahe, the 1st plural is mahe, and the last letter of the remaining terminations is generally e. When the 1st dual Atmane is vahi, the 2d and 3d end in αm ; the 1st plural is mahi, and the 2d plural is dhwam. Note also—The terminations of the 2d future resemble those of the present, with sya prefixed. Those of the 1st future also resemble the present, with tá or tás prefixed. Those of the conditional resemble the 1st preterite, with sya prefixed. Those of the 3d preterite also resemble the 1st preterite, with s prefixed. Those of the benedictive resemble the potential, with s inserted in most of the Parasmai; and with s both inserted and prefixed in some of the Atmane.
- b. The frequent occurrence of m in the 1st sing., of s in the 2d, of t in the 3d, of mas and ma in the 1st pl., of ta in the 2d pl., and of ant in the 3d pl., suggests a comparison with the Greek and Latin verb. We may remark, that m, the characteristic of the 1st person sing., is suppressed in the present tense active of all Greek verbs excepting those in μt ($asmi = \hat{\epsilon} \mu \mu i$, $dadami = \delta i \delta \omega \mu t$), and also in Latin verbs (except sum and inquam); but ω and o answer to the Sanskrit d of $bhar dmi = \phi \hat{\epsilon} \rho \omega$, fero. In the Greek middle and passive, the μt , which originally belonged to all active verbs, appears in $\mu \alpha t$; while the Sanskrit, on the other

hand, here suppresses the m, and contracts a i into e (see 32); bhare (for bhara-me for bhara-mai) = φέρομαι. Greek has μι in the 1st sing. optative or potential; and in verbs in $\mu \iota$, ν takes the place of the mute m of Sanskrit and Latin: thus, bhareyam = $\phi \in \rho \circ \iota \mu \iota$, feram; dadyám = $\delta \iota \delta \circ \iota \gamma \nu$, dem; tishtheyam = $\iota \sigma \tau \alpha \iota \gamma \nu$, stem. In the 1st preterite or imperfect, Greek has v for the Sanskrit and Latin mute m: $atarpam = \epsilon \tau \epsilon \rho \pi \sigma v$, $adadam = \epsilon \delta i \delta \omega v$, $astrinavam = \epsilon \sigma \tau \delta \rho v v v$, $avaham = v \epsilon h \epsilon b a m$. In the first Greek agrist, m is suppressed, so that Sanskrit adiksham (3d pret.) = $\tilde{\epsilon}\delta\epsilon\iota\xi\alpha$; but not in the 2d agrist, so that $ad\acute{a}m=\tilde{\epsilon}\delta\omega\nu$. In the 2d preterite the Sanskrit $a = \text{Greek } \alpha$, $tutopa = \tau \acute{\epsilon} \tau \nu \phi \alpha$. In the Greek middle and passive futures, m is retained, but not in the active; $d\acute{a}sy\acute{a}mi = \delta\acute{\omega}\sigma\omega$, $dekshy\acute{a}mi = \delta\acute{\epsilon}i\kappa\sigma\omega$. $d\acute{a}sye = \delta\acute{\omega}\sigma o\mu \alpha i$. As to the 1st person plural, the Sanskrit mas of the pres. is $\mu \epsilon \nu$ (for $\mu \epsilon \varsigma$) in Greek, and mus in Latin; $tarp \acute{a}-mas = \tau \acute{\epsilon} \rho \pi o - \mu \epsilon \nu$; $sarp \acute{a}-mas =$ $\xi \rho \pi \sigma - \mu \epsilon \nu$, serpi-mus; dad-mas = δίδο- $\mu \epsilon \nu$, da-mus; tishthá-mas = $i \sigma \tau \alpha - \mu \epsilon \nu$, sta-mus. The Atmane-pada mahe answers to the Greek $\mu \epsilon \theta \alpha$; dad-mahe = $\delta \iota \delta \delta$ - $\mu\epsilon\theta\alpha$. As to the other tenses, in the potential 1st pl. bhare-ma = $\phi\epsilon\rho\sigma\iota$ - $\mu\epsilon\varsigma$ (- $\mu\epsilon\nu$), fera-mus; dadyáma = $\delta i \delta o i \eta \mu \epsilon \varsigma$ (- $\mu \epsilon \nu$), demus; dadí-mahi = $\delta i \delta o i - \mu \epsilon \theta \alpha$. In the ıst preterite 1st pl. abhará-ma = ἐφέρο-μεν, fereba-mus; avahá-ma = veheba-mus; $adad-ma = \epsilon \delta i \delta \delta - \mu \epsilon \nu$; $abhar \acute{a}-mah i = \epsilon \phi \epsilon \rho \acute{\rho} \mu \epsilon \theta \alpha$. In the 2d future, $d\acute{a}sy\acute{a}-mas =$ δώσο-μεν, $dekshy\acute{a}$ -mas = δείκσο-μεν. In the 2d pers. sing. active, the characteristic s has been preserved in all three languages: thus, in the present, the Sanskrit asi = $\dot{\epsilon}\sigma\sigma i$, es; dadá-si = $\delta i\delta\omega \varsigma$, das; bhara-si = $\phi\dot{\epsilon}\rho\epsilon\iota\varsigma$, fers; vahasi = vehis. In the Atmane, the Sanskrit se (for sai, by 32) answers exactly to the Greek $\sigma \alpha i$ of verbs in $\mu\iota$ (tishtha-se = $i\sigma\tau\alpha$ - $\sigma\alpha\iota$). In other Greek verbs, s has been rejected, and εαι contracted into η, something in the way of Sanskrit (τύπτη for τύπτε-σαι). In the 2d dual, thas = Greek TOV, and in the 2d plur. tha = TE and tis; bhara-thas $= \phi \epsilon' \rho \epsilon - \tau \sigma v$; tishtha-tha $= i \sigma \tau \alpha - \tau \epsilon$, statis; bhara-tha $= \phi \epsilon' \rho \epsilon - \tau \epsilon$, fer-tis. In the 2d pl. Atmane, bhara-dhwe = $\phi \epsilon \rho \epsilon \sigma \theta \epsilon$. As to the other tenses, in the 2d sing. potential, tishthes = $i\sigma\tau\alpha i\eta\varsigma$, stes; dadyás = $\delta i\delta oi\eta\varsigma$, des; vahes = vehas; bhares $= \phi \epsilon \rho \sigma i \varsigma$, feras: in 2d du. bhare-tam $= \phi \epsilon \rho \sigma i$ -τον: in 2d pl. tishtheta $= i \sigma \tau \alpha i \eta \tau \epsilon$, stetis; dadyáta = διδοίητε, detis; bhareta = φέροιτε, feratis. In the 2d sing. imperative, hi and dhi answer to Greek θι. Dhi was originally universal in Sanskrit (see 291), as in Greek verbs in $\mu \iota$; e- $dhi = i\sigma$ - $\theta \iota$, vid- $dhi = i\sigma$ - $\theta \iota$, de- $hi = \delta \iota \delta \circ -\theta \iota$. Many verbs drop the termination hi both in Greek and Sanskrit; as, $\forall \tau = \phi \epsilon \rho \epsilon$, and compare $\delta \epsilon i \kappa \nu \nu$ with chinu, &c. In the 2d du. imp. $tam = \tau o \nu$, and $ta = \tau \epsilon$. In the imperative Atmane, swa = the old form σo ; $bhara-swa = \phi \epsilon \rho \epsilon - \sigma o$ (old form of $\phi'_{\epsilon\rho\nu}$; $dat\text{-}swa = \delta i\delta \sigma - \sigma \sigma$; $atham = \epsilon \sigma \theta \nu \sigma$, &c. In the 2d sing. 1st pret. $atarpas = \tilde{\epsilon} \tau \epsilon \rho \pi \epsilon \varsigma$, avahas = vehebas, &c. So also, $tam = \tau \circ \nu$, $adat - tam = \tilde{\epsilon} \delta i \delta \circ \tau \circ \nu$, $ta = \tau \epsilon$, $adat - ta = \epsilon \delta i \delta o - \tau \epsilon$. In the Atmane, this is found for sas in the 2d sing. of the 1st pret., as well as of the potential; hence abhara-thás = $\dot{\epsilon}\phi\dot{\epsilon}\rho\epsilon-\sigma o$, adat-thás = $\epsilon \delta i \delta c - \sigma o$, dadi-thás = $\delta i \delta c \iota (\sigma) o$. In the 2d pret, the tha of the 2d sing. = Latin sti; dad-itha = dedi-sti, tasthi-tha = steti-sti, tutodi-tha = tutudi-sti. In the 3d pret. $ad\acute{a}s = \ \ \acute{\epsilon}\delta\omega\varsigma$, $av\acute{a}ksh\acute{a}s = vexisti$. In the 3d pers. sing. active, Greek has dropped the characteristic t (except in $\epsilon \sigma \tau i = \text{Sansk. asti, Lat. est}$); bharati

248. The above terminations are supposed to be applicable to all verbs, whether primitive or derivative: and as in nouns, so in verbs, the theory of Indian grammarians is, that before these terminations can be affixed to roots, an inflective base must be formed out of the root. Ten different rules, therefore, are propounded for forming verbal bases out of roots in the first four tenses; while all verbs are arranged under ten classes, according as they follow one or other of these rules. In the other tenses there is only one general rule for forming the base.

These ten classes of verbs are called the ten conjugations; and the four tenses, which alone are affected by the conjugational rules (viz. the present, potential, imperative, and first preterite), are called the conjugational tenses. It is evident, however, that the ten conjugations are hardly conjugations in the classical sense of the term. They are rather ten rules for moulding and fashioning ten classes of roots into the proper form for receiving a common scheme of terminations in four of the tenses only.

249. The following is a brief summary of the ten rules for forming the base of the four conjugational tenses in the ten classes of verbs, according to the Indian arrangement of the conjugations.

2d class (2d conjugation). Gunate the radical vowel (unless it be \overline{s} a or precede a double consonant) before those terminations only which are marked with P in the scheme at 246. Before all the other terminations the original vowel of the root must be retained.

3d class (3d conjugation). Reduplicate the initial consonant and

vowel of the root, and gunate the radical but not the reduplicated vowel before the P terminations only, as in the 2d conjugation.

4th class (4th conjugation). Affix \mathbf{v} ya—lengthened to \mathbf{v} ya before initial m or v—to the root, the vowel of which is generally left unchanged.

5th class (5th conjugation). Affix \mathbf{q} nu to the root, and gunate this nu into no before the P terminations only.

6th class (6th conjugation). Affix $\overline{\mathbf{w}}$ a—lengthened to $\overline{\mathbf{w}}$ in before initial m or v—to the root, which in other respects generally remains unchanged.

7th class (7th conjugation). Insert π na between the vowel and final consonant of the root before the P terminations, and π n before the other terminations. Observe the peculiarity of this conjugation—that the conjugational na or n is inserted into the middle of the root, and not affixed.

8th class (8th conjugation). Affix $\exists u$ to the root, and gunate this u into o before the P terminations only. Observe—As all the roots, except one, in this class, end in n, the 8th conjugation will appear to be exactly similar to the 5th.

9th class (9th conjugation). Affix ना $n\acute{a}$ to the root before the P terminations; नी $n\acute{a}$ before all the others, excepting those beginning with vowels, where only न n is affixed.

10th class (10th conjugation). Guṇate the radical vowel throughout all the persons of all the tenses, and affix अय aya—lengthened to अया $ay\acute{a}$ before initial m or v—to the root thus guṇated.

250. It will appear, from a cursory examination of the above rules, that the object of all of them, excepting the 2d, 3d, and 7th, is to insert a vowel, either alone or preceded by y or n, between the modified root and the terminations; and that the 1st, 4th, 6th, and 10th, agree in requiring that the vowel, which is immediately to precede the terminations, shall be a. It will appear, moreover, that the 2d, 3d, and 7th, alone agree in not interposing a vowel between the final of the root and the terminations; and that the 5th, 8th, and 9th, agree in interposing either u, \acute{a} , or \acute{i} , after the letter n.

a. It must never, however, be forgotten, that the conjugational characteristic, whatever it may be, has reference only to the four conjugational tenses (excepting only in the 10th conjugation), and that in the other tenses the base is formed according to one general

rule for all verbs of whatever conjugation; or, in other words, that in these tenses all verbs, of whatever class, are as if they belonged to one common conjugation.

- b. It is evident, that a comparison between the difficulty of the Sanskrit and Greek verb would be greatly to the advantage of the former. The Greek verb has three voices, and about ninety tenses and moods: the Sanskrit has only two voices, and not more than twenty tenses and moods. Besides which, a far greater number of verbs are susceptible of the three voices in Greek, than of the two in Sanskrit. Moreover, in Sanskrit there are no contracted verbs, and no difficulties resulting from difference of dialect; and although there are ten conjugations, yet these have reference to four tenses only; and, under some of these conjugations, only two or three common verbs are contained.
- 251. Hence it appears, that the very meaning of Sanskrit conjugation is the *Sandhi* or junction of a verbal base (formed out of a root according to ten rules for four of the tenses, and one general rule for the other tenses) with a common scheme of terminations, and that in conjugating a verb, two things have to be done; 1st, to form the base from the root, in the manner described above; 2dly, to join the base with the terminations, according to the rules of Sandhi.
- 252. Before proceeding to a detailed explanation of the formation of the verbal base of the simple or primitive verb, under the several classes, it will be worth while to specify the four other verbs deducible from roots, and to explain how they are derived.
- a. It has been already shown, at 74, that there are a large number of monosyllabic sounds in Sanskrit, called *roots*, which are the source of verbs as well as nouns. These roots are in number about two thousand; and the theory of grammarians is, that each of them may serve as the rough block out of which the inflective bases of five kinds of verbs may be fashioned: 1. of a primitive, transitive or intransitive; 2. of a passive; 3. of a causal, having often a causal and often merely a transitive signification; 4. of a desiderative, giving a sense of wishing to the root; and 5. of a frequentative (or intensive), implying repetition, or heightening the idea contained in the root.
- b. It will be found, however, in practice, that the greater number of these two thousand roots never occur at all in the form of verbs, nor, indeed, in any other form but that of the nouns to which they give origin; and that the roots in real use, as the source of verbs, are comparatively few. Of these few, moreover, certain particular roots (such, for example, as $\overline{q}_i k_{ri}$, to do'), as if to compensate

for the inactivity of the others, are kept in constant employment; and, by compounding them with prepositions and other prefixes, applied to the expression of the most various and opposite ideas. Nevertheless, theoretically, from every root in the language may be elicited five kinds of verbal bases.

The first, or primitive verb, is formed from the root, according to the ten different rules (or conjugations) applicable to the formation of the base in the first four tenses. The second, or passive, is formed according to the rule for the change of the root, required by the 4th conjugation; viz. the addition of ya in the first four tenses. The third, or causal, is formed according to the rule for the change of the root, required by the 10th conjugation; viz. the addition of aya to the root in all the tenses excepting the 3d preterite. fourth, or desiderative, is formed by the addition of sa or isha, the root also undergoing reduplication. The fifth, or frequentative, is formed like the passive, according to the rule required by the 4th conjugation, and is, in fact, a reduplicated passive verb. It may also be formed analogously to the rule for the 3d conjugation. Thus, take the root जान subh, conveying the idea of 'shining'—from this are elicited, 1st, the primitive verbal base, śobha, 'to shine;' 2dly, the passive, śubhya, 'to be bright;' 3dly, the causal, śobhaya, 'to cause to shine' or 'illuminate;' 4thly, the desiderative, śuśobhisha, 'to desire to shine;' 5thly, the frequentative or intensive, śośubhya or śośobh, 'to shine very brightly.'

a. Note, that as every root may be the source of five different kinds of verbs, so every noun may be the source of a class of verbs (not much used) called nominal verbs. A brief explanation of these will be found after frequentatives at 518.

253. It has already been remarked, that the passive can hardly be considered a voice, according to the classical acceptation of the term. In Greek and Latin, a verb in the passive voice corresponds in form with the same verb in the active: thus audior corresponds with audio, ἀκούομαι with ἀκούω, the terminations or system of inflection only being changed. And in Greek, a verb in the passive corresponds with the same verb in the middle voice, both in the form and in the terminations of most of its tenses. But, in Sanskrit, the form of the passive varies entirely in the conjugational tenses from that of the active verb (unless that verb belong to the 4th conjugation), whilst the terminations may sometimes be the same, viz. those of the Λtmane-pada. It is rather a distinct derivative from the root, formed on one invariable principle, without any necessary community with the conjugational structure of the active verb. Thus the root bhid, to divide, is of the 7th conjugation, and makes bhinatti or bhinte, he divides; dwish, to hate, is of the 2d conjugation, and makes dweshti or dwishte, he hates;

but the passive of both is formed according to one invariable rule, by the simple insertion of ya, without reference to the conjugational form of the active: thus, bhidyate, 'he is divided;' dwishyate, 'he is hated.' See 243. a.

- a. In fact, though it be a distinct derivative from the root, a passive verb is nothing but a verb of the 4th conjugation restricted to the Λ'tmane-pada: and to say that every root may take a passive form, is to say that roots of the 1st, 2d, 3d, 5th, 6th, 7th, 8th, 9th, and 1oth conjugations may all be conjugated in the 4th conjugation, with a passive sense: so that if a root be already of the 4th conjugation, its passive form is generally, though not always, identical with its own Λ'tmane-pada.
- b. It might even with reason be suspected, that the occasional assumption of a neuter signification and a Parasmai-pada inflection by a passive verb, was the cause which gave rise to the 4th conjugation. Instances are certainly found of passive verbs taking Parasmai-pada terminations, and many passive verbs (for example, jáyate, 'he is born,' from the root jan; púryate, 'he is filled,' from the root pri; and tapyate, 'he is heated,' from the root tap) are confounded with verbs of this conjugation *. So that it seems not unlikely, that, by making the 4th conjugation, grammarians only meant to say that the passive form of verbs, or the addition of ya to the root, is also the form that may be used to express a neuter or intransitive signification; the only difference requisite to be made between the two forms being exactly that which might be expected to exist between them; viz. that the one should take the Atmane-pada; the other, the Parasmaipada inflection. This fact, at least, is clear that the Parasmai-pada of the 4th conjugation is the form used in numerous roots to yield a neuter signification; and that the Atmane-pada is identical with the form used to yield a passive sense; so that the 4th conjugation can hardly be said to possess an Atmane-pada †. Hence it arises, that many roots appear in the 4th conjugation as neuter verbs, which also appear in some one of the other nine as transitive. For example, yuj, 'to join,' when used in an active sense, is conjugated either in the 7th conjugation, or in the causal; when in a neuter, in the 4th. So also, push, 'to nourish;' kshubh, 'to agitate;' khś, 'to vex;' sidh, 'to accomplish.'
- 254. Similarly, although causal verbs are said to be distinct derivatives from the root, they are in point of fact verbs of the 10th conjugation, inflected either in Parasmai or Atmane. To say, therefore, that every root may take a causal form, is to say that roots of the first nine conjugations may all be conjugated in the

^{*} That the passive does occasionally take the terminations of the Parasmai-pada is shown by Professor Bopp, who gives several instances; as, chhidyet for chhidyeta, 'it may be cut.' Nal. xiv. 6; mokshyasi for mokshyase, 'thou shalt be liberated.' Other instances may be found in Westergaard; as, vidyati for vidyate.

[†] At any rate, the forms given for the 3d preterites of such verbs as pad, 'to go,' budh, 'to know' (which are said to be Atmane verbs of the 4th conjugation), could only belong to passive verbs. The forms given by Westergaard are, apádi, abodhi. See 475.

toth conjugation, with a causal sense; and that if a root be already of the toth conjugation, it can then have no distinct form for its causal, the primitive verb and the causal being in that case identical (see 289). Indeed, it might reasonably be conjectured, that the occasional employment of a causal verb in a transitive, rather than a causal sense, was the only reason for creating a toth conjugation. It would certainly simplify the subject, if this conjugation were not separated from the causal; or, in other words, if the addition of aya to the root were considered in all cases as the mark of a causal verb. One thing, at least, is plain, that this affix is not the sign of a separate conjugation, in the way that nu is the sign of the 5th conjugation, or in the way of any other conjugational syllable; for it is retained in most of the other tenses of the verb, not only in the first four, just as the desiderative ish is retained.

255. The subject of verbs, therefore, will divide itself into two heads. In the first place, the formation of the base; 1st of primitive, 2dly of passive, 3dly of causal, 4thly of desiderative, 5thly of frequentative verbs; with their respective participles. In the second place, the exhibition, at full, of the base, united to its terminations, under each of the five forms of verbs consecutively.

Under the first head will be shown, how the root has to be changed before the terminations can be affixed; while the mode of affixing the terminations to the root, thus changed, will at the same time be indicated. Under the second head, the five forms of verbs beginning with primitives will appear conjugated in detail; the base, or changed root, being combined with its terminations in regular sequence.

PRIMITIVE VERBS.

FORMATION OF THE BASE OF THE FIRST FOUR TENSES, IN THE TEN CONJUGATIONS.

256. A brief summary of the formation of the base, in the ten classes of verbs, has already been given at 249; and a great peculiarity has been noted—that the rules of conjugation have reference only to the first four tenses, called *conjugational*, viz. the present, potential, imperative, and first preterite.

Remember, that after passing these four tenses the conjugational structure of the base is forgotten; and in the formation of the bases of the six remaining tenses all roots conform to one general rule, and are as if they belonged to one general conjugation. Hence the six last tenses are called non-conjugational. The tenth class alone retains the conjugational structure of the base throughout most of the non-conjugational tenses; but as this class consists chiefly of causal verbs, no confusion can arise from this apparent inconsistency. Of the 2000 roots, more than half follow the 1st conjugation, about 130 follow the 4th, about 140 the 6th,

and all may follow the 10th (see 289). Of the remaining roots, about 70 follow the 2d, but not more than 20 are in common use; about 20 follow the 3d, of which not half are in common use; about 24, of which hardly 6 are common, follow the 7th; about 30, of which 10 are common, the 5th; about 10, of which only 2 are common, the 8th; about 52, of which 15 are common, the 9th.

- 257. Primitive verbs, therefore, will separate themselves into ten classes, according as they fall under one or other of the ten conjugations; and these ten conjugations may be segregated into three groups.
- a. The 1st group is the most important and comprehensive, as comprising verbs of the 1st, 4th, 6th, and 10th classes, which agree in making their inflective bases end in a, and in taking substitutions for some of the terminations, as indicated at 247.
- b. The 2d group comprises verbs of the 2d, 3d, and 7th classes, which agree in affixing the regular terminations (at 246) to the final letter of the root, without the intervention of a vowel.
- c. The 3d group, comprising verbs of the 5th, 8th, and 9th classes, also affixes the regular terminations to the root; but after the intervention of either u, d, or i, preceded by the consonant n.

It will be convenient, in giving a detailed explanation of the formation of the base under each conjugation, to adhere to the grouping of the above divisions.

- 258. Although, to prevent confusion, it is advisable to preserve the Indian classification of verbs into ten classes, and therefore into ten conjugations; yet it would be more in unison with the classical idea of a conjugation, to arrange all verbs under three classes and three conjugations, according to the above grouping. The classical student may, if he please, consider that verbs of the 1st, 4th, 6th, and 1oth classes constitute his first conjugation; verbs of the 2d, 3d, and 7th classes, his second conjugation; and verbs of the 5th, 8th, and 9th, his third conjugation.
- a. In comparing Sanskrit verbs with Greek and Latin, observe that the first group of conjugations in Sanskrit, viz. the 1st, 4th, 6th, and 1oth, answers to the Greek first conjugation in ω , the conjugational $\overline{\mathbf{v}}$ a becoming o or ϵ in Greek ($tarp\acute{u}mas = \tau \acute{\epsilon} \rho \pi o \mu \epsilon v$, $tarpatha = \tau \acute{\epsilon} \rho \pi \epsilon \epsilon \epsilon$); and although the Greek first conjugation contains more subdivisions than the first group in Sanskrit, yet the inflection of these subdivisions is similar. As to the Sanskrit 1oth conjugation, however, it appears to correspond to Greek verbs in $\alpha \zeta \omega$ and $\iota \zeta \omega$, which, like the 1oth, are generally found in company with other verbs from the same root: thus, $\kappa \alpha \theta \alpha \rho \iota \zeta \omega$, 'I make pure' $(\kappa \alpha \theta \alpha \iota \rho \omega)$, $\sigma \tau \epsilon \nu \alpha \zeta \omega$, 'to groan' $(\sigma \tau \epsilon \nu \omega)$, where ζ is substituted for $\overline{\mathbf{v}}$, as in $\zeta \epsilon \alpha$ for $\overline{\mathbf{v}}$ barley.' To this class also may be referred verbs in

αω and εω: thus pάrayámi = π εράω, where the y has been dropped, and the two a's combined. Latin verbs in io, like audio &c., seem to be related to the Sanskrit 4th class, as well as to the 1oth: thus cupio answers to kupyámi; and the e of audiebam answers to the aya of the 1oth, just as in Prákrit aya is contracted into ∇ e. The second and third groups of conjugations in Sanskrit (viz. the 2d, 3d, 7th, 5th, 8th, and 9th) answer to Greek verbs in μ i: thus emi 2d conj. = εἶμι, dadámi 3d conj. = δἶδωμι. The 7th conjugation, however, has no exact parallel in Greek, but many Greek and Latin verbs resemble it in inserting a nasal into the middle of the root; see 342. a. The 5th and 8th conjugations answer to Greek verbs in νυ and ν; and νυ and ν are lengthened before certain terminations, just as nu is guṇated in Sanskrit: thus strinomi = στόρνυμι, strinoshi = στόρνυς, strinoti = στόρνυτι, strinumas = στόρνυμες, &c. The 9th conjugation answers to Greek verbs in νᾶ (νη): thus krínámi = πέρναμι (πέρνημι), krínímas = πέρναμες. Compare also Latin forms in ni: thus sternimus = Sans. strinímas, from stri, 9th conj. See Bopp's Comparative Grammar.

FORMATION OF THE BASE IN THE 1ST, 4TH, 6TH, AND 10TH CLASSES OF VERBS.

259. Before entering upon the formation of the base, observe particularly that the 1st, 4th, 6th, and 1oth classes take substitutions for some of the terminations, especially in the potential Parasmai, and in the 2d and 3d dual of the present, imperative, and 1st preterite, Atmane-pada. In the 2d sing. imperative they reject the termination*. See the scheme at 247.

260. Observe also, that it is an universal rule in all ten conjugations that the augment \mathbf{w} a be prefixed to the base of the 1st preterite; and when the base begins with \mathbf{w} a or \mathbf{w} a, the augment blends with these vowels into a, by 31 (just as in Greek a and a become a in a000, &c.).

a. But when the augment a is prefixed to bases beginning with the vowels इ i, उ u, and च ri, short or long, it blends with them into ऐ ai, जो au, जार् úr (instead of e, o, ar, by 32). Thus the base इच्छा ichchha becomes in the 3d sing. Ist preterite ऐच्छात aichchhat, the base जह úha becomes जोहत auhata, and the base चुमो ridhno becomes जामीत árdhnot.

b. This rule applies to two of the non-conjugational tenses also, viz. the 3d preterite and the conditional. Note, that the 1st and 3d preterites and the conditional are the only three tenses that take the augment a.

^{*} Probably in consequence of the haste with which 'command' is generally expressed.

First class (1st conjugation), containing about 1000 primitive verbs.

- 261. Rule for the formation of the base in the four conjugational tenses. Gunate the vowel (except when debarred by 28. b) before every termination of all the four tenses, and affix the vowel Ξ a to the root so gunated. Note, that this vowel Ξ a is lengthened into Ξ if before the initial m or v of a termination, but not when m is final, as in the 1st sing. 1st preterite.
- 262. Thus, from the root पुष् budh, 'to know,' is formed the base बोध bodha, lengthened into बोधा bodhá before m and v (Pres. 1.* bodhá + mi = बोधामि bodhámi, bodha + si = बोधामि bodhasi, bodha + ti = बोधामि bodhati; Du. 1. bodhá + vas = बोधाम bodhávas, &c.; A'tm. Pres. bodha + i = बोधे bodhe by 32, bodha + se = बोधमे bodhase, &c.). See table at 583.
- 263. Similarly, from जि ji, 'to conquer' (see 590), comes the base जय jaya, liable to be lengthened into जया jayá, as before (36. a); from जी ní, 'to lead,' the base naya or nayá; from भू bhú, 'to be' (φύω, Lat. fu), the bases bhava and bhavá (Pres. 1. भवामि bhavámi, 36. a; 2. भविम bhavasi, φύεις, &c., see 584); from मृष ṣṛip, 'to creep,' the base मर्ष sarpa or sarpá (see 28); from कूप klṛip, 'to make,' the base कह्य kalpa or kalpá.
- a. Note, that bhú, 'to be' or 'to become,' is one of the commonest verbs in the language, and like as, 'to be,' at 584, 321, is sometimes used as an auxiliary. It is conjugated at full at 585.
- 264. In the potential the final a of the base blends with the initial i of the termination by 32 (Pot. 1. bodha + iyam = बोधेंं bodheyam). So also in the Pres. Atm. (बोधे &c.). See table at 583.
- 265. In the imperative the termination is rejected in the 2d sing. (Imp. 1. bodha + áni = बोधानि bodháni, 2. बोध bodha, 3. bodha + tu = बोधाने bodhatu).
- 266. The base of the 1st preterite has the augment $\overline{\mathbf{w}}$ a prefixed by 260 (1st Pret. 1. $abodha + m = \overline{\mathbf{w}}$ abodham, 2. $abodha + s = \overline{\mathbf{w}}$ abodhas, &c.).
- 267. Roots like **पच्** 'to cook,' **ਮিঅ** 'to beg,' **जी**य् 'to live' (603), take the inserted স্থা a, liable to be lengthened to স্থা a, but forbid the Guṇa change by 28. b (Pres. 1. पचामि &c.; Atm. 1. মিল্ল &c.; Pres. 1. **जीवामि** &c.).

^{* 1.} stands for 1st singular; Du. 1. for 1st dual; Pl. 1. for 1st plural, &c.

- 268. There are some roots ending in the Vriddhi \hat{e} ai which cannot be gunated. but suffer the usual change of Sandhi before अ a and आ a by 37; as, from मैं 'to sing,' गै 'to be weary,' ते 'to preserve,' धे 'to meditate,' है 'to fade,' are formed the bases gáya, gláya, tráya, dhyáya, mláya. See 505. a.
- 260. Some roots of the 1st conj. form their bases in the first four tenses by a change peculiar to themselves, which change is of course discarded in the other tenses: thus, from स्था 'to stand' (see 587), भा ghrá, 'to smell' (588), पा 'to drink' (589), य्मा 'to blow,' सा 'to repeat over,' come the bases तिष्ठ tishtha, जिम्र jighra, पिव piva, धम dhama, मन mana, the final a being, as before, liable to be lengthened.
- a. Note, that the roots eq sthá and u ahrá are properly reduplicated verbs of the 3d class at 330. The reduplicated base, by 331, would be tasthá, jaghrá: but as the reduplication is irregular, and the radical α is shortened, grammarians place these roots under the 1st class. The Greek ιστημι, on the other hand, has not shortened its radical vowel in the singular.
- 270. Again, from दुश् 'to see,' गम् 'to go,' यम् 'to restrain,' मद् 'to sink,' are formed the bases पास्य pasya, मच्छ gachchha, यच्छ yachchha, सीद sída (Pres. 1. पञ्यामि paśyámi, &c.).
- 271. गुह 'to conceal' forms गूह guha; गुप् 'to protect,' गोपाय gopaya; and दंश 'to bite,' दश daśa (Pres. 1. गृहामि gúhámi, &c.).

Fourth class (4th conjugation), containing about 130 primitive verbs.

- 272. Rule for the formation of the base in the four conjugational Affix \(\mathbf{y} \) ya to the root. The vowel of the root is not gunated, and generally remains unchanged. Note, that the inserted य ya is liable to become या ya before an initial m or v of the terminations of the four tenses (but not before the m of the 1st sing. 1st preterite), as in the 1st class at 261.
- 273. Thus, from सिथ sidh, 'to succeed,' is formed the base सिथ sidhya (Pres. 1. sidhyá+mi= सिध्यामि sidhyámi, 2. सिध्यमि sidhyasi,&c.; Pot. 1. sidhya + iyam = सिध्येषं sidhyeyam, 2. सिध्येस sidhyes, &c.; Imp. 1. $sidhya + \acute{a}ni =$ सिध्यानि $sidhy\acute{a}ni$, &c.; 1st Pret. asidhya + m =ञ्चित्रध्यं asidhyam, &c.; Atm. Pres. 1. sidhya +i = निभ्ये sidhye, sidhya +i =se = सिध्यमे sidhyase, &c.). See 616.
- 274. Similarly, from मा má, 'to measure,' the base माय máya (Pres. 1. Atm. máya + i = माये máye, &c.); from द्विप kship, 'to throw,' िह्याप्य kshipya; from नृत् nrit, 'to dance,' नृत्य nritya; from डी 'to fly,' डीय (Pres. Atm. 1. डीये).
- 275. Roots ending in am and iv, and one in ad, lengthen the vowel; as, from दिव div, 'to play,' दीव्य divya; from भम् bhram, 'to wander,' भास्य bhramya; from मह mad, 'to be mad,' माद्य mádya.

- 276. If a root contain a nasal it is generally rejected; as, from সঁম্ 'to fall,' সম্ম bhrasya; নন্'to be born' makes নাম jáya (Pres. 1. A'tm. নাম), lengthening the vowel, to compensate for the loss of n.
- a. Roots ending in छो o drop this o before the conjugational ya: thus सो so, 'to destroy,' makes its base sya.
- 277. The following are anomalous. From नृ 'to grow old,' नीये jirya; from न्या 'to pierce,' विध्य vidhya; from निंदु 'to be viscid,' मेद्य medya.

Observe—Although this class includes only 130 primitive verbs (generally neuter in signification), yet every one of the 2000 roots in the language may have a passive form which follows the Atmane-pada of this class.

Sixth class (6th conjugation), containing about 140 primitive verbs.

- 278. Rule for the formation of the base in the four conjugational tenses. Affix the vowel \mathbf{w} a to the root, which is not gunated, and in other respects generally remains unchanged *. Note, that the inserted \mathbf{w} a becomes \mathbf{w} a before an initial a and a of the terminations of the four tenses (but not before the a of the 1st sing. 1st preterite), as in the 1st and 4th conjugations at 261 and 272.
- 279. Thus, from हिष्प kship, 'to throw,' comes the base शिष्प kshipa (Pres. 1. kshipá + mi = शिष्पामि kshipámi, 2. kshipa + si = शिष्पि kshipasi; Pot. 1. kshipa + iyam = शिष्पे kshipeyam, &c.; Atm. Pres. 1. kshipa + i = शिष्पे kshipe; see 635); from तुद् tud, 'to strike,' तुद tuda; from दिश् diś, 'to point out,' दिश्च diśa.
- 280. Roots in इ i, उ u or ज u, भू ri and भू ri, generally change those vowels into इस् iy, उच् uv, रि ri, and इर् ir respectively; as, from रि, 'to go,' comes the base रिस riya; from नु 'to praise,' नुच nuva; from भू 'to agitate,' भुच dhuva; from मृ 'to die,' सिस mriya (626); from कृ kri, 'to scatter,' किर kira (627).
- 281. A considerable class of roots, ending in consonants, in this conjugation, insert a nasal before the final consonant in the four tenses; as, from मुच्, 'to let go,' comes the base मुच muncha; from लिप 'to anoint,' लिम्प limpa; from कृत 'to cut,' कृत kṛinta; from सिच् 'to sprinkle,' सिच्च sincha; from लुप् 'to break,' लुम्प lumpa. Similarly, the roots पिश्, चिद्, खिद.
- 282. The following are anomalous. From হ্ৰ্, 'to wish,' comes the base হ্ৰড ichchha; from দক্ত 'to ask,' দৃক্ত prichchha; from মার 'to roast,' মূক্ত bhrijja; from অৰ্ 'to deceive,' বিৰ vicha; from অত্ 'to cut,' বৃত্য vrischa.

^{*} Prof. Bopp observes, that the sixth class is only an offshoot of the first, containing the diseased members of that class. Comp. Gram. 1055.

Tenth class of verbs (10th conjugation), containing a few primitive verbs and all causals.

- 283. Rule for the formation of the base in the four conjugational tenses. Gunate the vowel of the root throughout every person of all the four tenses (except when debarred by 28. b), and affix अय aya to the root so gunated. Note, that अय aya becomes अया $ay\acute{a}$ before an initial m or v of the terminations of the four tenses, but not before the m of the 1st sing. 1st preterite.
- 284. Thus, from चुर chur, 'to steal,' is formed the base चोरय choraya (Pres. 1. chorayá + mi = चोरयामि chorayámi, 2. choraya + si = चोरयमि chorayasi, &c.; Pot. 1. choraya + iyam = चोरपेयं chorayeyam; Imp. 1. choraya + áṇi = चोरयाणि chorayáṇi, &c., see 58; 1st Pret. 1. achoraya + m = ऋचोरयं achorayam, &c., see 638).
- 285. Roots ending in vowels take Vriddhi instead of Guṇa; as, from भी 'to please,' भाषम práyaya; from भू 'to hold,' भारम dháraya. But मू, 'to fill,' makes प्रम púraya.
- 286. Roots which enclose the vowel ज a between two single consonants generally lengthen this vowel; as, from ग्रम् 'to swallow,' ग्रामय grásaya: but not always; as, from कप 'to say,' कप्प kathaya.
 - 287. कृत, 'to celebrate,' 'to praise,' makes की तैय kirtaya (Pres. की तैयामि).
- 288. A few roots with a medial ज्ञा ri retain that vowel; as, from स्पृह् 'to desire,' स्पृह्य sprihaya.
- 289. Observe—Every Sanskrit root may have a causal form, and all causal verbs follow the 10th conjugation; but there are a considerable number of active primitive verbs, not causal in their signification, which belong to this conjugation. In these verbs, therefore, the causal form will be identical with the primitive verb. Hence there will often be a difficulty in determining whether a verb be a primitive verb of the 10th conjugation, or a causal verb; and the consideration of the 10th conjugation must to a great extent be mixed up with that of the causal form of the root (see 479).
- a. Observe also, that all verbs, whether primitive or causal, which belong to the 10th conjugation, have this great peculiarity, viz. that the conjugational ay is carried throughout all the tenses of the verb, non-conjugational as well as conjugational, excepting only the 3d preterite and the benedictive, Parasmai-pada (compare 254). For this reason the formation of the base of the non-conjugational tenses of verbs of the 10th conjugation will not be explained under the general head of the non-conjugational tenses (at 363), but will fall under causal verbs.

FORMATION OF THE BASE IN THE 2D, 3D, 7TH, 5TH, 8TH, AND 9TH CLASSES OF VERBS.

- 290. Before entering upon the formation of the base in the last two groups of conjugations, observe that they take the regular terminations of the memorial scheme at 246, without any substitutions, excepting in the 3d plur. present and imperative, Atmane-pada, where the nasal is rejected in all six classes (see scheme at 247).
- a. The 3d class, however, owing to the burden occasioned by reduplication, rejects the nasal from the 3d plur. of the Parasmai-pada, as well as from the Atmane-pada, in these two tenses, and takes us for an in the 3d pl. 1st preterite.
- b. Two roots, moreover, in the 2d class (jaksh, 'to eat,' and śás, 'to rule'), and roots of more than one syllable (very few in number), resemble the 3d class in rejecting the nasal from the 3d pl. Parasmai, and taking us for an in the 1st preterite*.
- 291. Observe also, that roots ending in consonants, of the 2d, 3d, and 7th classes, and the root \mathfrak{F} hu of the 3d, take dhi (the Greek $\theta\iota$) for hi in the 2d sing, imperative † (see 247); and that roots ending in vowels, of the 5th and 8th classes, resemble the first group of classes at 259, in rejecting this termination altogether.
- 292. Again, roots ending in consonants will reject the terminations s and t of the 2d and 3d sing. 1st preterite by 43. a, changing the final of the root, if a soft consonant, to an unaspirated hard, by 42. a; and in other respects changing a final consonant, as indicated at 43. But in the 2d sing, the termination s is sometimes optionally retained, and the final letter of the root rejected.
- a. If a root end in ξ h, this final h becomes k, in the 2d and 3d sing. 1st pret., by 43. c: but if the root begin with d or g, the aspirate is thrown back on these letters, which become dh, gh.
 - b. If a root end in \mathbf{H} s, it may change this s to t in the 2d sing.
- 293. Although comparatively few verbs fall under the last two groups of conjugations, yet some of these are among the most useful in the language. Their formation presents more difficulties than that of the 1st, 4th, 6th, and 1oth conjugations. In these latter the verbal base, although varying slightly in each conjugation, preserves the same form before all the terminations of every tense; but in the last two groups of conjugations the base is liable to variation before

^{*} A few other roots of the 2d class (as, चिंह, दिस्, पा, पा) optionally take us for un in the 1st preterite. Sas probably follows the analogy of reduplicated verbs, on account of its double sibilant.

[†] Dhi was originally the only form. Hence in the Vedas সুমি (κλύθι); and in the Mahábhárata অঘাকৃষি. Dhi then passed into hi, as dhita passed into hita, and bhúmi into the Latin humus.

the different terminations of each tense, such variation being denoted by the letter P and other indicatory letters of the memorial scheme at 246, which, be it remembered, are significant only in reference to the second and third groups, and not to the first.

a. In the 2d preterite, however, being a non-conjugational tense, the P is equally significant for verbs of all conjugations. Observe-This P, which usually indicates that in those persons of the tense where it occurs, the root must be gunated or vriddhied, is generally to be found after light terminations. The 1st, 2d, and 3d sing. Parasmai of the present, 1st preterite, and 2d preterite are manifestly light terminations. The 3d sing. Parasmai of the imperative is also clearly light; and the 1st sing, du, and pl. Parasmai and Atmane of this tense must have been originally light, as these also have a P affixed. The object, therefore, of the P is to show, that fulness of form or weight is to be imparted to the root or base before these light terminations, and these only: thus \(\xi i, 2d \) conj., 'to go,' is in the pres. sing. emi, eshi, eti; in du. ivas, ithas, itas; in pl. imas, &c.: just as in Greek εἰμι, $\epsilon \tilde{i}_{\varsigma}$, $\epsilon \tilde{i}_{\sigma i}$; $\tilde{i}_{\tau o \nu}$, $\tilde{i}_{\tau o \nu}$; $\tilde{i}_{\mu \epsilon \nu}$, &c.: compare also $\phi \eta \mu i$ (for $\phi \bar{a} \mu i$), $\phi \dot{\eta}_{\varsigma}$, $\phi \eta \sigma i$, φατόν, φατόν, φαμέν, φατέ, φασί. So again, stri, 'to strew,' is in pres. sing. strinomi, strinoshi, strinoti; in du. strinuvas, strinutas, strinutas; in pl. strinumas, &c.: just as in Greek στόρνυμι, στόρνυς, στόρνυτι, στόρνυτον, στόρνυτον, στόρνυμες, &c. Similarly, krí, 'to buy,' is in pres. sing. krínámi, krínási, krínáti; in du. &c. krínívas, kríníthas, krínítas, krínímas, &c., the á being heavier than í. Compare Greek πέρναμι (πέρνημι), πέρνας, πέρνατι, πέρνατον, πέρνατον, &c. When a root is long by nature or position, no additional weight is necessary, and no Guna is then possible (see 28. b); but in place of Guna, the root or base sometimes remains unmutilated before the light terminations, while mutilation takes place before the heavy. Thus dá and dhá suppress their final vowels before the heavy terminations, and preserve them before the light; see 335, 336. Similarly, as, 'to be,' which by 28. b. cannot be gunated, drops its initial vowel before the heavy terminations, retaining it before the light; see 322, and compare 320. Observe, that since Guna takes place before all the terminations of the 2d future indiscriminately, the P affixed to the singular terminations of this tense can have no significance, unless it be to show that the terminations of this tense are taken from the present, with sya prefixed.

294. Another source of difficulty is, that in the second group (viz. the 2d, 3d, and 7th) the verbal base will generally end in a consonant, there being no provision for the interposition of a vowel between the root and the terminations. Hence the combination of the final consonant of a base with the initial *t*, *th*, or *s*, of a termination in the conjugational tenses of these three classes requires a knowledge of the laws of Sandhi already propounded, as well as of the following additional rules.

a. Observe, however, that as regards the initial m or v of a termination, a hard consonant at the end of a root is not made soft before these letters, as might be expected by 41, but remains unchanged: thus, vach + mi = vachmi, and chekshep + mi = chekshepmi.

295. The following rules will also apply in forming the base of the non-conjugational tenses of all the conjugations excepting the 10th, and in some of the participles; for although in most roots ending in consonants provision is made for the insertion of the vowel $\mathbf{\xi}$ i (see terminations of 1st future &c. at p. 107) before the terminations of these tenses, yet there are a large class of common roots which reject this inserted vowel, leaving the final of the base to coalesce with the initial consonant of the termination. It will be convenient, therefore, in the following pages to introduce by anticipation a few examples from the non-conjugational tenses and participles.

Combination of final च् ch and ज j with त t, च th, and स s.

297. But a final palatal is sometimes changed to \mathbf{v} sh before \mathbf{r} th; and \mathbf{r} th, then become इ, इ: thus, मार्ज् +ti = मार्ष; मृज् +thas =मृष्टम्; मृज् +ta =मृष्ट; प्रज्ञ् +ta =प्रष्टा.

Combination of final udh and भू bh with त t, u th, and स s.

- a. Observe—When final \mathbf{v} dh is preceded by a conjunct \mathbf{v} n, as in rundh, then the final dh, which has become d (before t and th changed to dh), may optionally be rejected; so that $rundh + tas = \mathbf{v}$ \mathbf{v} \mathbf{v}
- 299. Final \mathbf{u} dh and \mathbf{u} bh, before \mathbf{u} s, are changed by 42, the one to \mathbf{u} t, the other to \mathbf{u} p: thus, रूस्प runadh + si becomes रूर्णान्स runatsi; sedh + syámi = setsyámi; labh + sye = lapsye.
- a. And if the initial of the root be b or d, the aspirate, which has been rejected in the final, is thrown back on the initial; as, bodh +

sye = भोत्स्ये bhotsye; dadh + swa = धास्त्र dhatswa. See 42. c, 664; and compare $\theta \rho \acute{e} \psi \omega$ from $\tau \rho \acute{e} \phi \omega$. Observe—The aspirate is also thrown back on the initial, when final dh is changed to d, before the terminations dhwe and dhwam. See 664.

Combination of final π s, Ψ sh, Ψ s, with π t, Ψ th, Π s, Ψ dh.

300. Final ज्ञ \hat{s} , before πt and $\nabla t t h$, is changed to $\nabla s h$; and the t, t h, take the cerebral form z, z: thus, $\hat{z} + t e = \hat{z}\hat{z}$; and $\hat{c} + t h \hat{a} s = \hat{c} \hat{z} + t \hat{c} + \hat{c} \hat{z}$?

301. Similarly, final \mathbf{v} sh, before \mathbf{v} t and \mathbf{v} th, requires the change of t, th, to \mathbf{v} , \mathbf{v} : thus, \mathbf{v} \mathbf{v} that \mathbf{v} is \mathbf{v} that \mathbf{v} is \mathbf{v} that \mathbf{v} is \mathbf{v} that \mathbf{v} is \mathbf{v} is \mathbf{v} in \mathbf{v} is \mathbf{v} in \mathbf{v} in

302. Final श्रं or \mathbf{q} sh, before \mathbf{t} s, is changed to \mathbf{q} k by 43.e, the s then becoming \mathbf{q} sh by 70: thus, वश्+ $si = \mathbf{q}$ िक्ष; $\mathbf{g}\mathbf{q} + si = \mathbf{g}$ िक्ष; $\mathbf{g}\mathbf{q} + sy\acute{a}mi = \mathbf{g}\mathbf{g}\mathbf{q}\mathbf{q}\mathbf{m}$.

303. Final ज् \acute{s} or \mathbf{u} \acute{sh} , before \mathbf{u} \acute{dh} , is changed to \mathbf{z} \acute{dh} , the \mathbf{u} \acute{dh} becoming \mathbf{z} \acute{dh} by 51: thus, $\mathbf{f}\mathbf{z}\mathbf{u}+dhi=\mathbf{f}\mathbf{z}\mathbf{z}\mathbf{f}\mathbf{z}$. Similarly, $\mathbf{f}\mathbf{z}\mathbf{u}+dhwam=\mathbf{f}\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}$. A final \mathbf{u} \mathbf{j} may also follow this rule; see 632,651.

304. Final स्s, before \mathbf{u} dh, is either dropped or changed to \mathbf{c} d: thus, $chak\acute{a}s + dhi = \text{either}$ चकाधि $chak\acute{a}dhi$ or चकादि $chak\acute{a}ddhi$; ज्ञास $chak\acute{a}dhi = \mathbf{m}$ पि; हिंस $chak\acute{a}dhi = \mathbf{m}$ पि; हिंस $chak\acute{a}dhi = \mathbf{m}$

a. Before π s it is changed to π t; as, $vas + sy\acute{a}mi = vatsy\acute{a}mi$. So in the 2d sing. 1st pret. of $\acute{s}\acute{a}s$, $a\acute{s}\acute{a}s + s = a\acute{s}\acute{a}ts = a\acute{s}\acute{a}t$ by 43. a.

Combination of final ह h with त t, प th, स s, ध dh.

306. Final ह h, before स s, follows the analogy of final ज् s and u sh, and is changed to क k, which blends with स s into ख ksh:

thus, लेह teh with si becomes लेखि; रोह + syámi =रोस्थामि. Similarly, in Latin, final h becomes k before s; as, veksit (vexit) from veho.

- b. In the root $\overline{\eta} \in nah$ final h becomes $\underline{\mathbf{v}} dh$, and then $\overline{\eta} t$, before s. Compare 182. e, and see 624.
- c. In roots beginning with \mathbf{z} d, like $\mathbf{z}\mathbf{z}$ duh and $\mathbf{z}\mathbf{z}\mathbf{z}$, final \mathbf{z} h becomes \mathbf{z} y before dh; i. e. before the dhi of the 2d sing. imperative, and before the terminations dhwe and dhwam: thus, $\mathbf{z}\mathbf{z}\mathbf{z}$ duh + dhi = $\mathbf{z}\mathbf{z}\mathbf{r}\mathbf{v}\mathbf{z}$ duydhi. And in a root beginning with n, like nah, final h becomes dh, and then d, before these terminations. But if the root begin with any other letter than d or n, then final h is dropped, and the $\mathbf{v}\mathbf{z}\mathbf{z}$ dh of the termination becomes $\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}$ dh, the radical vowel being lengthened: thus, $\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}$ ih + dhi = $\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}$ if $\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}\mathbf{z}$
- d. Again, in roots beginning with $\bar{\epsilon} d$ or $\bar{\eta} g$ these letters become respectively $\bar{\mathbf{u}} dh$ and $\bar{\mathbf{u}} gh$, when final $\bar{\epsilon} h$ becomes g or is dropped before dhwe and dhwam; but not before the dhi of the imperative: thus, duh + dhwe = धुम्ब्रे dhugdhwe; and aguh + dhwam = ध्रमूढ़े aghá-<math>dhwam.

FORMATION OF THE BASE IN THE 2D, 3D, AND 7TH CLASSES OF VERBS.

Second class (2d conjugation), containing 70 primitive verbs.

- 307. Rule for the formation of the base in the four conjugational tenses. Gunate the vowel of the root (except when debarred by 28. b) before those terminations only which are marked with P in the memorial scheme at 246. Before all the other terminations the original vowel of the root must be retained by 293. a. Remember, that no vowel is interposed between the root and the terminations, as in Greek verbs like $\hat{\epsilon i}\mu \iota$, $\phi \eta \mu \iota$, &c. See 258. a, 294.
- 308. Thus, from चिर् vid, 'to know' (Greek ĕiồw, 'iồov, Lat. video), is formed the base of the singular present ved (1. ved + mi = चेन्नि vedmi, &c.), and the base of the dual and plural vid (Du. 1. vid + vas = चिद्रम् vidwas, &c.; Pl. 1. vid + mas = चिद्रम् vidmas, &c.). So also the base of the potential vid (1. vid + yám = चिद्रां vidyám, &c.); the base of the imperative ved and vid (1. ved + áni = vedáni, 2. vid +

 $dhi = viddhi \ 201$, ved + tu = vettu; Du. 1. $ved + \acute{a}va = ved\acute{a}va$, &c.*); and the base of the 1st pret. area and arid (1. area + am = area am, 2. aved + s = avet or aves by 43. a. and 292). See the table at 583.

- a. A contracted form of the 2d preterite of vid (365) is sometimes used for the present: thus, Sing. veda, vettha, veda; Du. vidwa, vidathus, vidatus; Pl. vidma, vida, vidus; see 168. a. Compare the Greek οἶδα or Fοίδα from the root Fιδ $(\epsilon i \delta \omega)$, also used with a present signification; and the Latin vidi, vidisti, &c. Cf. also the present vidmas with $i\delta\mu\epsilon\nu$ ($i\sigma\mu\epsilon\nu$), vittha with $i\sigma\tau\epsilon$, and viddhi with ζσθι.
- 309. Similarly, from fay, 'to hate,' come the bases dwesh and dwish (Pres. 1. द्वेष्म; Du. 1. द्विष्यम्, &c.; see 657).
- 310. So also, from ξ i, 'to go,' will come the bases e and i (Pres. 1. एमि emi, cf. εἶμι, 2. एपि by 70, 3. एति; Pl. 1. इमस्, cf. ἴμεν, see 645); from जाग 'to awake,' the bases जागर jágar and जाग jágri (Pres. 1. नागिम, &c.; Du. 1. नाग्वस; Pl. 3. नाग्रित by 290. b).
- 311. The preposition অথি adhi, 'over,' prefixed to the root ₹ i, 'to go,' gives the sense of 'to read' (Atmane-pada only): 3 then becomes iy (compare 123), and blends with adhi into अधीय adhiy before the vowel-terminations of the pres. pot. and 1st pret. Before the consonantal-terminations it becomes অধী adhi. (Hence the Pres. 1. अधीये, 2. अधीये, 3. अधीते; Du. 1. अधीवहे, &c.; Pot. 1. अधीयीय, &c.; Imp. 1. adhi + e + ai = अध्यये by 36. a, 2. अधीष्य, &c.; 1st Pret. 1. adhi + a + iy + i= अधीय by 260. a, 2. अधीयास्, 3. अधीत; Du. 1. अधीवहि, 2. अधीयायां, &c.)
- a. The preposition আ \acute{a} is prefixed to the root Ξ i, according to the usual rules of Sandhi, and gives the sense of 'to come:' thus, Pres. ऐमि, ऐपि, ऐति; एवस्, &c.; Pot. एवां, एयाम्, &c.; Imp. जायानि, एहि, ऐतु, &c.; 1st Pret. जायं, ऐम्, &c. Again, the prep. अप apa prefixed gives the sense of 'to go away:' thus, Pres. अपेमि, &c.
- 312. Other roots in \(\frac{2}{3}\) i and \(\frac{2}{3}\) u or \(\frac{2}{3}\) i change these vowels to iy and uv (compare 123 and 125. a) before the vowel-terminations; as, from वी ví, 'to go,' come the bases ve, ví, and viy (Pres. 1. वेमि, &c.; Du. 1. वीव; Pl. 3. वियन्ति). Similarly, स, 'to bring forth' (Atmane only), makes in Pres. S. Du. Pl. 3. सूते, सुवाते, मुवते; and in Imp. S. Du. Pl. 1. मुवै, सुवावहै, मुवामहै, Guna being suppressed †.
- 313. सु stu and न nu, 'to praise;' यु yu, 'to join,' 'to mix;' and र ru, 'to sound' -follow 312, and take Vriddhi instead of Guna before the consonantal P terminations ‡. Hence the bases स्ती stau, स्तु stu, and स्तुव stuv; see 648. Before the

^{*} The imperative of vid is optionally formed with the syllable \acute{am} and the auxiliary verb kri (compare 384): thus, s. 3. विदांकरोतु or विदाङ्करोतु . Páṇini III. 1. 41.

[†] See Pánini VII. 3. 88.

[‡] That is, the terminations marked with P, which begin with consonants.

vowel P terminations both Vriddhi and Guna are generally (but not always) suppressed, and uv substituted, as in $\frac{\pi}{4}$ at 312. Note, that these roots may optionally insert an $\frac{\pi}{4}$ i before the consonantal P terminations; and before this vowel Guna, not Vriddhi, is required. According to some authorities, however, i is inserted before all the consonantal-terminations; and, according to others, before all the consonants, excepting y, v, or m, not followed by an indicatory P.

- 314. 4, 'to speak,' can never take Vriddhi, like the roots at 313; but inserts an \$\frac{1}{3}\$ if after Guṇa in the places where those roots optionally insert it, viz. before the consonantal P terminations. Hence the bases bravi, bru, bruv. See 649.
- a. Before the vowel P terminations Guna is not suppressed, excepting in the 1st pret. 1st sing.
- 315. \mathfrak{N} , 'to lie down,' 'to sleep' (Atmane only), gunates the radical vowel before all the terminations, and inserts r in the 3d pl. pres., 1st pret., and imperative, after the analogy of the 3d pl. potential. See 646.
- 316. कर्षे, 'to cover,' takes either Vriddhi or Guṇa of the final u before the consonantal P terminations, excepting before the 2d and 3d sing. of the 1st pret., where Guṇa only is admissible. Before the vowel-terminations it follows 312, but Guṇa is retained before the vowel P terminations, excepting in the 1st pret. 1st sing. Hence the bases urnau, urno, urnu, and urnuv (Pres. 1. कर्षोमि or कर्षोमि; Du. 1. कर्षोचम्; Pl. 3. कर्षोचित, see 290. b; Pot. 1. कर्षोच ; Imp. s. 1. कर्षोचित, 3. कर्षोत् or कर्षोत्; 1st Pret. 1. क्षोक्चें by 260. a, 2. क्षोषोम्, &c.).
- 317. Roots like $\[\mathbf{q} \mathbf{i} \]$ 'to go,' $\[\mathbf{q} \mathbf{i} \]$ 'to protect,' $\[\mathbf{q} \mathbf{c} \]$ 'to eat' (edo), $\[\mathbf{q} \mathbf{i} \]$ 'to sit,' Atm., having a or a for their vowels, cannot be gunated, but are themselves bases (Pres. 1. ya + mi = yami, see 6_{14} , ad + mi = admi, 2. ad + si = atsi, 3. ad + ti = atti; Dn. 3. ad + tas = attas, &c., see 6_{52} . Similarly, as + e = ase, as + se = ase, as + te = ase, &c.). With atti compare Lat. edit.
- a. Before the terminations of the 2d and 3d sing. Ist preterite of আৰু, 'to eat,' the vowel স্থা a is inserted by special rule; and some others of these roots require peculiar changes, as follows:—
- 318. हन् han, 'to kill,' makes its base $\overline{\epsilon}$ ha before t or th (by 57.a); $\overline{\mu}$ ghn before anti, an, antu; and $\overline{\pi}$ ja before $\overline{t}\overline{\epsilon}$. The last change is to avoid the proximity of two aspirates. See 654, and compare 331.b.
- 319. यच् vach, 'to speak,' changes its final palatal to a guttural before all the hard consonantal-terminations, in conformity with 176; but not before the soft, by 294. a. It is defective in the 3d pl. present and imperative, where its place must be supplied by ह्य at 314, 649. Hence the bases vach and vak. See 650.
- 320. वर्श् uss, 'to desire,' 'to choose,' suppresses the a, and changes v to u before the terminations which have no P (see 293. a); and उस् us becomes उप ush before t and th by 300. See 656.
- 321. च ह्यं chaksh, 'to speak' (A'tmane-pada only), drops the penultimate k before all consonantal-terminations, excepting those beginning with m or v (Pres. 1. च ह्यं, 2. च प् + में = च ह्यं by 292, 3. च ष्टे, &c.).
 - 322. अस् as, 'to be' (Parasmai-pada only), a very useful auxiliary verb, follows

293. a, and rejects its initial a, excepting before the P terminations. The 2d pers. sing. of the pres. is खास for खासा. The 1st pret. has the character of a 3d pret., and retains the initial a throughout, and inserts ई i before the s and t of the 2d and 3d sing.; see 584. This root is never found in the Atmane-pada, excepting with the prepositions vi and ati, when the Present is Sing. व्यतिह, -पे, -षे; Du. -पुहे, -पाये, -पाते, -पाहे, -हे, -पते; Pot. S. 1. व्यतिपीय, &c.

323. शास् sis, 'to rule,' changes its vowel to इ i before t, th, and y; and, after i, स् becomes प् by 70. Hence the bases शास् and शिष्. See 658.

324. FA mrij, 'to cleanse,' is vriddhied before the P terminations, and optionally before the vowel-terminations having no P. Hence the bases márj and mrij. See 651.

325. The roots ईश् tá, 'to rule' (Atm.), and ईड tál, 'to praise' (Atm.), not gunated by 28. b, insert the vowel इ i between the root and the terminations of the 2d person से, स्व, ध्वे, and ध्वं (ईड्—Pres. 1. ईडे, 2. ईडिपे, 3. ईट्टे; Du. 1. ईड्यहे, &c.; Pot. 1. ईडीप, &c.; Imp. 1. ईडे, 2. ईडिप्य, 3. ईट्टां; 1st Pret. 3. ऐट्ट, &c. ईश्——Pres. 1. ईशे, 2. ईप्टिंग्से, 3. ईट्टें by 300; Imp. 3. ईट्टां, &c.; 1st Pret. 3. ऐट्ट, &c.)

326. हह rud, 'to weep,' besides the usual Guṇa change before the P terminations, inserts the vowel \mathfrak{F}_i before all the consonantal-terminations except y, and optionally a or i in the 2d and 3d sing. 1st pret. Hence the three bases rodi, rudi, rudi; see 653. Similarly, but without Guṇa, the roots स्वप् 'to sleep,' श्रम् and सन् 'to breathe,' and नस्र 'to eat.' The last obeys 290. b.

327. दुई duh, 'to milk,' and ਲਿ ξ lih, 'to lick,' form their bases as explained at 305, 306. They are conjugated at 660, 661.

328. दिर्द्रा daridrá, 'to be poor' (Parasmai-pada), follows 293. a, making its base daridri before the consonantal-terminations not marked with P, and daridr before ati, us, atu (Pres. S. Du. Pl. 3. दिर्द्राति, दिर्द्रितस्, दरिद्रितः; see 290. b).

329. दीघी didhi, 'to shine' (Atm.), changes its final to y, and not to iy, before the vowel-terminations (compare 312); but in the potential the final i coalesces with the i of the terminations (Pres. Pl. 3. दीघाते; Pot. 1. दीघीय, &c.).

Third class (3d conjugation), containing about 20 primitive verbs.

330. Rule for the formation of the base in the four conjugational tenses. Reduplicate the initial consonant and vowel of the root, and gunate the vowel of the radical syllable before the P terminations only, as in the 2d conjugation, by 293. a. Note, that this conjugation resembles the 2d in interposing no vowel between the root and the terminations. It is the only conjugation that rejects the nasal in the 3d plur. Parasmai-pada, by 290. a, and takes us for an in the 3d plur. 1st pret., before which us Guna is generally required.

331. In reduplication the following rules are observed. 1st, As to consonants.

a. A corresponding unaspirated letter is substituted for an aspirate: thus, d for dh. So in Greek τ is repeated for θ ; as, $\theta \dot{\nu} \omega$, $\tau \dot{\epsilon} \theta \nu \kappa \alpha$, &c.

- b. The palatal \mathbf{v} ch is substituted for the gutturals \mathbf{v} \mathbf{v}
- c. If a root begin with a double consonant, the first consonant only is reduplicated; but if with a double consonant, whose first is a sibilant and whose second is hard, the second is reduplicated: thus, च ch for $\mathbf{E}_i ksh$; त t for $\mathbf{E}_i ksh$; \mathbf{E}
- d. 2dly, As to vowels. স্থা a is the reduplicated vowel for স্থা a'; হ i for $\hat{\Xi}_i$ or $\hat{\Xi}_i$ i or $\hat{\Xi}_i$ i or $\hat{\Xi}_i$ i is also repeated for a and a', as being a lighter vowel.
- e. Observe—As a general rule, the reduplicated syllable has a tendency to lighten the weight of the radical syllable.
- 332. Thus, from भू bhṛi, 'to bear' (феဴρω, fero), is formed the base of the present singular विभर् bibhar (1. bibhar + mi = विभिन्ने), and the base of the dual and plural विभू bibhṛi (Du. 1. bibhṛi + vas = विभृवस् ; Pl. 1. bibhṛi + vas = विभृवस् ; Pl. 3. bibhṛi + vas = विभृति by 34 and 290). See the table at 583.
- a. Note, that bibharti bears the same relation to bibhrimas that fert does to ferimus, and vult to volumus.
- 333. Similarly, from \Re bhí, 'to fear,' come the two bases bibhe and bibhí; from \Re hu, 'to sacrifice,' the two bases juho and juhu. The former of these roots may optionally shorten the radical vowel before a consonant, when not gunated. See 667. The latter may optionally reject its final before vas and mas, and is the only root ending in a vowel which takes dhi for hi in the 2d sing, imperative. See 662.
- a. ही, 'to be ashamed,' is like भी, but changes its final ई to इय् iy before the vowel-terminations, in conformity with 123. a. See 668.
- 334. भू ri, 'to go,' is the only verb in this conjugation that begins with a vowel. It substitutes iy for ri in the reduplication, and makes its bases इस् iyar and इस् iyri (Pres. S. Du. Pl. 3. इसिंत, इस्तस, इस्ति; 1st Pret. S. 1. ऐसरं, 2. ऐसर्, 3. ऐसर, &c.).
- 335. ξ ī $d\acute{a}$, 'to give' $(\delta i \delta \omega \mu i$, do), drops its final \acute{a} before all excepting the P terminations. Hence the bases $dad\acute{a}$ and dad. It becomes $\hat{\xi}$ de before the hi of the imperative. See 663.
- 336. Similarly, the root $\mathfrak{A}\mathfrak{I}$ dha, to place' $(\tau i\theta\eta\mu\iota)$. Hence the bases dadha and dadh; but dadh becomes $\mathfrak{A}\mathfrak{I}$ before t, th, and s, by $\mathfrak{A}\mathfrak{I}$. \mathfrak{I} and \mathfrak{I} dhe before the hi of the imperative. See 66_+ .
- 337. $\overline{\xi}$ I há, 'to abandon,' changes its final á to $\overline{\xi}$ i before the consonantal-terminations not marked with P, and drops the final altogether before the vowel-terminations, and before y of the potential. Hence the bases $jah\acute{a}$, jahi, jahi, jahi, or $jah\acute{a}$; and, according

to some authorities, जही may be shortened into जिंह in the present, imperative, and 1st preterite. See 666.

- 338. मा mú, 'to measure' (Atm.), and हा há, 'to go' (Atm.), make their bases मिमी mimí and जिन्ही jihí before the consonantal-terminations not marked with P. Before the vowel-terminations their bases are mim and jih. According to some authorities, mimí and jihí may be optionally shortened into mimi and jihí. See 665.
- 339. जन् jan, 'to produce' (Parasmai-pada), rejects the final nasal (see 57, u), and lengthens the radical a before t and th and hi, and, according to some, optionally before y. Before the vowel-terminations not marked with P it rejects the radical a (compare the declension of $r\acute{a}jau$ at 149). Hence the three bases jajan, $jaj\acute{u}$, and $jaj\acute{u}$. The 2d sing, pres. is either $\pi \dot{\pi} h$ or $\pi \ddot{\pi} h$. See 667, b.
- 340. भस् bhas, 'to shine,' like jan, rejects the radical a before the vowel-terminations not marked with P; and bh coalescing with s becomes p by 42 (Pres. S. Du. Pl. 3. वभित्त, वभित्त, वभित्त,
- 341. The roots निज् 'to purify,' विज् 'to separate,' and विष् 'to divide,' gunate the reduplicated syllable before all the terminations, and forbid the usual Guna of the radical syllable in the 1st pers. sing. du. pl., imperative (Pres. 1. नेनेजिन, 2. नेनेखि, 3. नेनेकि; Du. 1. नेनिज्ञम, &c.; Pl. 1. नेनिज्ञम, 3. नेनिज्ञित; Imp. 1. नेनिज्ञान; Du. 1. नेनिज्ञान; Pl. 1. नेनिज्ञान; 1st Pret. 1. अनेनेजं, 2. अनेनेक्, &c.; Pl. 3. अनेनिज्ञन, &c.).

Seventh class (7th conjugation), containing about 24 primitive verbs.

- 342. Rule for the formation of the base in the four conjugational tenses. Insert $\forall na$ (changeable to $\forall na$ after $\forall i$ &c. by 58) between the vowel and final consonant* of the root before the P terminations, and $\forall n$ (changeable to $\forall na$, or Anuswára, according to the consonant immediately succeeding) before all the other terminations by 293. a. Note, that this conjugation resembles the 2d and 3d in interposing no vowel between the final consonant of the root and the terminations.
- a. Similarly, n is inserted in certain Greek and Latin roots; as, μαθ, μανθάνω;
 λαβ, λαμβάνω; θιγ, θιγγάνω; seid, seindo; fid, findo; tag, tango; liq, linqno,
 &c. See 258. u.
- 343. Thus, from भित् bhid, 'to divide,' 'to break,' is formed the base of the present tense singular भिन्द् bhinad, and the base of the dual and plural भिन्द् bhinad, changeable to bhinat and bhint by 46 (1. bhinad + mi = भिन्दिन, 3. bhinad + ti = भिन्दिन; Du. 1. bhinad + vas = भिन्द्यम्, 3. bhind + tas = भिन्द्यम् or भिन्द्यम्; Pl. 3. bhind + anti = भिन्दिन्त). See the table at 583.

^{*} All the roots in this conjugation end in consonants.

- 344. Similarly, from रूप rudh, 'to hinder,' the two bases रूपए runadh and रूप rundh, changeable to runat, runad, and rund (1. runadh + mi = रूपएम, 2. runadh + si = रूपिम, 3. runadh + ti = रूपिम; Du. 3. rundh + tas = रूप्डम). See 671.
- 345. Observe—Roots ending in त t and ह d may reject these letters before th, t, and dhi, when n immediately precedes: hence भिन्तम् may be written for भिन्तम्, भिन्म for भिन्ति. Similarly, रूपम् may be written for रूद्धम्, see 298. a; and on the same principle तृग्ढम् is written for तृग्डढम् from तृह, see 674.
- 346. The roots भुज् 'to eat,' युज् 'to join,' विच् 'to distinguish,' conform to 296. Hence, from bhuj come bhunaj and bhunj, changeable to bhunak and bhun-k.
- 347. The roots শসু 'to break,' সমু 'to anoint,' उन्ह 'to moisten,' and इन्ह 'to kindle,' are placed under this class; but the nasal belonging to the root takes the place of the conjugational nasal. Hence, from bhanj come the two bases bhanaj and bhanj, changeable to bhanak and bhank.
- 348. The root तृह, 'to strike,' 'to kill,' inserts से instead of स before all the P terminations, excepting the 1st sing. du. pl. imperative and 1st pret. See 674.

FORMATION OF THE BASE IN THE 5TH, 8TH, AND 9TH CLASSES OF VERBS.

Fifth class (5th conjugation,) containing about 30 primitive verbs.

- 349. Rule for the formation of the base in the four conjugational tenses. Add $\frac{1}{3}$ nu to the root, which must be gunated into $\frac{1}{3}$ nu before the P terminations by 293. u. Note, that roots ending in consonants add nuv, instead of nu, to the root before the vowel-terminations. Roots ending in vowels may drop the u of nu before initial v and m (not marked with P), and always reject the termination hi of the imperative. See 291 and 259 with note.
- a. This change of nn to no is supplied in the corresponding Greek affix νν, by lengthening the ν, as in ζεύγνυμι, ζεύγνυμεν; δείκνυμι, δείκνυμεν. See 258. a.
- 350. Thus, from चि chi, 'to gather,' are formed the bases chino and chinu (Pres. 1. chino + mi = चिनोमि, chino + si = चिनोपि by 70; Du. 1. chinu + ras = चिनुषम् or चिन्यम्; Pl. 1. chinu + mas = चिनुषम् or चिन्यम्, 3. chinu + anti = चिन्यन्ति by 34; Imp. 1. chino + áni = चिनवानि by 36. b, 2. chinu by 291). See the table at 583.
 - 351. Similarly, from आप áp, 'to obtain,' come ápno and ápnu. See 681.
- 352. ∇sru , 'to hear' (sometimes placed under the 1st class), substitutes ∇sru for the root, and makes its bases srino and srinu. See 677.

Eighth class (8th conjugation), containing 10 primitive verbs.

353. Rule for the formation of the base in the four conjugational

tenses. Add \overline{s} u to the root, which must be gunated into \overline{s} before the P terminations by 293. a.

- a. Observe—There are only ten roots in this conjugation, and nine of these end either in $\overline{\eta}$ n or $\overline{\eta}$ n: hence the addition of u and o will have the same apparent effect as the addition of nu and no in the 5th conjugation.
- 354. Thus, from तन् tan, 'to stretch,' 'to extend,' are formed the bases tano and tanu (Pres. 1. $tano + mi = \pi$ नोिम, 2. $tano + si = \pi$ नोिम by 70; Du. 1. $tanu + vas = \pi$ नुचम or तन्मम; Pl. 1. $tanu + mas = \pi$ नुमम् or तन्मम; Imp. 1. $tano + áni = \pi$ नचानि by 36. b). Compare the Greek $\tau \acute{a} \nu \nu \mu \nu$, $\tau \acute{a} \nu \nu \mu \nu \varepsilon$.
- a. The root मन् san, 'to give,' optionally rejects its n, and lengthens the radical a before the y of the potential: thus, मन्यां sanyám or मायां sáyám, &c.
- 355. The tenth root in this class is $\frac{\pi}{2}$ kri, 'to do,' by far the most common and useful root in the language. This root gunates the radical vowel ri, as well as the conjugational u, before the P terminations. Before the other terminations it changes the radical ri to ur. Before initial m (not marked with P), v, and y, it rejects the conjugational u. Hence the three bases karo, kuru, and kur. See 682.

Ninth class (9th conjugation), containing about 52 primitive verbs.

- 356. Rule for the formation of the base in the four conjugational tenses. Add $\pi_1 n \acute{a}$ to the root before the P terminations; $\pi_1 n \acute{a}$ before all the others, excepting those beginning with vowels, where only $\pi_1 n$ is added, by 293. a. Observe— π_1 , π_1^2 , and π_2 , are changeable to π_1 , π_1^2 , and π_2 , by 58.
- 357. Thus, from यु yu, 'to join,' are formed the three bases $yun\acute{a}$, $yun\acute{a}$, and yun (Pres. 1. $yun\acute{a}+mi=$ पुनामि; Du. 1. $yun\acute{a}+vas=$ पुनी-वस; Pl. 1. $yun\acute{a}+mas=$ पुनीमस्, 3. yun+anti= पुनिनः Pres. Atm. 1. yun+e= पुने; Imp. 1. $yun\acute{a}+\acute{a}ni=$ पुनानि, 2. $yun\acute{a}+hi=$ पुनीहि, &c.).
- a. Observe—Roots ending in consonants substitute ána for núhi in the 2d sing. imperative: so, अज्ञान 'eat thou,' from अज्ञ 'to eat;' पुपास 'nourish thou,' from पुष, &c. See 696, 698.
- 359. ग्रह, 'to take,' becomes गृह, 'and makes its bases गृह्ला, गृह्ली, and गृह्ल. See 699.

- 360. जा, 'to know,' becomes जा, and makes its bases janá, janí, and ján. See 688. 361. न्या, 'to grow old,' becomes जि, and makes its bases jiná, jiní, and jin.
- 362. The roots वन्स्, ग्रन्स्, मन्स्, श्रन्स्, and कुन्स्, reject the radical nasal in favour of the conjugational: thus, from bandh are formed the three bases badhná. badhní, and bandh. See 692.

PRIMITIVE VERBS OF THE FIRST NINE CLASSES IN THE SIX NON-CONJUGATIONAL TENSES.

363. Observe—The general rules for the formation of the base in the 2d preterite, 1st and 2d futures, 3d preterite, benedictive, and conditional, apply to all verbs of the first nine classes indiscriminately; see 250. a. The 10th class alone carries its conjugational characteristic into most of the non-conjugational tenses; and for this reason the consideration of its five last tenses falls most conveniently under causal verbs. Compare 289. a.

Second preterite (Greek perfect).

- 364. Rule for the formation of the base in verbs of the first nine classes. In the first place, if a root begin with a consonant, reduplicate the initial consonant, according to the rules given at 331, with its vowel (a being reduplicated for a, á, ri, rí; i for i, í, e; u for u, ú, o): thus, from बुध budh, 1st c.*, 'to know,' comes the base बुद्ध bubudh; from नृत urit, 4th c., 'to dance,' ननृत nanrit; from याच yách, 1st c., 'to ask,' ययाच yayách; from कृ kri, 8th c., 'to do,' चकृ chakri; from नृ trí, 1st c., 'to cross,' ततृ tatrí; from निष् sidh, िर्माध्य sishidh by 70; from sev, sishev; from pú, pupú.
- a. And if it begin with a vowel, double the initial vowel: thus, from जस as, 'to be,' आस ás.
- b. In the second place, if the root end in a consonant, gunate † the vowel of the radical syllable, except when debarred by 28. b, in the 1st, 2d, and 3d singular, Parasmai-pada (as bubodh for bubudh); but leave the vowel unchanged before all the other terminations, Parasmai and Atmane-pada. See 293. a.
- c. And if the root end in a vowel, vriddhi the vowel of the radical syllable in the 1st and 3d singular, Parasmai ‡ (as chakár for chakri),

^{* 1}st c. means 1st class or conjugation.

[†] The gunation of the vowel is indicated by the P of wq, vq, in the singular terminations. See scheme at 246.

[‡] Grammarians assert, that there is optionally Guna in the 1st singular. Vriddhi is indicated by the w of w unaP. See scheme at 246.

and gunate it in the 2d singular (as chakar for chakri, see 293. a); but before all the other terminations, Parasmai and Atmane-pada, it must revert to its original form, and then suffer the usual change required by the rules of Sandhi.

- 365. Thus, from बुध् budh, 1st c., comes the base of the singular Parasm. बुबोध bubodh, and the base of the rest of the tense बुबुध् bubudh (1. bubodh + a = बुबोध bubodha, 2. bubodh + itha = बुबोध bubodhitha, 3. bubodh + a = bubodha; Du. 1. bubudh + iva = बुबुध्व, &c.). Similarly, from विद्*vid*, 2d c., 'to know,' come the two bases vived and vivid (1. 3. viveda; Du. 1. vividiva; Pl. 1. vividima, &c.)*.
- a. Greek affords many examples of verbs which suffer a kind of Guna or Vriddhi change in the perfect; but this change is not confined to the singular, as in Sanskrit. Compare λέλοιπα (from λείπω, ἔλιπου), πέποιθα (from πείθω, ἔπιθου), τέτροφα (from τρέφω), τέθεικα (from τίθημι), &c. There is one Greek root, however, which agrees very remarkably with the Sanskrit in restricting Guna to the singular, viz. Fιδ (εἴδω), 'to know,' answering to the Sanskrit vid above: thus, οἶδα, οἶσθα, οἶδε; ἴστον, ἴστον; ἴσμεν, ἴστε, ἴσασι. The root vid has a contracted form of its 2d pret. used for the present, which agrees exactly with οἶδα: thus, veda, vettha, &c. See 308. a.
- 366. Again, from कृ kri, 8th c., 'to do' (see 684), comes the base of the 1st and 3d singular Parasm. चकार $chak\acute{a}r$ (331. b), the base of the 2d sing. चकर chakar, and the base of the rest of the tense चक् chakri (1. $chak\acute{a}r + a =$ चकार, 2. chakar + tha = चकार, 3. $chak\acute{a}r + a =$ चकार; Du. 1. chakri + va = चकृष 267. a, 2. chakri + athus = चक्रपुस by 34; Pl. 1. chakri + ma = चकृम, &c. Atm. 1. chakri + e = चक्र by 34; Pl. 2. chakri + dhwe = चक्रदे . See scheme at 247).
- a. Observe—In the 2d preterite the 1st and 3d sing. Parasmai and Atmane have the same termination, and are identical in form.
- 367. Note, that if a root end in इ i or ई i this vowel does not blend with the initial i of the terminations in the du. pl. Parasmai, sing. du. pl. Atmane-pada, but is changed to y, violating 31: thus, from चि chi, 5th c., 'to collect' (see the table at 583), come the bases chichai, chiche, and chichi, changeable to chicháy, chichay, and chichy (1. 3. चिचाय, 2. चिचायण or चिचेण; Du. 1. चिचिय, 2. चिच्यण by 34. Atm. 1. 3. चिच्ये, &c.). Similarly, नी ní, 1st c., 'to lead' (Du. 1. निन्य, &c.; Atm. 1. निन्य, &c.). Observe, chi has also an anomalous form of the 2d pret.

^{*} There is a contracted form of the 2d preterite of vid sometimes used for the present. See 308. a.

- a. But roots ending in i or i, and having a double initial consonant, change ξ i or ξ i to $\xi \Psi$ iy before all the terminations, excepting those of the singular, Parasmai-pada: hence, from মি 1st c., 'to have recourse,' come the three bases śiśrai, śiśre, and śiśriy (1. 3. গিলাম, 2. গিলামি তা গিলাম ; Du. 1. গিলামিব, &c.). So ক্লী 9th c. makes 1. 3. chikróya, 2. chikrayitha or chikretha; Du. 1. chikriyiva; Pl. chikriyima, &c. Atm. chikriye, &c.
- b. And all roots ending in u or ú change u or ú to उच् uv before these terminations, excepting of course the roots श्व, सु, हु, सु, in the persons marked with * at p. 107, and excepting भू bhú, 1st c., 'to be,' at 585, which makes its base चभूच् babhúv throughout sing. du. and pl. Parasmai and Atmane: thus, from भू 5th c., 'to shake,' come the bases dudhan, dudho, and dudhuv (1. 3. दुर्थाच, 2. दुर्थाच or दुर्थोच; Du. 1. तुर्थाच. Atm. 1. 3. दुर्थच, 2. दुर्थाच्ये). But श्व 5th c. makes 1. 3. गुश्चाच, 2. गुश्चाच, 2. गुश्चाच, 2. गुश्चाच, 2. गुश्चाच, 5th c. makes 1. 3.
- c. And roots ending in the vowel ri, preceded by a double consonant, and most roots in long ri, instead of retaining this vowel, and changing it to r by 364. c. before the terminations of the du. and pl. Parasmai, sing. du. and pl. Atmane, gunate it into ar, as in the 2d sing., before all these terminations: thus, from ri smri, 'to remember,' 1. 3. sasmára, 2. sasmaritha; Du. 1. sasmariva. Atm. 1. 3. sasmare. But ri 'to fill,' ri 'to dissolve,' and ri 'to rend,' may optionally retain ri, changeable to ri; thus, Du. ri to ri thus, Du. ri
- 368. By referring back to the scheme at p.107, it will be seen that all the terminations of this tense begin with vowels. Those which begin with i are distinguished by the mark *, because eight roots, and only eight roots in the language (viz. कृ 'to do,' भृ 'to bear,' मृ 'to go,' वृ 'to surround,' श्रु 'to hear,' सृ 'to praise,' हु 'to run,' सृ 'to drop'), reject the i from these terminations.
- a. Most roots, however, ending in vowels, and most of those in consonants which absolutely reject the initial i from the terminations of the futures (see 394), are allowed the option of rejecting it in the 2d sing. Parasmai of the 2d preterite; but in these itha as well as tha is generally admissible \dagger .
- b. Since, therefore, only eight roots reject the initial i from the 1st dual &c.‡, and these all end in vowels, it follows that the final consonants of roots can never in this tense coalesce with the initial consonants of terminations, excepting sometimes optionally in the 2d

[†] Nevertheless, six of the eight roots at 368 and p. 107, and a few others ending in vowels, take tha only. 瞏, 昇, and many roots assuming i, take itha only.

 $[\]ddagger$ It is said, however, that some roots ending in consonants optionally reject the i in the 1st du. and plur.: thus, the 1st du. of the 2d pret. of sidh is said to be either RIUVA or RIUVA.

singular; in which case the rules of Sandhi propounded at 296 &c. are observed *: see also 388. c. Its formation, therefore, is not attended with many difficulties of consonantal combination. Nevertheless, there are numerous anomalies, as follows.

ANOMALOUS REDUPLICATION OF AN INITIAL VOWEL.

- 369. We have already seen at 364. a, that if a root ending in a single consonant begin with Ξ a, Ξ i, or Ξ u, these vowels are repeated, and the two similar vowels blend into one long one by 31: thus, from Ξ Π u, 'to be,' comes u u, or u u. So from u u u, 'to obtain,' comes u u, or u. See 681.
- 370. But when an initial i or u is gunated (as in the sing. Parasm.), then the reduplicated i becomes iy before e, and the reduplicated u becomes uv before o thus, from इप ish, 6th c., 'to wish,' come the two bases iyesh and ish, see 637 (1. 3. इपेप, &c.; Du. 1. ईपिय, &c.); and from उस् ukh, ist c., 'to move,' the two bases uvokh and ukh (1. 3. उपोस, &c.; Du. 1. जिल्ला).
- 371. And if a root begin with স্থ a and end in a double consonant, or begin with স্থ ri and end in a single consonant, the reduplicated syllable is án: thus, from অব্ arch, 1st c., 'to worship,' comes the base স্থানৰ্ ánarch (1. 3. স্থানৰ); from স্থা ridh, 5th c., 'to flourish,' comes স্থান্ধ ánarch (1.3. স্থান্ধ); Du.i. স্থান্ধিৰ, &c.).
 - a. সম্ 5th c. Atm., 'to pervade,' although ending in মা, follows 371 (1.3. সান্ম).
- 372. इ. i, 2d c., 'to go,' is vriddhied in 1st and 3d sing., and the reduplicated syllable is इय् iy, in accordance with 370. In the du. and pl. the base is ईय् iy (1. 3. इयाय, 2. इयायप or इयेष; Du. 1. ईयिब, &c.). See 645.
- a. Observe—When the preposition adhi is prefixed to the root i, it is then A'tmane only, and the 2d preterite is formed as if from $g\acute{a}$: thus, 1. 3. adhijage, &c.

ANOMALOUS MODES OF FORMING THE BASE OF THE SECOND PRETERITE.

- 373. Roots ending in **आ** \acute{a} (as, दा \acute{a} \acute{a} , 3d c., 'to give;' **धा** \acute{a} \acute{b} \acute{a} c., 'to place;' **पा** \acute{y} \acute{a} , 2d c., 'to go;' **स्पा** \acute{s} \acute{t} \acute{a} \acute{t} \acute{t}
- 374. Roots ending in the diphthongs ए e (except द्वे &c. at 379), ऐ ai, स्त्री au, follow 373, and form their 2d preterite as if they ended in á: thus, भे 1st c., 'to drink,' makes in 1st and 3d sing. दभी, 2d दिभिष or दभाष, Du. 1. दिभिष; मे 1st c., 'to sing,' makes नगी; में 1st c., 'to fade,' मुझी; शो 4th c., 'to sharpen,' शाशी.
- 375. Roots beginning with any consonant, and ending with a single consonant, and enclosing a short $\overline{\mathbf{M}}$ a, lengthen the a in the 1st† and 3d sing.; as, from

^{*} Thus, from pach, 'to cook,' 2d sing. papaktha; from driś, 'to see,' 2d sing. dadrashtha. See 388. c.

[†] The lengthening of a is said to be optional in 1st sing.: thus, pach makes in sing. 1. either papácha or papacha.

पच् pach, 1st c., 'to cook,' पपाच् papách; from tyaj, 1st c., 'to quit,' tatyáj (1. 3. tatyája, 2. tatyajitha; Du. 1. tatyajiva, &c.).

- a. Moreover, before itha and in the dual and plur. Parasmai, and all the persons of the Atmane, if the initial as well as the final consonant of the root be single, the अ a is changed to ए e, and, to compensate for this, the reduplication suppressed*: thus, from pach come the two bases पपाच papách and पेच् pech (1.3. papácha, 2. pechiha or papaktha 296; Du. 1. pechiva. Atm. 1. 3. peche, &c.). Similarly, from उभ labh, 1st c. Atm., 'to obtain' (cf. λαμβάνω, ἔλαβον), the base उΗ lebh throughout (lebhe, lebhishe, lebhe, lebhivahe, &c.). So nah, 4th c., 'to bind,' makes 1. 3. nanáha. 2. nehitha or nanaddha by 305; Du. 1. nehiva, &c. Atm. nehe, &c. Similarly, naś, 4th c., 'to perish,' 1. 3. nanáśa, 2. nešitha or nananshtha (ननेष्ठ), &c.: compare 388. d.
- b. Roots of this last kind, that require a substituted consonant in the reduplication, are excepted from the rule (but not भन bhaj and দক্ত phal).
- d. Observe—The root वम् vam, 1st c., 'to vomit,' usually follows 375 (Pán. VII. 2. 5), but may also follow 375. a.
- e. A similar rule is applied in यज्ञ yaj, 1st c., 'to sacrifice' (1. 3. iyája; Du. 3. íjatus; Pl. 3. íjus); and the 2d sing, of this root will be either द्यजिय or द्यष्ठ by 297, or येजिय by 375. a. The Atmane is 1. 3. ईजे, 2. ईजिये, &c. See 597.
- f. The roots ग্রন্থ oth and ist c., স্থান্থ oth c., হোন্ ist c., মান্ 4th c., হোন্ ist c., মান্ 1st c., মান্ ist c. Atm., মান্ ist and 4th c., may optionally follow 375. a, although not answering its conditions, and হা ist c. Atm. necessarily: thus, granth makes sing. du. pl. 3. either jagrantha, jagranthatus, jagranthus or jagrantha, grethatus, grethus; bhram makes babhrama, babhramatus, babhramus, by 375, or babhrama, bhrematus, bhremus; and trap makes trepe, trepûte, trepûre.

Similarly, TIV 4th and 5th c., but not when \acute{a} is prefixed.

- g. तृ ist c., 'to pass,' also follows 375. a (as if it were tar): thus, i. 3. tatára, 2. teritha; Du. 1. teriva, &c. नृ 4th c., 'to grow old,' may optionally follow 367. c or 375. a (3. jajára; Du. 3. jajáratus or jeratus, &c.).
- 376. गम् gam, 1st c., 'to go,' जन् jan, 4th c., 'to be born,' खन् khan, 1st c., 'to dig,' and हन् han, 2d c., 'to kill' (which last forms its 2d pret. as if from \mathbf{v} न् ghan), drop the medial a before all the terminations, except those of the sing. Parasm.

^{*} Bopp deduces forms like pechira, from papachiva, by supposing that the second p is suppressed, the two a's combined into \acute{a} , and \acute{a} weakened into e.

(compare the declension of rájan at 146, 149). Hence, gam makes in sing. du. pl. 3. jagáma, jagmatus, jagmus; jan makes jajána, jajhatus, jajhus; khan makes chakhána, chakhnatus, chakhnus; and han makes jaghána, jaghnatus, jaghnus.

377. ঘদ্ ghas, 1st c., 'to eat,' is analogous, making jaghása, jakshatus, jakshus. See 42 and 70.

378. जि ji, 1st c., 'to conquer,' forms its 2d pret. as if from गि gi, see 590 (1. and 3. जिमाय; Du. 1. जिम्बिन, &c.); हि hi, 5th c., 'to send,' as if from पि (1. 3. जियाय); स्व pi, 1st c., 'to go,' makes its base सार् dr throughout *.

379. के hwe, ist c., 'to call,' forms its 2d pret. as if from हु or हू, see 595 (1. 3. मुहाब; Du. I. मुहाबय); दे de, ist c., 'to pity,' 'to protect,' makes its base digi (1. 3. A'tm. दिग्ये, 2. दिग्यिषे, &c.); यो vye, ist c., 'to cover,' makes its bases vivyáy, vivyay, and vivy (1. विव्याय, 2. विव्यायप; Du. I. विव्याय or विव्यायव); ये ve, ist c., 'to weave,' forms its 2d pret. as if from vá or vav or vay (1. 3. वर्षो or उवाय, 2. वर्षाय or विव्याय, 2. वर्षाय, 2. वर्षाय, 2. वर्षाय, 2. वर्षाय, 2. वर्षाय, 3. वर्षो or उवाय, 3. वर्षो or जिल्ला करिय, &c.).

380. ग्रह् grah, 9th c., 'to take,' makes its base नग्नाह् and नगृह (S. Du. Pl. 3. नग्नाह, नगृहतुस्, नगृहुस्). See 699.

381. प्रक् prachchh, 6th c., 'to ask,' makes its base पप्रक् † throughout; see 631. মুর্কা bhrajj, 6th c., 'to fry,' makes either बभर्क्त or बभुक्त throughout. See 632.

382. स्वप् swap, 2d c., 'to sleep,' makes its bases सुष्याप् and मुषुप्. See 655 and 70.

383. व्यथं 4th c. 'to pierce,' व्यव् 6th c. 'to deceive,' व्यव् ist c. 'to be pained,' and व्यय् ist c. 'to spend,' make their reduplicated syllable vi; and the first two roots change vya to vi before all the terminations, excepting the sing. Parasmai: thus, from vyadh comes sing. du. pl. 3. विव्याप, विविधतुम्, विविधुम्; Atm. विविधे, &c. See 615 and 629.

384. खह ah, 'to say,' is only used in the 2d pret., and is defective in sing. du. pl. 1. and pl. 2, forming 2d sing. from छात् (2. खात्य, 3. खाह; Du. 2. खाहयुम्, 3. खाहतुम्; Pl. 3. खाहूम्).

385. Roots which begin with a vowel, long by nature or position (except \$ap\$, 5th c., 'to obtain;' \$ainchh\$, 1st c., 'to stretch;' and except roots having an initial \$a\$ before two consonants), and all roots of more than one syllable (excepting \$urnu\$, 2d c., 'to cover'), form their 2d preterites by adding आम् \$am\$ to the base, and affixing the 2d preterite of some one of the auxiliary verbs, आस \$as\$, 'to be;' भू \$bh\$, 'to be;' कृ \$kr\$, 'to do.' (Observe—आम् with चकार becomes आचकार by 59.) Thus, from ईग्रं 2d c., 'to rule,' comes 1st and 3d sing. 2d pret. ईग्रामास or ईग्राम्ब-भूव or ईग्राम्बकार 59; from चकास 2d c., 'to shine,' comes चकासाचकार. When the Atmane-pada inflection has to be employed, कृ only is used: thus, ईंड् 2d c. Atm., 'to praise,' makes 1st and 3d sing. 2d pret. ईडाचक. The root ऊर्णु 2d c.,

^{*} Pánini VII. 4. 11. VII. 2. 66.

[†] This rests on Siddhánta Kaum. 134. Some grammarians make the base in du. and pl. &c. पपुड्य.

- 'to cover,' is anomalous, and makes sing. du. pl. 1. कर्णुनाव, कर्णुनुविव, कर्णुनुविम; Atm. कर्णुनुवे, &c.
- a. Observe—Roots of the 10th class form their 2d pret. according to 385, the syllable ám being added to the base: thus, from chur, 10th c., 'to steal,' 2d pret. sing. 1. 3. chorayámása. See under Causals, 471.
- b. Also according to 385 is formed the 2d preterite of all derivative verbs, such as causals, desideratives, and frequentatives.
- c. Also of the roots स्थ्यं ay, 1st c., 'to go;' द्यं day, 1st c., 'to pity;' and कास् kás, 1st c., 'to shine' (कासास्तक्रे)*: and optionally of the roots भी bhís, 3d c., 'to fear' (विभाय or विभयास्वकार); ही hrí, 3d c., 'to be ashamed' (निहाय or निह्यास्वकार); में bhri, 3d c., 'to bear' (विभार or विभरास्वकार); हु hu, 3d c., 'to sacrifice' (नुहाय or नुह्वास्वकार); विद् vid, 2d c., 'to know;' उप् ush, 1st c., 'to burn' (उवोप or स्थोपास्वकार).
- d. Some polysyllabic roots also take both forms of the 2d preterite: thus, daridrá, 2d c., 'to be poor,' makes दिरद्राञ्चकार and द्दरिद्री; jágri, 2d c., 'to awake,' makes नागराञ्चकार and ननागार.

First and second future.

- 386. Observe—The first future results from the union of the nom. case of the noun of agency (formed with the affix $\frac{1}{4}$ tri, see 83. I) with the present tense of the verb $\frac{1}{4}$ as, 'to be:' thus, taking $\frac{1}{4}$ tri, see 83. I) with the present tense of the verb $\frac{1}{4}$ as, 'to be:' thus, taking $\frac{1}{4}$ tri, 'a giver' (declined at 127), and combining its nom. case with $\frac{1}{4}$ tri tri
- $_387$. Observe also—The second future, in its terminations, resembles the present tense, the chief difference being that sya is prefixed.
- 388. Rule for the formation of the base in verbs of the first nine classes. Gunate the vowel of the root (except when debarred by 28. b, and except in certain uncommon roots of the 6th class) throughout all the persons of both first and second future. See 293. a. at the end.
- a. Note, that in all roots ending in consonants, excepting those included in the list at 400, and in a few ending in vowels, enu-

^{*} Pánini III. 1. 37. 35.

[†] The future signification inherent in the noun of agency dátá, seems implied in Latin by the relation of dator to daturus.

merated at 397, 399, the vowel \mathbf{x} i must be inserted between the root so gunated, and the terminations.

- c. Roots containing the vowel ri are generally gunated, but they may optionally change ri to ra, when i is not inserted: thus, trip becomes either tarp or trap. The root mrij is vriddhied into márj (compare 324). Note, that when the change of ri to ra is allowed in the futures, it is admitted also in the 3d preterite and conditional, and before tha in the 2d singular of the 2d preterite.
- d. One or two roots, like majj, nas, insert a nasal in the two futures and some of the other non-conjugational tenses. See 403, 410.
- 389. Thus, from जि ji, 1st c., 'to conquer,' comes the base जे je (1st Fut. $je + t\acute{a}smi = \hat{\pi}$ तासि, &c.; Atm. $je + t\acute{a}he = \hat{\pi}$ ताहि. 2d Fut. $je + sy\acute{a}mi = \hat{\pi}$ चामि, &c.; Atm. $je + sye = \hat{\pi}$ चे, by 70). Similarly, from शु $\acute{s}ru$, 5th c., 'to hear,' comes the base श्रो $\acute{s}ro$ (1st Fut. $\acute{s}ro + t\acute{a}smi = \hat{n}$) तासि, &c.; 2d Fut. $\acute{s}ro + sy\acute{a}mi = \hat{n}$) च्योचामि, &c., by 70).
- 390. So also, from बुध् budh, 1st c., 'to know,' comes the base बोधि bodhi (1st Fut. bodhi + tásmi = बोधितासि, &c.; Atm. bodhi + táhe = बोधिताहे. 2d Fut. bodhi + syámi = बोधियामि, &c.; Atm. bodhi + sye = बोधियो.
- 391. This insertion of i, the manifest object of which is to prevent the coalition of consonants, is unfortunately forbidden in one hundred and three roots ending in consonants, some of which are of very common occurrence; and the combination of the final consonant of the root with the initial t and s of the terminations, will require an acquaintance with the rules already laid down at 296, &c. When these rules are known, there will be no difficulty in the formation of these tenses. The only question is, how are we to ascertain whether a root inserts i, or whether it rejects it? The lists about to be given at 394 and 400 will determine this point.
- 392. It is of the utmost importance that the attention of the student be directed towards these lists, as the assumption or rejection of this inserted vowel is not confined to the two futures, but extends to many other parts of the verb; insomuch, that if the first future reject ξ i, it is, as a necessary consequence, rejected in the third preterite, the Atmane-pada of the benedictive, the conditional, the infinitive mood, the passive past participle, the indeclinable past participle, the future participle formed with the affix tavya, and the noun of agency formed with the affix tri; and is, moreover, optionally rejected in the 2d pers. sing. of the 2d

preterite, and decides the formation of the desiderative form of the root by s instead of ish. So that the learner, if he know the first future, will pass on with great ease to the formation of these other parts of the verb, and should always look to this tense as his guide. For example, taking the root kship, 'to throw,' and finding the 1st future to be ksheptásmi, he knows that i is rejected. Therefore he knows the 2d future to be kshepsýami; the 3d pret. to be akshaipsam: the Atmane of the benedictive, kshipsíya: the conditional, akshepsyam; the infinitive, ksheptum; the passive past participle, kshipta; the indeclinable participle, kshiptwá; the future participle, ksheptavya; the noun of agency, ksheptri; the 2d pers. sing. of the 2d pret. optionally chiksheptha; the desiderative, chikshipsámi. On the other hand, taking the root yách,' to ask,' and finding the 1st future to be yáchitá, he knows that i is inserted, and therefore the same parts of the verb will be yáchishyámi, ayáchisham, yáchishíya, ayáchishyam, yáchitum, yáchituá, yáchituá, yáchitarya, yáchitri, yayáchitha, yayáchishámi, respectively.

393. It is evident that roots ending in vowels do not require i; and it may be taken as a general rule that they all reject it, excepting roots ending in $\Im i$ and $\Im i$; and excepting a few roots ending in the other yowels.

Observe—In the following lists the 3d pers. sing. of the 1st and 2d future is given after each root. The roots are arranged in the order of their radical vowels.

ROOTS ENDING IN VOWELS, REJECTING OR INSERTING $\mathbf{\xi}$ i in the last five tenses.

- 394. All roots in जा \acute{a} , as दा 3d c. (दाता, दास्पति, $\delta \acute{\omega} \sigma \epsilon \iota$), reject i.
- 395. All roots in इ i and ई i, as जि ist c. (जेता, जेम्पित), नी ist c. (नेता, नेम्पित), reject i.
- a. Except न्त्रि (श्रयिता, श्रयिष्यति), न्त्रि 1st c. (श्रयिता, श्रयिष्यति), डी 1st and 4th c. (इयिता, डियप्पति), and जी 2d c. (ज्ञयिता, ज्ञयिष्यति).
 - 396. All roots in σu , as श्रु 5th c. (श्रोता, श्रोप्पति), reject i.
 - a. Except the roots ह्यु, ह्यु, नु, यु, रू, स्नु (ह्यविता, ह्यविष्यति, &c.).
- b. The root मु 2d č. Xtm. optionally inserts i (स्रोता or मविता, सोप्पते or मविप्पते).
- 397. Roots in क \acute{u} insert इ i, as भू 1st c. (भिवता, भिवष्पित); but v 5th c. optionally rejects it (धिवता or धोता, धिवष्पित or धोष्पित).
- 398. All roots in चृ ri reject i in the 1st future, but not in the 2d, as कृ 8th c. (कर्त्ता, करिप्पति).
- a. Except the root वृ 5th c., which optionally lengthens the i (विरता or वरीता, विरचति or वरीचिति).
- b. The roots स्न 9th c. and ज्ञाst c. have three forms of the 1st future (स्तता, स्तरिता or स्तरीता &c., अर्ता &c.).

399. Roots in च्यू ri long, insert ξ i, as η (तरिता, तरिपाति).

a. They may optionally lengthen the i (तरीता, तरीपाति).

b. Roots in ए e, ऐ ai, ज्ञो o, reject i; but change their final diphthongs to ज्ञा á before the terminations of the futures; thus सो 4th c. (साता, सास्यति). The root पे 1st c. may optionally insert i (प्याता or प्यापिता, &c.).

ROOTS ENDING IN CONSONANTS, REJECTING $\mathbf{\xi}$ i IN THE LAST FIVE TENSES.

Observe—The roots marked * optionally reject i or insert it.

400. One in क् k. शक, शका, शस्यित, see 296.

401. Six in eq ch, and one optionally.

पच् 1st c., पक्षा, पस्यित 296. वच् 2d c., वक्षा, वस्यिति रिच् 7th c., रेक्षा, रेस्सिति विच् 7th and 3d c., वेक्षा, वेस्सिति. सिच् 6th c., सेक्षा, सेस्सिति. मुच् 6th c., मोक्षा, मोस्सिति. * ब्रष्ट् 6th c., ब्रष्टा or ब्रियुता, ब्रस्सिति or ब्रियुष्पिति.

402. One in ज् chh. प्रज्ञ 6th c., प्रशा, प्रस्पति 297.

403. Fifteen in πj , and two optionally.

त्यन् Ist c., त्यक्ता, त्यस्यिति 296. भन् Ist c., भक्ता, भस्यिति. यन् Ist c., यष्टा 297, यस्यिति. भन्न् 6th c., भष्टा, भष्टेंग, भस्यिति, भस्यिति. मन्न् 6th c., मंक्ता, मंस्यिति 388. c. भन्न् 7th c., भंक्ता, भंस्यिति. रन्न् Ist and 4th c., रंक्ता, रंस्यिति.

भूज 7th c., भोक्ता, भोड्यति. युज् 7th c., योक्ता, योध्यति. हन् 6th c., रोक्का, रोध्यति. मुज 6th c., सष्टा 297, सध्यति. * अच्च 7th c., अंक्षा or अच्चिता, अंस्पति or अज्ञिष्यति. * मृज् 2d c., माष्टी or मार्जिता, मार्ख्यति or माजिप्पति 388. b. 404. Fourteen in द d. श्रद 2d c., श्रज्ञा, श्रत्यति, see 46. पद 4th c., पत्ता, पत्यते. श्रद 1st and 6th c., श्रत्रा, श्रत्यति. सद् 1st and 6th c., सत्ता, सत्यति. स्त्रन्तु 18t c., स्त्रन्ता, स्त्रन्त्यति. हतु 1st c., हत्ता, हत्यते. खिद 6th c., खेन्ना, खेत्स्पति. छित 7th c., छेन्ना, छेन्सित. भिद 7th c., भेज्ञा, भेत्यति-

विदु 6th c., वेन्ना, वेह्यति.

खिदु 4th c., खेन्ना, खेत्यति.

खुद 7th c., खोत्ता, खोत्यति.

तुद 6th c., तोचा, तोत्स्पति.

नुद 6th c., नोज्ञा, नोत्यतिः

खच्च Ist c., खंजा, खंट्यते.

विज 3d c.t, वेका, &c., like विच.

निज् 3d c., नेक्का, नेख्यति.

[†] When विज् belongs to the 7th c., it takes i: thus, विजिता, विजियाति.

405. Eleven in प् dh.
वन्स् 9th c., बन्दा, भन्तसित 299. a.
यम् 4th c., खद्धा, यत्सित.
राभ् 5th c., राद्धा, रात्सित.
साभ् 4th and 5th c., साद्धा, सात्सित.
सिभ् 4th c.†, सेद्धा, मेत्सित.
कुष् 4th c., कोद्धा, कोत्सित.
खुम् 4th c., खोद्धा 298, खोत्सित 299.
बुम् 4th c.†, बोद्धा 298, भोत्सित 299. a.
युम् 4th c., रोद्धा, रोत्सित.
इम् 7th c., रोद्धा, रोत्सित.
इम् 4th c., शोद्धा, शोत्सित.

406. Two in न् n. मन् 4th c., मना, मंस्यते 6. b. हन् 2d c., हना, but हनिष्पति.

407. Eleven in $\mathbf{q} p$, and three optionally.

 or दर्पिष्यति ‡. मृष् 1st c., सप्ती, सप्स्वीत ‡.

408. Three in \(\frac{1}{2}\) bh, and one optionally.

यभ् 1st c., यथा, यप्पति.

रभ् 1st c., रथा, रप्पति.

लभ् 1st c., लथा 298, लप्पते 299.

* लुभ् 4th c., लोगा or लोभिता, but
लोभिषति.

409. Four in \mathbf{n} , \mathbf{n} , and one optionally.

गम् 1st c., गना 59, but गिनचिति.
 नम् 1st c., नना, नंस्यित.
 यम् 1st c., यना, यंस्यित.
 रम् 1st c., रना 59, रंस्यित 6. b.
 *क्रम् 1st c. Δ'tm., क्रना or क्रमिता, क्रंस्यते or क्रमियति.

410. Ten in sq s, and two optionally.

दंश 1st c., दंश 300, दंस्सित 302.
दिश् 6th c., देश, देस्सित (ठिंध्र्ट्स).
विश् 6th c., देश, देस्सित (ठिंध्र्ट्स).
विश् 6th c., देश, देस्सित.
लिश 4th c., लेश, लेस्सित.
लुश 1st c., क्रोश, क्रोस्सित.
स्श 6th c., रोश, रोस्सित.
दृश 1st c., दृश, दृस्सित.
मृश 6th c., मंश, मर्स्सित‡.
मृश 6th c., मर्श, स्पर्सित‡.
मश्य 6th c., स्पर्श, स्पर्सित‡.
मश्य 4th c., नंश or नशिता, नंस्सित

[†] When सिथ् and वृथ् belong to the 1st c., they take i: thus, सेधिता, बोधिता, &c.

[‡] These may optionally change the radical vowel ri to ra instead of ar: thus, $sarpt\acute{a}$ or $srapt\acute{a}$, &c. See 388. c.

* क्रिज् 9th c., क्लेष्टा or क्लेशिता, क्लेष्ट्यित or क्लेशियति.

411. Eleven in **q** sh, and six optionally.

तिवप् 1st c., त्वेष्टा, त्वेष्ट्यति.

डिप् 2d c., डेष्टा 301, डेस्ट्यति 302.

पिप् 7th c., पेष्टा, पेस्ट्यति.

विप् 3d c., वेष्टा, वेस्ट्यति.

शिप् 7th c., शेष्टा, शेस्ट्यति.

शिप् 4th c., शेष्टा, शेस्ट्यति.

हुप् 4th c., तोष्टा, तोस्ट्यति.

हुप् 4th c., दोष्टा, दोस्ट्यति.

पुप् 4th c., शोष्टा, पोस्ट्यति.

शुप् 4th c., शोष्टा, शोस्ट्यति.

शुप् 4th c., शोष्टा, शोस्ट्यति.

कृप् 1st and 6th c., वर्ष्टा, कर्स्ट्यति;

तस्ट्यति or तिस्ट्यपति.

* त्वस् Ist c., त्वष्टा or त्वस्थिता, &c. * इप् 6th c., रष्टा or रिपता, but रिपपति.

*रिष् 1st and 4th c., रेष्टा or रेपिता, but रेपिप्पति.

* कुष् (with निस्) 9th c., -कोष्टा or -कोपिता, -कोष्ट्यति or -कोपि-प्यति.

* ह्प् 1st and 4th c., रोष्टा or रोपिता, but रोपियातिः 412. Two in स् s. घस् 1st c., घस्ता, घत्यति 304. a. यस् 1st c., वस्ता, चत्यति 304. a.

413. Eight in ξ h, and seven optionally.

दह् 1st c., दग्धा 305, धस्त्रपति 306. a.
नह् 4th c., नद्धा 305, नास्पति 306. b.
यह् 1st c., चोढा 305. a, चस्र्यति 306. विह् 2d c., देग्धा 305. a, मेस्र्यति 306. a.
मिह् 1st c., मेढा 305. a, मेस्र्यति 306. हु 2d c., लेढा 305. a, लेस्र्यति 306. a.
हु 2d c., दोग्धा 305. a, लेस्र्यति 306. a.
हु 1st c., रोढा 305. a, रोस्र्यति 306. a.
हु 1st c., रोढा 305. a. रोस्र्यति 306.
*सह 1st c., सोढा 305. a. रोस्र्यति 306.

*गाह् 1st c., गाढा or गाहिता, घास्पते 306. a. or गाहिष्पते

* स्निह् 4th c., स्नेग्था or स्नेटा or स्नेहिता, स्नेष्ट्यति or स्नेहिप्पतिः

*गुह् 1st c., गोढा or गूहिता, घोस्पति 306. a. or गूहिष्यति.

*दूह 4th c., द्रोग्था or द्रोढा or द्रोहिता, भ्रोस्थित 306. a. or द्रोहिप्यति.

*मुह् 4th c., मोग्धा or मोढा or मोहिता, मोस्यित or मोहिष्यित.

* तृह् 7th c., तढी or तहिंता, तहिंप्पति or तस्मिति

414. All roots, without exception, ending in $\mathbf{u}_i(h)$, $\mathbf{\eta}_i(y)$, $\mathbf{u}_i(y)$

a. The root ग्रह् 9th c., 'to take,' lengthens the inserted i in every tense except the 2d preterite: thus, ग्रहीना, ग्रहीपानि, &c. See 699.

[†] When push belongs to the 9th c., it takes i.

[†] Krish may optionally change ri to ra; as, krashtá, &c.

Third preterite (Greek aorist, Latin perfect).

415. This complex and multiform tense, the most troublesome and intricate in the whole Sanskrit verb, is not so much one tense, as an aggregation of several tenses, all more or less allied to each other, all bearing a manifest resemblance to the first preterite, but none of them exactly assignable to that tense, and none of them so distinct in its character or so universal in its application as to admit of segregation from the general group, under any separate title of its own.

Fortunately, however, the third preterite occurs but rarely in the better specimens of Hindú composition; so that the student may satisfy himself with a cursory survey of its character and functions.

- 416. Although grammarians assert that there are seven different varieties of this tense, four of which correspond more or less to the Greek 1st agrist, and three to the 2d agrist, yet we shall endeavour to show that all these varieties may be included under the two distinct forms of terminations given in the table at 247, p. 107. form of terminations corresponds to those of the memorial scheme at 246, and belongs both to roots which reject i and to roots which assume it (see 394): but in the latter case the initial s of the 2d and 3d sing. is rejected, and the i blends with the i, which then becomes the initial of those terminations. Moreover, in the case of roots which assume i the base is formed according to rules different to those which apply in the case of roots which reject i. The 2d form of terminations resembles those of the first preterite, and belongs, in the first place, to certain roots, whose bases in the first preterite present some important variation from the root; in the second, to certain roots ending in $\Im s$, $\Im sh$, or $\lnot sh$, which have i, u, or ri, for their radical yowel; and, in the third, to verbs of the 10th class and causals.
- 417. Observe also—In all the modifications of the third preterite, the first step in the formation of the base is the prefixing of the augment Ξ u, a further indication of the community of character which this tense presents to the first preterite.
- a. It will appear, however, in the Syntax, that when the third preterite is used as a prohibitive imperative, the particle \mathbf{HI} ma being prefixed, the augment a is then rejected.

b. When a root begins with the vowels ξ i, \Im u, or \Im ri, short or long, the augment is prefixed in accordance with 260. n.

FORM I.

418. The terminations are here repeated from 247, p. 107.

1. sam	swa	sma	si	swahi	smahi
2. sís	stam or tam	sta or ta	sthás or thás	$s \acute{a} t h \acute{a} m$	$dhwam \ { m or} \ dhwam$
3. sít	stám or tám	sus	sta or ta	sátám	sata

- 419. Observe, that when i is not inserted before the above terminations, the initial s may be discarded from those terminations in which it is compounded with t and th, if the base ends in any consonant excepting n, or in any short vowel. Observe also, that \vec{q} dhwam takes the place of $\vec{\omega}$ dhwam, when the base ends in any other vowel than \vec{a} .
- 420. Rule for the formation of the base for those verbs of the first nine classes, at 395, 396, 398, 400, &c., which reject ξ i. In the Parasmai, if a root end in either a vowel or a consonant, vriddhi the radical vowel before all the terminations. In the Atmane, if a root end in ξ i, ξ i, τ u, or τ i, gunate the radical vowel; and if in τ i or any consonant, leave the vowel unchanged before all the terminations. Observe—The augment τ a must always be prefixed, as in the 1st preterite. See 260.
- 421. Thus, from नी 1st c., 'to lead,' come the two bases anai for Parasmai and ane for Atmane (anai + sam = ज्ञनेषं by 70; Atm. ane + si = ज्ञनेषं, ane + sthás = ज्ञनेषास, &c.); and from कृ 8th c., 'to make,' come the two bases akár for Parasmai and akṛi for Atmane (akár + sam = ज्ञकाषं by 70, &c.; Atm. akṛi + si = ज्ञकृषि by 70, akṛi + thás = ज्ञकृषास by 419, akṛi + ta = ज्ञकृत, &c.). See 682. Similarly, भू 3d c., 'to bear.' See the table at 583.
- 422. So from युन् 7th c., 'to join,' come the two bases ayanj for Parasmai and ayuj for Λ tmane (Parasmai ayauj + sam = अयोक्षं by 296, ayauj + swa = अयोक्षं, ayauj + tam = अयोक्षं by 419; Λ tm. ayuj + si = अयुक्षि by 296, ayuj + thás = अयुक्याम्, ayuj + ta = अयुक्ष); and from रूप् 7th c., 'to hinder,' the bases araudh and arudh (Parasmai araudh + sam = अरोत्सं by 299, Du. araudh + swa = अरोत्सं, araudh + tam = अरोदं; Λ tm. arudh + si = अर्हास्, araudh + thás = अरहास्, &c.).
- 423. Similarly, from पच् ist c., 'to cook,' come the bases apách and apach (apách+sam=अपाछ) by 296; Atm. apach+si=अपछि, apach+thás=अपन्यास्. &c.); and from दह ist c., 'to burn' (601), the bases adáh and adah (adáh+sam=

स्थासं by 306. a, addh+tam=सदाग्यं by 305; Λ tm. adah+si=सथि by 306. a, adah+thás=सदग्यास, &c.).

- 424. The root यह ist c., 'to carry' (611), changes the radical vowel to ञ्रो o before those terminations which reject an initial s (see 419, 305.a): thus, aváksham, avákshís, avákshít, avákshwa, avodham, &c.; Atm. avakshi, avodhás, avodha, &c.: compare 375. c. सह ist c. Atm., 'to bear,' generally follows 427 (asahishi, &c.), though the form asodha is given for the 3d sing. With avákshít compare the Latin vexit, and with avakshi compare vexi.
- 425. नह् 4th c., 'to tie,' 'to fasten,' makes anátsam, anátsís, anátsít, anátswa, anáddham, &c.; and Atm. anatsi, anaddhás, &c., by 306. b (compare 182. e). Similarly, यस् 1st c., 'to dwell' (607), makes avátsam, &c., by 304. a.
- 426. मज्ज 6th c., 'to be immersed,' and सञ्च ist c., 'to adhere,' make amán-ksham &c., asán-ksham &c. See 633, 597. a.
- a. The root ₹ 2d c., 'to go,' with adhi prefixed, signifying 'to go over,' 'to read,' Atmane-pada only, substitutes मी gi in the 3d pret.: thus, ऋथ्यगीपि, ऋथ्य-मीष्टास, ऋथ्यगीष्ट, &c.
- b. Roots ending in न or ए rarely reject the sibilant from some of the terminations in the Atmane, as indicated at 418, dropping the final nasal where s is rejected: thus, तन् 8th c. makes in Atmane 2d and 3d sing. खनपास, खता (compare 57). Similarly, खण् 8th c. makes खद्यपास, खद्या. And the roots सन् 8th c., जन् 4th c., खन् 1st c., may lengthen the a when a is dropped: thus, खसापास, खसात, &c.; compare 354. a, 339. But the above roots generally follow 427, and prefix i to all the terminations; so that खतिशास, खतिनश, खतिनश, is more usual than खतपास, खतत. The root मन् 4th and 8th c. makes 3d sing. खमस्त or खमिनश or खमत.

The same form with \$\mathbf{z}\$ i prefixed.

427. Those verbs which assume \mathbf{z}_i (see 388. a, 397, 399, 414) reject the initial sibilant from the terminations of the 2d and 3d sing., and the i then blends with the initial i of those terminations. In the other terminations the i causes the change of s to sh by 70: thus,

1. isham	ishwa	ishma	ishi	ishwahi	ishmahi
2. ís	ish tam	ishta	ishṭhás	$ish \'ath \'am$	idhwam or iḍhwam
3. ít	ish ț $\acute{a}m$	ishus	ishṭa	$ish \acute{a}t \acute{a}m$	ishata

Verbs which assume i, and take the above terminations, require a different rule for the formation of their base, as follows:—

- 428. Rule for the formation of the base for those verbs of the first nine classes which assume \bar{z} i before the terminations, as above.
- a. If a root end in the vowels z_i , z_i

Observe—Roots ending in any other vowel than u and ri rarely follow 427, as they generally reject i, and follow 418* (see 304, &c.).

- b. If a root end in a single consonant, gunate the radical vowel in both Parasmai and Atmane (except when debarred by 28. b, and except in the roots enumerated at 388. b). Of course the augment a must in every case be prefixed. See 260.
- 429. Thus, from पू 9th c., 'to purify,' come the two bases apau for Parasmai and apo for Atmane (apau + i + sam = अपाविषं by 37, apau + i + is = अपाविष, apau + i + it = अपाविष, &c.; Atm. apo + i + si = अपविष, &c., by 36), see 583; and from η 1st c., 'to cross,' comes the base atar for Parasmai (atar + i + sam = atarisham, &c.).
- a. Observe—Roots in $orall p_i ri$, and the root $rac{1}{2} v_i ri$, may optionally lengthen the inserted i in the Atmane: thus, अकरिपि or अकरिपि.
- 430. Similarly, चुष् budh, 1st c., 'to know,' makes abodhisham, &c., see 583; and चृत् vrit, 1st c., 'to be,' makes avartishi, &c.; and रूप् edh, 1st c., 'to increase,' makes aidhishi, &c. (260. b), see 600.
- 431. A medial **ष** a is sometimes lengthened: thus, **बर्** vad, 1st c., makes **ष्ट्रवादियं**, &c. See 598.
- 432. The roots कू, गू, धू, भू, नू, all of the 6th c., may either follow 429 or make अधुविषं adhuvisham, &c.
- a. हन् 2d c., 'to kill,' forms its 3d preterite from वध्: thus, अविधिषं, &c. See 654.
- 433. Many roots in खा \acute{a} , ए \acute{e} , स्रो \acute{o} , and \acute{v} \acute{e} i, with three in \acute{v} \acute{v} , var, रम् \acute{v} \acute{e} , and \acute{e} , but insert \acute{e} before it; the final \acute{e} , \acute{o} , and \acute{e} , being changed to खा \acute{e} : thus, from या 2d c., 'to go,' comes खयासिएं, &c. (see 644); from शो 4th c., 'to sharpen,' खशासिएं, &c.; from यम् 1st c., 'to restrain,' खर्यसिएं, &c. दिस्ता 2d c., 'to be poor,' makes adaridrisham or adaridrásisham, &c.
- a. In the Atmane these roots reject the i and the s which precedes it, and follow 418: thus, from मा 3d c., 'to measure,' comes समासि, &c. (see 665); from रम् 1st c., 'to sport,' स्रंशित, स्रंस्यास्, स्रंस्त, &c.
- 434. Some Atmane-pada verbs of the 4th class form the 3d person sing. of the 3d preterite by rejecting the termination sta, and leaving i, as in the passive (475. a): thus, पह् 4th c., 'to go,' makes 3d pret. 3d sing. अपादि; जन् 4th c., 'to be born,' makes अजिन; and वुध् 4th c., 'to know,' makes अविधि. Compare 253. a.

^{*} Except जागृ, जर्षु, and ग्वि, which follow 427, and are gunated, instead of taking Vriddhi: thus, अजागरिपं, और्शविपं, अन्नरिपं

FORM II.

435. Resembling the first preterite.

1. am	$\acute{a}va$ or va	áma or ma	e or i	ávahi	\acute{a} mah i
				ethám or áthám	
3. at or t	atám or tám	an or us	ata	etám or átám	anta

Note, that this form corresponds to the Greek 2d aorist (compare $asth\acute{a}m$, $asth\acute{a}s$, $asth\acute{a}t$, with $\emph{\'e}\sigma\tau\eta\nu$, $\emph{\'e}\sigma\tau\eta\varsigma$, $\emph{\'e}\sigma\tau\eta$), and that the first form is more or less analogous to the 1st aorist. The substitution of i for e, and $\emph{\'a}th\acute{a}m$, $\emph{\'a}t\emph{\'a}m$, for $eth\acute{a}m$, et $\emph{\'a}m$, in the $\emph{\'a}t$ tmane of form II, is confined to a class of roots mentioned at 439.

- 436. Rule for the formation of the base in verbs of the first nine classes. In general the terminations are attached directly to the root: thus, गम् ist c., 'to go,' makes आगमं agamam, &c., see 602; भिर् 7th c., 'to break,' अभिरं; नश् 4th c., 'to perish,' अनशं (or अनेशं, see 441). But दृश ist c., 'to see,' is gunated, and makes adarsam, see 604. Observe—Sometimes roots which follow this form in the Parasmai, follow form I. (418) in the Atmane.
- 437. No confusion can arise from this apparent identity with the 1st preterite, as in all cases where these terminations are used for the 3d preterite, the 1st preterite presents some difference in the form of its base; as in agachchham (270), abhinadam (343). So again, the sixth conjugation, which alone can ever show a perfect identity of root and base, never makes use of this form for its 3d preterite, unless by some special rule the base of its 1st preterite is made to differ from the root: thus, lip, 'to smear' (cf. $\grave{\alpha}\lambda\epsilon l\phi\omega$), which is alipam in the 3d preterite, is alimpam in the first (281). So in Greek, compare the imperfect $\check{\epsilon}\lambda\epsilon\iota\pi o\nu$ with the 2d aor. $\check{\epsilon}\lambda\iota\pi o\nu$; and similarly, $\grave{\epsilon}\lambda\acute{\alpha}\mu\beta\alpha\nu\nu$ with $\check{\epsilon}\lambda\alpha\beta o\nu$; $\grave{\epsilon}\delta\acute{\alpha}\mu\nu\eta\nu$ with $\check{\epsilon}\delta\alpha\mu\nu\nu$, &c.
- a. One or two roots in आ á and इ i reject their finals; and one or two in श ri and भू ri change these vowels to ar before the above terminations: thus, स्था 2d c, 'to tell,' makes अस्य; भू ri ist ri, 'to go,' makes असरं; ri 4th ri, 'to grow old,' अनरं.
- 438. Certain roots ending in long vowels reject the initial vowel from the terminations of the Parasmai, as indicated in the table at 435: thus, दা 3d c., 'to give,' makes adám, adás, adát, adáva, &c.; 3d pl. adus, see 663. So also, **પা** 3d c., 'to place,' makes adhám, &c., 664; and स्था 1st c., 'to stand,' makes asthám, &c., 587. Similarly, মূ 1st c., 'to be,' excepting in 1st sing. and 3d pl. (অমূব, অমূব, অমূব, &c.; 3d pl. অমূবন,), see 585.
 - α . Observe, however, that some roots in \acute{a} , like $y\acute{a}$, 2d c., 'to go,' follow 434.

- b. Some roots in ए e and ञो o, which follow 434, optionally follow 438; in which case e and o are changed as before to á: thus, पे dhe, 1st c., 'to drink,' makes either adhásisham &c., or adhám &c.; सो so, 4th c., 'to come to an end,' makes either asásisham or asám, see 613; पे also makes ञर्भ, see 440. a.
- c. But \$\overline{\overline{\pi}}\$ ist c., 'to call,' drops the final e, and retains the initial vowel of the terminations: thus, ahwam, ahwas, ahwat, &c. See 595.
- d. In the Atmane-pada, roots like दा, धा, स्था, &c., at 438, follow form I. at 418; but drop the final á, and assume i in its place: thus, adishi, adithás, adita, adishwahi, &c.; 2d pl. श्रदिहं. See 663.
 - e. ₹ 2d c., 'to go,' makes its 3d preterite from a root मा: thus, agám, agás, &c.
- f. The classical scholar will observe, that adadám, the 1st preterite of the root $d\acute{a}$, 'to give,' bears the same relation to its 3d preterite adám that $\epsilon \delta i \delta \omega \nu$ does to $\epsilon \delta \omega \nu$. So also the relation of adhám (3d pret. of dhá, 'to place') to adadhám (1st pret.) corresponds to that of $\epsilon \delta \nu$ to $\epsilon \tau i \delta \nu$. Compare also abhavas and abhús with $\epsilon \delta \nu \epsilon s$ and $\epsilon \delta \nu s$.
- 439. Certain roots ending in \mathbb{N} i, \mathbb{N} i, \mathbb{N} i, enclosing a medial i, i, or i, form their 3d preterites according to form 11. at 435; but whenever confusion is likely to arise between the 1st and 3d preterites, i is prefixed to the terminations, before which sibilant the final of the root becomes i by 302 and 306.
- a. Thus, दिश् 6th c., 'to point out,' the 1st pret. of which is adisam, makes adisham &c. in 3d pret. (compare the Greek 1st aorist &θείξα). Similarly, द्विष् 2d c., 'to hate,' makes adwiksham &c. 657; दुइ 2d c., 'to milk,' makes adhuksham &c. by 306. a. See 660.
- b. This class of roots substitutes i for e, and áthám, átám, for ethám, etám, in the Atmane terminations: thus, adikshi, adikshathás, adikshata, adikshávahi, adiksháthám, &c.
- c. A few roots of this kind optionally follow 418 in the Atmane: thus, লিছ্ 2d c. may make অভিনিম, অলীৱান্, অলীৱ, &c., 661; and दुइ 2d c., 'to milk,' may make অধ্যান, অ.c. See 660.
- 440. Causal verbs make use of form II, but the base assumes a peculiar reduplication (analogous to the Greek pluperfect), to be explained at 492: thus, from ৰু মূ ist c., 'to know,' comes অৰূৰ্থ, &c.
- a. A few primitive verbs take a reduplicated 3d preterite, analogous to causals: thus, छि 1st c., 'to have recourse,' makes सिमिष्यं, &c.; छि 1st c., 'to swell,' makes either स्रष्टां or स्रष्टायमं or सिमिष्यं; हु 1st c., 'to run,' सिद्दुद्वं: मु 1st c., 'to flow,' समुमुवं; भे 1st c., 'to drink,' सद्भं; कम् 1st c., 'to love,' सम्बमे, &c. This last is defective when it belongs to the 1st c., having no conjugational tenses; but when it belongs to the 1oth c. (Pres. काममे, &c.) its 3d preterite is समिके
- 441. The following primitive verbs take a contracted form of reduplicated 3d preterite: वच् 2d c., 'to speak,' makes अशोचं avocham

(from खवउचं for खववचं 650); पत् 1st c., 'to fall,' खपप्रं (from खपपतं; compare Greek ἔπιπτον); ज्ञास् 2d c., 'to rule,' खिजापं (from खिजाज्ञासं. The Λtmane follows 427; see 658); खस् 4th c., 'to throw,' आस्यं (from खाससं, contracted into खाप्सं for खात्तं 304. α, whence by transposition खास्यं); नज्ञ 4th c., 'to perish,' खनेज़ं (from खनइपं for खननिज्ञं 620, 436).

Benedictive or precative.

- 442. Observe, that the terminations of this tense resemble those of the potential in the memorial scheme at p. 105. In the 2d and 3d singular they are identical. In the other persons of the Parasmai a sibilant is inserted, and in some of the Atmane both prefixed and inserted. The only difference between the potential and benedictive of verbs of the 2d and 3d groups, at 290, will often be that the potential will have the conjugational characteristic: thus, bhid, 7th c., 'to break,' will be $bhindy\acute{a}t$ in the potential, and $bhidy\acute{a}t$ in the benedictive. Compare the optative of the Greek agrist $\delta o\acute{n}\gamma \nu$ with the optative of the present $\delta i\delta o\acute{n}\gamma \nu$.
- 443. Rule for the formation of the base in verbs of the first nine classes. In the Parasmai, as a general rule, leave the root unchanged before the terminations, and never insert i; but in the Λ tmane prefix i to the terminations in those roots ending in consonants or vowels which take the inserted i in the futures (388. a, 414), and before this i gunate the radical vowel. It is also gunated in the Λ tmane in some roots ending in vowels which reject i: but if a root end in a consonant, and reject i, the radical vowel is left unchanged in the Λ tmane, as well as Parasmai.
- 444. Thus, from भू 1st c., 'to be,' come the base of the Parasmai $bh\acute{u}$, and the base of the Atmane bhavi, by 36. b ($bh\acute{u} + y\acute{a}sam =$ भूयासं &c., $bhavi + s\acute{i}ya = भविपीय$ by 70).
- 445. Frequently, however, before the y of the Parasmai terminations, the root is liable to changes analogous to those which take place before the y of the 4th conjugation at 272, and the y of passive verbs at 465; and not unfrequently it undergoes changes similar to those of the 2d preterite at 373, &c., as follows:—
- 446. A final आ á is changed to ए e in the Parasmai, but remains unchanged in the Atmane: thus, दा 3d c., 'to give,' makes देपासं &c. for Parasmai; दासीप &c. for Atmane-pada.
- 447. Final इ i and उ u are lengthened in Parasmai, and gunated in Ktmane: thus, चि 5th c., 'to gather,' makes चीयासं &c., चेपीय &c.; and हु 3d c., 'to sacrifice,' makes ह्यासं &c., होपीय &c.
- 448. Final च्रा is changed to रि ri in Parasmai, but retained in Atmane: thus, कृ 8th c., 'to do,' makes क्रियामं &c., and कृषीय &c. After a double consonant ri is gunated in Parasmai, as well as before inserted i: thus, स्नृ 5th and 9th c., 'to spread,' makes स्तरीसं &c., स्नृ भीय &c., or स्तरिपीय &c.

- u. वृ, 'to cover,' 'to choose,' makes either व्रियामं or वृर्यामं, वृषीय or वरिपीय or वृषीय.
- 449. Final स् ri is changed to ईर्ir in both voices, but is gunated before inserted i in Atmane: thus, तृ 1st c., 'to cross,' makes तीयामं &c., तीपीय &c., or तरिपीय &c., or तरिपीय &c.
 - a. One root, प् 10th c., 'to fill,' makes पूर्वासं &c. Compare 448. a.
- 450. Of roots in र e, धे 1st c., 'to drink,' makes धेयामं &c.; but हो 1st c., 'to call,' makes हूयामं &c., and हासीय &c.; व्ये 1st c., 'to cover,' makes वीयामं &c., and व्यासीय &c.; कार्य वे 1st c., 'to weave,' makes जयामं &c., and वासीय &c.
- 451. Final ऐ ai and जो o are treated like final á at 446: thus, मै 1st c., 'to sing,' makes मेयासं &c.; ब्लै 1st c., 'to preserve,' makes ह्वासीय &c.
- 452. If a root end in a consonant, there is no change in Parasmai; and there are no changes in Atmane, excepting those of Sandhi, unless the root take i, when the radical vowel is gunated: thus, दुइ 2d c., 'to milk,' makes दुः आसं &c., and भुक्षीय &c., by 306. a; डिय् 2d c., 'to hate,' makes डिप्पासं &c., and डिशोय &c., by 302; and वृष् 1st c., 'to know,' makes वृष्यासं &c., and बोधिपीय &c.
- a. Roots of the 10th class, however, retain Guna in the Parasmai, as well as in the Atmane, rejecting the conjugational aya in the Parasmai only; see under Causals (460).
- b. And if a root end in a double consonant, of which the first member is a nasal, the latter is generally rejected: thus, bhanj, 7th c., makes bhajyásam, &c.
- 453. ग्रह 9th c., 'to take,' makes in Parasmai मृद्धामं &c.; प्रज् 6th c., 'to ask,' makes पृज्जामं &c. Similarly, भज्ज् 6th c., 'to fry,' and ब्रष्ट् 6th c., 'to cut.' In the A'tmane they are regular.
- 454. यच् 2d c. 'to speak,' वह 1st c. 'to say,' वप् 1st c. 'to sow,' वस् 2d c. 'to wish,' वह 1st c. 'to carry,' and खप् 2d c. 'to sleep,' substitute उ u for व v in the Parasmai: thus, उच्यामं &c., मुप्पामं &c. In the Atmane they are regular; as, यसीय from वह.

Conditional.

- 455. Note, that this tense bears the same relation to the 2d future that the 1st preterite does to the present. In its formation it lies half-way between a first preterite and a second future. It resembles the first preterite in prefixing the augment $\overline{\mathbf{w}}$ a to the base (see 260), and in the latter part of its terminations: it resembles the second future in gunating the radical vowel, in inserting $\overline{\mathbf{x}}$ i in exactly those roots in which the future inserts i, and in the sy of its terminations. See the scheme at 246, p. 105.
- 456. Rule for the formation of the base in verbs of the first nine classes. Prefix the augment $\overline{\mathbf{w}}$ a, gunate the radical vowel, except when debarred by 28. b, and insert i before the terminations if the futures insert i. When i is rejected, as in all the roots at 400 &c., the rules of Sandhi must be observed.
 - 457. Thus, बुध 1st c., 'to know,' makes अबोधियं &c.; हह 2d c.,

'to milk,' makes ऋषोस्त्रं &c., by 306. a; डिष् 2d c., 'to hate,' makes ऋडेस्सं &c., by 302.

Infinitive.

- 458. The termination of the infinitive is $\vec{\mathbf{g}}$ tum, like the um of the Latin supine.
- 459. Rule for the formation of the base in verbs of the ten classes. The base of the infinitive is identical with the base of the first future, and where one inserts इ i, the other does also: thus, budh, 1st c., 'to know,' makes चोचित्रं bodhitum; kship, 6th c., 'to throw,' makes चोह्रं ksheptum. Moreover, all the rules for the change of the final consonant of a root before the t of the future terminations apply equally before the t of the infinitive. Hence, by substituting um for the final á of the 3d pers. sing. of the 1st future, the infinitive is at once obtained: thus, śaktá, śaktum; tyaktá, tyaktum; प्रहा, प्रहे; मोडा, सोहं, &c. See 400, &c.
- a. The following examples will show how remarkably the Sanskrit infinitive answers to the Latin supine. S. स्यानुं 'to stand,' L. statum; S. दानुं 'to give,' L. datum; S. पानुं 'to drink,' L. potum; S. एतुं 'to go,' L. itum; S. स्तनुं 'to strew,' L. stratum; S. चानुं 'to anoint,' L. unctum; S. चिनानुं 'to beget,' L. genitum; S. स्विनानुं 'to sound,' L. sonitum; S. समुं 'to go,' L. serptum; S. विमानुं 'to vomit,' L. vomitum. Prof. Bopp considers that the infinitive affix tum is the accusative of an affix tu, of which the affix twá of the indeclinable participle (see 555. a) is the instrumental case.

DERIVATIVE VERBS.

460. Having explained the formation of the verbal base in the ten classes of primitive verbs, we come next to the four kinds of derivative verbs, viz. passives, causals, desideratives, and frequentatives.

PASSIVE VERBS.

- 461. Every root in every one of the ten classes may take a passive form*, which is conjugated as an Atmane-pada verb of the 4th class.
- a. It is a form, however, not very commonly used, except in the 3d singular and plural of the present and imperative; for although a passive construction is exceedingly common in Sanskrit syntax, yet almost all the tenses of the passive verb are expressed by participles.
- 462. Observe—Passive verbs take the regular Atmane-pada terminations* at 247, making use of the substitutions required in the

^{*} See 253, and 253. a. b. There are occasional instances in the Mahábhárata of passive verbs conjugated in the Parasmai.

4th class. In the 3d preterite they take either of the forms at 418 and 427, according as the root may admit the inserted ξ i or not; but they require that in the 3d singular of both forms the termination be ξ i in place of sta and ishta.

Conjugational tenses.

- 463. Rule for the formation of the base in the four conjugational tenses, Atmane-pada, of roots of the first nine classes. The rule is the same as in the 4th class at 272, viz. affix \mathbf{u} ya^* —lengthened to \mathbf{u} ya before initial m or v—to the root, the vowel of which is not gunated, and generally remains unchanged.
- 464. Thus, from भू 1st c., 'to be,' comes the base भूष $bh\dot{u}ya$ (Pres. $bh\dot{u}ya+i=$ भूषे, $bh\dot{u}ya+se=$ भूषसे, &c.; Pot. $bh\dot{u}ya+iya=$ भूषेप, &c.; Imp. $bh\dot{u}ya+ai=$ भूषे, &c.; 1st Pret. $abh\dot{u}ya+i=$ अभूषे, &c.); from तुर 6th c., 'to strike,' comes tudya (Pres. tudya+i= तुष्टे, &c.).
- 465. A final vowel, however, often undergoes changes, some of which are different from, and some analogous to, those of the 4th class, as follows:—

Six roots in आ d, and one or two in \mathbf{v} e, \mathbf{v} ai, and \mathbf{v} ai, change their final vowels to \mathbf{v} \mathbf{v} i: thus, \mathbf{v} \mathbf{v} i: thus, \mathbf{v} i: to give, makes Pres. दीये, दीयसे, दीयते, &c. So also, \mathbf{v} , $\mathbf{v$

- a. But other roots in á remain unchanged; and most others in ai and o are changed to á: thus, स्या 2d c., 'to tell,' makes 3d sing. स्यायते; and ज्ञा 9th c., 'to know,' ज्ञायते; पा 2d c., 'to protect,' पायते; ध्ये 1st c., 'to meditate,' ध्यायते; शो 4th c., 'to sharpen,' ज्ञायते. But दरिद्रा 2d c. makes दरिद्राते.
- b. द्धे 1st c. 'to call,' व्ये 1st c. 'to cover,' वे 1st c. 'to weave,' make their bases húya, víya, and úya (3d sing. ह्यते).
- 466. Final इior उu are lengthened, as also i or u before v or r: thus, from जि ist c., हु 3d c., दिव् 4th c., come the three bases जीय, ह्य, दीव्य.
 - a. But श्वि ist c., 'to swell,' makes जायते; and ज्ञी 2d c., 'to sleep,' ज्ञाय्यते.
- 467. Final जा ri becomes रि ri, but if preceded by a double consonant is gunated: thus, कृ 8th c., 'to do,' makes क्रियते; but स्मृ 1st c., समयते. The roots जा and जागृ are also gunated.
- 468. Final स्ट्रार्ग becomes ईर्रा रंग: thus, कृ 6th c., 'to scatter,' makes कीर्यते; but प्, 'to fill,' प्रेने.
- 469. Roots ending in two consonants, of which the first is a nasal, usually reject the nasal; as, from बन्ध, स्तम्भ, सञ्च, come the bases badhya, &c. (बधते, &c.).

^{*} Bopp considers that this ya is derived from ya, 'to go,' just as the causal aya is derived from i, 'to go.' It is certain that in Bengálí and Hindí the passive is formed with the root ya. Compare the Latin $amatum\ iri$, &c. See 481.

- 470. जन् 4th c., खन् 1st c., तन् 8th c., may optionally reject the final nasal, and lengthen the preceding a: thus, जायते or जन्यते, &c.
- 471. यच् 2d c., वह 1st c., वष् 1st c., वस् 1st c., वश् 2d c. 'to wish,' वह 1st c., स्वप् 2d c., यज् 1st c., make their bases उच्य, उद्य, उप्य, उप्य, उश्य, पुण, इन्य (उच्यते, &c.).
- 472. ग्रह, प्रच्ल, भज्ज, याच्, याध्, प्राय, शास, make their bases गृह्म, पृच्छन, भृज्जन, विषय, विध्य, वृष्ट्य, शिष्य, respectively (गृह्यते, &c.).

Non-conjugational tenses.—Second preterite of passives.

- 473. The base of this tense in the passive verb is identical with that of all primitive verbs, in all ten conjugations. The bases, therefore, as formed at 364, will serve equally well for the 2d preterite of the passive, provided only that they be restricted to the Atmane-pada inflection.
- a. According to some grammarians, however, the root भू may make बुभूवे bubhúve, as well as बभूव bubhúve, in the passive 2d preterite.

First and second future of passives.

- 474. In these and the remaining tenses no variation can occur from the bases of the same tenses in the primitive, unless the root end in a vowel. In that case the insertion of \S i may take place in the passive, although prohibited in the primitive, provided the final vowel of the root be first vriddhied: thus, from \lnot chi, 5th c., 'to gather,' may come the base of the 1st and 2d fut. pass. cháyi (cháyitáhe &c., cháyishye &c.), although the base of the same tenses in the primitive is che (chetáhe &c., cheshye &c.). Similarly, from \Tau hu and \Tau kri may come hávi and kári (hávitáhe, káritáhe), although the bases in the primitive are ho and kar.
- a. In like manner \mathfrak{F}_i may be inserted when the root ends in long \mathfrak{F}_i d, or in \mathfrak{F}_i e changeable to d, provided that, instead of Vriddhi (which is impossible), y be interposed between the final d and inserted i: thus, from dd, 'to give,' may come the base of the fut. pass. ddyi (ddyitdhe &c.), although the base of the same tenses in the primitive is dd (ddidhe &c.); from hwe, 'to call,' may come hwdyi (\mathbf{E}_i \mathbf{I} $\mathbf{I$
- b. In the case of roots ending in consonants, the base of the two futures in the passive will be identical with that of the same tenses in the primitive verb †, the inflection being that of the Atmane.
- c. In verbs of the 10th conjugation deviation from the Atmane form of the primitive may take place in these and the succeeding tenses. See 496.

^{*} This explanation of the passive rests on the authority of Páṇini (VI. 4. 62), and the Siddhánta Kaumudí.

[†] The root दृश् ist c., 'to see,' however, in the passive, may be दर्शिताहे, दर्शिष्णे, as well as दृष्टाहे, दृक्ष्पे; and हन् may be पानिताहे, पानिष्पे, as well as हनाहे, हिन्षे, and यह may be ग्राहिताहे, ग्राहिष्पे, as well as ग्रहीताहे, ग्रहीषे.

Third preterite of passives.

475. In this tense, also, variation from the primitive may occur when the root ends in a vowel. For in that case the insertion of ξ i may take place, although forbidden in the primitive verb, provided the final of the root be vriddhied: thus, from fa chi may come the base of the 3d pret. pass. acháyi (acháyishi &c., 427), although the base in the Atmane of the primitive is ache (acheshi &c., 418). also, from \cline{F} hu and \cline{F} kṛi may come ahávi and akári (ahávishi, akárishi, 427), although the bases in the Atmane of the primitive are aho and akri (ahoshi, akrishi, 418). Again, i may be inserted when the root ends in long आ á, provided that y be interposed between final \acute{a} and inserted i: thus, from $d\acute{a}$, to give, may come adáyi (adáyishi &c.), although the base in the Atmane of the primitive is adi (adishi &c.). But in all these cases it is permitted to take the base of the primitive for that of the passive (so that the passive of chi may be either acháyishi or acheshi), except in the 3d pers. sing., where the terminations ishta and sta being rejected, the base, as formed by Vriddhi and the inserted i, must stand alone: thus, acháyi, 'it was gathered;' ahávi, 'it was sacrificed;' akári, 'it was done;' adáyi, 'it was given.' Sometimes, however, the regular form of the 3d sing. Atmane is admissible, as well as the mutilated form.

a. If the root end in a consonant, the base of the 3d pret. pass. will always be identical with that of the 3d pret. Atmane of the primitive, except in the 3d pers. sing., where ₹ i being substituted for the terminations ishta and sta of the 1st form, requires before it the lengthening of a medial a, and the Guna of any other short medial vowel*. Hence, in tan, 8th c., 'to stretch,' the form of the 1st, 2d, and 3d sing. 3d pret. will be atanishi, atanishihás, atáni; from kship, 6th c., 'to throw,' akshipsi, akshipthás, akshepi; from vid, 2d c., 'to know,' avedishi, avedishthás, avedi. Observe—This 3d sing. of the 3d pret. passive is not unfrequently found, even in the simplest writings.

Benedictive and conditional of passives.

476. In these tenses the same variation is permitted in the case of roots ending in vowels as in the last; that is, the insertion of $\mathbf{\xi}$ i is allowed, provided that, before it, Vriddhi take place in a final vowel capable of such a change, and y be interposed after final \acute{a} : thus, from chi may come the bases $ch\acute{a}yi$ and $ach\acute{a}yi$ $(ch\acute{a}yish\acute{y}a, ach\acute{a}yishye)$; from hu, $h\acute{a}vi$ and $ah\acute{a}vi$; from kri, $k\acute{a}ri$ and $ak\acute{a}ri$; from $d\acute{a}$, $d\acute{a}yi$ and $ad\acute{a}yi$. But $chesh\acute{y}a$, acheshye, $hosh\acute{y}a$, ahoshye, &c., the forms belonging to the Atmane of the primitive verb, are equally admissible in the passive.

^{*} A medial vowel, long by nature or position, remains unchanged (by 28. b), and in one or two cases a short; as, asami for asami. The above explanation of the 3d preterite rests on the authority of Panini, the Siddhanta Kaumudí, and the Bhatti Kávya (15. 64, 65).

Passive infinitive mood.

477. There is no passive infinitive mood in Sanskrit distinct in form from the active. But although the affix tum has generally an active, it is capable of a passive sense, when joined with certain verbs, especially with new factor, to be able.' It is also used passively, in connection with the participles árabdha, nirúpita, yukta, &c. See Syntax.

Passive verbs from roots of the 10th class.

478. In forming a passive verb from roots of the 10th class, although the conjugational স্বাম is rejected in the first four tenses, yet the other conjugational changes of the root are retained before the affix ya: thus, from সুং 10th c., 'to steal,' comes the base chorya (মার্মা). In the 2d pret. স্বাম is retained (see 473), and in the other non-conjugational tenses the base may deviate from the Atmane form of the primitive by the optional rejection or assumption of স্বাম, especially in the 3d preterite. See Causal Passives at 496.

CAUSAL VERBS.

- 179. Every root in every one of the ten classes may take a causal form, which is conjugated as a verb of the 10th class; and which is not only employed to give a causal sense to a primitive verb, but also an active sense to a neuter verb; see 289, 254: thus the primitive verb bodhati, 'he knows' (from the root budh, 1st c.), becomes in the causal बोधपति bodhayati, 'he causes to know,' 'he informs;' and the neuter verb kshubhyati, 'he is shaken' (from kshubh, 4th c.), becomes खोभपति 'he shakes.'
- a. This form may rarely imply 'allowing,' 'permitting:' thus, hárayati, 'he allows to take;' nášayati, 'he suffers to perish.'
- 480. As to the terminations of causal verbs, they are the same as those of the scheme at 247, p. 106; and the same substitutions are required in the first four tenses as in the 1st, 4th, 6th, and 10th classes.

Conjugational tenses.

481. Rule for the formation of the base in the four conjugational tenses of roots of the ten classes. If a root end in a vowel, viiddhi that vowel; if in a consonant, gunate the radical vowel before all the terminations, and affix अय aya* (changeable to $ay\acute{a}$ before initial m or v) to the root so viiddhied or gunated.

^{*} Derived from the root ₹ i, 'to go,' just as the passive ya is derived from ya. See 463.

- 482. Thus, from नी 1st c., 'to lead,' comes the base नायम by 37 (Pres. $n\acute{a}yay\acute{a} + mi =$ नायमामि, $n\acute{a}yaya + si =$ नायमामि &c.; Pot. $n\acute{a}yaya + iyam =$ नायमें &c.; Imp. $n\acute{a}yaya + \acute{a}ni =$ नायमानि &c.; 1st Pret. $an\acute{a}yaya + m =$ ऋनायमें &c. Atm. Pres. $n\acute{a}yaya + i =$ नायमे &c.). Similarly, from भू $bh\acute{u}$, 1st c., 'to be,' comes the base भारम $bh\acute{a}vaya$; and from कू 8th c., 'to do,' the base कारम $k\acute{a}raya$. But from नुष् 1st and 4th c., 'to know,' comes the guṇated नोषम bodhaya; and from मृष् 1st c., 'to creep,' the guṇated मर्षम sarpaya.
- 483. Roots ending in जा \acute{u} , or in \acute{v} e, \acute{v} \acute{v} ai, जो o, changeable to जा \acute{u} , cannot be vriddhied, but generally insert \acute{v} p between the root and the affix aya: thus, दा ist c., 'to give,' makes दापयािम dápayámi, &c.; धे ist c., 'to drink,' धापयािम dhápayámi, &c.; गे ist c., 'to sing,' गापयािम gápayámi, &c.
- a. All other roots in á insert p, excepting पा ist c., 'to drink,' which inserts य् y, making पायपामि &c.; and पा 2d c., 'to preserve,' which inserts रू l, making पालपामि &c.
- b. All other roots in ai insert p, but most other roots in e and o insert y: thus, दे ist c., 'to call,' makes द्वाययामि &c.; and शो 4th c., 'to sharpen,' makes शाय-यामि &c.
- 484. जा 9th c. 'to know,' श्रा 2d c. 'to cook,' सा 2d c. 'to bathe,' and \hat{R} 1st c. 'to languish,' may optionally shorten the á, the last two only when not joined with prepositions: thus, ज्ञापयामि &c., or ज्ञापयामि &c., or ग्लापयामि &c.
- 485. Some roots in i, i, ri, also insert p, after changing the final vowel to d: thus, नि ist c., 'to conquer,' makes नापयामि &c.; स्मि ist c., 'to smile,' makes स्माययामि &c., and स्मापये &c.; चि 5th c., 'to collect,' has four forms; 1. चाप-यामि &c., 2. चपयामि &c., 3. चाययामि &c., 4. चययामि &c.; भी 3d c., 'to fear,' has three forms; 1. भाययामि &c., 2. भापये &c., Atm. only, 3. भीपये &c.; इ 2d c., 'to go,' makes आपयामि &c., especially with the preposition अधि 'over,' अध्याप-यामि 'I cause to go over,' 'I teach.'
- a. Three roots insert n; ली 4th c., 'to embrace,' 'to adhere,' making (with prep. वि) -लीनयामि &c., as well as -लापयामि, -लाययामि, and -लालयामि &c.; भ्री 9th c., 'to please,' making प्रीणयामि; and पू 5th and 9th c., 'to shake,' धूनयामि.
- 486. ही 3d c. 'to be ashamed' and भा ist c. 'to go' insert p after gunation: thus, हेपयामि &c., अर्पयामि &c.
- 487. Roots ending in consonants, enclosing a medial $\overline{\bf w}$ a, generally, but not always, lengthen the a: thus, ${\bf u}$ $\overline{\bf v}$ ist c., 'to cook,' makes **पाचयामि** &c.
- a. Note, that few roots in m lengthen the a: thus, गम् ist c., 'to go,' makes गमयामि &c. Some, however, optionally do so.
- 488. Anomalies.— रह् ist c., 'to grow,' changes h to p, making रोपयामि &c.; दुम् 4th c., 'to be corrupt,' makes ह्रमयामि &c., 'I corrupt;' हन् 2d c., 'to kill,' यातयामि &c.; आह् ist and 6th c., 'to perish,' शातयामि &c.; स्मुर् 6th c., 'to quiver,' स्मार्यामि &c.; स्माय् ist c., 'to increase,' स्मावयामि &c.

Non-conjugational tenses.

489. The changes of the root required to form the base of the conjugational tenses are continued in the non-conjugational. Moreover, aya is retained in all these tenses, excepting in the 3d preterite and benedictive, Parasmai; but the last a of aya is dropped before the inserted \mathbf{z} \mathbf{i} , which is invariably assumed.

Second preterite of causals.

490. This tense is formed by adding जां úm to the base of the conjugational tenses, and affixing the 2d preterite of one of the three auxiliary verbs, ज्ञम् 'to be,' भू 'to be,' or कृ 'to do:' thus, पुष Ist c., 'to know,' makes बोधयामास or बोधयाम्बभूव * or बोधयाज्ञकार. See 385.

First and second future of causals.

491. In these tenses the inserted ₹ i is invariably assumed between the base, as formed in the conjugational tenses, and the usual terminations: thus, budh makes bodhayitásmi &c., bodhayishyámi &c.

Third preterite of causals (Greek pluperfect).

- 493. The rule for this reduplication is as follows:—The initial consonant of the root, with its vowel, is reduplicated, and the reduplicated consonant follows the rules given at 331; but the reduplication of the vowel is peculiar.

Rules for the reduplication of the vowel of the initial consonant.

a. Causal bases, after rejecting ay, will end either in \dot{ay} , \dot{av} , \dot{ar} , or a consonant preceded by a, \dot{av} , \dot{av} , or ar. The usual reduplicated vowel for all these vowels, except av, is av. But av is reduplicated for av, and sometimes also for \dot{av} . The rule is, that either the reduplicated syllable or the base syllable must be long either by

^{*} It may, however, be questioned whether \(\mathbf{Y} \) is often found added to causals.

nature or position; and in general the reduplicated vowel is made long, and, to compensate for this, the long vowel of the causal base shortened, or, if it be Guṇa, changed to its cognate short vowel: thus, the causal base náy (from ní, rejecting ay) makes the base of the 3d pret. aninay (अनीनयं aninayam &c.); the causal base bháv (from bhú) makes abibhav (अनीमयं &c.); the causal base kár (form kṛi), achikar; gam (from gam), ajigam; pách (from pach), apipach; pál (from pá), apipal; ved (from vid), avivid; vart (from vṛit), avivṛit. But bodh (from budh), abūbudh; and sáv (from su), asūshav. Sometimes the reduplicated vowel is only long by position before two consonats, the radical vowel being still made short; as, śráv (from śru) makes aśuśrav; dráv from (dru), adudrav; bhráj, abibhraj. Sometimes the reduplicated vowel remains short, whilst the vowel of the causal base, which must be long either by nature or position, remains unchanged: thus, the causal base jív (from jív) may make ajijív; chint, achichint; kalp, achikalp. In such cases a may be reduplicated for a or á; as, laksh makes alalaksh; yách, ayayách; vart (from vṛit), avavart, &c.

b. The following are anomalous: from páy (pá, 'to drink'), अपीपं &c.*; from stháp (sthá, 'to stand'), अतिष्ठिपं &c.; from ghrúp (ghrá, 'to smell'), अतिष्ठिपं &c., and अजिमपं &c.; from adhyáp (i, 'to go,' with adhi), अध्यजीगएं &c.

Reduplication of an initial vowel in causal third preterites.

- 494. Roots beginning with vowels, and ending with single consonants, form their causal third preterites by a peculiar reduplication of the root (after rejecting अव). The rule is that not only the initial vowel, as in the 2d pret. at 364. a, but the final consonant also be reduplicated. In fact, the whole root is doubled, as it would be if it began with a consonant, and ended with a vowel; but the consonant is reduplicated according to the rules at 331, and the reduplicated vowel is always i. This i, however, takes the place of the radical vowel, instead of beginning the reduplicated syllable; and the vowel of the root then becomes the initial of the reduplicated syllable, combining with the augment ভা a, according to 260. a: thus, সুধ্ 5th c., 'to prosper,' which ought to be reduplicated into इदृध् by 331. a, becomes, by transposition of the vowels, सृदिध; and with अ prefixed, आदिध by 260. a (आदिधं 'I caused to prosper,' &c.). Similarly, 勁震 1st c., 'to infer,' which ought to be इन्ह ijúh, becomes जिन्ह újih; and with अ prefixed, आैनिह (स्रीहिह 'I caused to infer'). So also, आप् 5th c., 'to obtain,' makes आपिपं 'I caused to obtain;' ईड़ 2d c., 'to praise,' makes ऐडिडं 'I caused to praise.' Compare the Greek 2d aorist ηγαγον from άγω, and ώρορον from όρω.
- a. If a root end in a compound consonant, the first member of the compound is rejected from the final, but not from the reduplicated letter: thus, आई ist c., 'to be worthy,' makes आर्मिट 'I caused to be worthy,' 'I honoured;' उन्ह 7th c., 'to moisten,' makes आस्टिंद 'I caused to moisten.'
- b. Note, that ख ksh is treated as a single consonant, and च् ch is reduplicated for it by 331. c. thus, ईस् 1st c., 'to see,' makes ऐ चिस्रं aichiksham, 'I caused to see.'

c. Roots consisting of a single vowel, form their causal 3d preterite from the causal base (after rejecting aya): thus, the root স্কু, 'to go,' makes its causal base arp, 'to deliver over;' and its causal 3d pret. স্থাবিদ '1 caused to deliver.'

d. कर्णु 2d c., ' to cover,' makes श्रीर्णुनुवं.

Benedictive and conditional of causals.

495. The base of the benedictive, Λ tmane, and of the conditional in both voices, does not differ from that of the non-conjugational tenses; but the last a of aya is dropped before the inserted ξ i, which is always assumed. In the Parasmai of the benedictive both ay and i are rejected, but any other change of the root is retained: thus, $\xi \psi$ 1st c., 'to know,' makes in benedictive bothyásam &c., bodhayishýa &c.; in conditional, abodhayishýam &c., abodhayishýe &c.

Passive form of causals.

496. In forming a passive verb from a causal base, the causal affix स्वय is rejected, but the other causal changes of the root are retained before the passive affix ya: thus, from the causal base पात्रय pátaya (from पत् 1st c., 'to fall') comes the passive pátya, making 3d sing. पात्रते 'he is made to fall.' Similarly, स्वा 1st c., 'to stand,' makes स्वापयित 'he causes to stand,' स्थापते 'he is made to stand,' and ज्ञा 9th c., 'to know,' makes ज्ञपयित 'he causes to know,' and ज्ञपते 'he is caused to know,' 'he is informed.'

a. In the non-conjugational tenses, the base of all the tenses, excepting the 2d preterite, may vary from the Atmane form by the optional rejection of the conjugation sa. But in the 2d preterite, the Atmane of the usual form with úm and the auxiliaries (490, 385) is admitted for the passive. In the 3d preterite, the usual reduplicated form (492) gives place to the Atmane form which belongs to those verbs of the first nine classes which assume i: thus, from भावय, the causal base of भ ' to be,' come the passive 2d pret. भाव-याचक्रे; 1st fut. भावियताहे or भाविताहे; 2d fut. भाविषणे or भाविषणे; 3d pret. सभाविषिष or सभाविषि, 3d sing. सभावि: bened. भाविष्येषीय or भाविषीय; cond. सभाविषये or सभाविष्ये. So also, from ज्ञमय, the causal base of ज्ञम् 'to cease,' come the passive 2d pret. ज्ञमयाचन्ने or ज्ञमयामासे; ist fut. शमयिताहे or श्रमिताहे; 2d fut. शमयिष्ये or शमिष्ये; 3d pret. अशम-यिपि or अज्ञामिपि, 3d sing. अज्ञामि; bened. ज्ञामियपीय &c.; and the radical a may in every case be optionally lengthened; thus, 1st fut. जमियताहे or जामियताहे &c.

Desiderative form of causals.

497. Causals may take a desiderative form (498): thus, from pátayámi, 'I cause to fall,' pipátayishámi, 'I desire to cause to fall;' from swápayámi, 'I cause to sleep,' sushwápayishámi, 'I desire to cause to sleep.'

DESIDERATIVE VERBS.

- 498. Every root in the ten classes may take a desiderative form.
- a. Although this form of the root rarely appears in its character of a verb, yet nouns and participles derived from the desiderative base are not uncommon (see 80. XXII, and 82. III). Moreover, there are certain roots which take a desiderative form, without yielding a volitive signification; and these, as being equivalent to primitive verbs (amongst which they are sometimes classed), may occur in the best writers. For example, jugups, 'to blame,' from the root गुष् gup; chikits, 'to cure,' from कित kit; titiksh, 'to bear,' from तिच tij; mimians, 'to reason,' from चिष्ण man; bibhats, 'to abhor,' from विष्ण bidh.
- 499. Note, that desideratives take the terminations of the scheme at 247, with the substitutions required in the 1st, 4th, 6th, and 10th classes; and their inflection, either in the Parasmai or Atmane, is determined by the practice of the primitive verb: thus, the root दुए budh, 1st c., 'to know,' taking both inflections in the primitive, may take both in the desiderative (bubodhishámi &c., or bubodhishe &c., 'I desire to know'); and लग् labh, 'to take,' taking only the Atmane in the primitive, may take only the Atmane in the desiderative (lipse &c., 'I desire to take').
- 500. Rule for the formation of the base in the four conjugational tenses. Reduplicate the initial consonant and vowel of the root, and if the primitive verb inserts ξi (see 388. a), affix $\xi \eta$ ish; if it rejects i, then simply η s, changeable to η sh, to the root so reduplicated: the vowel a is then added to form the base, as in the 1st, 4th, 6th, and 10th classes; and, according to the rule in those classes, this a is lengthened before m and v.
- a. Thus, from द्विष् kship, 6th c., 'to throw,' comes the base chikshipsa (chikshpsa + mi = चिद्यापानि chikshipsami &c., 'I desire to throw'); but from चिद् vid, 2d c., 'to know,' taking inserted i, comes vividisha (vividisha + mi = चिचिदिपामि vividishami &c.).
- b. The reduplication of the consonant is strictly in conformity with the rules laid down at 331, and that of the vowel of the initial consonant follows the

- c. And if the root begin with a vowel the reduplication still follows the analogy of the same tense: thus, from ভাষ্ comes ভাগিয়া; and with isha added, ভাগিয়ান.
 Similarly, from ভাই comes arjihisha; from জাই, újihisha; from ভাষ্, indidisha: see 494. The vowel i is reduplicated for a, as being lighter; see 331. e.
- 501. When a root takes the inserted i, and consequently forms its desiderative with isha, the radical vowel may in general be optionally gunated: thus, $\frac{4}{3}$? 1st c., 'to rejoice,' makes either mumodisha or mumudisha.
- 502. When ম sa is affixed to roots ending in vowels, it has the effect of lengthening a final হ i or হ u; of changing ম e, ऐ ai, মা o, to মা á; মু ri or মু ri to মু tr r, or after a labial to ক্ tr : thus, from হ 5th c. comes chichisha; from মু 5th c., śuśrúsha; from মু 8th c., chikirsha; from মৃ 1st c., jigása; from মৃ, titírsha; from মৃ, pupúrsha; from মৃ, bubhúrsha; from মৃ, mumúrsha.
- a. When it is affixed to roots ending in consonants, the radical vowel remains unchanged, but the final consonant combines with the initial sibilant, in accordance with the rules laid down at 296; as, from दुर् 4th c. comes yuyutsa (299); from दुर 1st c. comes didhaksha (306. a); from दुर 2d c., dudhuksha; from भुन 7th c., bubhuksha.
- 503. The following roots form their desiderative bases anomalously: from दा 3d c., 'to give,' comes ditsa (ditsámi, 'I wish to give'); from मा, 'to measure,' mitsa; from छाप् 5th c., 'to obtain,' comes úpsa; from धा, 'to place,' dhitsa: so also, from धे, 'to drink,' dhitsa; from जि, 'to conquer,' jigísha; from चि, 'to gather,' chikísha, as well as chichísha; from हन्, 'to kill,' जियांस; from ग्रह, जियुख; from प्रक्, 'to be able,' शिख; from लभ, 'to obtain,' लिख; from राप्, रित्स; from राभ, रिप्स; from पत, पित्स; from चुंध्, ईक्से, or regularly छिदिधिम; from दिव, दुद्यूप, or regularly दिदेविम; from हे, जुहूम; from दिरहा, दिदरिद्रिप; from छुंद, जियात, substituted from यम, 304. a.
- 504. When causals and verbs of the 10th class take a desiderative form, they retain ay, and are all formed with isha: thus, चुर् makes chuchorayishámi &c. The causal adhyápayati, 'he causes to go over,' 'he teaches,' makes अध्यापिपयिपित or अधिजिमापयिपति &c., 'he desires to teach.'

Non-conjugational tenses of desideratives.

505. The second preterite is formed by affixing ám to the desiderative base, as already formed, and adding the second preterite of either one of the auxiliaries kri or bhú (see 385.b): thus, from pach comes the 2d preterite pipakshánchakára, 'I wished to cook.' In all the remaining tenses it is an universal rule, that inserted i be assumed after the desiderative base, whether formed by sa or isha, except in the bened. Parasmai: thus, from pach comes 1st fut. 1st sing. pipakshitásmi &c.; 2d fut. pipakshishýami &c; 3d pret. apipakshishýam &c. (form II. at 427); bened. Parasmai pipakshyásam &c.; Atmane pipakshishýa &c.; cond. apipakshishyam &c. So also, taking viridish (formed with ish from vid), the 1st fut. is vividishitásmi; 2d fut. viridishishyami; 3d pret. avividishisham &c.

Causal form of desideratives.

506. Desiderative verbs may sometimes take a causal form: thus, div, 'to play,' makes Pres. dudyúshámi, 'I desire to play;' dudyúshayámi, 'I cause to desire to play.'

FREQUENTATIVE OR INTENSIVE VERBS.

- 507. Every one of the roots in the ten classes may take a frequentative form.
- a. This form is even less used than the desiderative. In the present participle, however, and in a few nouns, it may sometimes appear (see 80. XXII). It either expresses repetition or gives intensity to the radical idea, especially in the case of roots signifying 'to shine,' 'to be beautiful,' or 'to lament:' thus, from रीप्, 'to shine,' comes the frequentative base dedipya (Pres. 3d sing. dedipyate, 'it shines brightly'), and the present participle dedipyamána, 'shining brightly:' so also, from पुष्, 'to be beautiful,' comes śośubhya and śośubhyamána; from रूट्, 'to weep,' rorudya and rorudyamána.
- 508. There are two kinds of frequentative verb, the one a reduplicated A'tmane-pada verb, conforming, like neuter and passive verbs, to the conjugation of the 4th class, and usually, though not always, yielding a neuter signification; the other a reduplicated Parasmaipada verb, following the conjugation of the 3d class of verbs. This last is rarely used *.
- a. Observe—There is no frequentative form for roots of the 10th class, or for polysyllabic roots †, or for most roots beginning with

^{*} Intensive or frequentative forms are found in Greek, such as παιπάλλω, δαιδάλλω, μαιμάζω οr μαιμάω, παμφαίνω, ἀλαλάζω.

[†] कर्णुं 'to cover' excepted, which has for its first form कर्णीन्य, and for its second कर्णीन्.

vowels. Some roots beginning with vowels take the Λ tmane form of frequentative; see 511, 681.

b. The terminations for the first form of frequentative will be those of the Atmane at 247, with the usual substitutions required for the 4th class of verbs. For the second form they will be the regular Parasmai-pada terminations of the memorial scheme at 246.

ÁTMANE-PADA FREQUENTATIVES.

509. Rule for the formation of the base in the four conjugational tenses. Reduplicate the initial consonant and vowel of the passive base according to the rules for reduplicating consonants at 331, and gunate the reduplicated vowel (if capable of Guna), whether it be long or short: thus, from the passive base दीप (of dá, 'to give') comes the frequentative base dedíya (Pres. I. dedíya + i = दरीप, 2. dedíya + se = देरीपसे &c.); from दीप (passive of há, 'to quit') comes jehíya (jehíye &c.); from stírya comes testírya; from púya, popúya; from vidya, vevidya; from budhya, bobudhya (Pres. बोबुप्पे, बोबुप्पेसे, बोबुप्पेते, &c.). The conjugation of all four tenses will correspond exactly with that of the passive.

- 510. If the passive base contain a medial ष a, long á is substituted in the reduplication; as, pápachya from pachya; sásmarya from smarya: if a medial á, e, or o, the same are reduplicated; as, yáyáchya from yáchya; seshevya from sevya; lolochya from lochya: if a medial ष् ri, then ष्रारी arí* is substituted in the reduplication; as, दरीद्वय from drisya; परीम्पूज्य from sprisya, &c.
- 511. If a passive base contain tt ri, this becomes th ri in the frequentative base; as, चेक्रीय from ক্লিয় (passive of कू ' to do'). If the base begin with স্থ a, as in সভা atya (from সুই ' to wander'), the initial at is repeated, and the radical á lengthened: thus, স্পতাত্ত্বা atya (3d sing. স্পতাত্ত্বান).
- 512. If the passive base contain a nasal after short a, this nasal is often repeated; as, from gam, 'to go,' comes 司宗理 (司宗理 &c.), 'to walk crookedly;' from bhram, bambhramya.
- a. The passive bases जप्प, जस्प, दश्य, भन्य, and some others, may insert nasals, instead of lengthening the vowel in the reduplication: thus, जञ्जप्पे &c.
- b. Padya (from pad) inserts नी ní: thus, panípadya †; from charya is formed चर्च्य; from hanya, passive of han, 'to kill,' जेशीय; from ghráya, नेश्रीय; from dhmáya, देश्मीय (देश्मीय &c.).

^{*} This supports the idea that the original Guna of ri is ari. See 29. b.

[†] Similarly, the roots भंश, संस्, ध्वंस्, स्कन्द, यञ्च (बनीभश्य &c.).

Non-conjugational tenses of A'tmane-pada frequentatives.

513. In these tenses frequentatives follow the analogy of passives, and reject the affix ya. Since, however, the base of the second preterite is formed by affixing ám (as usual in all polysyllabic forms, see 385. b), and since, in all the other tenses, inserted i is assumed, a coalition of vowels might arise were it not allowed to retain y in all cases in which a vowel immediately precedes that letter*: thus, from dedípya is formed the 2d preterite (1st sing.) dedípánchakre &c., rejecting ya; but from dedíya, dedíyánchakre &c., retaining y. Similarly in the other tenses: 1st fut. dedípitáhe &c., dedíyitáhe &c.; 2d fut. dedípishye &c., dedíyishye &c.; 3d pret. adedípishi &c., adedíyishi &c.; bened. dedípishiya &c., dedíyishíya &c.; cond. adedípishye &c., adedíyishye &c. In the 3d sing. 3d preterite i is not allowed to take the place of the regular terminations, as in the passive form.

PARASMAI-PADA FREQUENTATIVES.

514. Rule for the formation of the base in the four conjugational tenses. The base is here also formed by a reduplication similar to that of Atmane-pada frequentatives; not, however, from the passive, but from the root: thus, from the root pach comes pápach; from vid, vevid; from vil, daridris; from vil, charíkri to Moreover, in accordance with the rules for the 2d and 3d conjugation (307, 330), the radical vowel is gunated before the P terminations of the scheme at 246. Hence come the two bases veved and vevid (Pres. vevedmi, vevetsi, vevetti; Du. vevidwas, &c.; Ist Pret. avevedam, avevet, avevet, avevidwa, &c.; Pot. vevidyám, &c.; Imp. vevedáni, veviddhi, vevettu, vevedáva, vevittam, &c.). Again, the base will vary in accordance with the rules of combination at 296 &c., as in budh (Pres. bobodhmi, bobhotsi, boboddhi, bobudhwas, &c.). And in further analogy to the 2d conjugation (313, 314) long i is often optionally inserted before the consonantal P terminations (Pres. vevedimi, vevediti; Du. vevidwas, &c.; ist Pret. avevedam, avevedis, avevedit, avevediti, vevediti; Du. vevidahi, veveditu).

515. Lastly, when the root ends in a vowel, the usual changes take place of i and i to y or iy; of u and i to uv; and of ri to r (see 312): as in the roots bhi, bhi, kri (Pres. 1st sing. bebhemi, bobhomi, charkarmi; 3d plur. bebhyati, bobhuvati, charkrati).

a. Observe—Roots in स्q, ri substitute a in the reduplicated syllable: thus, from क्, चाक्; from स्q, तास्q; from q, पाq, &c.

Non-conjugational tenses of Parasmai-pada frequentatives.

516. The second preterite follows the usual rule for polysyllabic bases (385. b),

^{*} In passives this coalition of vowels is avoided by the change of a final vowel to Vriddhi, as of chi to $ch\acute{a}y$, of hu to $h\acute{a}v$, and of kri to $k\acute{a}r$; and by the change of final \acute{a} to $\acute{a}y$, as of $d\acute{a}$ to $d\acute{a}y$; see 473.

[†] In the Parasmai form of frequentative, ari and ar as well as ari may be reduplicated for the vowel चा ri; so that दृश् may make दरीदृश् or दरिदृश् or दर्दृश्; and क, चरीक or चरिक or चक्कै.

and affixes úm with the auxiliaries: thus, from rid, 'to know,' comes 1st sing. vevidúmása; from bhi, bebhyúmása. In the other tenses, excepting the benedictive, inserted i is invariably assumed; and before this inserted i roots ending in vowels forbid the usual Guṇa change in the futures, but admit Vriddhi in the 3d preterite: thus, 1st fut. 1st sing. veveditásmi &c., bebhyitásmi &c., (367); 2d fut. vevedishyámi &c., bebhyishyámi &c.; 3d pret. avevedishyámi &c., abebhúyishyámi &c.; bened. vevidyásam &c., bebhýyásam; cond. avevedishyam, abebhúyishyam. This rejection of Guṇa, however, admits of question, especially in the case of roots in u or u.

Causal, desiderative, and desiderative causal form of frequentatives.

517. Frequentatives are said to be capable of these forms: thus, from the frequentative base totud, 'to strike often,' come totudayámi, 'I cause to strike often;' totudayishámi, 'I desire to cause to strike often,'

NOMINAL VERBS, OR VERBS DERIVED FROM NOUNS.

518. These are formed by adding certain affixes to the crude base of nouns. They are not in very common use, but, theoretically, there is no limit to their formation. They might be classed under three heads, according to their meaning; viz. 1st, transitive nominals, yielding the sense of performing, practising, making or using the thing or quality expressed by the noun; 2d, intransitive nominals, giving a sense of behaving like, becoming like, acting like the person or thing expressed by the noun; 3d, desiderative nominals, yielding the sense of wishing for the thing expressed by the noun. It will be more convenient, however, to arrange them according to the affixes by which they are formed, as follows:—

Observe—The terminations of nominals will be those of the scheme at 247; making use of the substitutions required by the 1st, 4th, 6th, and 1oth classes.

519. 1st, Those formed by affixing $\overline{\mathbf{w}}$ a (changeable to \acute{a} before m and v) to a nominal base, the final of the base being gunated (if capable of Guna). When the base ends in a, this vowel takes the place of the affix a. A final \acute{a} absorbs the affix.

a. Thus, from कृषा 'Krishna,' Pres. 1. कृष्णामि 'I act like Krishna,' 2. कृष्णसि, 3. कृष्णाति, &c. So from कवि 'a poet,' Pres. 1. कवयानि 'I act the poet,' 2. कवयसि, &c.; and from पितृ 'a father,' Pres. 1. पितरानि 'I act like a father,' 2. पितरित, 3. पितराति . Atm. Pres. 1. पितरे, &c.; from माला 'a garland,' Pres. 1. मालामि, 2. मालामि, 3. मालानि; 1st Pret. 1. समालां, 2. समालाम्, &c.; Pot. मालेगं, &c.; from स्व 'own,' Pres. 3. स्वित 'he acts like himself.' Sometimes a final i or u is not gunated; as, from सर्च 'a beak,' Pres. चञ्चामि, सञ्चित, 'he uses his beak,' &c.; from कवि 'a poet,' कव्यामि, कव्यामि, &c. Words ending in nasals

preserve the nasals, and lengthen the preceding vowels; as, राजानति 'he acts like a king,' प्योनित 'it serves as a road,' इत्मिति 'he acts like this.'

- 520. 2dly, Those formed by affixing \(\pi \) ya to a nominal base.
- a. If it is intended to express 'wish' or 'desire,' then a final Ξ a or Ξ u must be changed to Ξ i; a final Ξ i or Ξ u must be lengthened; a final Ξ i or Ξ i dropped, before Ξ i0 is affixed.
- b. Thus, from पुत्त 'a son,' Pres. 1. पुतीयानि 'I desire a son,' 2. पुतीयमि, &c.; from पित 'a husband,' Pres. 1. पतीयानि 'I desire a husband,' &c. So also, from मातृ comes मात्रीयामि, &c.; from राजन्, Pres. राजीयामि, &c.; Pot. राजीयेयं, &c. If a word end in a consonant, ya is generally affixed without change; as, from वाच 'a word,' वास्पति 'he wishes for words.'
- c. This form of nominal has not always a desiderative meaning. The following are examples of other meanings, some of which properly belong to the next form: प्रसादीयित 'he fancies himself in a palace;' कवीयित 'he acts like a poet;' कस्यूपित or -ते 'he scratches;' मन्त्यित or -ते 'he sins' or 'he is angry;' मित्तीयत 'he acts the part of a friend;' तपस्पित 'he performs penance' (from tapas, 'penance'); निरस्पित 'he vanishes;' गव्यित 'he seeks cows' (from गो 'a cow').
- d. If it is intended to express 'behaving like,' 'acting like,' a final ख a must be lengthened, a final खा a retained, and a final न् n, स्s, or त्t, may be dropped: thus, from परिद्वत 'a wise man,' Pres. 1. परिद्वताये 'I act the part of a wise man,' 2. परिद्वताये ते, &c.; from हुम 'a tree,' Pres. 1. हुमाये, &c.; from राजन् 'a king,' Pres. 1. राजाये, &c.; from उम्मनस् 'sorrowful,' Pres. उन्मनाये, &c.; from वृहत् 'great,' Pres. वृहाये, &c.
- e. This nominal is sometimes found with an active sense, especially when derived from nouns expressive of colour; as, from कृष्ण 'black,' कृष्णायते or -ति 'he blackens:' and sometimes in the Parasmai with a neuter sense; as, from जिल्ल 'crooked,' जिल्लायति 'it is crooked;' from दाम 'a slave,' दामार्यात 'he is a slave.' It corresponds to Greek desiderative denominatives in ιάω, as θανατιάω &c.
- 521. 3dly, Those formed by affixing ञ्चय aya to a nominal base. This form is similar to that of causals and verbs of the 10th class, with which it is sometimes confounded. Like them it has generally an active sense. A final vowel must be dropped before aya; and if the nominal base have more than one syllable, and end in a consonant, both the consonant and its preceding vowel must be dropped.
- a. Thus, from वस्त्र 'cloth,' Pres. 1. वस्त्रयामि 'I clothe,' 2. वस्त्रयामि, 3. वस्त्रयानि, &c.; from वर्मन् 'armour,' Pres. 1. वर्मयामि 'I put on armour,' &c.; from प्रमाख 'authority,' प्रमाख्यामि 'I propose as authority;' from सन् 'a garland,' सन्त्रयामि 'I crown,' &c.

- b. In further analogy to causals, a **प्** p is sometimes inserted between the base and aya, especially if the noun be monosyllabic, and end in a. Before this **प्** p, Vriddhi is required: thus, from स्व 'own,' Pres. स्वापयानि 'I make my own.' There are one or two examples of dissyllabic nouns: thus, from सत्य 'true,' सत्यापयानि, &c.*
- c. If the base be monosyllabic, and end in a consonant, Guna may take place; as, from हार्य 'hunger,' होभयामि.
- d. Whatever modifications adjectives undergo before the affixes iyas and ishtha at 194, the same take place before aya: thus, from दीर्घ 'long,' द्राघयामि, द्राघयासि, &c.; from अनिक 'near,' नेदयामि 'I make near,' &c.
- e. This form of nominal is rarely neuter, as चिरमति 'he delays' (from चिर 'long'). According to Prof. Bopp, Greek denominatives in αζω, αω, εω, οω, ιζω, correspond to this form; as, ἐνομ-άζω, γυναικ-ίζω, πολεμ-όω.
- 522. 4thly, Those formed by affixing स्व sya or अस्य asya to a nominal base, giving it the form of a future tense, generally with the sense of 'desiring,' 'longing for.'
- a. Thus, from होर 'milk,' Pres. 1. होरस्यामि 'I desire milk,' 2. होरस्यमि, &c.; from वृप 'a bull,' वृपस्यति '(the cow) desires the bull;' from दिषे 'curds,' दथ्य-स्यामि 'I desire curds,' &c. Compare Greek desideratives in σείω.
- 523. 5thly, Those formed by affixing काम्य kámya (derived from kam, 'to desire') to a nominal base; as, from पुत्त 'a son,' Pres. 1. पुत्रकाम्यामि 'I desire a son,' 2. पुत्रकाम्यामि, 3. पुत्रकाम्यामि, &c.

PARTICIPLES.

PRESENT PARTICIPLES; PARASMAI-PADA.—FORMATION OF THE BASE.

524. These are the only participles that have any affinity with the conjugational structure of the verb. The base in the Parasmai is formed by substituting त t for nti, and जत at for anti and ati, the terminations of the 3d plural present; so that the peculiarities of conjugation necessarily appear in the participle: thus, from पचिन pachanti, 'they cook' (3d pl. pres. of पच, 1st c.), comes पचत pachat, 'cooking;' from मिन ghnanti (3d pl. of han, 2d c.) comes ghnat; from मिन (3d pl. of as, 2d c., 'to be') comes sat; from मिन 'they go' (3d pl. of \(\frac{1}{3}\), 2d c.), मत 'going;' from मिन (3d pl. of मा, 2d c.), मात; from जुद्धित juhwati (3d pl. of hu, 3d c.), मुद्धत juhwat; from नृत्यनि nrityanti, 4th c., nrityat; from चिन्यनि chinwanti, 5th c., चिन्यत chinwat; from ápnuvanti, 5th c., ápnuvat; from rundhanti, 7th c., rundhat; from kurvanti, 8th c., kurvat; from punanti, 9th c., punat.

^{*} Similarly, अर्थ, 'substance,' makes अर्थापयामि, &c.

- 525. So again, from the causal बोधयिन, 'they cause to know' (479), comes bodhayat, 'causing to know;' from the desiderative बुवोधियन्त, 'they desire to know' (499), comes bubodhishat, 'desiring to know;' from ditsanti, 'they desire to give' (503), comes ditsat, 'desiring to give.'
- a. It has been remarked at 253. b, that the passive verb may sometimes assume a Parasmai-pada inflection; and that all the neuter verbs placed under the 4th conjugation may be considered as so many examples of this form of the passive. This theory is corroborated by the fact of the existence of a Parasmai-pada present participle derivable from a passive base: thus, from the passive base दूश्य drisya comes दूश्य 'being seen;' from चीय chiya (passive base of chi) comes चीयत 'being gathered.'
- b. The inflection of Parasmai-pada present participles is explained at 141. In the first five inflections a nasal is inserted, proving that the base of this participle properly ends in ant. In the cognate languages the n is preserved throughout.
- c. Thus, compare Sanskrit bharan, bharantam (from bhri), with φέρων, φέρωντα, ferentem; also, bharantau (Ved. bharantaí) with φέρωντε; bharantas with φέρωντες, ferentes; bharatas with φέρωντας; gen. sing. bharatas with φέρωντος, ferentis. So also, Sanskrit vahan, vahantam, with vehens, vehentem; and san, santam (from as, 'to be'), with the sens of ab-sens, præ-sens. Compare also the base strinwant with στορυμντ.

PRESENT PARTICIPLES; ÁTMANE-PADA,—FORMATION OF THE BASE.

- 526. The base is formed by substituting मान mána for nte, the termination of the 3d plur. pres. of verbs of the 1st, 4th, and 6th conjugations, and passives; and by substituting ज्ञान ána for ate, the termination of the 3d plur. pres. of verbs of the other conjugations; see 247, p. 106: thus, from पचले pachante (1st conj.) comes पचमान pachamána, 'cooking;' from तिष्ठले (sthá, 1st conj.), तिष्ठमान 'standing;' from नृत्यले (4th conj.), नृत्यमान; from लिम्पले (lip, 6th conj.), लिम्पलान.
- a. But from बुवते bruvate (बू 2d conj.), बुवास bruvána (see 58); from निम्नते (हन् with नि 2d conj.), निमान; from द्धते (dhá, 3d conj.), द्धान; from चिन्यते (5th conj.), चिन्यान; from युद्धते (7th conj.), युद्धान; from कुर्वते (8th conj.), कुर्वास; from पुनते (9th conj.), पुनान. The root आम् 2d c., 'to sit,' makes आमीन for आमान; and शी 2d c. is शेरते in 3d pl. (see 315), but शयान in the pres. participle.
 - b. Observe—The real affix for the Atmane-pada pres. participle is $\emph{m\'ano},$ of

which ána is probably an abbreviation. Compare the Greek $\mu\epsilon\nu$: भरमाण (58) $=\phi\epsilon\rho\delta\mu\epsilon\nu\sigma$ 5.

- 527. Verbs of the 10th conjugation and causals may substitute either mána or ána, but more frequently the latter: thus, from bodhayante comes bodhayamána and bodhayána; from darśayante, darśayána; from vedayante, vedayána. The affix ána is probably preferred on account of the greater fulness of form of verbs of the 10th class.
- 528. Passives and other derivative verbs always substitute mána: thus, from क्रियन्ते. 'they are made,' comes क्रियमाण, 'being made' (58); from दीयन्ते, 'they are given,' दीयमान, 'being given;' from the desiderative दित्तन्ते, 'they desire to give,' दित्तमान, 'desiring to give;' from जिथांमन्ते, 'they desire to kill,' जिथांमनान, 'desiring to kill.'
- 529. The inflection of Atmane-pada pres. participles follows that of the 1st class of nouns at 103: thus, N. masc. sing. पचमानस्; fem. पचमाना; neut. पचमानं.

PAST PARTICIPLES.

PAST PASSIVE PARTICIPLES.—FORMATION OF THE BASE.

530. These participles may be regarded as falling under four heads: 1st, as derived from roots; 2dly, as derived from causal bases; 3dly, as derived from desiderative bases; 4thly, as derived from nominal bases.

1. Derived from roots.

- 531. In general the base is formed by adding ৰ ta directly to the root; as, from ঝিষ্ kship, 'to throw,' ঝিম kshipta, 'thrown.'
- a. But if the root end in च् p', by adding π na; as, from \overline{q} kr', 'to scatter,' कीर्य kirna, 'scattered.' Some roots in \overline{s} a, \overline{s} b, and \overline{s} a, some in \overline{v} ai preceded by two consonants, with some of those in \overline{v} a, \overline{s} , one in \overline{v} a, and one in \overline{v} a, rejecting inserted a (see the lists at 394) from the participle, also take aa instead of a.

^{*} ज़ी, however, makes ज़ियत: and पृ may be पवित as well as पूत.

from यु, युन; from भू, भूत; from कृ, कृत; from मा, प्रास (58); from ली, लीन; from ही, होस; from लू, लून; from यु, मून.

533. But in certain cases the final vowel of the root is changed: thus, some roots in जा á change á to i before ta; as, from स्या sthá, स्थित sthita; from मा, मित; from दरिद्रा, दरिद्रित. था, 'to place,' becomes हित; दा, 'to give,' दन्न *; पा, 'to drink,' पीत. हा, 'to quit,' becomes ही before na (हीन). Some roots in á take both na and ta; as, from बा, भागा and भात; from बा, with the preposition निर, निर्वास and निर्वात.

534. Roots in च्यु ri change ri to ir before na, which passes into स na by 58; as, from त, 'to pass,' तीसी, 'passed.' But from पू, पूर्ख 'full,' 'filled.'

535. The root पे dhe, 'to suck,' becomes भी before ta (भीत); हे hwe, 'to call,' hú (हत); वे ve, 'to weave,' n (उत); वे ve, 'to cover,' वी ví (चीत).

536. Roots in रे ai generally change ai to á before na or ta; as, from मेले mlai, 'to fade,' म्लान mlána; from खे, 'to meditate,' स्थात; from दे, 'to purify,' दात; from ते, 'to rescue,' लाख or लात. But from गे, 'to sing,' गीत; from हो, 'to waste,' धाम.

537. Roots in जो o change o to i; as, from सो, सित; from शो, शित.

538. Those roots ending in consonants which take the inserted i in the last five tenses (388. a), generally take this vowel also in the past passive participle, but not invariably (see 542). Whenever i is assumed, ta is affixed, and not na; as, from $\operatorname{un}_{\overline{i}}$ patita, 'to fall,' $\operatorname{un}_{\overline{i}}$ and if $\operatorname{un}_{\overline{i}}$ u or $\operatorname{un}_{\overline{i}}$ precede the final consonant of the root, these vowels may take Guṇa; as, from $\operatorname{un}_{\overline{i}}$ dyut, $\operatorname{un}_{\overline{i}}$ dyotita; from $\operatorname{un}_{\overline{i}}$ u $\operatorname{un}_{\overline{i}}$, 'to take,' lengthens the inserted i ($\operatorname{un}_{\overline{i}}$) is taken').

539. Roots ending in consonants which reject the inserted i in the last five tenses (400), generally reject it in the past passive participle. They must be combined with ta, agreeably to the rules at 296, &c. Whatever form, therefore, the final consonant assumes before the termination $t\acute{a}$ of the 1st future (see the lists at 400), the same form will generally, though not invariably, be preserved before the ta of the past participle; so that, in many cases, this participle may be derived from the 3d sing. of the 1st future by shortening the final \acute{a} , and, if necessary, restoring the radical vowel to its original state: thus, taking some of the examples at 400; NTST

^{*} When prepositions are prefixed to datta, the initial da may be rejected: thus, átta for ádatta, 'taken;' pratta for pradatta, 'bestowed;' vyátta for vyádatta, 'expanded;' parítta for paridatta; sútta for sudatta, the i and u being lengthened.

saktá, 'he will be able,' gives ज्ञाक śakta, 'able;' सेका sektá, 'he will sprinkle,' सिक sikta, 'sprinkled;' मोका moktá, मुक mukta; प्रष्टा, पृष्ट; त्यका, त्यकः; योका, युक्तः; स्रष्टा, मृष्टः; मार्ष्टा, मृष्टः; सेद्धा, सिद्धः वोद्धा, बुद्धः योद्धा, युद्धः खेप्ता, खिप्तः; लोप्ता, लुप्तः; सप्ता, मृष्टः; सेद्धा, सिद्धः वोद्धा, लुद्धः; लोध्या, लुद्धः; वेष्टा, विष्टः; दृष्टा, दृष्टः; क्रोष्टा, कुष्टः; द्वेष्टा, दिष्टः; देष्टा, दृष्टः; क्राष्टा, त्रप्यः; सोदा, सोदः; नद्धः, नद्धः, नद्धः, नद्धः, नद्धः, नद्धः, स्रष्टा, स्रष्टः, स्रप्ता, स्रष्टः, स्रष्टा, स्रष्टः, स्रष्टा, स्रष्टः, स्रष्टा, स्रष्टः, स्रष्टः, स्रष्टा, स्रष्टः, स्रष्टः,

- 540. Most roots ending in ξ d, forbidding the inserted ξ i (404), take na instead of ta, and are combined with na, agreeably to 47; as, from $\mathbf{u}\xi$, $\mathbf{u}\pi$; from $\mathbf{h}\xi$, $\mathbf{h}\pi$; from $\mathbf{u}\xi$, with the preposition \mathbf{u} , \mathbf{u} , \mathbf{u} \mathbf{u} , \mathbf{u} ,
- 541. Those roots ending in ज् j, which take na, change j to g before na; as, from चिज् vij, चिग्न vigna; from रूज् ruj, रूग्न rugna. So from मज्ज, rejecting one j, मग्न; from लज्ज 'to be ashamed,' लग्न (as well as लज्जित). लग्, 'to adhere,' also makes लग्न; and ब्रिश्च, 'to cut,' makes चुक्स (see 58).
- 542. Some roots which admit i in the futures, reject it in this participle; as, भृष, 1st fut. धर्षिता, but pass. part. भृष्ट; so खर्द, खर्दिता, but खर्च (with खा á prefixed, खार्च 'pained'); दृह्, दिहेता, but दृढ; मद्, मिदता, but मत्त; निर्द्ध 'to eat,' निर्द्धाता, but नग्ध; दीप 'to shine,' दीपिता, but दीप्त; नश् 'to perish,' निश्चता, but नष्ट; मूर्च्च 'to faint,' मूर्च्छिता, but मूर्च as well as मूर्च्छित; क्लेच्छ 'to speak barbarously,' क्लेचिता, but क्लिक क्ष well as मित्ता, but नृत्त as well as निर्तत.
- 543. If in forming the passive base (471), or in the 2d preterite (375. c. d), the v or y contained in a root is changed to its semivowel u or i, the same change takes place in the past passive participle: thus, from বৰ্ vach, 'to say,' বন্ধ ukta; from বৰ্vach, 'are vach, 'to say,' বন্ধ vach, 'from বৰ্, কেট'; from বৰ্, মুম; from বৰ্, হুছ. Similarly, from বিবৃ, হুন or হুন; from বৰ্, মুঝ.
- 544. Some other changes which take place in forming the passive base (472) are preserved before ta: thus, from शास, शिष्ट; from स्थर, विद्व. And when the root ends in two conjunct consonants, of which the first is a nasal, this nasal is rejected; as, from वन्य, वद्ध; from भंश, भष्ट; from सन्न, सन्न; from सन्न, सन्न; from सन्न, भग्न: but not if ξ i is inserted; as, from खर्इ, खरिडत; from क्रन्द, क्रिन्टित (except सन्य, making सचित).
- 545. Roots ending in म् m or न् n reject these nasals before ta; as, from गम् gam, 'to go,' गत gata; from यम् yam, यत yata; from रम्, रत; from तन्, तत; from हन्, हत: but retain them if z is inserted; as, from सन्, स्वितः. From जन्, 'to be born,' is formed जात; from सन्, स्वतः, the a being lengthened.
 - 546. Those roots ending in 4 m, of the 4th conjugation, which lengthen a

medial a before the conjugational affix y, also lengthen it before ta, and change m to n as in the futures: thus, from क्रम्, क्रान्त; from अम्, आन्त; from श्रम्, शान्त; from दम्, दान्त; from ख्रम्, ख्रान्त; from क्रम्, क्रान्त. Similarly, from वम्, वान्त; from क्रम्, कान्त.

547. From स्माय, 'to swell,' is formed स्मीत or स्मात; from पूय, 'to be putrid,' पूत; from प्याय or पी, 'to be fat,' 'to increase,' पीन or प्यान; from ज्या, 'to grow old,' जीन; from मुध, 'to bind,' मूर्ण.

548. The following are quite anomalous: from पच् pach, 'to cook,' पक्ष pakwa; from भूप्, 'to dry,' भूष्क; from श्लीच, 'to be drunk,' श्लीच.

2. Derived from causal bases.

549. In forming the past passive participles from these, the causal affix अय aya is rejected, but the inserted इ i is always assumed: thus, from कार्य, causal of कू 'to make,' comes कारित kárita, 'caused to be made;' from स्थापय, causal of स्था 'to stand,' comes स्थापित sthápita, 'placed.'

3. Derived from desiderative bases.

550. In adding त ta to a desiderative base, the inserted इ i is invariably assumed; as, from पिपास, 'to desire to drink,' comes पिपासित; from चिकीपे, चिकीपित; from ईप्स, ईप्सित, &c.

4. Derived from nominal bases.

- 551. There are in Sanskrit certain participles, which are said to be formed by adding इत ita to nouns: thus, from शिपल, 'loose,' शिपिलत, 'loosened;' from निद्य, 'crooked,' निद्यित, 'curved.' These may be regarded as the passive participles of the transitive nominal verbs शिपिलपति, निद्यपति (521); and whenever this kind of participial adjective is found, it may indicate that a nominal verb is in use, whence the participle is derived.
- a. Moreover, as na sometimes takes the place of ta, so ina is added to some nouns instead of ita: thus, malina, 'soiled,' from mala; śringina, 'horned,' from śringa.
- b. Corresponding forms in Latin are barbatus, alatus, cordatus, turritus, &c.; and in Greek, ὀμφαλωτός, κροκωτός, αὐλωτός, &c. See Bopp's Comp. Gr.
- 552. The inflection of past passive participles follows that of the first class of nouns at 103; thus exhibiting a perfect similarity to the declension of Latin participles in tus: thus, जून krita, nom. sing. masc. fem. neut. जूतस, जूता, जूतं.

a. The perfect identity between Sanskrit passive participles in ta, Latin participles in tu-s, and Greek verbals in το-ς, will be evident from the following examples: Sanskrit jnátas = (g)notus (ignotus), γνωτός; dattas = datus, δοτός; śrutas = clutus, κλυτός; bhútas = ψυτός; yuktas = junctus, ζευκτός; labdhas = ληπτός; pitas = πότος; bhritas = fertus, φερτός; dishṭas = dictus, δεικτός. And, like Sanskrit, Latin often inserts an i, as in domitus (= Sanskrit damitas), monitus, &c. In Greek, ε is inserted in forms like μενετός, έρπετός. There are also examples of Latin and Greek formations in nu-s and νυ-ς, corresponding to the Sanskrit participle in na: thus, plenus (= púrua), magnus (from Sanskrit root mah), dignus (from Sanskrit diś, dik, Greek δεικ); and στυγνό-ς, στεγνό-ς, σεμνό-ς, &c. See Eastwick's Bopp's Comp. Gr. 1117.

PAST ACTIVE PARTICIPLES.

These are of two kinds: 1st, those derived from the past passive participle; 2dly, those derived from the second preterite. These latter rarely occur. The former are much used to supply the place of a perfect tense active.

PAST ACTIVE PARTICIPLES DERIVED FROM PAST PASSIVE PARTICIPLES.—FORMATION OF THE BASE.

553. The base of these participles is easily formed by adding यत् vat to that of the past passive participle: thus, from कृत 'made,' कृतवत् 'who made;' from दग्ध 'burnt,' दग्धवत् 'who burnt;' from उक्त 'said,' उक्तवत् 'who addressed;' from भिन्न 'broken,' भिन्नवत् 'who broke;' from स्थापित 'placed,' स्थापितवत् 'who placed,' &c.

a. These participles are declined at 140. a. b.

Participles of the second preterite.

554. In the case of participles derived from the 2d preterite, either $\overline{\mathbf{AR}}$ vas or $\overline{\mathbf{SAH}}$ iras is added to the base of that tense, as formed in the dual and plural. Vas, when the base in the dual and plural consists of more than one syllable; as, from rivid (365), vividwas; from chichi (367), chichivas; from nanrit (364, compare 45.a), nanritwas; from sasmar (367.c), sasmarvas. But ivas, when the base in the dual and plural consists of one syllable only; as, from ten (375.a), tenivas; from jagm (376), jagmivas; from jaksh (377), jakshivas. Roots which take ám in the 2d preterite (385.a.b.c.d) form the participles of this tense by adding the 2d preterite participles of kri, bhú, and as, to ám: thus, from chur, toth c., chorayámbabhúvas, chorayámchakrivas, chorayámásivas. Those roots which insert a y or v in the base of the 2d preterite (see 367.a.b), reject it in the participle: thus, śri, to have recourse, makes its participle siśrivas; and bhú, to be, makes babhúvas, not babhúvas, &c.

- a. There is an Atmane-pada participle of the 2d preterite formed by adding ána to the base of the dual and plural: thus, vividána, chichyána, jagmána. See 526. a; and compare the Greek perfect participle in μενο: ππυμμένος.
- b. The participles of the 2d preterite are inflected at 168. Those of the Atmanepada follow the inflection of the first class of nouns at 103.
- c. Observe—Sanskrit has no past participles derived from the 1st or 3d pretcrite, corresponding to the participles of the Greek agrists.

PAST INDECLINABLE PARTICIPLES.

- 555. These may be classed under two heads: 1st, as formed by affixing ना twá to uncompounded roots; as, from मू bhú, 'to be,' भूना bhútwá, 'having been:' 2dly, as formed by affixing प ya to roots compounded with prepositions or other adverbial prefixes; as, from अनुभू anubhú, 'to perceive,' अनुभूष anubhúya, 'having perceived;' from सज्जीभू sajjíbhú, 'to become ready,' सज्जीभूष sajjíbhúya, 'having become ready.' The sense involved in them is generally expressed by the English 'when,' 'after,' 'having,' or 'by:' thus, तत् कृत्वा tat kritwá, 'when he had done that,' 'after he had done that,' 'having done that,' 'by doing that.' See the chapter on Syntax.
- a. Prof. Bopp considers the affix $tw\acute{a}$ of this participle to be the instrumental case of an affix tu, of which the infinitive affix tum is the accusative. There can be little doubt that the indeclinable participle has about it much of the character of an instrumental case (see Syntax); but the form of its base varies considerably from that of the infinitive: thus, vaktum, $uktw\acute{a}$, from vach; vachtum, vachtu

Indeclinable participles formed from uncompounded roots.

556. When the root stands alone and uncompounded, the indeclinable participle is formed with \overline{a} 1 $tw\acute{a}$ *.

This affix is closely allied to the π ta of the past passive participle at 531, insomuch that the rules for the annexation of π ta to the root apply equally to the indeclinable affix त्वा twá. The formation, therefore, of one participle generally involves that of the other: thus, from द्वाम kshipta, 'thrown,' दिश्वम kshiptwá, 'having thrown;' from कृत, 'done,' कृत्वा, 'having done;' so from स्थित, स्थित्वा; from दृष्ट, दृष्ट्वा; from द्व, द्वा; from पीत, पीत्वा; from कान, क्रान्त्वा; from गृहीता, गृहीत्वा; from उपित, उपित्वा; from उक्त, उक्वा; from हित (root धा), हित्वा; from जग्ध, जग्ध्वा. And where i is inserted, there is often an optional change of the radical

^{*} There are one or two instances in which an uncompounded root takes य; as, জর্ম 'having reverenced.' Manu VII. 145. I. 4. Mahábh. 3. 8017.

vowel to Guṇa, as in the passive participle at 538: thus, द्युतित्वा dyutiturá or होतित्वा dyotiturá from हात; मृपित्वा or मर्पित्वा from मृप्.

- a. When there are two forms of the passive participle, there is often only one of the indeclinable: thus, नृत् makes नृत्र and निर्तित, but only निर्तिया; लज्ज् makes लग्न and लज्जित, but only लज्जित्या; and, vice versa, यम्, 'to dwell,' makes only उपित, but उपित्या and उष्ट्वा; and सह, 'to bear,' makes only सोढ, but महित्या and सोढ़ा.
- b. The penultimate nasal, which is rejected before ta (544), is often only optionally rejected before $tw\acute{a}$: thus, from \textbf{TS}_{i} , \textbf{TS}_{i} , but $\dot{\textbf{TS}}_{i}$ or \textbf{TS}_{i} .
- 557. The only important variation from the passive participle occurs in those roots, at 531. a, which take na for ta. In such roots no corresponding change takes place of twá to nwá: thus, from जृ, जीर्य, but जरित्वा (or जरीत्वा); from तृ, तीर्य, but तीर्त्वा; from छिह, छिन्न, but छिन्ना; from भन्न, भगन, but भन्ना or भन्ना; from रूज्, रूगन, but रुजा; from हा, हीन, but हित्वा, 'having quitted' (not distinguishable from हित्वा, 'having placed,' from था).
- 558. Observe, moreover, that verbs of the 10th class and causals, which reject the characteristic खर्म before the *ita* of the past passive participle, retain *ay* before *itwá*: thus, स्पापित made to stand' (from the causal base स्थापय), but स्थापित्वा having made to stand; 'चिन्तत thought' (from चिन्त् 10th c., to think'), but चिन्तियाना having thought.'

Indeclinable participles formed from compounded roots.

559. When a root is compounded with a preposition or any indeclinable prefix (excepting $\overline{\mathbf{w}}$ a, 'not'), the indeclinable participle cannot be formed with twa. The affix $\overline{\mathbf{v}}$ ya is then used, and the rules which regulate its annexation to the root are some of them analogous to those which prevail in other cases in which ya is affixed; see the rules for the formation of the fourth conjugation at 272, of passives at 461, and of the benedictive at 443.

560. But if a root end in a short vowel, instead of any lengthening of this vowel, त् t is interposed; as, from ज्ञाप्त्र áśri, 'to take refuge' (root प्रि), ज्ञाप्त्रिस áśritya, 'having taken refuge;' from निष्प्रि, निष्प्रिस, from उन्त्रु, उन्द्रुस; from संस्कृ, संस्कृत्य; from निःसृ, निःसृत. The lengthening of the radical vowel by coalition does not prevent this rule; as, from ज्ञती atí (ati with i), ज्ञतीस atítya.

561. If a root end in long आ ú, ई í, or ज ú, no change takes

^{*} There are one or two instances of compounded roots formed with twá: thus, অনুখানো (from भे), Rámáyana I. 2. 20. Especially in the case of causals; as, নিবর্মিনো. When স u, 'not,' is prefixed, twá is always used; as, সকুনো 'not having done,' without having done; সব্লা 'not having given.'

place; as, from विहा, विहाय; from उपक्री, उपक्रीय; from विधू, विध्यः but if in long ज्ञु ri, this vowel becomes ir; as, from ज्ञवकृ, अवकीयें 'having scattered.' ज्ञाप् (from \mathbf{y} 'to fill') makes ज्ञापूर्य (compare 534).

- 562. Final diphthongs pass into ज्ञा ú; as. from परिच्ये, परिच्याय (also परिचीय); from ज्ञभिध्ये, ज्ञभिध्याय; from ज्ञयसो, ज्ञवसाय.
 - a. But from सो with व्यव comes व्यवस्य; and from द्धे with आ, आहूय.
- 563. A penultimate nasal is generally rejected; as, from समासङ् samásaij, समा-सन्य samásajya; from प्रमन्य, प्रमन्य (used adverbially, 'violently').
 - a. But not always; as, from আয়ান্ধ, আয়ান্ধ্য; from আলিন্ধ, আলিন্ধ্য
- 564. If a root end in a consonant the general rule is, that no change takes place; as, from निश्चिष् nikship, निश्चिष nikshipya; from प्राप् (pra and áp), प्राप्य; from वीश् (vi and iksh), वीक्स.
- a. But some roots ending in am and an may optionally reject the nasal, and interpose t between the final short a and ya; as, from निर्मम् nirgam, निर्मस nirgatya or निर्मम् nirgamya; from निहन्, निहस. जन् and खन्, instead of interposing t, lengthen the final a; as, from उत्खाय.
- 565. The changes which take place in certain roots before the ya of the passive (471, 472) are preserved before ya; as, from निवय, जुण; from विवस, जुण; from विवस, जुण; from आप्रह, आपृद्धा; from आप्रह, आप्
- 566. In affixing **प** ya to the bases of causals and verbs of the 10th class the characteristic **स्प** is generally rejected; as, from प्रचोध्य prabodhya, प्रचोध्य prabodhya; from प्रमार्थ, प्रमार्थ; from सन्दर्शय, सन्दर्श्य.
- a. It is, however, retained in some few instances; as, चिगणस्य, 'having calculated,' from गण्; ञ्चाकलस्य, 'having imagined,' from कल्; सङ्गणस्य, 'having narrated,' from कण्.

Adverbial indeclinable participle.

567. There is another indeclinable participle yielding the same sense as those formed with twú and ya, but of rare occurrence. It is equivalent to the accusative case of a noun derived from a root, used adverbially; and is formed by adding अम् am to the root, before which affix changes of the radical vowel take place, similar to those required before the causal affix अय (481): thus, from नी ní, 'to lead,' नायं náyam, 'having led;' from पा, 'to drink,' पायं, 'having drunk;' from के, द्वायं; from पच, पाचं; from शिष्, क्षेपं; from हन्, 'to kill,' धातं. It often occupies the last place in a compound; as in the expression समृत्यवातं, 'having totally exterminated;' and in the following passage from Bhatti:

लतानुपातं कुमुमान्यगृह्णात् स नद्ययक्षन्दमुपाम्पृश्च । कुतृहलाचारुशिलोपयेशं काकुत्स्य ईपत्स्वयमान स्नासः॥

'The descendant of Kakutstha, smiling softly, repeatedly bending down the creepers, would pluck the blossoms; descending to the streams, would sip (the waters); seating himself on some variegated rock, would recline in admiration. (of the scene).' Compare also the passage at the end of Act V. of S'akuntalá; वाहत्थेपं क्रन्दितं प्रवृत्ता 'repeatedly throwing up her arms she began to weep.'

a. These participles generally imply repetition of the action, as in the passage above, and in this sense are themselves often repeated; as, dáyam, dáyam, having repeatedly given.'

FUTURE PASSIVE PARTICIPLES.

- 568. These are amongst the most common and useful of all participles, and may be classed under three heads: 1st, as formed with the affix तव tavya; 2dly, as formed with जनीय aniya; 3dly, as formed with प ya. These affixes yield a sense corresponding to the Latin future passive participle in dus, and the English able and ible, and most commonly denote 'obligation' or 'propriety' and 'fitness.'
- a. Although these participles agree in signification with the Latin participles in dus, yet Prof. Bopp considers that the affix tavya corresponds in form to the Latin tivus, and in sense as well as form to the Greek $\tau\epsilon o \varepsilon$. In some of the Latin formations with tivus, the passive sense is preserved, as in captivus, nativus, coctivus. Compare Sanskrit dátavya with dativus (dandus), $\delta o \tau \acute{e} o \varepsilon$; yoktavya with (con)junctivus (jungendus); janitavya with genitivus (gignendus); dhátavya with $\theta \epsilon \tau \acute{e} o \varepsilon$, &c.

Future passive participles formed with new tavya.

569. These are formed by substituting तथ tavya for ता tá, the termination of the 3d pers. sing. of the 1st future: thus, from क्षेत्रा ksheptá, 'he will throw,' क्षेत्रच ksheptavya, 'to be thrown;' कर्त्ता, 'he will do,' कर्त्तच, 'to be done;' from भिवता, 'he will be,' भिवतच्य, 'about to be.' And in the case of roots ending in consonants rejecting i, whatever changes take place before tá, the same take place before tavya (see 400): thus, त्यक्ता, त्यक्तच (relinquendus); प्रष्टा, प्रष्टच; द्रष्टच; वोडा, वोडच्च; द्रथा, द्रथच; सोढा, सोढच; and from the causal कारियता, कारियतच्य, &c.

Future passive participles formed with स्ननीय aniya.

570. This affix is added directly to the root, without any other change than the Guna of the radical vowel: thus, from च chi, 'to gather,' चयनीय chayaníya, 'to be gathered;' from भू, भवनीय; from कृ, करणीय (58); from लिख, लेखनीय; from ग्रुप, ग्रोधनीय; from स्पृत्, स्पर्श्रानीय; from कृप, कर्षणीय (58). A final diphthong is changed to आ á; as, from थै, ध्यानीय; from गै, गानीय.

Future passive participles formed with \(\mathbf{q} \) va.

- 571. Before this affix, as before all others beginning with y, certain changes of final vowels become necessary.
- a. If a root end in जा á, or in ए e, ऐ ai, जो o, changeable to जा á, this vowel becomes ए e (compare 446); as, from मा má, 'to measure,' मेय meya, 'to be measured,' 'measurable;' from हा há, हेय heya; from धै dhyai, धेय dhyeya; from गै, ग्रेय, &c.
- b. If in इ i, ई i, उ u, or ज ú, these vowels are guṇated; as, from चि chi, चेय cheya. But the Guṇa जो o is changed to av, and sometimes the Guṇa ए e to ay, before ya (as if before a vowel): thus, from भू, भव्य; from जि, 'to conquer,' जय्य jayya. The Guṇa जो o, however, oftener passes into áv before y; as, from यु, श्राव्य; from भू, भाव्य.
- c. If in च्हा ri or च्हा ri, these vowels are vriddhied; as, from कृ, कार्यो.
- 572. Sometimes if a root end in a short vowel no change takes place, but t is interposed, after the analogy of the indeclinable participle formed with ya at 560; so that the crude base of the future participle is often not distinguishable from the indeclinable: thus, from नि ji, 'to conquer,' नित्य jitya, 'conquerable;' from सु stu, 'to praise,' स्तुत्य stutya, 'laudable;' from क् kri, 'to do,' कृत्य kritya, 'practicable;' from इ 'to go,' इत्य 'to be gone;' from आदू 'to honour,' आदृत्य 'to be honoured.'
- 573. If a root end in a single consonant with a medial a, the latter may be vriddhied; as, from ग्रह grah, ग्रास gráhya: but not always; as, from शक्, शका; from सह, सद्य; from क्य, क्या badhya: and rarely if the final is a labial; as, from गम, गम्य; from लभ, लभ्य.
- a. If with a medial इ i or उ u, these are generally gunated; as, from भुज, भोज्य; from लिह, लेख.
- b. If with a medial = ri, no change takes place; as, from स्पृश्, स्पृश्य; from दृश्, दृश्य.
- 574. A final च ch may sometimes optionally be changed to क k, and ज j to ग् g; and other changes may take place, some of which are similar to those before the ya of passives; as, from पच् pach, पाका pákya and पाच्य páchya; from चच्, पाका and चाच्य; from भुज, भोग्य and भोज्य; from ग्रह, गृहा as well as ग्राहा gráhya; from चह्, उद्य (471); from पज्, इज्य; from श्रास, श्रिष्य (472); from खन, खेय.
- 575. Many of these participles are used as substantives: thus, वाक्य n. 'speech;' भोज्य n. 'food;' भोज्या f. 'a harlot;' इज्या f. 'sacrifice;' खेय n. 'a ditch;' भाज्या f. 'a wife,' from भू 'to support,' &c.
- 576. The affix ya may occasionally be added to nouns or nominal bases: thus, from মুমল 'a pestle,' মুম্মন্থ ' to be pounded with a pestle.'

577. The inflection of future passive participles follows that of the first class of nouns at 103: thus, করিম 'to be done;' N. sing. m. f. n. kartavyas, kartavyá, kartavyam. Similarly, karaníyas, karaníyas, karaníyam; and káryas, káryá, káryam.

PARTICIPLES OF THE SECOND FUTURE.—FORMATION OF THE BASE.

578. These are not common. They are of two kinds, either Parasmai-pada or A'tmane-pada; the former being formed by changing खन्ति anti, the termination of the 3d plur of the 2d future, into खन् at; the latter, by changing खन्ते ante into खनान amána: thus, from करिप्पन्ति karishyanti and करिप्पन्ते karishyante, 'they will do,' come करिप्पन्त karishyat and करिप्पना karishyamáya (58), 'about to do;' from the passive 2d fut. चन्न्यन्ते, 'they will be said,' comes चन्न्यनाग, 'about to be said.'

a. In the mode of their formation from the 3d person plural, by the affixes at and amána, and in their inflection, they resemble present participles at 524 and 526.

b. Observe—The future participle in mána may be compared with the Greek in μενο: dúsyamána = δωσόμενος.

PARTICIPIAL NOUNS OF AGENCY.

579. These have been already incidentally noticed at 80, 83, 85. As, however, they partake of the nature of participles, and are of great practical utility, some further mention of them is necessary. They may be classed under three heads: 1st, as formed from the root; 2dly, as formed from the 1st future; 3dly, as formed from the causal base.

580. The base of the first class (see 80. II) is formed from the root by affixing ज a, before which Guṇa, and rarely Vṛiddhi, of a final vowel is required; as, from नि ji, 'to conquer,' जय jaya, 'conquering.' Medial vowels are generally unchanged; as, from चर् vad, 'to say,' चर vada, 'saying;' from तुर् tud, 'to vex,' तुर tuda, 'vexing:' and final खा á, जम am, or जन an, are dropped; as, from दा dá, 'to give,' द da, 'giving;' from गम yam, 'to go,' ग ya, 'going;' from नन jan, 'to be born,' ज ja, 'being born.' Their declension follows the first class of nouns at 103.

581. The base of the second class (see 83) is formed from the 3d pers. sing. of the 1st future of primitive verbs, by substituting the vowel च ri for the final vowel á, the nominative case being therefore identical with the 3d pers. sing. of that tense (see 386): thus, from भोक्ता bhoktá, 'he will eat,' भोक्न bhoktri, 'an eater;' from योद्धा, 'he will fight,' योद्ध, 'a fighter;' from याचिना, याचिनृ; from मोढा, मोढ़, &c. They are inflected at 127.

- 582. The base of the third class is formed in three ways.
- a. By adding इन् in to the root (see 85. V), before which affix changes take place similar to those required before the causal affix aya (481, 482, 483); as, from कृ, कारिन् kárin, 'a doer;' from इन् (488), घातिन ghátin, 'a killer;' from ज्ञी, ज्ञापिन्, 'a sleeper:' y being inserted after roots in á (483); as, from पा, पापिन्, 'a drinker;' from दा, दापिन् dáyin, 'a giver.' They are inflected at 159.
- b. By adding सक aka to the root (see 80. IV), before which affix changes take place analogous to those before the causal aya (481, 482, 483); as, from कृ, कारक káraka, 'a doer,' 'doing;' from नी, नायक náyaka, 'a leader,' 'leading;' from ग्रह, ग्राहक gráhaka; from किए, साथक; from हन्, चातक; from हुए, हुएक; from क्रम, क्रमक; from नन्द, नन्दक; from स्था, स्थापक.
- c. By adding ञ्चन ana to some few roots ending in consonants (see 80. V), after changes similar to those required before the causal affix; as, from नन्द, नन्दन nandana, 'rejoicing;' from दुम्, हूमग्र, 'vitiating;' from ग्रुप्, शोधन, 'cleansing.'

Observe—The inflection of the last two follows that of the first class of nouns at 103.

EXAMPLES OF PRIMITIVE VERBS IN THE TEN CLASSES, AND OF DERIVATIVE VERBS INFLECTED AT FULL.

583. We begin by giving a synopsis of the inflection of the primitive forms of the ten roots: बुध budh, 'to know,' 1st c.; नृत् nrit, 'to dance,' 4th c.; दिश् dis, 'to point out,' 6th c.; युन् yuj, 'to unite,' 10th c.; fag vid, 'to know,' 2d c.; + bhri, 'to bear,' 3d c.; भिद्र bhid, 'to break,' 7th c.; चि chi, 'to gather,' 5th c.; तन् tan, 'to stretch,' 8th c.; पू pú, 'to purify,' 9th c.: grouping together, first, the 1st, 4th, 6th, and 10th classes; then the 2d, 3d, and 7th; and lastly, the 5th, 7th, and 9th, for the reasons stated at 257. In the next place, the passive forms of these ten roots will be synoptically exhibited, followed by the present tense of the causal desiderative and frequentative forms, and the participles. Examples will then be given of primitive verbs of all the ten classes (according to the grouping at 257), inflected at full; and under every verb the derivative forms and participles will be indicated. Lastly, a full example will be given of each of the four kinds of derivative verbs, passives, causals, desideratives, and frequentatives.

Observe-In the 2d sing., Parasmai, the roots of the 5th and 8th conj. are like those of the 1st group, and make chinu, tunu, rejecting the termination. The 2d and 7th take dhi for hi by 291, and make viddhi, bhinddhi. Bhyi makes bibhratu for bibhratu in 3d pl. In the Ktmane, bodha + ai = bodhai by 33, bodha+ithám=bodhethám by 32.

BOOT. PARASAM. 1. Budh bodhat 4. Nṛit nṛityat 6. Diś diśat 10. Yɨŋ yajayat 2. Yɨd cɨdat 3. Bhṛi bibkrat 7. Bhɨd bhɨndat 5. Chɨ chɨuwean 8. Ten tameat		1. Budh	4. Nṛit	6. Dis	10. Yuj	2. Vid	3. Bhṛi	7. Bhid	5. Chi	8. Ton	9. Pú

+ Chakrivos must be added to yojayán for the participle of the 2d pret. Parasmai, and chakrána for that of the 2d pret. Atmane.

584. Root अस् as, 'to be' (see 322). PARASMAI-PADA.

Note, that although this root belongs to the 2d class, its inflection is exhibited here, both because it is sometimes used as an auxiliary, and because it is desirable that the student should study its inflection at the same time with that of the other substantive verb $bh\dot{u}$, 'to be,' which will follow at 585, and which supplies many of the defective tenses of as. It may be remarked, that all the cognate languages have two roots similar to the Sanskrit for the substantive verb 'to be.' Compare $\phi\bar{v}$ and $\alpha\sigma$ ($\epsilon\sigma$) in Greek, es (sum) and fu (fui) in Latin; and observe how the different parts of the Sanskrit verbs correspond to the Greek and Latin: thus, asmi, asi, asti; $\dot{\epsilon}\mu\mu\dot{\mu}$, $\dot{\epsilon}\sigma\sigma\dot{t}$, $\dot{\epsilon}\sigma\tau\dot{t}$; sum, es, est. Compare also santi with sunt; ástam, ástám, with $\tilde{\gamma}\sigma\tau\sigma\nu$, $\tilde{\gamma}\sigma\tau\eta\nu$; ásma, ásta, with $\tilde{\gamma}\sigma\mu\epsilon\nu$, $\tilde{\gamma}\sigma\tau\epsilon$, &c. Two other roots in Sanskrit are sometimes employed as substantive verbs, with the sense 'to be,' viz. sthá, ist c., 'to stand' (see 269, 587), and ás, 2d c., 'to sit' (see 316). Indeed, the root as, here inflected, is probably only an abbreviation of ás.

श्रास ása	ञामत्म् ásatus	ञ्जामुस् ásus	आसे áse	ञ्जासाते ásáte	आसिरे ásire

Observe—The root as, 'to be,' has no derivative forms, and only two participles, viz. those of the present, Parasmai and Atmane, सत् sat, सान sána (see 524, 526). The conjugational tenses have an Atmane-pada, which is not used unless the root is compounded with prepositions. In this Pada ह h is substituted for the root in the 1st sing. pres., and सs is changed to d before dh in the 2d plur.: thus, Pres. he, se, ste; swahe, sáthe, sáte; smahe, ddhwe, sate: see 322.

^{*} The 2d preterite of as is never used by itself, but is employed in forming the 2d preterite of causals and some other verbs, see 385, 490; in which case the Atmane may be used. The other tenses of as are wanting, and are supplied from $bh\acute{u}$ at 585.

EXAMPLES OF PRIMITIVE VERBS OF THE FIRST CONJUGA-TION, EXPLAINED AT 261.

CHAPTER VII.

INDECLINABLE WORDS.

ADVERBS.

712. ADVERBS, like nouns and verbs, may be divided into simple and compound. The latter are treated of in the next Chapter on Compound Words.

Simple adverbs may be classed under four heads; 1st, as formed from the cases of nouns; 2dly, adverbs of less obvious derivation; 3dly, adverbial affixes; 4thly, adverbial prefixes.

Adverbs formed from the Cases of Nouns.

The following cases of nouns are used adverbially:

713. The nominative or accusative neuter of any adjective.

As, सर्यं 'truly;' बहु 'much;' शीग्नं, 'ध्यां, 'quickly;' युक्तं 'fitly;' समीपं 'near;' लघु 'lightly;' निभंदं, खत्यनां, गाढं, भृशं, 'exceedingly;' खवश्यं 'certainly;' नित्यं 'constantly;' चिरं 'for a long while;' बलवन् 'strongly;' भूयस् 'again,' 'repeatedly' (194); केवलं 'only,' 'merely.'

- a. The nom. or acc. neuter of certain pronouns; as, तत् 'therefore,' 'then;' यत् 'wherefore,' 'when;' तायत् 'so long,' 'so soon;' यायत् 'as long as,' 'as soon as;' किस् 'why?'
- b. The nom. or acc. neuter of certain substantives and obsolete words; as, रहस् 'secretly;' कार्म 'willingly;' स्वयं 'of one's own accord,' 'of one's self,' spon-

taneously;' नाम 'by name,' 'that is to say;' वारं वारं 'repeatedly;' चिरं 'long ago;' सुखं 'pleasantly;' साम्प्रतं 'now;' नकं 'by night' (noctu).

714. The instrumental case of nouns and pronouns.

As, धर्मोण 'virtuously;' दक्षिणेन 'southwards' or 'to the right;' उत्तरेण 'northwards;' व्यतिरेकेण 'without;' उत्तेम् 'above;' नीचैम् 'below;' श्रानेम् 'slowly;' तेन 'therefore;' येन 'wherefore.' The instr. case of certain obsolete nouns; as, चिरेण 'for a long time;' अचिरेण 'in a short time;' दिया 'by day;' दिष्या 'fortunately;' सहसा, अञ्चसा, 'quickly;' अधुना 'now.'

715. The ablative case of nouns and pronouns.

As, वलात् 'forcibly;' हपात् 'joyfully;' हूरात् 'at a distance;' तस्मात् 'therefore;' कस्मात् 'wherefore?' श्रकस्मात् 'without cause,' unexpectedly;' उत्तरात् 'from the north:' and of a few obsolete nouns; as, चिरात् 'for a long time;' पश्चात् 'afterwards;' ताश्चणात् 'at that instant.'

716. The locative case of a few nouns and obsolete words.

As, रात्नी 'at night;' हूरे 'far off;' प्रभाते 'in the morning;' प्राह्स्त 'in the forenoon;' स्थाने 'suitably;' अग्रे 'in front;' एकपदे 'at once;' सपदि 'instantly;' अन्तरे 'within.'

Adverbs of less obvious Derivation.

- 717. Of affirmation. -- नूनं, खलु, जिल, एव, 'indeed;' ऋपि 'even.'
- a. Of negation.— न, नो, निह, 'not.' मा, मास्म, are prohibitive; as, मा कुरू, मा कार्पीस, 'do not.' See 889.
 - b. Of interrogation. किम्, किन्नु, किन्नु, ननु, किमुह, 'whether?'
- c. Of comparison.— इव 'like;' एव, एवं, 'so;' किम्पुनर् 'how much rather;' तथैव (तथा + एव) 'in like manner.'
- d. Of quantity.— अतीव 'exceedingly;' ईपत् 'a little;' सकृत् 'once;' असकृत्, पुन: पुनर्, मुहुस्, 'repeatedly.'
- e. Of manner.— इति, रवं, 'so,' 'thus;' पुनर् 'again;' प्रायस् 'for the most part;' नाना 'variously;' पृथक् 'separately;' मिथ्या 'falsely;' वृथा, मुधा, 'in vain;' अलं 'enough;' फरिति, आशु (cf. ἀκύς), 'quickly;' तूणा 'silently;' निथस् 'reciprocally,' 'together.'
- f. Of time.— अद्य 'to-day,' 'now;' इदानों, सम्प्रति,'now;' तदानों, तर्हि, 'then;' पुरा 'formerly;' पुरस, पुरस्तात, प्राक्, 'before;' युगपत् 'at once;' सद्यस् 'instantly;' प्रेस 'after death;' परं 'afterwards;' जातु 'ever;' न जातु 'never;' अन्येद्युस्, परेद्युस्, 'another day,' 'next day.'
 - g. Of place.—इह 'here;' क्व 'where?' वहिस 'without.'
 - h. Of doubt. किंखित, अपिनाम, 'perhaps.'

Adverbial Affixes.

718. चित् chit, अपि api, and चन chana, may form indefinite adverbs of time and place, when affixed to interrogative adverbs.

As, from कदा 'when?' कदाचिन, कदाचिन, कदाचिन, 'sometimes;' from कुत and क्क 'where?' कुत्वचिन, कुतापि, क्कचिन, क्कापि, 'somewhere;' from कुतम् 'whence?' कुतिश्चत् and कुतश्चन 'from somewhere;' from कित 'how many?' कितिचिन् 'a few;' from किहैं 'when?' किहिचिन् 'at some time;' from कर्ष 'how?' कथमि, कथचन, 'somehow or other,' 'with some difficulty.' Compare 228, 230.

719. तम् tas (changeable to तः or तो by 63, 64) may be added to any noun, and to some pronouns, to form adverbs.

As, from यत्न, यत्नतम् 'with effort;' from आदि, आदितम् 'from the beginning;' from त (the proper base of the pronoun तद्), ततम् 'thence,' 'then,' 'thereupon,' 'therefore:' similarly, यतम् 'whence,' 'since,' 'because;' आतम्, इतम् 'hence,' 'hereupon.'

- a. This affix usually gives the sense of the prepositions with and from, and is often equivalent to the ablative case; as in मत्तम् 'from me;' न्वतम् 'from thee *;' पितृतम् 'from the father;' शत्तम् 'from an enemy.'
- b. But it is sometimes vaguely employed to express other relations; as, पृष्ठतस् 'behind the back;' अन्यतस् 'to another place,' elsewhere;' प्रयमतस् 'in the first place;' इतस्ततस् 'here and there,' 'hither and thither;' समन्ततस् 'on all sides;' पुरतस्, अग्रतस्, 'in front;' अभितस् 'near to;' विभवतस् 'in pomp or state.'
 - 720. त tra, forming adverbs of place.

As, ऋत 'here;' तत 'there;' कुत 'where?' यत 'where;' सर्वेत 'every where;' अन्यत 'in another place;' रकत 'in one place;' बहुत 'in many places;' अमुत 'there,' 'in the next world.'

721. या thá and यं tham, forming adverbs of manner.

As, तथा 'so,' 'in like manner;' यथा 'as;' सर्वेषा 'in every way,' 'by all means;' जन्यथा 'otherwise;' कर्ष 'how?' इत्थे 'thus.'

722. दा dá, forming adverbs of time from pronouns, &c.

As, तदा 'then;' यदा 'when;' कदा 'when?' एकदा 'once;' नित्यदा 'constantly;' सर्वेदा, सदा, 'always.'

723. ut dhá, forming adverbs of distribution from numerals.

As, एकथा 'in one way;' द्विथा 'in two ways;' घोथा 'in six ways;' शृतथा 'in a hundred ways;' सहस्रथा 'in a thousand ways;' बहुथा or खनेकथा 'in many ways.'

^{*} In fact, these are the forms generally used for the ablative case of the personal pronouns, the proper ablative cases मृत्, त्वत्, being rarely used, except as substitutes for the crude base, in compound words.

724. वत् vat may be added to any noun to form adverbs of comparison or similitude.

As, from सूर्य्ये, सूर्य्येवत् 'like the sun;' from पूर्व्वे, पूर्व्वेवत् 'as before.' It may be used in connexion with a word in the accusative case. See 918.

a. This affix sometimes expresses 'according to;' as, विधिवत् 'according to rule;' प्रयोजनवत् 'according to need.'

725. ज्ञास sas, forming adverbs of quantity.

As, बहुश्रम् 'abundantly;' অভ্যেষ্ 'in small quantities;' एकश्रम् 'singly;' श्रातमहस्रश्रम् 'by hundreds and thousands;' क्रमश्रम् 'by degrees.'

Adverbial Prefixes.

- 726. ज a, prefixed to nouns and even to participles with a privative or negative force, corresponding to the Greek a, the Latin in, and the English 'in,' 'im,' 'un;' as, from शक्य 'possible,' जशक्य 'impossible;' from स्पृश्चत 'touching' (pres. part.), ज्ञस्पृश्चत 'not touching;' from कृत्वा 'having done' (indeel. part.), ज्ञकृत्वा 'not having done.' When a word begins with a vowel, ज्ञन् is euphonically substituted; as, ज्ञन्त 'end;' ज्ञनन्त 'endless.'
 - a. ज्ञाति ati, 'excessively,' 'very;' as, ज्ञातिमहत् 'very great.'
- b. आ á, prefixed to imply 'diminution;' as, आपार्ड 'somewhat pale.' ईपत is prefixed with the same sense.
- c. का ká or कु ku, prefixed to words to imply 'disparagement;' as, कापुरुष 'a coward;' कुरूष 'deformed.'
- d. हुर् dur, prefixed to imply 'badly' or 'with difficulty;' as, दुम्बृत 'badly done' (see 72); दुभेद्य 'not easily broken.' It is opposed to स्, and corresponds to the Greek $\partial v\sigma$.
- e. নিম্ nir and বি vi are prefixed to nouns like স্থ a with a privative or negative sense; as, নিবল 'powerless;' নিমান 'without fruit' (see 72); বিহানে 'unarmed:' but not to participles.
- f. सु su, prefixed to imply 'well,' 'easily;' as, सुकृत 'well done;' सुभेद्य 'easily broken.' In this sense it is opposed to दुर, and corresponds to the Greek ev. It is also used for खित, to imply 'very,' 'excessively;' as, सुमहत 'very great.'

CONJUNCTIONS.

Copulative.

727. racha, 'and,' also,' corresponding to the Latin que and not to et. It can never, therefore, stand as the first word in a sentence, but follows the word of which it is the copulative.

- a. तथा 'so,' 'in like manner' (see 721), is not unfrequently used for च, as a kind of copulative conjunction; and like च is generally placed after the word which it connects with another.
- b. हि 'for,' like च, is always placed after its word, and never admitted to the first place in a sentence. यदि, चेत्, 'if;' ततम् 'upon that,' 'then' (see 719). जन्मच, किच, खपरच, परच, खपिच, 'again,' moreover,' used very commonly before quotations. चैय 'also.'
- c. ञाष 'then,' 'now,' is used as an inceptive particle at the commencement of sentences or narratives. It is opposed to इति, which marks the close of a story or chapter.

Disjunctive.

- 728. चा vá, 'or,' corresponds to the Latin ve, and is always placed after its word, being never admitted to the first place in a sentence.
 - a. त, किन्तु, 'but;' the former is placed after its word.
- b. यद्यपि 'although;' तथापि 'nevertheless,' 'yet,' sometimes used as a correlative to the last; अथवा, किम्बा, 'or else;' नवा 'or not;' यदिवा 'whether,' 'whether or no.'
- c. जपना may also be used to correct or qualify a previous thought, when it is equivalent to 'but,' 'yet,' 'however.'
 - d. सा, ह, तु, वै, are expletives, often used in poetry to fill up the verse.

PREPOSITIONS.

- 729. There are a great many prepositions in Sanskrit, but they are generally found as inseparable prefixes, qualifying the sense of roots, and the nouns and verbs derived from roots; see 783. Only three, out of the list of prepositions at 783, are commonly used in government with nouns; viz. স্বা ৫, মনি prati, and স্বনু anu; and of these the two last are rarely so used, except as postpositions.
- 730. ज्ञा á, generally signifying 'as far as,' 'up to,' 'until,' with an ablative case; as, ज्ञासमुद्रात् 'as far as the ocean;' ज्ञामनोस् 'up to Manu:' and rarely with an accusative; as, ज्ञातम् ज्ञाजातीस् 'for a hundred births.'
- a. क्षा á may sometimes express 'from;' as, क्षामूलात् 'from the beginning;' क्षाप्रयमदर्शनात् 'from the first sight.'
- b. मित prati, generally signifying 'at,' 'about,' 'with regard to,' 'to,' 'towards,' 'against,' with an accusative; as, गङ्गां मित 'at the Ganges;' थसीं मित 'with regard to justice;' श्रातुं मित 'against an

- enemy.' It sometimes has the force of apud; as, मां प्रति, 'apud me,' 'as far as regards me.'
 - c. जान anu, 'after,' with an accusative; as, तदन 'after that.'
- d. प्रति, and more rarely अनु, may be used distributively to signify 'each,' 'every.' They are then prefixed; thus, प्रतिवासरं or अनुवासरं 'every year,' 'year by year.'
- e. Observe—The preposition ञा is generally not separated from the word which it governs, and may be regarded as forming with it a kind of adverbial compound. Instances are not uncommon of other prepositions united in composition with the neuter form or accusative case of nouns; as, प्रतिस्तर्भ 'upon the shoulders;' प्रतिमुखं 'face to face;' अधिवृद्धं 'upon the tree;' अनुगक्तं 'along the Ganges.' See 760. b.

ADVERBS USED AS PREPOSITIONS IN GOVERNMENT WITH NOUNS.

- 731. There are certain adverbs used as prepositions in government with nouns, but generally placed after the nouns which they govern.
- a. These are, स्रुते 'besides,' with the accusative and sometimes ablative case. यावत 'up to,' 'as far as,' sometimes found with the accusative. सह, साई, 'with,' 'along with,' with the instrumental. विना 'without,' with the instrumental or accusative, or sometimes the ablative. चिह्म 'out;' प्रभृति, 'inde a,' 'from a particular time,' with the ablative, or placed after the crude base. अप, अप, होतोस, हेतो, कृते, निमित्ते, 'on account of,' 'for the sake of,' 'for,' with the genitive, or usually placed after the crude base*; उपिर, ऊई, 'above,' 'over,' 'upon' (cf. ὑπέρ, super), with the genitive: so अधस or अधसात 'below;' अनत्रं 'after,' 'afterwards;' समीपं, सकाशं, 'near;' सकाशात 'from;' अग्रे, पुरतस्, समझं, साझात, 'before the eyes,' 'in the presence of;' पश्चात् 'after:' all with the genitive. प्राक्, पूर्व, 'before,' with ablative or genitive; परं, अवीक्, ऊई, 'after,' with the ablative; अनत्रेस 'without,' 'except,' 'with regard to,' with the genitive or accusative; अन्तर् 'within,' with the genitive. All the above may be placed after the crude base. उपरि and अधस are sometimes doubled; thus, उपरुपरि, अधोऽधम्.
- b. Some of the adverbs enumerated at 714, 715, may be used in government with the cases of nouns; thus, दिश्योन, 'to the south' or 'to the right,' may govern a genitive case; च्यतिरकेश, 'without,' is placed after the crude base.

^{*} ऋषें is almost always found in composition with a crude base, and may even be compounded adjectively to agree with another noun; as, द्विजायें: सूपस् 'broth for the Bráhman;' द्विजायें प्रम 'milk for the Bráhman.' See 760.

INTERJECTIONS.

732. भोस्, भो, हे, are vocative; रे, खरे, less respectfully vocative, or sometimes expressive of 'contempt.' धिक expresses 'contempt,' 'abhorrence;' आस, अहो, अहह, 'surprise,' 'alarm;' हा, हाहा, अहो, अहोबत, 'grief;' साधु, सुष्टु, 'approbation;' खरित, 'salutation.'

CHAPTER VIII.

COMPOUND WORDS.

- 733. Compounds abound in Sanskrit to a degree wholly unequalled in any other language, and it becomes necessary to study the principles on which they are constructed, before the learner can hope to understand the simplest sentence in the most elementary book. In the foregoing chapters we have treated of simple nouns, simple verbs, and simple adverbs. We have now to treat of compound nouns, compound verbs, and compound adverbs.
- a. Observe, that in this chapter the nom, case, and not the base, of a substantive terminating a compound will be given; and in the instance of an adjective forming the last member of a compound, the nom. case masc., fem., and neut. The examples are chiefly taken from the Hitopadeśa, and sometimes the oblique cases in which they are there found have been retained. A dot placed underneath marks the division of the words in a compound.

SECTION I.

COMPOUND NOUNS.

- 734. The student has now arrived at that portion of the subject in which the use of the base of the noun becomes most strikingly apparent. This use has been already noticed at 77, p. 42; and its formation explained at pp. 44-53. In all compound nouns (with some few exceptions) the last word alone admits of declension, and the preceding word or words require to be placed in the crude form or base, to which a plural as well as singular signification may be attributed.
- a. It may here be noted, that while Sanskrit generally exhibits the first member or members of a compound in the crude base with the final letter unchanged, excepting by the laws of euphony, Latin frequently and Greek less frequently change the final vowel of the base into the light vowel i; and both

Greek and Latin often make use of a vowel of conjunction, which in Greek is generally o, but occasionally ι : thus, $c\alpha li$ -cola for $c\alpha la$ -cola or $c\alpha lo$ -cola; lani-ger for lana-ger; $\chi \alpha \lambda \kappa i$ - $\nu \alpha \nu \rho \rho i$ $\chi \nu \rho \nu \rho \rho i$ $\chi \nu \rho \nu \rho i$ $\chi \nu \rho i$ Both Greek and Latin, however, possess many compounds which are completely analogous to Sanskrit formations. In English we have occasional examples of the use of a vowel of conjunction, as in 'handicraft' for 'hand-craft.'

735. Native grammarians class compound nouns under six heads: the 1st they call TAT-PURUSHA*, or those composed of two nouns, the first of which (being in the crude base) would be, if uncompounded, in a case different from, or dependent on, the last; as, चन्द्राप्रभा ' moon-light' (for चन्द्रस्य प्रभा ' the light of the moon'); शस्त्रकृशलस, -ला, -लं, 'skilled in arms' (for शस्त्रेषु कुशलस्); मणि:भूपितस्, -ता, -तं, 'adorned with gems' (for मणिभिर् भूषितम्). The 2d, DWANDWA, or those formed by the aggregation into one compound of two or more nouns (the last word being, according to circumstances, either in the dual, plural, or neuter singular, and the preceding word or words being in the crude base), when, if uncompounded, they would all be in the same case, connected by a copulative conjunction; as, गुरु शिष्पी 'master and pupil' (for गुरु: शिष्पश्च); मरण व्याधि शोकाम 'death, sickness, and sorrow' (for मरणं व्याधि: शोकछ); पाणिपादं 'hand and foot' (for पारिष: पार्ष्य). The 3d, KARMA-DHÁRAYA, or those composed of an adjective or participle and substantive, the adjective or participle being placed first in its crude base, when, if uncompounded, it would be in grammatical concord with the substantive; as, साधु श्रीलस् 'a good disposition' (for साधु: शीलस्); सर्हे द्वाशि 'all things' (for महीशिए द्रव्याशि). The 4th, DWIGU, or those in which a numeral in its crude base is compounded with a noun, either so as to form a singular collective noun, or an adjective; as, दिन्मुणं 'three qualities' (for तयो गुणाम्); ति गुणम्, -णा, -णं, 'possessing the three qualities.' The 5th, BAHU-VRÍHI, or those formed of any number

^{*} These names either furnish examples of the several kinds of compounds, or give some sort of definition of them: thus, तापुरुष:, 'his servant,' is an example of the 1st kind (for तस्य पुरुष:); इन्द्रः is a definition of the 2d kind, meaning 'conjunction;' कस्मेपारप: is a definition of the 3d kind, i. e. 'containing the object' (कर्म); इन्द्राः is an example of the 4th kind, meaning 'any thing to the value of two cows;' बहुनीहिः is an example of the 5th kind, meaning 'possessed of much rice.' The 6th class, अन्ययोभावः avyayibhávah, means 'the indeclinable state.'

of words associated to form an epithet to a noun; as, चन्द्रप्रभम्, -भा, -भं, 'brilliant as the moon;' मरण्यापिशोकम्, -का, -कं, 'liable to death, sickness, and sorrow;' मापुशीलम्, -ला, -लं, 'well-disposed.' The 6th, AVYAYÍ-BHÁVA, or those resulting from the combination of a preposition or adverbial prefix with a noun; the latter, whatever may be its gender, always taking the form of an accusative neuter.

736. Such then, in brief, is the native division of compound words, a division leading to some confusion, from the incompleteness and want of sufficient comprehensiveness in the definitions, and the absence of sufficient distinctness and opposition between the several parts or members of the division. For it is plain, from the examples given, that the 5th class of compounds may often be regarded as another name for the first three, when they take the form of adjectives declinable in three genders; and that the second species of the 4th class is for this reason referrible to the 5th. The student, moreover, finds it difficult to understand why, if the definition of the 5th class of compounds be, that they are epithets of other nouns, such compounds as মানে কুমান and মালি মুণিন should not be comprehended under it. And further, he is often at a loss to refer a compound to its proper head *, from the inadequacy of the definitions to express all the cases included under each class.

In the following pages the subject is discussed according to a different method, although it has been thought desirable to keep the native arrangement in view.

737. Compound nouns may be regarded either as *simply* or *complexly* compounded. The latter have reference to a class of compounds within compounds, very prevalent in poetry, involving two or three species of simple compounds under one head.

SIMPLY COMPOUNDED NOUNS.

738. These will be divided into, 1st, Dependent compounds or compounds dependent in case (corresponding to *Tat-purusha*); 2d, Aggregative (*Dwandwa*); 3d, Descriptive † (*Karma-dháraya*); 4th, Collective (*Dwigu*); 5th, Indeclinable or Adverbial (*Avyayí-bháva*);

^{*} Ex. gr. such a compound as कृष्णशृक्षम्, -क्का, -क्का, 'any thing black and white.'

[†] As being composed of an adjective or participle preceding a substantive, and always descriptive of the substantive. Prof. Bopp calls them 'Determinativa,' a word of similar import.

6th, Relative (Bahu-vríhi). This last consists of, a. Relative form of absolute Dependent compounds, terminated by substantives; b. Relative form of Aggregative compounds; c. Relative form of Descriptive compounds; d. Relative form of Collective compounds; c. Relative form of Adverbial compounds.

DEPENDENT COMPOUNDS (TAT-PURUSHA).

Accusatively Dependent.

739. These comprehend all those compounds in which the relation of the first word (being in the crude base) to the last is equivalent to that of an accusative case. They are generally composed of a noun in the first member, and a participle or noun of agency in the last; as, खर्गमामस, -मा, -मं, 'one who has obtained heaven' (equivalent to खर्ग मामस); प्रियायहो 'one who speaks kind words;' बहुदस् 'one who gives much;' भस्तभृत 'one who bears arms;' पत्रगतस, -ता, -तं, 'committed to a leaf,' 'committed to paper' (as 'writing'); चित्रगतस, -ता, -तं, 'committed to painting.'

a. Observe—गत 'gone' (past pass. part. of गम् 'to go') is used loosely at the end of compounds of this description to express relationship and connexion, without any necessary implication of motion. In the above compound, and in many others (such as जिलाभिद्गातो मिश्रम् 'a jewel lying in the cleft of a rock;' हस्तालागतस्, नता, नतं, 'lying in the palm of the hand'), it has the sense of स्थ 'staying:' but it may often have other senses; as, गोष्टीगतस्, नता, नतं, 'engaged in conversation;' सस्तीगतं विश्वत् 'something relating to a friend.' In theatrical language सामागतं and स्वगतं (lit. 'gone to one's self') mean 'spoken to one's self.' 'aside.'

b. Before the nouns of agency the accusative case is often retained, especially in poetry; as, जरिन्तमस्, -मा, -मं, 'enemy-subduing;' हृदयङ्गमस्, -मा, -मं, 'heart-touching;' भयहरस्, -रा, -रं, 'fear-inspiring' (see 580).

Instrumentally Dependent,

740. Or those in which the relation of the first word (being in the crude base) to the last is equivalent to that of an instrumental case. These are very common, and are, for the most part, composed of a substantive in the first member, and a passive participle in the last; as, लोम्मोहितस्, -ता, -तं, 'beguiled by avarice' (for लोमेन मोहित); यस्त्रविधितस्, -ता, -तं, 'covered with clothes;' राजपूजितस्, -ता, -तं, 'honoured by kings;' विद्याहीनस्, -ता, -तं, 'deserted by (i. c. destitute of) learning;' वृद्धिरहितस्, -ता, -तं, 'destitute of intelligence;

दु:खार्त्रम्, -त्ता, -त्तं, 'pained with grief;' ज्ञात्माकृतम्, -ता, -तं, 'done by one's self;' ज्ञादित्यामृह्शम्, -शी, -शं, 'like the sun' (for ज्ञादित्येन सदृशम्, see 826); ज्ञस्मदृपानितस्, -ता, -तं, 'acquired by us.'

a. Sometimes, but rarely, this kind of compound contains a substantive or noun of agency in the last member; as, विद्यापनं 'money acquired by science;' शस्त्रोपनीची 'one who lives by arms.'

Datively Dependent,

741. Or those in which the relation of the first word to the last is equivalent to that of a dative; as, परिधान वस्तुं 'bark for clothing;' पापोदकं 'water for the feet;' यूप दारुस् 'wood for a stake;' शरखागतस्, -ता, -तं, 'come for protection' (for शरखाय सागत). This kind of compound is rare, and is generally supplied by the use of अधं (731. a); as, शरखापेम सागतस्.

Ablatively Dependent,

742. Or those in which the relation of the first word to the last is equivalent to that of an ablative; as, पितृप्राप्तम्, -मा, -मं, 'received from a father;' राज्याभष्टम्, -ष्टा, -ष्टं, 'fallen from the kingdom' (for राज्याद् भष्टम्); तरङ्गाचललतरम्, -रा, -रं, 'more changeable than a wave;' भवद्रयम् 'other than you' (for भवतोऽन्यम्); भवद्रयम् 'fear of you' (814. d); ज्ञास्त्रापराङ्मुखम्, -खी, -खं, 'turning the face from books,' 'averse to study.'

Genitively Dependent,

- 743. Or those in which the relation of the first word to the last is equivalent to that of a genitive. These are the most common of all dependent compounds, and may generally be expressed by a similar compound in English. They are for the most part composed of two substantives; as, ममुद्रतीरं 'sea-shore' (for समुद्रस्य तीरं 'shore of the sea').
- a. Other examples are, अश्रम् ष्टं 'horse-back;' धनुतृंशम् 'bow-string;' इष्टिकागृहं 'brick-house;' गिरिन्दी 'mountain-torrent;' नळ,तीर 'water's edge;' अधीगमस् or अधीपार्जना 'acquisition of wealth;' विषह्णा 'state of misfortune;' मुद्धहेदस् 'separation of friends;' यम्पूङ्कि 'on whose brow' (loc. c.); तङ्गचम् 'his words;' जन्मस्यानं or जन्मभूमिस् 'birth-place;' मूख्जितेस् 'with hundreds of fools' (instrum. c. plur.); श्रोक्द्रयं 'a couple of Slokas;' भूतळं 'the surface of the earth;' पृथियीपतिस् 'lord of the earth;' तज्जीयनाय 'for his support' (dat. c.); ब्राद्ध- एपुदाम् (the sons of a Bráhman;' असम्पुदास् 'our sons;' त्वाङ्म्मं 'thy deed;' पितृत्वचनं 'a father's speech;' मृत्युद्धारं 'the gate of death;' इन्छांसम्यत् 'fulfilment

of wishes;' मातानन्दम् 'a mother's joy;' नलाग्रायम् 'a receptacle of water,' 'a lake;' विद्याची 'seeker of knowledge,' 'a scholar.'

- b. Sometimes an adjective in the superlative degree, used substantively, occupies the last place in the compound; as, नर्श्रेष्ठम् or पुरषोन्नमम् 'the best of men.'
- c. In a few instances the genitive case is retained; as, विशाम्पतिस् 'lord of men;' दिवस्पतिस् 'lord of the sky.'

Locatively Dependent,

- 744. Or those in which the relation of the first word to the last is equivalent to that of a locative case; as, पङ्कामग्नम्, -ग्ना, -ग्नां, 'sunk in the mud' (for पङ्के मग्ना); गगण्चिहारी 'sporting in the sky;' जलाजीडा 'sport in the water;' ग्रामाचामी 'a dweller in a village;' जलाचरम् 'going in the water;' जलाजम् 'born in the water;' शिरोह्दां 'gem on the head.'
- a. It is not unusual to retain the locative case, especially before nouns of agency; as, ग्रामे वासी 'a villager;' जले चरस् 'going in the water;' उरसिभृपितम्, -ता, -तं, 'ornamented on the breast.'

Dependent in more than one Case.

- 745. Dependent compounds do not always consist of two words. They may be composed of almost any number of nouns, all depending upon each other, in the manner that one case depends upon another in a sentence; thus, च सुर्विषयाति- क्रान्तस्, -न्ता, -न्तं, 'passed beyond the range of the eye' (for च सुपो विषयम् अतिक्रान्तस्); रण्नथ्यस्यम् 'standing in the middle of the chariot;' भीत्परिता- ख्वन्त्यालम्भापरितान 'skilful in censuring the means of rescuing those in danger.'
- a. There is an anomalous form of Tat-purusha compound, which is really the result of the elision of the second or middle member (uttara-pada-lopa, madhyama-pada-lopa) of a complex compound; thus, স্থানিয়ান্যানুলানা 'token-Sakuntalá' for স্থানিয়ান্যান্দান্যানুলানা 'Sakuntalá (recognised) by the token.'
- b. Dependent compounds abound in all the cognate languages. The following are examples from Greek and Latin; οἶνο-θήκη, οἶκο-φύλαξ, λιθό-στρωτος, γυναικο-κήρυκτος, ἀνθρωπο-δίδακτος, θεό-δοτος, θεό-τρεπτος, χειρο-ποίητος, auri-fodina, manu-pretium, parri-cida for patri-cida, parri-cidium, matri-cidium, matri-cultor, mus-cerda. English furnishes innumerable examples of dependent compounds, ex. gr. 'ink-stand,' 'snow-drift,' 'moth-eaten,' 'priest-ridden,' 'doormat,' 'writing-master,' &c.

AGGREGATIVE COMPOUNDS (DWANDWA).

746. This class of compounds has no exact parallel in other languages.

When two or more persons or things are enumerated together, it

is usual in Sanskrit, instead of connecting them by a copulative, to aggregate them into one compound word. No syntactical dependence of one case upon another subsists between the members of Dwandwa compounds, since they must always consist of words which, if uncompounded, would be in the same case; and no other grammatical connexion exists than that which would ordinarily be expressed by the use of the copulative conjunction and in English, or win Sanskrit. In fact, the difference between this class and the last turns upon this dependence in case of the words compounded on each other; insomuch that the existence or absence of such dependence, as deducible from the context, is, in some cases, the only guide by which the student is enabled to refer the compound to the one head or to the other: thus, गुरुशियामेवकाम may either be a Dependent compound, and mean 'the servants of the pupils of the Guru,' or an Aggregative, 'the Guru, and the pupil, and the servant.' And मांसाजोिखतं may either be Dependent, 'the blood of the flesh,' or Aggregative, 'flesh and blood.' This ambiguity, however, can never occur in aggregatives inflected in the dual, and rarely occasions any practical difficulty.

747. There are three kinds of Aggregative compounds: 1st, inflected in the plural; 2d, inflected in the dual; 3d, inflected in the singular. In the first two cases the final letter of the base of the word terminating the compound determines the declension, and its gender the particular form of declension; in the third case it seems to be a law that this kind of compound cannot be formed unless the last word ends in $\overline{\mathbf{w}}$ a, or in a vowel changeable to $\overline{\mathbf{w}}$ a, or in a consonant to which $\overline{\mathbf{w}}$ a may be subjoined; and the gender is invariably neuter, whatever may be the gender of the final word.

Inflected in the Plural.

748. When more than two animate objects are enumerated, the last is inflected in the plural; as, इन्हानिल यमार्कास 'Indra, Anila, Yama, and Arka' (for इन्ह्रम्, अनिलम्, यमम्, अवैद्ध); राम् लक्ष्मण्भरतास्, 'Ráma, Lakshmana, and Bharata;' मृग्याप सर्पे ज्ञूकरास् 'the deer, the hunter, the serpent, and the hog.' The learner will observe, that although the last member of the compound is inflected in the plural, each of the members has here a singular acceptation. But a plural signification may often be inherent in some or all of the words

constituting the compound; thus, ब्राह्मण् ख्रित्वय्वेष्ठयाण्ड्राम् 'Bráhmans, Kshatriyas, Vaisyas, and Súdras;' मिल्लोदामीन अलवम् 'friends, neutrals, and foes' (for मिल्लाणि, उदामीनाम्, शलवम्य); च्यप्पिदेव पिल्लिपिभृतानि 'sages, gods, ancestors, guests, and spirits' (for च्यप्यम, देवाम्, पितरम्, ख्रित्ययम्, भूतानि च); मिल्ल्याम्भहोरमाम् 'lions, tigers, and serpents;' ख्राम्भाकद्वकाकोलभाग्योमायुवायमाम् 'dogs, vultures, herons, ravens, kites, jackals, and crows.'

749. So also when more than two inanimate objects are enumerated, the last may be inflected in the plural; as, धर्म्हार्थकामामोद्धास् 'virtue, wealth, enjoyment, and beatitude' (for धर्म्सम्, अर्थम्, कामम्, मोद्धाय); इन्द्राध्ययनहानानि 'sacrifice, study, and liberality' (for इन्द्रा, अध्ययनं, दानं च). In some of the following a plural signification is inherent; as, पुष्पमूल,फलानि 'flowers, roots, and fruits;' अनातमृतम्मेखां ' of the unborn, the dead, and the foolish' (for अनातानां, मृतानां, मृतानां, मृतावाम् 'eyes, mind, and disposition;' रोग्ओक्प-रिताप्यस्थन व्ययनानि 'sickness, sorrow, anguish, bonds, and afflictions;' काष्ट्रजल,मुलन्मुंनि ' wood, water, fruit, roots, and honey.'

750. So also when only two animate or inanimate objects are enumerated, in which a plural signification is inherent, the last is inflected in the plural; as, देव मनुष्णास् 'gods and men;' पुतापोदास् 'sons and grandsons;' पानोत्पानास् 'falls and rises;' प्राकार परिवास 'ramparts and trenches;' मुखादुः विषु 'in pleasures and pains' (for सुवेषु, दुः विषु च); पाय पुरुषानि 'sins and virtues.'

Inflected in the Dual.

- 751. When only two animate objects are enumerated, in each of which a singular signification is inherent, the last is inflected in the dual; as, रामलक्ष्मणों 'Ráma and Lakshmaṇa' (for रामम्, लक्ष्मणञ्च); चन्द्राम्र्यी 'the moon and sun;' मृगःकाको 'a deer and a crow;' भार्यापनी 'wife and husband.'
- 752. So also when only two inanimate objects are enumerated, in each of which a singular signification is inherent, the last is inflected in the dual; as, जारम्भाचनाने 'beginning and end' (for जारम्भम्, ज्ञव-मानं च); जनुरागापरागी 'affection and enmity' (for जनुरागम्, जपरागद्य); हपै:चिपादी 'joy and sorrow;' ह्युत्पासे 'hunger and thirst' (for ह्युत्पापाम च); सुद्धाधी 'hunger and sickness;' स्थानामनाभ्यां 'by standing and sitting' (for स्थानेन, जासनेन च); मधुमपिपी 'honey and ghee;' सुखदुःखे 'pleasure and pain;' उत्स्वलमुपले 'mortar and pestle;'

प्रसुत्थान्।भिवादाभ्यां 'by rising and saluting;' मृद्धारिभ्यां 'by earth and water,'

Inflected in the Singular Neuter.

- 753. When two or more inanimate objects are enumerated, whether singular or plural in their signification, the last may either be inflected as above (748, 749, 750, 751), or in the singular number, neut. gender; as, पुष्पमूल्फलं 'flowers, roots, and fruits' (for पुष्पाणि, मृलानि, फलानि च); यवसाबोदकेन्धनं 'grass, food, water, and fuel' (for यवसम्, अतं, उदकं, इन्धनं च); अहोरातं 'a day and night' (for अहम्, रातिष्ठ); दिग्देशं 'quarters and countries' (for दिशम्, देशान्छ); दुःनिशं 'day and night;' शिरोग्नीचं 'head and neck;' चम्मांसरूपिरं 'skin, flesh, and blood.'
- a. Sometimes two or more animate objects are thus compounded; as, पुत्र पोतं 'sons and grandsons;' हस्य ग्रं 'elephants and horses:' especially inferior objects; as, ग्राचारडालें 'a dog and an outcast.'
- 754. In enumerating two qualities the opposite of each other, it is common to form a Dwandwa compound of this kind, by doubling an adjective or participle, and interposing the negative ज a; as, चराचरं 'moveable and immoveable' (for चरम् अचरं च); शुभाशुमं 'good and evil;' ग्रियाग्रिये 'in agreeable and disagreeable' (for प्रिये अप्रिये च); दृष्टादृष्टं 'seen and not seen;' कृताकृतं 'done and not done;' मृदृक्तरं 'gentle and cruel.'
- a. In the Dwandwas which occur in the Vedas the first member of the compound, as well as the last, may sometimes take a dual termination; thus, मिताय-रुखों (see 97. a), इन्द्राविषण, पितरामातरों; and some of the anomalous Dwandwas used in more modern Sanskrit are probably Vaidik in their character; thus, द्यावापुरियों 'heaven and earth;' मातापितरों 'mother and father,' &c.
- b. Greek and Latin furnish examples of complex compounds involving Dwandwas; thus, βατραχο-μνο-μαχία, 'frog-mouse war;' su-ovi-taurilia, 'pig-sheep-bull sacrifice;' ζωό-φυτον, 'animal-plant.' Zoophyte is also a kind of Dwandwa. In English, compounds like 'plano-convex,' 'convexo-concave,' are examples of the relative form of Dwandwa explained at 765.

DESCRIPTIVE COMPOUNDS (KARMA-DHÁRAYA).

755. In describing, qualifying, or defining a substantive by means of an adjective or participle, it is common in Sanskrit to compound the two words together, placing the adjective or participle in the first member of the compound in its crude base; as, सागुः जनस् 'a good man' (for सागुर् जनस्); चिर्मितं 'an old friend' (for चिरं मितं); प्रियाभायी। क्षाविक 'a beautiful wife'

^{*} The feminine bases of adjectives rarely appear in compounds; so that प्रिया-भाय्यो and रूपवतीभाय्यो are not found; although there can be no question that

(for रूपवती भाषी); सुआंखेंदा: 'a troubled ocean;' पुरायकामी 'a holy act;' जननात्मा 'the infinite soul;' मंस्कृतोक्तिम् 'polished speech;' पुरायकामीणि 'holy acts' (for पुरायक्ति कामीणि); उन्नमानराणां 'of the best men' (for उन्नमानां नराणां); महापातं 'a great crime' (see 778); महाराजम् 'a great king' (see 778); प्रियमस्यम् 'a dear friend' (see 778); दीर्घरात्वं 'a long night' (see 778).

- a. An indeclinable word or prefix may sometimes take the place of an adjective in this kind of compound; thus, सु.पप: 'a good road;' सु.दिनं 'a fine day;' सु.भापितं 'good speech;' दुष्ट्रारितं 'bad conduct;' स्थापं 'not fear,' &c.; वहिःशोचं 'external cleanliness' (from vahis, 'externally,' and śaucha, 'purity'); सनाःशोचं 'internal purity.'
- 756. Numerals in their crude state are sometimes found occupying the place of adjectives in the first member of a compound of this class; as, चतुर्वेशास् 'the four castes;' पञ्चावास 'five arrows.'
- 757. Adjectives, used substantively, sometimes occupy the last place in Descriptive compounds; as, परम्थाम्मिकस् 'a very just man;' परमाह्नतं 'a very wonderful thing.'
- a. In the same manner, substantives, used adjectively, may occupy the first place; as, मल दुर्याणि 'impure substances.'
- 758. Compounds expressing 'excellence' are said to fall under this class, and are composed of two substantives, one of which is used as an adjective to describe or define the other, and is placed last, being generally the name of an animal denoting 'superiority;' as, पुरुपपुद्वाद: 'man-bull,' पुरुप्तिद: 'man-bull,' equivalent to 'an illustrious man.'
- a. The following are examples of Greek and Latin compounds falling under this class; μεγαλο-μήτηρ, ἰσό-πεδου, μεγαλό-νοια, ἡμι-κύων, sacri-portus, meri-dies (for medi-dies), decem-viri, semi-deus. Parallel compounds in English are, 'goodwill,' 'good-sense,' 'ill-nature,' &c.

COLLECTIVE COMPOUNDS (DWIGU).

- 759. A numeral is often compounded with a substantive to form a collective noun of the neuter gender; thus, चतुर्युगं 'the four ages' (for चलारि युगानि); चतुर्दिशं 'the four quarters;' तिदिनं 'three days' (triduum); तिरातं 'three nights' (रात being substituted for राति, see 778); त्र्यन्दं 'three years' (triennium); पचागिन 'the five fires.'
- a. Compare Greek and Latin compounds like τετραόδιον, τρινύκτιον, τέθριππον, triduum, triennium, trinoctium, quadrivium, quinquertium.

भिया and रूपवती are the proper bases of the feminine form of the adjectives. There are, however, a few examples of feminine adjective bases in compounds of this kind, as कामिनी जनस, where कामिनी is used substantively. See also 766. a, note.

b. Sometimes the final vowel of the substantive is changed to \S ; as, विलोकी

INDECLINABLE OR ADVERBIAL COMPOUNDS (AVYAYÍ-BHÁVA).

- 760. In this class of compounds the first member must be either a preposition (such as जन, प्रांत, &c.) or an adverbial prefix (such as यथा 'as,' ज or जन् 'not,' सह 'with'). The last member is a substantive which always takes the form of an accusative case neuter, whatever may be the termination of its crude base; thus, यथा अंद्रां 'according to faith,' 'proportioned to faith' (from यथा and अद्रा).
- a. The majority of these compounds are formed with the adverbial preposition सह, contracted into स; thus, सकोपं 'with anger' (from स and कोप); साहरं 'with respect' (from स and आहर); साहाङ्गपातं 'with prostration of eight parts of the body.'
- b. The following are examples of indeclinable compounds formed with other prefixes; अनुज्येष्ठ 'according to seniority;' प्रत्कृ 'over every limb' (compare 730. d); प्रतिनासं 'every month' (730. d); प्रयाचिधि 'according to rule;' प्रयाज्ञाक or पावळकं (49) 'according to one's ability;' प्रयाज्ञाक or पावळकं (49) 'according to one's ability;' प्रयाज्ञाक 'happily;' अनुष्यणं 'every moment;' समद्यं 'before the eyes' (see 778); प्रतिस्कर्णं 'upon the shoulders;' अपिवृद्धं 'upon the tree;' असंग्र्यं 'without doubt;' निर्विशेषं 'without distinction.'
- c. Analogous indeclinable compounds are found in Latin and Greek, such as admodum, obviam, affatim, ἀντιβίην, ἀντίβιον, ὑπέρμορον, παράχρημα. In these, however, the original gender is retained, whereas, according to the Sanskrit rule, obvium would be written for obviam, and affate for affatim. In Greek compounds like σήμερον, the feminine ἡμέρα appends a neuter form, as in Sanskrit.
- d. The neuter word জাই 'for the sake of,' 'on account of' (see 731. a), is often used at the end of compounds; thus, स्वप्नाचें 'for the sake of sleep;' कम्मानुष्ठानाचें 'for the sake of the performance of business.' See, however, 731, note.

RELATIVE COMPOUNDS (BAHU-VRÍHI).

761. The greater number of compounds in the preceding four divisions are terminated by substantives, the sense of each being in that case absolute and complete in itself. All such compounds may be used relatively, that is, as epithets of other words, the final substantive becoming susceptible of three genders, like an adjective (see 108, 119, 130, 134. a): and it cannot be too forcibly impressed upon the memory that the terms Relative and Bahu-vríhi have reference to the adjective use of those compounds only which have a substantive in the last member. This is not to be regarded,

therefore, as a distinct division of the subject of compound words, so much as a distinct view of the same subject; the object of which is to show that all compounds, which are in themselves absolute and complete in sense, and are terminated by substantives, may be used adjectively, and in the relation of an epithet to some other word in the sentence. We have given the name relative to compounds when thus used, not only for the obvious reason of their being relatively and not absolutely employed, but also because they usually involve a relative pronoun, and are sometimes translated into English by the aid of this pronoun, and are, moreover, resolved by native commentators into their equivalent uncompounded words by the aid of the genitive case of the relative (यस्य). Thus, महाधनं is a Descriptive compound, meaning 'great wealth,' and may be used adjectively in relation to पुरुषस, as महाधन: पुरुष: 'a man who has great wealth;' or to स्त्री, as महाथना स्त्री 'a woman who has great wealth;' and would be resolved by commentators into यस्य or यस्या महदु थनं. In English we have similar compounds, as 'high-minded,' 'left-handed,' and the like, where the substantive terminating the compound is converted into an adjective.

Relative form of Dependent Compounds.

762. Many Dependent compounds (especially those that are instrumentally dependent at 740) are already in their own nature relative, and cannot be used except in connexion with some other word in the sentence. But, on the other hand, many others, and especially those which are genitively dependent, constituting by far the largest number of this class of compounds, are in their nature absolute, and yield a sense complete in itself. These may be made relative by declining the final substantive after the manner of an adjective; thus, चन्द्राकृतिस, -ितस, -ित, 'moon-shaped' (see 119), from the absolute compound चन्द्राकृतिस 'the shape of the moon.'

a. Other examples are, देव रूपस्, -पी, -पं, 'whose form is godlike' (see 108); मूर्य्य प्रभावस्, -वा, -वं, 'splendid as the sun' (108); हिस्त पादस्, -दा, -दं *, 'elephant-footed' (see 57); सागरानस्, -ना, -नं, 'ending at the sea;' मरणानस्, -ना, -नं, 'terminated by death;' कर्णापुरोगनस्, -मा, -मं, or कर्ण मुखस्, -खा, -खं, 'headed by Karṇa;' विष्णुप्रामेनामा, -मा, -म, 'named Vishṇuśarma' (see 154);

^{*} पाद् may be substituted for पाद in compounds of this kind, but not after हिस्तन्. See 778.

पुखरीकाक्षम्, -ह्यां, -ह्यां, 'lotus-eyed' (see 778); नारायणां स्थम्, -ह्यां, -ह्यां, 'called Narayana;' धन्मूलस्, -ला, -लं, 'founded on wealth;' लह्या मंस्थानि (agreeing with धनानि), 'money to the amount of a lac;' गदा हस्तम्, -स्ता, -स्तं, 'having a club in the hand,' or 'club in hand;' शस्त्र पाणिम्, -िर्णम्, 'वर्णाः in hand;' नाल हस्तम्, -सा, -सं, 'net in hand; पुष्पाचिषयम्, -या, -यं, 'on the subject of flowers,' 'relating to flowers.' These examples are not distinguishable from absolute dependent compounds, except by declension in three genders.

- 763. Many of them, however, are not found, except as relatives; and if used absolutely would yield a different sense; thus, कर्णमुखं means 'the face of Karņa,' but when used relatively to राजानस, 'the kings headed by Karņa.' So also चारचहास signifies 'the eye of the spy,' but when used relatively to राजा, 'a king who sees by means of his spies,' the nom. case masc. being then चारचहास. See 166. a.
- 764. The substantive खादि, 'a beginning,' when it occurs in the last member of a compound of this nature, is always used relatively to some word expressed or understood, and yields a sense equivalent to et cetera. It is generally found either in the plural or neuter singular; as, इन्हाद्यम् 'Indra and the others' (agreeing with the nom. case मुराम् expressed or understood, 'the gods commencing with Indra'); अग्यादीनां 'of Agni and the others' (agreeing with पृष्ठोक्तानां understood, 'of those above-named things of which Agni was the first'); चयुरादीनि 'the eyes, &c.' (agreeing with इन्द्रियागि 'the senses commencing with the eyes'). When used in the neut. sing. it either agrees with पृष्ठोक्त, 'the aforesaid,' understood, or with a number of things taken collectively, and the adverb iti* may be prefixed; as, देवानियादि 'the word deván, &c.' (agreeing with पृष्ठोक्तं understood, 'the aforesaid sentence of which deván is the first word'); दानादिना 'by liberality, &c.' (agreeing with some class of things understood, 'by that class of things of which liberality is the first').
- a. It may occasionally be used in the masc. sing.; as, मार्जन्यादिस् 'brooms, &c.' (agreeing with उपस्करम् 'furniture').
- b. Sometimes आदिक is used for आदि; as, दानादिकं gifts, &c.:' and sometimes आध; as, इन्द्राद्या: मुराम् 'the gods of whom Indra is the first.'
- c. The feminine substantive प्रभृति 'manner,' 'kind,' may be used in the same way; thus, इन्द्र प्रभृतयः सुरास् 'the gods, Indra and the others;' तेपां ग्रामनिवा-सिप्रभृतीनां 'of those villagers, &c.'
- d. Observe—The neuter of आदि may optionally take the terminations of the masculine in all but the nom. and accus. cases; thus, इस्यग्रादेस् 'of elephants, horses, &c.' (agreeing with बलस्य gen. neut. of बल 'an army').

^{*} Sometimes evam is prefixed; as, रुवमादीनि प्रलापानि 'lamentations beginning thus.'

Relative form of Aggregative Compounds.

765. Aggregative compounds are sometimes used relatively; as, मरण व्यापिजोकस्, -का, -कं, 'that which is liable to sorrow, sickness, and death:' especially in the case of adjectives or participles; as, कृष्ण गुक्रस्, -का, -कं, 'black and white;' चातानुलिप्रस्, -पा, -पं, 'bathed and anointed;' पोर जानपदस्, -दा, -दं, 'city and country;' कृतापकृतस्, -ता, -तं, 'done and done badly;' गुभागुभस्, -भा, -भं, 'good and evil' (754); सान्द्र चित्रपस्, -ग्धा, -ग्धं, 'thick and unctuous;' गृहीत प्रतिमुक्तस्य 'of him taken and let loose.' Compare Greek compounds like λευκο-μέλας, 'white and black.' Examples are still more common under the head of Complex Compounds.

Relative form of Descriptive Compounds.

- 766. A greater number of compound words may be referred to this head than to any other. Every style of writing abounds with them; thus, जन्मज्ञाकिम, -िक्कम, -िक्कम, 'whose strength is small' (119).
- a. Other examples are, महावलस्, नला, नलं, 'whose strength is great' (108, see also 778); महातेजास्, -जास्, -जस्, 'whose glory is great' (164. a); अल्पधनस्, -ना, -नं, 'whose wealth is small;' महातमा, -त्मा, -तम, 'high-minded' (151); उदारचिरतम्, -ता, -तं, 'of noble demeanour;' वहुमत्यस्, -त्या, -त्यां, 'having many fish;' खल्पमलिलम्, -ला, -लं, 'having very little water;' पिउत्वृद्धिस्, -द्धिस्, -द्धि, 'of wise intellect' (119); प्रियभार्यस्, -त्यां, 'कं, 'having a dear wife *;' अश्वस्यसन्धानस्, -ता, -तं, 'not to be reconciled;' मंवृतसंवार्यस्, agreeing with राजा, 'a king who conceals what ought to be concealed.'
- 767. Although a passive participle is not often prefixed to a noun in an absolute sense, this kind of combination prevails most extensively in the formation of relative compounds; as, प्राप्त कालस्, -ला, -लं, 'whose time has arrived.'

^{*} Occasionally the feminine of the adjective appears in the compound; as, पष्ठीभायोस् 'having a sixth wife.' Compare 755, note.

by whom the Sastras have not been read; भिन्न, इदयस्, -या, -पं, 'whose heart is pierced.'

- b. Examples of Greek and Latin compounds of this kind are, μεγαλο-κέφαλος, μεγαλό-μητις, λευκό-πτερος, πολύ-χρυσος, χρυσεο-στέφανος, ήδύ-γλωσσος, έρημό-πολις, magn-animus, longi-manus, multi-comus, albi-comus, multi-vius, atricolor.
- c. In English compounds of this kind abound; ex. gr. 'blue-eyed,' 'narrow-minded,' 'good-tempered,' 'pale-faced,' &c.

Relative form of Collective Compounds.

- 768. Collective or Dwigu compounds may be used relatively; as, द्विपर्णेस, -र्णी, -र्णे, 'two-leaved;' ति लोचनस, -नी, -नं, 'tri-ocular.'
- a. Other examples are, ति मुर्डेस्, -डी, -डी, 'three-headed' (मूर्डे being substituted for मूर्डेन्, see 778); चतु मुखस्, -खी, -खं, 'four-faced;' चतु फ्लोणस्, -णा, -णं, 'quadrangular;' शत्डारस्, -रा, -रं, 'hundred-gated;' चतु विद्यस्, -द्या, -छं, 'possessed of the four sciences;' सहसाद्यस्, -खी, -खं, 'thousand-eyed' (see 778); पद्माय्यस्, -ता, -तं, 'having the wealth of five bullocks.'

Relative form of Adverbial or Avyayí-bháva Compounds.

769. The adverbial compounds most frequently employed relatively as adjectives are those formed with the adverbial preposition सह 'with,' contracted into स; thus, मक्रोधस, -धा, -धं, 'angry' (lit. 'with-anger,' having anger'); सामलस, -ला, -लं, 'fruitful' (108); सावन्धुस, -च्युस, -न्धु, 'possessed of kindred' (119); सायत्रस, -ता, -लं, 'energetic;' सजीवस, -वा, -वं, 'possessed of life,' 'living;' सानन्दस, -त्ता, -तं, 'joyful;' सामचिवस, -वा, -वं, 'accompanied by ministers;' सामार्थस 'accompanied by a wife,' 'having a wife;' साज्यस, -ज्या, -ज्यं, 'strung' (as a bow, lit. 'with-bowstring').

- a. Sometimes the affix क ka is pleonastically added; as, संप्रीकस, -का, -कं, 'possessed of fortune;' संस्त्रीकस, -का, -कं, 'accompanied by women.' Compare 80. XVII.
- b. The following are examples of other nouns combined with adverbial prefixes, so as to form relative compounds: उद्गुपुथस्, -था, -थं, 'with uplifted weapon;' नाना प्रकारस्, -रा, -रं, 'of various shapes;' सामि भुक्रस्, -क्का, -क्का, -क्का, 'half-eaten;' क्किनिवासस्, -सा, -सं, 'where dwelling?' क्किनिवासस्, -सा, -न्, 'where born?' निरपराथस्, -था, -थं, 'without fault;' निराहारस्, -रा, -रं, 'having no food;' अप्भीस्, -भीस्, -िन, 'fearless' (123. b); अज्ञातस्, -ता, -तं, 'unknown;' तथावि-धस्, -था, -थं, 'of that kind,' 'in such a state;' दुर्चुहिस्, -हिस्, -हि, 'weak-minded;' दुष्पकृतिस्, -ितस्, -ित, 'ill-natured' (see 72); सुमुखस्, -खी, -खं, 'handsome-faced;' सुनुहिस्, -हिस्, -हि, 'of good understanding.' Some of the

above may be regarded as the relative form of Descriptive compounds, formed with indeclinable prefixes; see 755. a. Similar compounds in Greek and Latin are, ἄ-γνωτος, ἀν-ήμερος, εὖ-δηλος, in-imicus, in-felix, dis-similis, semi-plenus.

- c. Observe—The adverbial prefixes दुर् and सु (726. d. f) impart a passive sense to participial nouns of agency, just as δυσ and εῦ in Greek; thus, दुष्कर 'difficult to be done,' सुकर 'easy to be done;' दुल्लम 'difficult to be obtained,' सुलम 'easy to be attained;' दुस्तर 'difficult to be crossed.' Compare the Greek εὖφορος, 'easy to be borne;' δύσπορος, 'difficult to be passed,' &c.
- d. स्नायस, न्या, न्यं, 'possessed of a master,' is sometimes used at the end of compounds to denote simply 'possessed of,' 'furnished with;' thus, वितान सनायं शिलातलं 'a stone-seat furnished with a canopy;' शिलापट्ट सनायो मग्रयः 'an arbour having a marble-slab as its master,' i. e. 'furnished with,' 'provided with,' &c. Similarly, बहु वक्सनायो वट्पाद्यः 'a fig-tree occupied by a number of cranes.'
- e. Observe—The relative form of a compound would be marked in the Veda by the accent; thus in mahá-báhus, 'great arm,' the accent would be on the last syllable; but in mahá-báhus, 'great armed,' on the ante-penultimate.
- f. Note, that with a and wu are used at the end of relative compounds to denote 'composed of,' 'consisting of;' but are more frequently found at the end of complex relatives; see 774.

COMPLEX COMPOUND NOUNS.

770. We have now to speak of those complex compound words, or compounds within compounds, which form the most remarkable feature in Sanskrit composition. Instances might be given of twenty or thirty words thus compounded together; but these are the productions of the vitiated taste of more modern times, and are only curious as showing that the power of compounding words may often be extravagantly abused. But even in the best specimens of Sanskrit composition, and in the simplest prose writings, four, five, or even six words are commonly compounded together, involving two or three forms under one head. It will be easy, however, to determine the character of the forms involved, by the rules propounded in the preceding pages; in proof of which the student has only to study attentively the following examples.

Instances of absolute complex compounds, whose sense is complete and unconnected, are not rare.

a. The following are examples: कालानरावृत्ति गुभागुभानि 'good and evil (occurring) in the revolutions of the interval of time,' the whole being a dependent, involving a dependent and an aggregative; सेनापित वलाध्यक्षी 'the general

of the army and the overseer of the forces,' the whole being an aggregative, involving two dependents; शोकारातिभवतार्थ 'the protection from sorrow, enemies, and perils,' the whole being a dependent, involving an aggregative; अवधीरित मुद्धद्वाकं 'the disregarded words of a friend,' the whole being a descriptive, involving a dependent; शुक्राद्धर्मास्यदान 'a white robe and a string of garlands,' the whole being an aggregative, involving a descriptive and dependent; सर्वशास्त्र पार्गम 'one who has gone to the opposite bank (pára) of all the S'astras,' i. e. 'one who has read them through;' मृत्तिसहास्यीनि 'the bones of a dead lion.'

- 771. The greater number of complex compounds are used as adjectives, or relatively, as epithets of some other word in the sentence; thus, मिलतास्वानयनस्, -नी, -नं, 'whose teeth and eyes were decayed,' the whole being the relative form of descriptive, involving an aggregative; खुन्ह्याम कराटम् 'having a throat emaciated with hunger,' the whole being the relative form of descriptive, involving a dependent.
- a. Other examples are, गुक्कमान्यानुलेपनम्, -ना, -नं, 'having a white garland and unguents,' the whole being the relative form of aggregative, involving a descriptive; पृद्धिनम्मकृतम्, -ता, -तं, 'done in a former birth,' the whole being a dependent, involving a descriptive; विद्यान्योगृहम्, -द्धा, -द्धं, 'advanced in learning and age,' the whole being a dependent, involving an aggregative; द्धा-तम्यनोहीनम्, -ना, -नं, 'having fresh garlands, and being free from dust,' the whole being the relative form of aggregative, involving a descriptive and dependent; अभिषेताई शिराम्, -राम्, -रम्, 'whose head was moist with unction;' प्रयोधान मुख्य, -खा, -खं, 'having the face turned in any direction one likes;' गुल्मुन रहस्तम्, -स्ता, -सं, 'spear and club in hand;' रङ्गात निवीहोचितम्, -ता, -तं, 'sufficient for support during one night' (see 778); खुग्यन आमास्याव्याम्यन्यायामिताम् 'acquainted with the meaning of the three Vedas, called Rig, Yajur, and Sáma' (agreeing with चित्रम्स); सन्दर्गन कर नाच नेताम् 'biting their lips and having red eyes' (agreeing with राजानम्); पराहोह कर्षाधीम् 'injuring another by action or by intention.'
- 772. The substantive आदि, 'a beginning,' often occurs in complex relative compounds, with the force of et cetera, as in simple relatives at 764; thus, गुक्रसा-रिकादयम् 'parrots, starlings, &c.' (agreeing with पश्चिम् 'birds beginning with parrots and starlings'), the whole being the relative form of dependent, involving an aggregative; मन्पिविग्रहादि 'peace, war, &c.' (agreeing with पृद्धान understood); गृहत्वागारादि युक्तम्, -का, -कं, 'possessed of houses, temples, &c.;' करितुरग्कोपादि परिच्छद युक्तम्, -का, -कं, 'possessed of elephants, horses, treasuries, and other property.'
- a. Similarly, आद्य in the example उत्तम गन्धाद्याम् (agreeing with सन्तम 'garlands possessing the best odour and other qualities').

- 773. Long complex compounds may be generally translated by beginning at the last word and proceeding regularly backwards, as in the following; मन्मभुक्रिन-कर्मुक्कक्षार्मिलित कोकिलालाए सङ्गीतक मुखावहः, -हा, -हं, 'causing pleasure by the music of the voice of the cuckoo, blended with the hum emitted by the swarms of joyous bees.'
- 774. जात्मक or रूप, as occupying the last place in a complex relative, denote 'composed of;' thus, हस्य प्राप्तातिकामीकरात्मकं वलं 'a force consisting of elephants, horses, chariots, infantry, and servants;' प्राप्तानमस्कृततुष्कृत रूपे कम्मेखी 'the two actions consisting of the good and evil done in a former birth.'
- 775. Complex compounds may sometimes have their second or middle member elided or omitted; thus, অনিরান্যকুলনা is really a complex compound, the whole being a descriptive, involving a dependent; but the middle member स्मृत is elided: see 745. a. Similarly, মাকু पार्थिवस् 'the era-king' is for মাকু प्रिय पार्थिवस् 'the king (beloved) by the era.'
- a. Sometimes the substantive verb 'to be' may be inherent in a relative compound; as, प्रारम्भ मृह्योदयम् 'his success was proportionate to his undertakings;' पीताम्मसि 'on his drinking water,' for तेन अम्मसि पीते सति.
- 776. Complex compound adverbs, or indeclinable compounds, involving other compounds, are sometimes found; as, खगृह निविशेषेख 'not differently from one's own house;' श्रद्धोचारणानन्तरं 'after uttering a sound;' सन्भर्विनमन्भयाभङ्गानपेखं 'regardlessly of the curving of her waist bending under the weight of her bosom;' यथा दृष्ट्युतं 'as seen and heard.'

ANOMALOUS COMPOUNDS.

- 777. There are certain compounds which are too anomalous in their formation to admit of ready classification under any one of the preceding heads. Amongst these may be placed those compounds expressive of 'comparison' or 'resemblance,' usually included under the Karma-dháraya or Descriptive class. In these the adjective is placed last; as, छाया चञ्चलस्, -ला, -लं, 'fickle as a shadow;' वज्ञपात.सदृशस्, -शी, -शं, 'like a clap of thunder;' फेनोपमस्, -मा, -मं, 'like foam;' अम्बुद्श्यामस्, -मा, -मं, 'dark as a cloud;' भूषद्विस्तीर्थस्, -खा, -खं, 'spread out like a mountain;' जलविन्ह लोल चपलस्, -ला, -लं, 'unsteady as a trembling drop of water;' निलनीदल नोयातरलस्, -ला, -लं, 'tremulous as water on the leaf of a lotus:' the last two examples are complex.
- a. कल्प, देशीय, रप्न, इयस, मात, affixed to crude bases, form anomalous compounds; see 8c. XX. XXI. and 919.
- b. There is a common anomalous compound formed by placing अनार after a crude base, to express 'another,' 'other;' as, स्थानानारं or देशानारं 'another place;' राजानारेण सह 'along with another king;' जन्मानाराणि 'other births.' The following examples, also, are not readily assignable to any class: त्यक्तजीवित योथी

- 'a fighter who abandons all idea of life;' सारस्द्वितीयस्, -या, -यं, 'accompanied by the Sárasa *;' अदृष्ट्यू बेस, - ब्री, - ब्रें, 'never before seen.'
- c. पूर्च or पूर्वक or पुर:सर (meaning literally 'preceded by') may be added to crude bases to form a kind of anomalous compound, as in the following example; पना पृष्ठीकम् अनं ददी 'he gave food with reverence.' See 792.

CHANGES UNDERGONE BY CERTAIN WORDS AT THE END OF COMPOUNDS.

778. The following is an alphabetical list of the substitutions or changes which take place in the final syllables of certain words, when used at the end of compounds. Observe-The most common substitution is that of \mathbf{w} a for the final vowel or final consonant and vowel of a word.

अक्ष m. for अधि n. 'the eye.'— अहुल m. in a few compounds for अहुलि f. 'the finger.'- अञ्चल m. in a few compounds for अञ्चलि m. 'joining the hands in reverence.' - অথব m. joined with a few inseparable prepositions for অথব m. 'a road.'- अनस in Karma-dháraya compounds for अनस् n. 'a cart,' 'a carriage.' — अयस in Karma-dhárayas for अयस n. 'iron.' — अइम in Karma-dhárayas for अञ्चन m. 'a stone.' -- अष्ठीय in Dwandwas for अष्ठीयत m. n. 'the knee.' -- अस for असि f. 'an angle.'-- अह for अहन n. 'a day.'-- अहर in the first member of a compound for अहन n. 'a day.' - अह at the end of a few compounds for अहन n. ---ईप for अप् f. water.'--- उद्या in a few Karma-dharayas for उद्यन् m. an ox.'--उपासा in the beginning of Dwandwas for उपस् n. f. the dawn.'-- जधन (fem. जभी) for जधम् n. 'an udder.'— काकुद् in a few Bahu-vrihis for काकुद m. 'the palate.' - कुछ for कुछ m. 'the belly.'- गन्धि in Karma-dhárayas for गन्ध m. 'smell.'-गव in Dwigus for गो m. f. 'an ox.'- जानि for जाया f. 'a wife.'- ज्ञ and जु in Bahu-vrihis for जानु n. 'the knee.' - तमस in Karma-dhárayas (preceded by सं, खव, or खन्ध) for तमस् n. 'darkness.'— दत् in a few Bahu-vrihis for दन्त m. 'a tooth;' the feminine may be दती.— दिवा in the beginning of a few compounds for दिवन् m. 'the day.'-- दुघ at the end of a few compounds for दुह 'yielding milk.'— द्यावा as the first member of a compound for दिव f. heaven.'— धन्वन् for धनुस् n. 'a bow.'- धर्मन् for धर्मे m. 'virtue,' 'duty.'- धुर for धुर् f. 'a load.'- नाभ for नाभि f. 'the navel.'—नाव for नौ f. 'a ship.'—पर्य for पर्थिन् m. 'a road.'— पाइ for पाद m. 'a foot;' the feminine may be पदी. - पृत् for पृतना f. 'an army.' — प्रजस at the end of Bahu-vrihis (preceded by आ, सु, or दुर्) for प्रजा f.— ब्रह्म at the end of Karma-dharayas for ब्रह्मन m. 'a Brahman.'--भूम for भूमि f. 'the earth.'— भुव in a few Dwandwas for भू f. 'the eye-brow.'— मनस in Dwandwas

^{*} So छायाद्वितीय: in Nala, translated by Bopp umbra geminatus.

for मनस् n. 'the mind *.'— मूई at the end of Bahu-vrihis (preceded by दि and ित) for मूईन् m. 'the head.'—मह and मही at the end of anomalous compounds (preceded by पिता, माता, &c., see 754. a) for महत् m. f. n. 'great.'—महा at the beginning of Karma-dháraya and Bahu-vrihi compounds for महत् m.f.n. 'great †.'
— मेधस् at the end of Bahu-vrihis (preceded by अ, सु, दुर, अट्य, मन्द) for मेधा f. 'intellect.'—राज at the end of Karma-dhárayas for राजन् m. 'a king;' see 151. a.
— राज in Dwigus, Karma-dhárayas, and Dwandwas, for राजि f. 'night.'—वर्षस in Karma-dhárayas for वर्षस् n. 'splendour.'—श्रेयस in Karma-dhárayas and Bahu-vrihis for श्रेयस् n. 'felicity.'— श्रे for श्रेन m. 'a dog.'—स in Avyayí-bhávas and Bahu-vrihis for सह 'with.'—सक्य in Karma-dhárayas and Bahu-vrihis for सिंख m. 'a friend.'—सरस in Karma-dhárayas for सर्ख m. 'a lake.'—हर for हर्य n. 'the heart.'

779. जह is found in the beginning of certain anomalous compounds (such as जहद्भार, जहम्मृष्टिका, &c.) for मत or जम्मत 'I.'

780. Numerals, when preceded by particles, prepositions, or other numerals, may change their finals to ञ a; or if their final letter be a consonant, may either drop that consonant or add ञ a to it; thus, दिल (nom. -तास, -तास, -तास, -तास, -तास, -पास, -पास, -पारिण) 'five or six;' उपचतुर (nom. -रास्) 'nearly four.'

Compound Nouns formed from roots combined with Prepositions.

781. In the next section it will be shown that the combination of roots with prepositions prevails most extensively in Sanskrit. From roots thus combined nouns of the most various significations may be formed; thus, from ह 'to seize,' with वि and अव, is formed व्यवहार 'practice;' from कृ 'to do,' with अनु, अनुकार 'imitation.' Hardly a line can occur in any book that does not afford an example of this kind of compound.

SECTION II. COMPOUND VERBS.

782. The learner might look over the list of 2000 simple roots, and well imagine that in some of these would be contained every possible variety of idea, and that the aid of prepositions and adverbial prefixes to expand and modify the sense of each root would be unnecessary. But in real fact there are comparatively very few

^{*} याङ्गनमें 'speech and heart,' which is the example given by Páṇini (V. 4.77).

[†] As महाजुले 'a great family;' see also 755. In Tat-purusha or dependent compounds महत is retained; thus, महतृ।प्रयः 'recourse to the great.'

Sanskrit roots in common use; and whilst those that are so appear in a multitude of different forms by the prefixing of one or two or even three prepositions, the remainder are almost useless for any practical purposes, except the formation of nouns. Hence it is that compound verbs are of more frequent occurrence than simple ones.

They are formed in two ways: 1st, by combining roots with prepositions; 2dly, by combining the auxiliaries of to do' and of to be' with adverbs, or nouns converted into adverbs.

Compound Verbs formed by combining Prepositions with roots.

- 783. The following list exhibits the prepositions chiefly used in combination with roots:
- u. ऋति ati, 'across,' 'beyond;' as, ऋतिया, ऋती (pres. ऋत्येमि, &c.), ऋतिक्रम्, 'to pass by,' 'to pass along,' 'to transgress.'
- b. স্কাম adhi, 'above,' 'upon,' 'over;' as, স্কামিয়া' to stand over,' 'to preside' (pres. স্কামিনিয়াদি); স্কামিন্ত্ 'to climb upon;' স্কামিয়া 'to lie upon;' স্কামিয়া 'to go over towards;' স্কামী 'to go over,' in the sense of 'reading.'
- c. अनु anu, 'after;' as, अनुषर्'to follow;' अनुषा'to follow,' in the sense of 'performing;' अनुकृ'to imitate;' अनुभन्'to assent.' With भू it signifies 'to experience,' 'to enjoy.'
- d. अनार् antar, 'within' (Latin inter); as, अनार्था 'to place within,' 'to conceal,' in pass. 'to vanish;' अनार्थ 'to be within;' अनार्थ 'to walk in the midst.'
- e. अप apa, 'off,' 'away' (ἀπό); as, अपगम्, अपमृ, अपे (from अप and इ), 'to go away;' अपनी 'to lead away;' अपकृष् 'to abstract;' अपवह 'to bear away.' It also implies 'detraction;' as, अपवह 'to defame.'
- f. ऋषि api, 'on,' 'over,' 'up,' only used with **धा** and नह; as, ऋषिधा 'to shut up;' अपिनह 'to bind on.' The initial a is generally rejected, leaving **पिधा**, पिनह.
- g. स्त्रभि abhi, 'to,' 'towards' (रेक्स'); as, स्राभिया, स्त्रभी, 'to go towards;' स्राभियाव 'to run towards;' स्त्रभिद्रम् 'to behold;' स्त्रभिवट् or स्राभिया (see **u**1 at 664) 'to address,' 'to speak to,' 'to salute.'
- h. स्रव ava, 'down,' 'off;' as, स्रवरूह, स्रवतृ, 'to descend;' स्रवेश्च् 'to look down;' स्रवकृ 'to throw down,' 'to scatter;' स्रवकृत् 'to cut off.' It also implies 'disparagement;' as, स्रवज्ञा 'to despise;' स्रविश्च् 'to insult.' With **धा** (3d c. स्रवद्धाति), 'to attend.'
- i. আ á, 'to,' 'towards,' 'up' (Latin ad); as, আবিছা্ 'to enter;' আদৃদ্ 'to go towards;' আত্ 'to mount up.' When prefixed to गम्, या, and হৃ, 'to go,' and হা 'to give,' it reverses the action; thus, আगम्, আया, ए, 'to come;' আহা 'to take.' With আহু, 'to practise.'
- j. उत् ut, 'up,' 'upwards' (opposed to नि); as, उचर् (48), उदि, 'to go up,' 'to rise' (pres. उदयामि, 1st conj.); उड्डी 'to fly up;' उद्वन् 'to strike up' (उन् and

हन्, 50); उहु (उत् and हृ, see 50) 'to extract;' उन्मिष् and उन्मील् (47) 'to open the eyes;' उन्मृत्, उच्छिद्, 'to cut up;' उन्मृत्ल 'to root up;' उच्छि 'to lift up' (उत् and श्रि, 40).

When prefixed to the roots स्या and स्तम्भ it causes the elision of s; as, उत्या to stand up;' उत्तम्भ 'to prop up.' In some cases it reverses the action; as, from पत् 'to fall,' उत्यत् 'to leap up;' from नम् 'to bend down,' उन्नम् (47) 'to raise up;' from यम् 'to keep down,' उद्यम् 'to lift up.'

- k. उप upa, 'to,' 'towards' (ὑπό), 'near,' joined like স্থা and স্থানি to roots of motion; as, उपया 'to approach;' उपचर् 'to wait upon;' उपस्था 'to stay near,' 'to be present,' 'to arrive.' With বিয় (6th c. उपविश्वाति), 'to sit down;' with স্থান, 'to sit near.'
- l. नि ni, 'down,' 'downwards,' 'under' (opposed to उत्); as, निपत् 'to fall down;' नियम् 'to suppress;' निमिष् and निमीत् 'to close the eyes;' निश्चिष्, निधा, न्यम्, 'to lay down,' 'to deposit;' निविश् 'to go within,' 'to encamp.' With वृत् it signifies 'to return,' 'to desist;' with श्रम्, 'to hear.' In some cases it does not alter the sense; as, निहन् 'to kill.'
- m. निर् nir, 'out;' as, निम्क्रम् (see 72), निर्मम्, नि:मृ (71. a. c), 'to go out,' 'to come out;' निम्कृत् 'to cut up;' निवृत् 'to come to an end,' 'to cease;' निश्चि (71. b) 'to determine.'
- n. परा pará, 'back,' 'backwards' (παρά), combined with जि and भू in the sense of 'defeat;' as, पराजि 'to overcome' (cf. παρανικάω, Æsch. Chöe.); पराभू 'to be defeated.' When joined with इ, 2d conj., it signifies 'to retire towards' (pres. परिम); when with इ, 1st conj. Atm., 'to run away,' 'to retreat,' r being changed to l (pres. पठाये).
- o. परि pari, 'around' (περί, per); as, परिवेष्ट्, परिवृ, 'to surround;' परिचर्, परिगम्, 'to go round;' परीख 'to look round,' 'to examine;' परिवृत् 'to turn round;' परिधाव 'to run round.' When prefixed to कृ it signifies 'to adorn,' and म् is inserted, परिष्कृ. With भू, 'to despise,' and with द्व, 'to avoid.' It sometimes merely gives intensity or completeness to the action; as, परिस्कृ 'to abandon altogether;' परिज्ञा 'to ascertain completely.'
- p. प्र pra, 'before,' 'forward' (πρό, pro, præ); as, प्रगम, प्रमृष्, 'to proceed;' प्रयम् 'to set before,' 'to present;' प्रक्रम् 'to begin;' प्रवृत् 'to proceed,' 'to begin;' प्रयाच् 'to run forward;' प्रस्था 'to set out,' 'to advance;' प्रभू 'to be superior,' 'to prevail;' प्रदृष् 'to foresee.' With लभ्, 'to deceive.' Observe—In combination with verbs beginning with e or o this preposition generally drops its final a; as, प्रथमि 'I send,' from प्र and एपय, causal base of इष् 'to go.' Similarly, प्रेजते 'he trembles' (3d sing. of ej with pra).

The r of pra influences a following nasal by 58; as, प्रयम् 'to bend before,' 'to salute.' Sometimes प्र does not alter the sense of a root, as in प्राप् 'to obtain' $(5\text{th c.}; \sec 681)$.

- q. प्रति * prati, 'against,' 'towards,' 'back again;' as, प्रतिगुप्' to fight against;' प्रति 'to go towards' (pres. प्रतिमि); प्रतिगम् 'to go towards,' 'to return;' प्रतिकृ 'to counteract;' प्रतिहन् 'to beat back,' 'to repel;' प्रतिवच् 'to answer;' प्रतित्नि 'to recover;' प्रतिनी 'to lead back;' प्रतिनन्द् 'to re-salute.' With खु, 'to promise;' with पह, 'to arrive at,' 'to obtain;' with ईस्, 'to wait for,' 'to expect.' Sometimes it does not alter the sense of the root; as, प्रतिवस् 'to dwell.'
- r. वि vi, 'apart,' implying 'separation,' 'distinction,' 'distribution,' 'dispersion' (Latin dis, se); as, বিৰহ্ 'to wander about;' বিৰহ্ 'to vacillate;' বিহ্ 'to roam for pleasure;' বিক্ 'to dissipate;' বিহু 'to tear asunder;' বিশন্ 'to divide;' বিবিষ্ 'to distinguish.' Sometimes it gives a privative signification;' as, বিযুব্ 'to disunite;' বিহ্ 'to forget;' বিশ্লী 'to sell.' With कृ, 'to change for the worse.' Sometimes it has no apparent influence on the root; as, বিবয় 'to perish;' বিবিন্ 'to think.'
- s. सम् sam, 'with,' 'together with' (σύν, con); as, सचि, सङ्ग्ह, 'to collect;' संयुज्'to join together;' सङ्गम्'to meet together;' सम्मद्'to happen;' सङ्ख्रिम्'to contract.' With कृ it signifies 'to perfect,' and स् is inserted, संस्कृ. It is often prefixed without altering the sense; as, सञ्चन्'to be produced.'
- 784. Two prepositions are often combined with a root; as, चादा 'to open' (वि, जा); चापद् (10th c.) 'to kill;' उपागम् 'to go under,' 'to undergo,' 'to arrive at' (उप, जा); समे 'to assemble' (सम, जा, with root इ); प्रशिण्यत् 'to prostrate one's self' (प्र, नि, 58); प्रोह् 'to raise up' (प्र, उत्, with root ह): and occasionally three; as, प्रचाह 'to predict' (प्र, वि, जा); प्रतुदाह 'to answer' (प्रति, उत्, जा). Other combinations of three prepositions, occasionally prefixed to roots, are सं + उप + जा; ज्ञाभ + वि + जा; सं + ज्ञाभ + प्र; ज्ञान् + सं + वि.
- a. Observe—Excepting in the case of **प्र** above, prepositions ending in vowels combine with roots beginning with vowels according to the rules of Sandhi; thus, आ with ₹ 'to go' becomes **ए** (32), and in pres. ऐमि (आ + एमि 33), &c.; in pot. एयां (आ + इयां), &c.; in imp. आयानि (आ + यानि), &c.; in 1st pret. आयं, ऐस् (645, 33), &c. Similarly, अप with एमि becomes अपेमि by 33.
- 785. In conjugating compound verbs formed with prepositions, the augment and reduplication do not change their position, but are inserted between the preposition and the root †; as, पर्येणपं, 1st pret.

^{*} The final i of the prepositions प्रति, परि, नि, is optionally lengthened in forming certain nouns from compound verbs; as, प्रतीकार, परीहास, नीकार.

[†] There are a few exceptions to this rule in the Mahábhárata; as in अन्यसन्तर्(Mahábh. Selections, p. 33).

of नी, with परि; उपाविशं, 1st pret. of विश्, with उप; अन्यतिष्ठं, 1st pret. of स्था, with अनु; प्रतिज्ञान, 2d pret. of हन्, with प्रति; प्रोज्जहार, 2d pret. of ह, with प्रवात उत.

786. Grammarians restrict certain roots to particular voices, when in combination with particular prepositions; as, for example, the root नि 'to conquer,' with नि, and the root निश् 'to enter,' with नि, are restricted to the Atmane-pada; but no certain rules can be propounded on this subject; and in the two epic poems especially the choice of voice seems generally arbitrary and subservient to the purposes of metre *.

Compound Verbs formed by combining Adverbs with the roots
দ্ধ kri and মু bhú.

- 787. These are of two kinds; 1st, those formed by combining adverbs with कृ 'to make' and भू 'to become;' 2dly, those formed by combining nouns used adverbially with these roots.
- a. Examples of the first kind are, श्रलङ्ग 'to adorn;' शाविष्कृ 'to make manifest' (see 72); विहिष्कृ 'to eject;' पुरस्कृ 'to place in front,' 'to follow;' विनाकृ 'to deprive;' सन्कृ 'to entertain as a guest;' नमस्कृ 'to revere;' साह्याङ्ग, प्राहुर्भृ, 'to become manifest,' &c.
- 788. In forming the second kind, the final of a crude word, being a or á, is changed to í; as, from सज्ज, सज्जीकू 'to make ready,' सज्जीकू 'to become ready;' from कृष्ण, कृष्णीकृ 'to blacken;' from परिसा 'a ditch,' परिसीकृ 'to convert into a ditch;' and sometimes a becomes á; as, प्रियाकृ from प्रिय. A final i or u is lengthened; as, from श्रुचि, श्रुचीकू 'to become pure;' from लघु, लघुकृ 'to lighten.' A final vi is changed to रो ví; as, from मातृ, मात्रीकृ 'to become a mother.' A final as becomes either i (as, from सुमनस्, सुमनीकृ 'to be of good mind') or así (as, from श्रिरस्, श्रिरसीधा 'to place on the head').
- a. But the greater number of compounds of this kind are formed from crude nouns in a. The following are other examples: तृष्णीकृ 'to esteem as a straw;' स्त्रश्लीकृ 'to stiffen;' एकचिन्नीभू 'to fix the mind on one object;' स्त्रीकृ 'to make one's own,' 'to claim as one's own;' मैत्रीभू 'to become friendly.' Substantives are sometimes formed from these; as, मैत्रीभाच 'the state of being friendly,' 'friendship.'

^{*} Thus, यत् 'to strive' and प्रार्थ 'to beg for,' which are properly Atmane-pada verbs, are found in the Parasmai. Instances of passive verbs taking Parasmai terminations have been given at 253.b. On the other hand, नन्द् 'to rejoice,' which is properly a Parasmai-pada verb, is found in the Atmane.

- b. Observe—This mode of compounding nouns and adverbs with kri and bhú is by Indian grammarians technically termed chwi. These compounds, however, rarely occur, excepting in the form of passive participles*; and it may be questioned whether the genius of Sanskrit favours the combination of any other part of speech but a preposition with the tenses of verbs. In Greek and Latin, on the other hand, the composition of nouns with verbs is not unusual.
- 789. Sometimes सात, placed after a crude noun, is used to form a compound verb of this kind; as, from जल 'water,' जलसालृ 'to reduce to liquid;' from भस्मन् 'ashes,' भस्मसालृ (57) 'to reduce to ashes.' These compounds, like the last, are rarely found, excepting in the form of past passive participles.

SECTION III.

COMPOUND ADVERBS.

- 790. Compound adverbs are formed, 1st, by combining adverbs, prepositions, and adverbial prefixes, with nouns in the nom. or accus, singular neuter; 2dly, by placing adverbs, or adjectives used as adverbs, after the crude base of nouns.
- a. The first kind are identical with indeclinable compounds at 760, and the greater number are formed with the adverbial preposition मह saha, contracted into म sa; as, from कोप 'anger,' सकोप 'angrily;' from जादर 'respect,' सादरं 'respectfully;' from जाहकपात 'prostration of the limbs,' साष्टाङ्गपात 'reverentially.'
- b. The following may be taken as examples of compound adverbs formed with other prefixes: अनुज्येष्ठं 'according to seniority;' प्रत्यक्कं 'over every limb;' प्रतिमासं 'every month;' यथा विधि 'according to rule;' यथा शक्ति का यावज्यकं 'according to one's power;' यथा मुखं 'happily;' समृद्धं 'before the eyes' (अक्ष being substituted for अक्षि, see 778); असंशयं 'undoubtedly;' निर्विशेषं 'without distinction.'
- 791. Most of the adverbs at 731 may be placed after the crude base of nouns; thus, बालक्समीपं 'near the child;' रह्यांपं 'for the sake of protection;' किम्पं 'on what account?' शब्दोचारणाननारं 'after uttering a sound.'
- 792. पृष्ठ or पृष्ठकं or पुर:मरं (meaning literally 'preceded by') is placed after crude bases to denote 'the manner' in which any thing is done; as, क्रोपपृष्ठ 'with anger.' See 777. c.
 - 793. A kind of compound adverb, implying 'reciprocity,' is formed

^{*} Generally as past passive participles; thus, खलङ्गत 'adorned:' प्रानुभृत 'become manifest;' सज्जीभृत 'made ready;' लघुकृत 'lightened.' The future passive participle is sometimes found so compounded; as, स्वीकरणीय 'to be agreed to.'

298 SYNTAX.

by doubling a noun, lengthening the final of the first word, and changing the final of the last to i; as, from द्राउ 'a stick,' दराइ शिड 'mutual striking;' अंशांशि 'share by share;' मुपलामुपलि 'club to club;' मृशेनुष्टि 'fist to fist.'

- a. Something in the same manner, जन्म and पर, 'another,' are doubled; thus, जन्मोन्मं, परस्परं, 'mutually,' 'together.'
- b. The indeclinable participle সামেশ, 'having begun,' is joined with অল্ল, 'to-day' (স্থলামেশ), in the sense of 'from this time forward;' and with the crude bases of other words to express 'beginning from;' see 925. মৃদ্রি is placed adverbially after words, in the same sense; as, রন্ম্মদ্রি 'from birth upwards.'

CHAPTER IX.

SYNTAX.

- 794. Sanskrit syntax, unlike that of Greek and Latin, offers fewer difficulties to the student than any other portion of the Grammar. Indeed, compounds prevail so abundantly in this language, that the writer who has properly expounded the subject of compound words has already more than half completed his investigation into the laws which regulate syntactical combinations. We shall endeavour, in the present chapter, to collect together all the most useful rules for the connexion and collocation of uncompounded words. Much vagueness and uncertainty, however, may be expected to attach to the rules propounded, when it is remembered that Sanskrit literature consists almost entirely of poetry, and that the laws of syntax are ever prone to yield to the necessities of metrical composition.
- a. Observe—In the present chapter on Syntax, that the subject may be made as clear as possible, each word will be separated from the next, and vowels will not be allowed to coalesee, although such coalition be required by the laws of combination. When compounds are introduced into the examples, a dot, placed underneath, generally marks the division of the words.

THE ARTICLE.

795. There is no indefinite article in classical Sanskrit; but কথিব (228) and in modern Sanskrit হন্ধ (238) are sometimes used to supply the place of such an article; thus, হন্ধান্মন্ মুট্টা 'in a certain

SYNTAX. 299

country;' कश्चित् भृगाल: 'a certain jackal.' The definite article may not unfrequently be expressed by the pronoun स (220); thus, स पुरुष: may mean simply 'the man,' not necessarily 'that man.'

CONCORD OF THE VERB WITH THE NOMINATIVE CASE.

- 796. The verb must agree with the nominative case in number and person; as, ऋहं करपाणि 'I must perform.'
- a. Other examples are, त्वम् अवधेहि 'do thou attend;' स ददाति 'he gives;' आवां द्व्य: 'we two say;' क्योता ऊचु: 'the pigeons said;' राजा मन्दी च जग्मतु: 'the king and minister went;' यायच् चन्द्राकी तिष्ठतः 'as long as the moon and sun remain;' युवां चिन्तयतं 'do you two reflect;' यूयम् आयात 'do ye come;' सज्जना: पृत्यते 'good men are honoured;' वाति पवन: 'the wind blows;' उदयित अशाद्धः' the moon rises;' म्फुटित पूर्णं 'the flower blossoms.'
 - b. Observe—The verb is usually, though not always, placed last in the sentence.
- 797. When a participle takes the place of the verb, it must agree with the nominative in number and *gender*; as, म गत: 'he went;' सा गता 'she went;' नार्याय उक्तयतो 'the two women spoke;' राना हत: 'the king was killed:' वण्यनानि छिद्यानि 'the bonds were cut.'
- a. Sometimes, when it is placed between two or more nominative cases, it agrees with one only; as, स्वावधः प्रवोधिता पुत्रश्च 'his wife and son were awakened.'
- b. Very often the copula, or verb which connects the subject with the predicate, is omitted; when, if an adjective stand in the place of the verb, it will follow the rules of concord in gender and number; as, धनं दुर्लभं wealth is difficult of attainment; आयो कृताहारों we two have finished eating. But if a substantive stand in the place of the verb, no concord of gender or number need take place; as, सम्बद: पदम आयदां successes are the road to misfortunes.

CONCORD OF THE ADJECTIVE WITH THE SUBSTANTIVE.

798. An adjective, participle, or adjective pronoun, qualifying a substantive, when not compounded with it, must agree with the substantive in gender, number, and case; as, सागुः पुरुषः 'a good man;' महद् दुःसं 'great pain;' एतेषु पृष्टिक्षिषु राष्ट्रेषु 'in these beforementioned countries;' ह्वांचि निहाणि 'three friends.'

CONCORD OF THE RELATIVE WITH THE ANTECEDENT.

799. The relative must agree with the antecedent noun in gender, number, and person; but in Sanskrit the relative pronoun generally precedes the noun to which it refers, this noun being put in the same case with the relative, and the pronoun स follows in the latter clause of the sentence; as, यस्य नरस्य युद्धिः स बलयान् 'of whatever man there is intellect, he is strong.'

a. The noun referred to by the relative may also be joined with स, as यस्य बुद्धि: स नरो बलवान्; or may be omitted altogether, as यत् प्रतिज्ञातं तत् पालयं 'what you have promised, that abide by;' येपाम् अपत्यानि खादितानि तै: (पिछाभिः understood) जिज्ञामा समारआ 'by those (birds) whose young ones were devoured an inquiry was set on foot;' यः सर्वान् विषयान् प्राप्तुयाद् यन्न स्तान् विषयो विषयापेक्षातः श्रेयान् 'he who would obtain all objects of sense, and he who despises them, of the two the despiser is the best.'

800. The relative sometimes stands alone, an antecedent noun or pronoun being understood, from which it takes its gender and number; as, नास्ति पुरुषवान् (तस्मात् understood) यस्य मिल्लेण सम्भापः 'there is not a happier (than that man) of whom there is conversation with a friend;' धनेन कि यो न ददाति 'What is the use of wealth (to him) who does not give?'

a. Sometimes, though rarely, the antecedent noun precedes the relative in the natural order; as, न सा भार्य्या यस्यां भन्ना न तुष्पति 'she is not a wife in whom the husband does not take pleasure.'

801. तावत् and यावत् stand to each other in the relation of demonstrative and relative; as, याविन तस्य द्वीपस्य वस्तृति ताविन स्तरास्त उपनेतन्यािन 'as many products as belong to that island, so many are to be brought to us.' See also 876.

a. Similarly, तादृश and यादृश; as, यादृशं वृत्तं तादृशं तस्मे किथातवन्तः 'as the event occurred, so they related it to him.'

SYNTAX OF SUBSTANTIVES.

802. Under this head it is proposed to explain the construction of substantives, without reference to their connexion with particular adjectives, verbs, or participles; and for this purpose it will be desirable to exhibit examples under each case.

Nominative case.

803. A substantive simply and absolutely expressed must be placed in the nominative case; as, हिनोपदेश: 'the Hitopadeśa;' भट्टिकाचं 'the poem of Bhatti.'

a. Two nominative cases in different numbers may be placed in apposition to each other; as, तृषानि अया 'grass as a bed.'

Accusative case.

804. Substantives are not found in the accusative, unconnected with verbs or participles, except as expressing 'duration of time' or 'space.' See 821.

Instrumental case.

805. This case yields a variety of senses. The most usual is that of 'the instrument' or 'means' by which any thing is done; as,

मया (उर्ऋ) 'by me it was said;' व्याधेन (पाशो योजितः) 'by the fowler a snare was laid;' वेदाध्ययनेन 'by the study of the Vedas;' स्न्वश्रुपा 'with one's own eye.'

806. It also has the force of 'with' in expressing other collateral ideas; as, बलीयमा स्पर्धा 'vying with the strong;' मिलेश सम्भाप: 'conversation with a friend;' पगुभि: सामान्यं 'equality with beasts;' पितृर् गोचरेश 'with the knowledge of (his) father:' especially when 'accompaniment' is intended; as, शिषेश गुरू: 'the master with his pupil.'

807. The other senses yielded by this case are, 'through,' by reason of,' on account of;' as, कृषया 'through compassion;' तेन अपराधन 'on account of that transgression:' especially in the case of abstract nouns formed with ता (80. XXIII); as, मृदतया 'through infatuation.'

- a. 'According to,' 'by;' as, विधिना 'according to rule;' मम सम्मतेन 'according to my opinion;' जात्या 'by birth.'
- b. 'The manner' in which any thing is done, as denoted in English by the adverbial affix 'ly,' or by the prepositions 'in,' 'at;' as, बाहुत्येन 'in abundance;' धर्मीय 'virtuously;' यथे छ्या or खे छ्या 'at pleasure;' मुखेन 'at ease;' अनेन विधिना 'in this way;' महता खेहेन (नियसतः) 'they both dwell together in great intimacy;' (नृष: सर्धु:भूतानि छभिभवति) तेजमा 'a king surpasses all beings in glory;' मनसा (न कर्ज्ञच्यं) 'such a deed must not even be imagined in the mind;' मानुष:इपेया 'in human form.'

808. Substantives expressive of 'want,' 'need,' may be joined with the instrumental of the thing wanted; as, चर्चया न प्रयोजनं 'there is no occasion for inquiry;' मया सेवकेन न प्रयोजनं 'there is no need of me as a servant;' तृषोन कार्व्य 'there is use for a straw.'

809. 'The price' for which any thing is done may be in the instrumental; as, पन्निम: पुराशेर (याति दासन्वं)' for five Puránas he becomes a slave;' बहुिमर दत्तेर् (युध्यन्ते) 'they fight for great rewards.' Similarly, प्राग्यारित्याग्मृत्येन (श्रीर् न लभ्यते) 'fortune is not obtained at the price of the sacrifice of life.'

- a. So also 'difference between' two things; as, त्वया समुद्रेण च महद् सन्तरं 'there is great difference between you and the ocean.'
- b. The English expression 'under the idea that' is expressed by the instrumental case of the substantive वृद्धि; as, व्यामनुद्धा 'under the idea that he was a tiger.'

Double Instrumental.

810. Sometimes when two substantives come together, expressing 'parts' of a common idea, they are both placed in the instrumental, instead of one in the genitive; as, यकुले: पुष्पेर वास्पते 'an odour is emitted by the bakul-plants by their flowers' (for यकुलानां पुष्पे:). Similarly, ताम् आधासपामास प्रेषाभिश् चन्द-नोटके: 'he caused her to revive by her attendants by sandal-water.'

Dative case.

- 811. This case is of very limited applicability, and its functions, irrespectively of the influence of verbs, are restricted to the expression of 'the object,' 'motive,' or 'cause' for which any thing is done, or 'the result' to which any act tends; as, जात्माविवृह्ये 'for self-aggrandizement;' आपत्मतीकाराय 'for the counteraction of calamity;' आस्त्रं च शास्त्रं च प्रतिपचये 'arms and books (lead) to renown.'
- a. When, as in the last example, 'the result' or 'end' to which any thing leads is denoted by this case, the verb is seldom expressed, but appears to be involved in the case itself. The following are other examples: यह आस्ते चिप्तंसर्गो इन्तं तदिष मृत्यच 'where there is admixture of poison, then even nectar (leads) to death;' उपदेशो मृत्याणां प्रकोपाय न ज्ञान्तये 'advice to fools (leads) to irritation, not to conciliation;' स वृद्धपतिस तस्या: सन्तोपाय न ज्ञान्यत् 'that old husband was not to her liking.'
- b. It will be seen hereafter that certain verbs of giving and relating govern the dative. Substantives derived from such verbs exercise a similar influence; as. अन्यस्में दानं 'the giving to another;' अन्यस्में क्यनं 'the telling to another.'
- c. Words expressive of 'salutation' or 'reverence' are joined with the dative; as, गणेज्ञाय नमः 'reverence to Gaṇeśa; कुज़लं ते 'health to thee.'

Ablative case.

- 812. The proper force of the ablative case is expressed by 'from;' as, लोभात् (क्रोध: प्रभवति) 'from avarice anger arises;' गिरे: पतनं 'falling from a mountain;' चाराणां मुखात् 'from the mouth of the spies.'
- 813. Hence this case passes to the expression of various correlative ideas; as, आहारात् किन्दित् 'a portion of (from) their food:' and like the instrumental it very commonly signifies 'by reason of,' in consequence of;' as, गोमनुपाणां चपात् 'on account of the slaughter of cows and men;' अनयसर्पयेशात् (पुतं निन्दित)' he blames his son for entering inopportunely;' दखःभयात् 'through fear of punishment;' अस्मन्प्रयोदयात् 'by reason of my good fortune.'
- a. 'According to;' as, मन्त्रियमतात 'according to the advice of the minister.' Abstract nouns in त्वं are often found in this case to express some of these ideas; as, अनवस्थित चिम्नतात 'by reason of the unsteadiness of his mind:' especially in the writings of commentators; as, वस्यमाणत्वात 'according to what will be said hereafter.'
- 814. It also expresses 'through the means' or 'instrumentality of;' as, जूगालात् पाज्यद्वः' caught in the toils through the instrumentality of the jackal;' न चौद-ध्परिकानाट् (व्याधेः ज्ञानिस् अवेत्) 'the alleviation of disease is not effected by the mere knowledge of the medicine.'

- a. 'The manner' in which any thing is done is occasionally expressed by the ablative; as, यल्लात् 'with diligence;' वलात् 'forcibly;' कुतृहलात् 'with wonder;' मूलात् उद्धरणं 'tearing up by the roots:' or by the ablative affix तम्; as, सेन्डातम् 'at one's own pleasure' (see 719. a. b).
- b. This case also denotes 'after;' as, जारीर विगमात 'after separation from the body;' मुख्यमितवन्थनात 'after the imprisonment of the Chief;' तस्य आगमनात 'since his arrival.'
 - c. In reference to time, 'within;' as, विषद्यात 'within three fortnights.'
- d. Nouns expressive of 'fear' are joined with the ablative of the thing feared; as, मृत्योर भयं 'fear of death;' चीरतो भयं 'fear of robbers.'

Genitive case.

- 815. This and the locative case are of the most extensive application, and are often employed, in a vague and indeterminate manner, to express relations properly belonging to the other cases.
- a. The true force of the genitive is equivalent to 'of,' and this case appears most frequently when two substantives are to be connected, so as to present one idea; as, मिह्नस्य यचनं 'the speech of a friend;' भन्ना नार्या: परमं भूषणं 'the best ornament of a woman is her husband;' न नरम्य नरो दासो दासस् तु अर्थस्य 'man is not the slave of man, but the slave of wealth.'
- 816. 'Possession' is frequently expressed by the genitive case alone, without a verb; as, सद्वा: सस्पन्नयम् तस्य मनुष्टं यस्य मानमं 'all riches belong to him who has a contented mind;' धन्योऽहं यस्य ईतृज्ञी भाष्या 'happy am I in possessing such a wife.'
- a. It often, however, has the force of 'to,' and is very generally used to supply the place of the dative; as, प्राया जात्मनो उभीष्टा: 'one's own life is dear to one's self;' न योजनाजातं हुरं वाद्यमानस्य तृष्णाया 'a hundred Yojanas is not far to one borne away by thirst (of gain);' किं प्रजावताम् खियिदितं 'What is unknown to the wise?' किम् खन्यस्य प्रकाजायित प्रदीप: 'What does a lamp show to a blind man?' किं मया खपकृतं राज: 'What offence have I committed towards the king;' किम् खयम् खम्माकं कर्त्तं समर्थ: 'What can this man do to us?'
- b. And not unfrequently of 'in' or 'on;' as, स्त्रीणां विश्वास: 'confidence in women;' मन खायज्ञलं 'dependence on me.'
- c. It is even equivalent occasionally to 'from' or 'by,' as usually expressed by the ablative or instrumental; as, न कस्यापि (उपायनं गृह्तीयात्) 'one ought not to accept a present from any one;' अस्माकं (वनं त्याज्यं) 'the wood is to be abandoned by us;' स भन्यो यस्य अधिनो न प्रयानि विमुखाः 'he is blessed from whom suppliants do not depart in disappointment.'
- d. 'Difference between' two things is expressed by this case; as, मेव्यामेवकयोर् महह् अनरें 'there is great difference between the master and the servant.' Compare 809. a.

Locative case.

- 817. The locative, like the genitive, expresses the most diversified relations, and frequently usurps the functions of the other cases. Properly it has the force of 'in,' 'on,' or 'at,' as expressive of many collateral and analogous ideas; thus, राह्मों 'in the night;' ग्रामें 'in the village;' पृष्ठे 'on the back;' त्विष विश्वास: 'confidence in you;' मरु.स्थल्यां वृष्टि 'rain on desert ground;' प्रथम.बुभुक्षायां 'at the first desire of eating;' पृथिक्यां रोगिको वृक्ष: 'a tree planted in the earth.'
- 818. Hence it passes into the sense 'towards;' as, द्यमा शती च मित्ने च 'leniency towards an enemy as well as a friend;' सर्ज्ञ:भूतेषु दया 'compassion towards all creatures;' मुद्दामु अजिद्धः 'upright towards friends;' मुकृत शतम असत्मु नष्टं 'a hundred good offices are thrown away upon the wicked.'
- 819. Words signifying 'cause,' 'motive,' or 'need,' are joined with the locative; as, सत्याने हेतु: 'the cause of his modesty;' भूपाउपोर् विग्रहे भवड्डचनं निदानं 'your speech was the cause of the war between the two princes;' प्रापंकाभाव: सतीन्वे कारणं स्त्रिया: 'the absence of a suitor is the cause of a woman's chastity;' नौकायां कि प्रयोजनं 'What need of a boat?' Also words signifying 'employment' or 'occupation;' as, अर्थार्जने प्रवृत्ति: 'engaging in the acquisition of wealth.' Words derived from the root ynj usually require the locative; as, मन राज्यरहा-याम् उपयोग: '1 am of service in preserving the kingdom.'
- a. This case may yield other senses equivalent to 'by reason of,' 'for,' &c.; as, मे चिद्रेषु 'through my faults;' चार: पर्राष्ट्राणाम् अवलोकने 'a spy is for the sake of examining the territory of one's enemies;' युद्धे कालोड्यं 'this is the time for battle;' तस्याम् अनुराग: 'affection for her;' उपदेशे अनादरः 'disregard for advice;' का चिन्ना मरणे रणे 'What anxiety about dying in battle!'
- b. It is also used in giving the meaning of a root; as, ग्रह उपादाने 'the root grah is in taking,' i. e. conveys the idea of 'taking.'
 - c. The locative case is often used absolutely; see 840.

SYNTAX OF NOUNS OF TIME.

- 820. When reference is made to any particular division of time, the instrumental case is usually required; as, तिभिर् वर्ष: 'in three years;' डादशिभ्र मासे: 'in twelve months;' छाणेन 'in an instant;' कियता कालेन 'In how long time?' वर्षशित: 'in hundreds of years;' काल पर्यापेश 'in process of time.'
- 821. When to duration of time, the accusative case is generally used; as, ध्रांगं 'for a moment;' अनेक कालं 'for a long time;' कियनं कालं 'for some time;' एकं मार्स 'for one month;' हो मासी 'for two months;' वर्षे आतं 'for a hundred years;' आस्त्रती: समा: 'to all eternity;' आतं वर्षे।िण 'for a hundred years;' बहुनि अहानि 'for many days.'

The instrumental, however, is sometimes used in this sense also; as, द्वादशाभर् वेर्ष् चाणित्र्यं कृत्वा 'having traded for twelve years;' कितप्य दिवसे: 'for a few days.'

822. When any particular period or epoch is referred to, the locative may be employed; as, किस्मिंश्चिह् दियसे 'on a certain day;' तृतीये दिवसे 'on the third day:' or sometimes the accusative; as, यां रातिं ते हृता: प्रविज्ञानि स्म पुरीं तां रातिं भरतेन स्त्रमी दृष्ट: 'on the night when the ambassadors entered the city, on that night a dream was seen by Bharata.'

NOUNS OF PLACE AND DISTANCE.

823. Nouns expressive of 'distance between two places' (according to Carey) may be in the nominative; as, कृष्णः आतं क्रोशाः सोमनापात् 'Krishna is a hundred Kos from Somanáth.' 'Space' may also be expressed by the accusative; as, क्रोशं गिरि: 'a hill for a Kos:' or by the instrumental; as, क्रोशन गत्मा 'having gone for a Kos.' 'The place' in which any thing is done may be in the locative; as, विद्भेषु 'in Vidarbha.'

SYNTAX OF ADJECTIVES.

Accusative after the Adjective.

824. The only adjectives governing an accusative are those formed from desiderative bases; as, स्वगृहं निगितपु: 'desirous of going home;' पुतम् सभीपु: 'desirous of obtaining a son;' राजानं दितृषु: 'desirous of seeing the king.'

Instrumental after the Adjective.

825. Adjectives, or participles used adjectively, expressive of 'want' or 'possession,' require this case; as, ऋषेंन हीन: 'destitute of wealth;' ऋषें: समायुक्त: 'possessed of riches;' चारिका पूर्की घट: 'a jar full of water.'

826. So also of 'likeness' or 'equality;' as, जनेन महुशो लोके न भूतो न भविष्यति 'there has never been, nor will there ever be, any one like him in this world;' प्रारम्भे: सहुश उदयः 'his success was equal to his undertakings;' प्राणै: समा पत्नी 'a wife as dear as life;' जादिसेन तुल्यः 'equal to the sun.' These are also joined with a genitive.

Genitive after the Adjective.

827. Adjectives signifying 'dear to,' or the reverse, are joined with the genitive; as, राजां प्रियः 'dear to kings;' भर्त्तारः स्त्रोणां प्रियः 'husbands are dear to women;' न किंद्यतं स्त्रीणाम् अदियः 'women dislike nobody;' डेप्यो भवित मन्त्रिणां 'he is detestable to his ministers.'

- a. Adjectives expressive of 'equality' often require this case as well as the instrumental; thus, सर्वेस्य समः 'equal to all;' तस्य अनुरूपः 'like him;' चन्द्रस्य कस्यः 'like the moon;' न तस्य तृत्यः अश्वन 'nobody is equal to him.'
- b. So also other adjectives; as, परोपदेश: सर्श्वेषां मुकर: नृषां 'giving advice to others is easy to all men;' मुखानाम् उचित: 'worthy of happiness;' उचित: क्रेशानां 'capable of toil.'

Locative after the Adjective.

- 828. Adjectives, or participles used adjectively, expressive of 'power' or 'ability,' are joined with this case; as, अध्यिन द्यमा अधाः 'horses able for the journey;' महित श्राती हामो राजा 'a king who is a match for a great enemy;' अशका गृह करणे शका गृह भन्नने 'unable to build a house, but able to demolish one.'
- a. So also other adjectives; as, शस्त्रेषु कुशलः 'skilled in arms;' अन्येषु प्राज्ञः 'wise in trifles;' न्विय अनुरक्तो विरक्तो वा स्वामी 'Is your master attached or adverse to you?' अनुजीविषु मन्दादरः 'neglectful of his dependants.'

SYNTAX OF THE COMPARATIVE AND SUPERLATIVE DEGREE.

- 829. Adjectives in the comparative degree require the ablative case; as, पत्नी प्राग्नेभोडिंप गरीयसी 'a wife dearer even than one's life;' पुत्न-पर्शात् मुखतरः स्पर्शो लोके न विद्यते 'there is no pleasanter touch in this world than the touch of a son;' वर्डनात् प्रजारुख्यं श्रेयः 'the protection of one's subjects is better than aggrandizement;' न मज्ञो (719.a) दुःखिततरः पुमान् छस्ति 'there is not a more wretched man than I;' मित् बलाह् बलीयसी 'mind is more powerful than strength.'
- 830. Sometimes they govern the instrumental; as, प्राणै: प्रियतर: 'dearer than life;' न ऋस्ति मया कथ्विद् अन्यान्यतरो भृषि 'there is nobody upon earth more unfortunate than I.'
- a. When it is intended to express 'the better of two things' the genitive may be used; as, अनयोर देशयोः को देशो भद्रतरः 'Of these two countries which is the better?'
- 831. The comparative in Sanskrit is often resolved into the expression 'better and not;' as, वरं प्राण्णपित्यागो न पुनर् ईदृशे कर्म्मीण प्रवृत्तिः 'better abandon life than (literally, and not) engage in such an action;' वरं मीनं कार्यं न च वचनम् उक्तं यद् अनृतं 'it is better that silence should be kept than a speech uttered which is untrue;' विद्या सह वेदाध्यापकेन वरं मर्तय्यं न तु अध्यापन योग्य शिष्याभावे अपादाय एतां प्रतिपादयेत् 'a teacher of the Veda should rather die with his learning than commit it to an unworthy object, in the absence of a pupil worthy to be instructed in it.'

832. The superlative degree is usually joined with the genitive; as, ब्राइसणो द्विपदां श्रेष्ठो गीर् वरिष्ठा चतुप्पदां। गुरूर् गरीयमां श्रेष्ठ: पुदाः म्यर्शवतां वर: 'a Bráhman is the best of all bipeds, a cow of quadrupeds, a Guru of venerable things, a son of things possessed of touch:' but sometimes with the locative; as, नरेषु वलयत्तवः 'the most powerful of men:' and even with an ablative; as, पान्यानां महुह उत्तमः मर्श्च महुहात 'a store of grain is the best of all stores.'

a. A superlative degree may even take a comparative affix, and govern the genitive; as, तेपां च्येष्टतरम् 'the eldest of them.' See 194.

833. 'Comparison' is often expressed by an adjective in the positive degree, joined with a noun in the ablative case; as, नास्ति तस्मात् पुरायवान् 'there is not a happier than he;' स मन्नो (719. a) महान् 'he is greater than me.'

a. In more modern Sanskrit 'comparison' is sometimes expressed by the use of अपेस्स 'regarding,' 'with reference to' (indecl. part. of the root ईस् with अप), which may take the place of 'than' in English; thus, द्शोपाध्यायान् अपेस्य खाचार्य खाचार्य आचार्य अपेस्स पिता गौरवेस अतिरक्षा भवति 'an Achárya ought to be higher in estimation than ten Upádhyáyas, a father than a hundred Acháryas.'

834. Many words have a kind of comparative influence, and require an ablative case, especially यरं, अयरं, अयरं, अय्यदा, अय्यदा, इतरं, परं, पूर्वं, अधिक, कन, अविशिष्ठः; as, प्रश्वालनात् पङ्गस्य अस्पर्शनं यरं 'it is better not to touch mud than to wash it off;' दारिट्रम् अवरं मरणात् 'poverty is less desirable than death;' को मां मिद्धाद् अय्यस् द्वातुं समर्थः 'Who is able to rescue me, other than a friend?' कित्तु दुःखम् अतः परं 'What grief is greater than this?' न स्नुताद् अय्यद् विद्यूपात् 'one ought not to speak differently from what one has heard;' त्वालालाद् अयदा 'at another time than the present;' नरस्य न अयदा मरणाद् भयं 'there is no cause of fear to man from any other quarter than from death;' श्राद्धाहात् (७३१.४,७४९) पूर्व दिनं 'on the day before that of the S'ráddha;' योजन्शताद् अधिकं 'more than a hundred Yojanas;' कान्तोद्नः सङ्गमात् किच्चिद् जनः 'intelligence of a lover is something less than a meeting;' अवाद् अवशिष्टं 'the remainder of the food.'

NUMERALS.

835. The syntax of numerals is explained at 206. The following examples may be added: नवतेर् नराणां 'of ninety men;' पष्टेर् नराणां 'of sixty men;' सहसम्य नराणां 'of a thousand men;' रूपां तथाणां मध्यात् अन्यतमः 'one of these three.'

- a. The aggregative numerals may sometimes be employed at the end of compounds for the cardinals; thus, सैन्यृहयं 'two armies;' विवाह चतुष्टयं 'four marriages.' See 214.
- b. Numerals, if used partitively, may take the genitive; as, अश्वानां जात सहसाखि 'a hundred thousand of the horses:' and, if comparatively, the ablative; as, चियादात् द्विगुक्तो दम: 'a fine the double of that which is in dispute.'

SYNTAX OF PRONOUNS.

- 836. The chief peculiarities in the syntax of pronouns have already been noticed in Chapter V. pp. 94—101. It remains to offer one or two remarks with reference more especially to the relative and interrogative.
- a. In the use of these pronouns a very peculiar attraction is often to be observed; that is, when either a relative or interrogative pronoun has been used, and an indefinite pronoun would naturally be expected to follow, the relative or interrogative are repeated, as in the following examples: यो यस्य (for कस्यचित्) भाव: स्यात् 'whatever may be the disposition of whom (i. e. any one);' यह रोचते यस्मे 'whatever is pleasing to any one;' यो यस्य मांसम् समाति 'whoever eats the flesh of any animal;' यस्य ये गुणा: सन्ति 'whatever excellencies belong to any one;' यह येन गुन्यते 'whatever corresponds with any thing;' क्यां कि शास्त्रम् सम्ययनीयं 'What book is to be read by whom? (i. e. by any one).' See Bopp's Comparative Grammar, vol. II. p. 537.
- 837. The relative and interrogative are sometimes used together, in an indefinite distributive sense; as, यानि कानि मिलाणि 'any friends whatever:' or more usually with चिन् affixed to the interrogative; as, यसी कसीचिन 'to any one whatever.'
- a. The neuter of the interrogative (किं) is often joined with the instrumental to signify 'What is the use of?' there is no need of;' as, श्रुतेन किं यो न धर्मम् सासरेत् किम् सात्यना यो न जितेन्द्रियो भवेत् 'Of what use is scriptural knowledge (to one) who does not practice virtue? Of what use is a soul (to one) whose passions are not kept in subjection?' किं ते स्रोन प्रश्लेन 'What business have you to make this inquiry?' किं वहना 'What need of more!' 'in short.'
- b. As already shown at 761, a relative pronoun is sometimes rendered unnecessary by the use of the relative compound; thus, नगरी चन्द्रिका भौत हर्म्या is equivalent to नगरी यस्याञ्चल्द्रका भौतानि हर्म्याण 'a city whose palaces were silvered by the moon-beams.'
- c. The relative, when followed by a pluperfect tense, may sometimes be expressed by the indeclinable participle; thus, सिंहो ध्यायं हत्वा 'a lion having killed a hunter,' or 'a lion who had killed a hunter.'
- 838. The following examples will illustrate the use of pronouns of quantity and pronominals: यावत: (or यत्संख्यकान्) द्वासान् भुंके तावत: (or तत्संख्यकान्) द्वाति 'as many mouthfuls as he eats, so many he gives away;' यदि रतावन् मद्यं दीयते तदा रतावह ख्यापचानि 'if so much is given to me, then I will give so much instruction;' तेषां सर्वेषां मध्याह एकतनः 'one out of all those.' See also 801.

SYNTAX OF VERBS.

- 839. Nothing is more common in Sanskrit syntax than for the verb to be omitted altogether, or supplied from the context.
- a. This is more especially the case with the copula, or substantive verb; thus, यावन् मेर्हिस्थता देवा यावर् मङ्घा नहीं तले। चन्द्रार्के ममने यावत् तावर विष्राक्ले

चर्य 'as long as the gods have existed in Meru, as long as the Ganges upon earth, as long as the sun and moon in the sky, so long have we (existed) in the family of Brahmans '' परिकोट: पारिटारं ' discrimination (is) wisdom.'

Locative, Genitive, and Nominative absolute.

- 840. The locative case is very commonly used absolutely with participles; as, तस्मिन् जीवित जीविति मृते तस्मिन् मिये पुनः 'he living I live, he dying I die;' खयमनायां रात्नी 'the night being ended;' ज्येष्ठे भाति खन्हे 'the elder brother being unmarried;' खमति उपायान्तरे 'there being no other expedient;' तथा मित 'it being so.' Sometimes the verb is omitted; as, हरे भये 'the danger (being) distant.' When the passive participle is thus used absolutely with a noun in the locative case, the present participle of जम, 'to be,' is often redundantly added; as, तथा कृते मित or तथा खन्षिते 'it being so done *.'
- a. The genitive is less commonly used absolutely; as, आपदाम् आपतन्तीनां 'calamities impending;' पश्यतां नरायां 'the men looking on.'
- b. The nominative is very rarely thus used; as, सुद्धन् में समायात: पुख्यवान् ऋस्मि 'my friend having arrived, I am happy.'
- c. It is evident from the above examples that the locative and genitive absolute often take the place of the particles 'when,' 'while,' 'since,' 'although.'

$Nominative\ case\ after\ the\ Verb.$

841. Verbs signifying 'to be,' 'to become,' 'to appear,' 'to be called,' or 'to be esteemed,' and other passive verbs used denominatively, may take a nominative after them; as, राजा प्रजारालकः स्पात् 'let a king be the protector of his subjects;' सा निरानन्दा प्रतिभाति 'she appears sorrowful;' ग्रामोडरखं प्रतिभाति 'the village appears like a desert;' राजा धर्मो क्राभिधीयते 'a king is called Justice.'

Accusative case after the Verb.

- 842. Transitive verbs generally govern this case; as, विश्वं समर्ज वेधा: 'Brahmá created the universe;' पुष्पाणि चिनोति नारी 'the woman gathers flowers;' प्राणान् नहीं मुमूर्पु: 'the dying man gave up the ghost;' मधु वर्जयेत् 'one should avoid wine;' तस्यं बृहि 'speak the truth.'
- 843. So also verbs of motion; as, सरित तीर्थं मुनि: 'the holy man goes to the place of pilgrimage;' नद्यः समुद्रं द्रवन्ति 'rivers run into the ocean;' अमित महीं 'he wanders over the earth.'

^{*} Possibly the object of adding the word sati may be to show that the passive participle is here used as a participle, and not as a past tense. So also in commentaries **स**ित is placed after a word like आगर्जित, to indicate the loc. c. sing. of the pres. part., as distinguished from the 3d sing. of the pres. tense.

844. Verbs of motion are not unfrequently used with substantives, to supply the place of other verbs; as, स्याति 'the goes to fame,' for 'he becomes famous;' समताम् एति 'he goes to equality,' for 'he becomes equal;' तयोर् मिलताम् आजगाम 'he came to the friendship of those two,' for 'he became a friend of those two;' पश्चलं गतः 'he went to death,' for 'he died;' नृपति तुष्टिं नयति 'he brings the king to satisfaction,' for 'he satisfies,' &c.

a. The following are other examples: अन्येषां पीडां परिहरित 'he avoids paining others;' अप्राप्यम् इन्छित 'he desires what is unattainable;' विद्यां चिनायेत् 'he should think on wisdom;' अग्न्यम् आरोहित 'he mounts his horse;' कम्मीणि आरोभिरे 'they began the business;' गतान् मा गुच: 'grieve not for the departed;' सर्ध्व,लो-कापिपायम् अर्हित 'he deserves the sovereignty of the universe;' पर्वत्कन्दरं भेते 'he lies down in a cave of the mountain;' गां द्यीरं पियन्तीं न निवारयेत् 'one ought not to prevent a cow from drinking milk.'

845. There are certain verbs which take a redundant accusative case after them of a substantive derived from the same root; as, शपर्य शेपे 'he swore an oath;' वस्ति वासं 'he dwells;' वस्ति वृद्धिं 'he conducts himself;' वाक्यं वद्ति 'he speaks a speech;' नद्ति नादं 'he raises a cry' (cf. the Greek expressions λέγω λόγου, χαίρω χαράν, &c.).

Double Accusative after the Verb.

846. Verbs of asking govern a double accusative; as, देवं वरं याचते 'he seeks a boon of the god;' धनं राजानं प्रार्थयते 'he begs money from the king.' Of speaking; as, राजानं वचनम् अववीत् 'he addressed a speech to the king.' Of leading; as, तं गृहं नयति 'he leads him home.'

847. Causal verbs; as, स्रातिष्यं भोजयित स्तर्नं 'he causes the guest to eat food;' त्वां बोधयामि यत् ते हितं 'I cause you to know what is for your interest;' जिप्यं वेदान् स्वध्यापयित गुरु: 'the Guru teaches his pupil the Vedas;' तां गृहं प्रवेशयित 'he causes her to enter the house;' फल:पुप्पोद्कं ग्राह्यामास नृपात्मजं 'he presented the king's son with fruits, flowers, and water;' पुत्रम् सङ्गम् सारोपयित 'she causes her son to sit on her lap' (literally, 'her hip'); विद्या नरं नृपं सङ्गमयित 'learning causes a man to have access to a king.'

a. Other examples arc, तं सेनापतिम् सिभिपिषु; 'they inaugurated him general,' more usually joined with an acc. and loc.; देवं पति वरयति 'she chooses a god for her husband;' खविनोति कुमुनानि वृद्यान् 'she gathers blossoms from the trees;' तान् प्राहिशोट् यम्सादनं 'he sent them to the abode of Yama' (Hades); ख्वेष्टितानि नरं गुरुत्वं विपरीततां वा नयन्ति 'his own acts lead a man to eminence or the reverse.'

Instrumental case after the Verb.

848. Any verb may be joined with the instrumental, to express 'the instrument or cause or manner' of the action; as, पुर्व यातेन झायति 'the flower fades by reason of the wind;' अही: क्रीडिंग 'he

plays with dice;' मेघोडिन वैर्पेर् निवीपयित 'the cloud puts out the fire with its rain;' मुखेन जीवित 'he lives happily.'

a. In this sense many causals take an instrumental; as, तां निष्टाचैर् भोजयामाम 'he caused her to eat sweetmeats;' पश्चिभि: पिखडान् खादयति 'he causes the pieces to be eaten by the birds.'

849. After verbs of motion this case is used in reference either to the vehicle by which, or the place on which, the motion takes place; as, र्षेन प्रयाति 'he goes in a chariot;' अश्वेन सञ्चर्ति 'he goes on horseback;' मार्गेश गर्द्धाते 'he goes on the road;' शस्प होत्रेश गर्द्धात 'he goes through a field of corn;' पुत्रुवे सागरं नौक्या 'he navigated the ocean in a boat.' Similarly, मुसाव नयनै: सल्लिलं 'tears flowed through the eyes.'

a. After verbs of carrying, placing, &c., it is used in reference to 'the place' on which any thing is carried or placed; as, वहित मूद्री इन्पर्न 'he bears fagots on his head;' कुकुर: स्क्रन्थन उद्योत 'the dog is borne on the shoulders.' कु is found with this case in the sense of placing; as, शिरमा पुत्रम् सकरोत् 'he placed his son on his head.' The following are other examples: शिष्येण गच्छित गुह: 'the master goes in company with the pupil;' मन्त्रयामाम मन्त्रिभि: 'he consulted with his ministers;' but in this sense मह is usually placed after it. भन्ना भाष्येया मङ्गच्छित 'the husband meets the wife;' संयोजयित रचं हये: 'he harnesses the horses to the chariot;' देहेन वियुज्यते 'he is separated from the body,' more usually with the ablative. युग्यते शाहुभि: 'he fights his enemies,' or शाहुभि: सह, &c.; वैरं न किनियत मह कुर्योत 'one ought not to be at enmity with any one.'

850. Verbs of boasting; as, विद्या विकाय 'you boast of your learning;' परेपां यज्ञासा स्थायसे 'you glory in the fame of others.' Of swearing; as, धनुपा ज्ञोपे 'he swore by his bow.' Of thinking, reflecting; as, मनसा विचित्त्य 'thinking in his mind.'

851. Verbs denoting liberation, freedom from, sometimes take an instrumental after them; as, सर्वे पापे: प्रमुच्याते 'he is released from all sins.'

852. Verbs of buying and selling take the instrumental of the price; as, सहसेर् जप मूखीखाम् एकं क्रीखीप्य परिदर्त 'buy one wise man even for thousands of fools;' गवां सहसेख गृहं विक्रीखीते 'he sells his house for a thousand cows.'

Dative after the Verb.

853. All verbs in which a sense of imparting or communicating any thing to any object is inherent, may take an accusative of the thing imparted, and a dative of the object to which it is imparted. (Frequently, however, they take a genitive or even a locative of the object; see 857.) पुलाय मोदकान् ददाति 'he gives sweetmeats to his son;' विमाय गां प्रतिभृष्णोति 'he promises a cow to the Bráhman;' देवदत्ताय भनं भारपति 'he owes money to Devadatta;' क्यां तस्मे प्रतिपादय 'consign the maiden to him,' more usually with the locative; see 861.

a. Other examples of the dative are, तेपां विनाशाय प्रकुर् ते मन: 'he sets his mind on their destruction;' गमनाय मितं दधी 'he set his mind on departure,' or with the locative. तन् मसं रोचते 'that is pleasing to me;' शिष्णेन्य: प्रवस्थानि तत् 'I will declare this to my pupils;' मर्छ राज्ञे विज्ञापयति 'he makes known all to the king,' these are also joined with the genitive of the person. अमृतत्वाय अस्पते 'he is rendered fit for immortality;' प्रभवित मम वधाय 'he has the power to kill me;' तान् मातुर वधाय असोदयत् 'he inciled them to the murder of their mother;' पुताय क्ष्यित 'he is angry with his son.'

Ablative after the Verb.

854. All verbs may take an ablative of 'the object' from which any thing proceeds, or arises, or is produced; as, भश्यति वृक्षात् पत्नं 'the leaf falls from the tree;' रुधिरं छत्रति गातात् 'blood flows from the body;' आसनात् उत्तिष्ठति 'he rises from his scat;' मृत्पिसदतः (719) कर्तता कुरुते यहह इच्छति 'from the lump of clay the artist makes whatever he wishes;' चिनयाह् याति पात्रतां 'from education a person attains capacity;' निर्माम नगरात 'he went out from the city.'

855. Verbs of fearing are joined with the ablative, and sometimes with the genitive; as, सागुर न तथा मृत्योर् थिमेति यथा अनृतात् 'a good man does not fear death so much as falsehood;' मा अन्दाद् थिमोत 'be not afraid of a noise;' दखाद् उद्विजते जगत् 'the whole world stands in awe of punishment;' दिक्षणस्य ते कृत्यश्वापस्य थिमेमि 'I fear thee, a cunning penitent;' see 859.

856. Verbs which express *superiority* or *comparison* govern an ablative; as, प्रापणात् कामानां परित्यागो चित्रिप्यते 'the abandonment of pleasure is *superior* to (better than) the possession.'

a. Other examples of verbs followed by ablative cases are, प्रामादाद् अवरोहित 'he descends from the palace;' विष्णुः स्मोद् अवतार 'Vishnu descended from heaven;' कनक्मूलम् अङ्गाद् अवतारयित 'he takes off (causes to descend) the golden bracelet from his body;' नियम्ति पापात् 'he ceases from wickedness;' वचनाद् विरराम 'he left off' speaking;' नरकात् पितरं लायते पुत्रो धार्मिनः 'a virtuous son saves his father from hell;' अध्यमेध महसात् मत्यम् अतिरिच्यते 'truth is superior to a thousand sacrifices;' स्वहितात् प्रमाद्यति 'he neglects his own interest;' मिलम् अकुशुलाद नियारपति 'a friend guards one from evil.'

Genitive after the Verb.

857. The genitive in Sanskrit is constantly interchangeable with the dative, locative, or even accusative*. It is more especially, however, used to supply the place of the first of these cases, so that

^{*} This vague use of the genitive to express 'various relations' prevails also in early Greek.

almost all verbs may take a genitive as well as dative of 'the object' to which any thing is imparted. For example, दरिद्रम्य धनं ददाति 'he gives money to the poor.'

858. It may be used for the locative after verbs of consigning, as निश्चेषं मन समर्पेयित 'he deposits a pledge with me;' or of trusting, as न कश्चित् स्त्रीयां श्रह्मपति 'nobody puts trust in women;' and for the accusative in examples such as श्चिनितानि दु:खानि श्रायानित देहिनां 'unexpected ills come upon corporeal beings.'

859. It is sometimes used after verbs of fearing; as, तस्य किं न भेषा मि 'Why art thou not afraid of him?' see 855. Also after verbs of longing for, desiring, envying; as, श्वमानस्य आकां होत् 'he should desire contempt;' स्पृह्यानि पुरुपायां सच्छायां 'l envy men who possess eyes.'

a. Other examples of verbs followed by genitive cases are, अज्ञानताम् अस्ताकं स्थापय कस्य असि भार्यो 'tell us, who are ignorant of it, whose wife you are;' कस्य (for कस्मात) विश्वति धार्मिकाः 'Of whom are the righteous afraid?' यद् अत्यस्य प्रतिज्ञानीते न तद् अत्यस्य द्वात् 'one should not give to one what one promises to another;' मम न भृषोति 'he does not hear me' (cf. the Greek usage); मम स्मरेः 'remember me,' or with the accusative. अस्माकं मृत्युः प्रभवति 'death overcomes us;' अग्निर् न तृष्यति काष्टानां 'fire is not satisfied with fuel;' तेमां समेपाः 'forgive them.'

Locative after the Verb.

860. This case is very widely applicable, but, as elsewhere remarked, is frequently interchangeable with the dative and genitive. The first sense of the locative requires that it should be united with verbs in reference only to 'the place' or 'time' in which any thing is done; as, पद्धे मज्जित 'he sinks in the mud;' पुरे चनति 'he dwells in the city;' रिण्मूर्ष्ट्वि तिवित 'he stands in the front of the fight;' म्यीदिये प्रमुखी 'at sunrise he awakes.'

861. The transition from 'the place' to 'the object' or 'recipient' of any action is natural; and hence it is that verbs are found with the locative of 'the object' to which any thing is imparted or communicated, as in the following examples: मा प्रयक्त ईश्वरे थनं 'bestow not money on the mighty;' तस्मिन् कार्याखि निश्चिपामि 'I entrust my affairs to him;' पुत्ने चहुर्रीयकं समर्पयति 'he consigns a ring to his son;' योग्ये सचिवे त्यस्पति राज्यभारं 'he entrusts the burden of the kingdom to a capable minister;' राज्ञि or राजकुले निवेदयित 'he informs the king;' प्रेतं भूमी निद्ध्यात् 'one should place (bury) a dead man in the ground;' धर्मो मनो द्धाति 'he applies his mind to virtue.'

a. In this sense कू is used; as, पृष्ठे इन्धनम् अकरोत् 'he placed the wood on his back;' मितं पापे करोति 'he applies his mind to sin.'

862. When \$\overline{\text{cl}}\$, 'to give,' is used for 'to put,' it follows the same analogy; as,

तस्य पुन्छाग्ने हन्तं देहि 'put your hand on the end of its tail;' अस्म चये परं दरी 'he placed his foot on a heap of ashes.' Similarly, वस्त्राचले धृतोऽस्ति 'he was held by the skirt of his garment.' So also verbs of seizing, striking; as, केजेपु गृह्मानि or आकृपनि 'he seizes or drags him by the hair;' सुन्ने प्रहरित 'he strikes a sleeping man.'

863. The locative is often put for the dative in sentences where the latter case stands for the infinitive; thus, भर्त्तुर् अन्त्रेपणे त्वरस्व 'hasten to seek thy spouse;' नलस्य आनयने यतस्व 'strive to bring Nala hither;' न श्रेकुम् तस्य धनुपो ग्रहणे 'they could not hold that bow.'

a. Other examples are. उग्रे तपिस वर्त्तते 'he is engaged in a very severe penance;' पर्कार्योपु मा व्यापृती भृ: 'do not busy yourself about other people's affairs;' विषयेषु मन्यते 'he is addicted to objects of sense;' मर्झलोक् हिते रमते 'he delights in the good of all the world;' हुर्गाधिकारे नियुज्यते 'he is appointed to the command of the fort;' हो वृपभी भुरि नियोजयित 'he yokes two bulls to the pole;' मैनापये अभिषिद्ध मां 'unoint me to the generalship;' यतते पाप्निग्रहे 'he strives to suppress evil-doers.'

b. न महिथे युन्यते वाकान ईतृष्ठां 'such language is not suited to a person like me;' प्रभुन्वं त्विय प्रयुन्यते 'sovereignty is suited to you;' आमने उपाविश्वत् 'he reclined on a scat;' वृष्णाम् आसस्य 'sit thou on a cushion;' शातुषु विश्वसिति 'he confides in his enemies;' चरक्यो: पत्ति 'it falls at his feet;' लुढति पादेषु 'it rolls at the feet.'

Change of case after the same Verb.

864. This sometimes occurs; as, विधुरो धृतराष्ट्राय कुली च गान्धार्य्धाः सर्धे न्यवेद-येतां 'Vidhura and Kunti announced every thing, the one to Dhritaráshtra, the other to Gándhárí' (Astrasikshá 34), where the same verb governs a dative and genitive. Similarly, in the Hitopadesa, शृह्लियां विद्यासो न कर्न्नचः स्त्रीपु च 'confidence is not to be placed in horned animals or women.'

INSTRUMENTAL CASE AFTER PASSIVE VERBS.

865. The prevalence of a passive construction is the most remarkable feature in the syntax of this language. Passive verbs are joined with 'the agent, instrument, or cause,' in the instrumental case *, and agree with 'the object' in number and person; as, योतेन रज उद्दूषते 'the dust is raised by the wind;' तेन सर्बद्धाणि सज्जीिक्रयनां 'let all things be prepared by him;' इपुनिर् आदित्योऽन्तरभीयत 'the sun was concealed by arrows.'

866. But the passive participle usually takes the place of the past tenses of the passive verb, and agrees with 'the object' in gender and case as well as number;

^{*} There are a few instances of the agent in the genitive case; as, मम कृतं पापं. 'a crime committed by me,' for मया.

as, नेतािण ममाप्रुतािन वारिणा '(their) eyes were suffused with tears;' तेन उर्ऋ (इटं being understood) 'it was said by him.' Compare 895.

- a. This instrumental construction after passive verbs is a favourite idiom in Sanskrit prose composition, and the love for it is remarkably displayed in such phrases as the following: दु:खेन गम्यते, 'he is gone to by misery,' for दुखं गच्छति; and आगम्यतां देवेन, 'let it be come by your majesty,' for खागच्छत् देय:; and again, समाभिर् एकत स्थीयतां, 'let it be remained by us in one spot,' for 'let us remain in one spot;' येन मार्गेण इष्टं तेन गम्यतां 'by whatever road it is desired, by that let it be gone.'
- b. Active or causal verbs, which take a double accusative, will retain one accusative when constructed passively; but the other accusative passes into a nominative case: thus, instead of स मां पर्पाणि उवाच, 'he addressed me in harsh words,' may be written तेन अहं पर्पाणि उकाः, 'by him I was addressed in harsh words.'

SYNTAX OF THE INFINITIVE MOOD.

867. The infinitive in Sanskrit cannot be employed with the same latitude as in other languages. Its use is very limited, corresponding to that of the Latin *supines*, as its termination *um* indicates.

a. Let the student, therefore, accurately distinguish between the infinitive of Sanskrit and that of Latin and Greek. In these languages we have the infinitive made the subject of a proposition; or, in other words, standing in the place of a nominative, and an accusative case often admissible before it. We have it also assuming different forms, to express present, past, or future time, and completeness or incompleteness in the progress of the action. The Sanskrit infinitive, on the other hand, can never be made the subject or nominative case to a verb, admits of no accusative before it, and can only express indeterminate time and incomplete action. Wherever it occurs it must always be considered as the object, and never the subject, of some verb expressed or understood. And, as the object of the verb, it may be regarded as equivalent to an indeclinable substantive, in which the force of two cases, an accusative and dative *, is inherent, and which differs from other substantives in its power of governing a case. Its use as a substantive, with the force of the accusative case, corresponds to one use of the Latin infinitive; thus, तत् सर्द्धं छोतुम् इच्छानि 'I desire to hear all that,' 'id audire cupio,' where स्रोतुं and audire are both equivalent to accusative cases, themselves also governing an accusative. Similarly, रोदितुं प्रवृत्ता 'she began to weep;' and महीं जेतुम् आरेभे 'he began to conquer the earth,' where महीजयम् आरेभे, 'he began the conquest of the earth,' would be equally correct.

^{*} Bopp considers the termination of the infinitive to be the accusative of the affix $\bar{\mathfrak{q}}$ (459. a); and it is certain that in the Vedas an irregular infinitive in $\bar{\mathfrak{a}}$ and $\bar{\mathfrak{a}}$ is found, which would seem to be the dative of the same affix. See Páṇini III. 4. 9.

868. But the Sanskrit infinitive most commonly involves a sense which belongs especially to the Sanskrit dative, viz. that of 'the end' or 'purpose' for which any thing is done; thus, ज्ञायकान् भिष्ततुम् ज्ञायकानि 'he comes to devour the young ones;' ज्ञावृन् योहुं सैन्यं प्राहिकोत् 'he sent an army to fight the enemy.'

a. In these cases it would be equally correct in Sanskrit to substitute for the infinitive the dative case of the verbal noun, formed with the affix ana; thus, अञ्चलाय, 'for the eating,' for भशितुं; योपनाय, 'for the fighting,' for योहुं; and in Latin the infinitive could not be used at all, but either the supine, devoratum, pugnatum, or, still more properly, the conjunction with the subjunctive mood, 'ut devoret,' 'ut pugnarent.' The following are other examples in which the infinitive has a dative force in expressing 'the purpose' of the action: पानीयं पातुं नदीम् अनम्म 'he went to the river to drink water;' मम बच्चनं छेन्नुम् उपमर्पति 'he comes to cut asunder my bonds;' मां लातुं समर्थः (ऋस्ति being understood) 'he is able to rescue me;' पाञान् संवरितुं सयत्वो वसूव 'he busied himself about collecting together the snares.'

869. The Sanskrit infinitive, therefore, has more of the character of a supine than an infinitive; and in its character of supine is susceptible of either an active or passive signification. In its passive character, however, like the Latin supine in u, it is joined with certain words only, the most usual being the passive verbs ज्ञक् 'to be able' and युज्ञ 'to be fitting,' and their derivatives; thus, त्यक्तुं न ज्ञक्यते 'it cannot be abandoned;' पाज्ञो न छेचुं ज्ञक्यते 'the snare cannot be cut;' न ज्ञक्याः कमाधातुं ते दोषाः 'those evils cannot be remedied;' खेतुं न युज्यते 'it is not fitting to be heard;' छेजुम् अयोग्यः 'unfit to be cut;' त्या न युज्जम् अवमानम् अस्य कर्ज्ञुं 'contempt is not proper to be shown by thee for him.'

a. The following are other instances: मस्टप: कारियतुम् आरआ: 'the shed was begun to be built;' राज्ये अभिषेक्कं भवान् निरूपित: 'your honour has been selected to be inaugurated to the kingdom;' अहीति कर्ज्ञं 'it deserves to be done' (Naiśadiya V. 112); कर्ज्ञम् अनुचितं 'improper to be done' (cf. factu indignum and ποιείν αἰσχρόν); सा मोचियतुं न्याय्या 'she ought to be released.'

870. The root अई 'to deserve,' when used in combination with an infinitive, is usually equivalent to 'an entreaty' or 'respectful imperative;' as, धम्मान् नो वक्षम् अर्हिस 'deign (or simply 'be pleased') to tell us our duties.' It sometimes has the force of the Latin debet; as, न मानुशी त्याम् अभिभाष्टुम् अर्हिस 'such a person as I ought not to address you;' न एनं शोचितुम् अर्हिस 'you ought not to bewail him.'

871. The infinitive is sometimes joined with the noun **新**邦, 'desire,' to form a kind of compound adjective, expressive of 'the wish' to do any thing, but the

final m is then rejected; thus, दृष्टुकामः, नमा, नमं, 'desirous of seeing;' जेतुकामः, नमा, नमं, 'wishing to conquer.'

a. In the 2d Act of Vikramorvasi the infinitive is joined in the same way with मनस; thus, स दृष्टमना: 'he has a mind to see.'

872. When kim follows the infinitive a peculiar transposition sometimes takes place, of which the 1st Act of S'akuntalá furnishes an example; thus, मर्खो ते ज्ञातुम इच्छामि किम् अनया वैखानसं व्रतं निषेवितव्यं, 'I wish to know thy friend, whether this monastic vow is to be observed by her,' for ज्ञातुम इच्छामि किं सस्या ते &c. 'I wish to know whether this vow is to be observed by thy friend.'

USE AND CONNEXION OF THE TENSES.

873. PRESENT TENSE.—This tense, besides its proper use, is often used for the future; as, क्क गच्छामि 'Whither shall I go?' कदा त्यां पश्यामि 'When shall I see thee?' किं करोति 'What shall I do?' and sometimes for the imperative; as, तत कुमैस् 'let us do that.'

874. In narration it is commonly used for the past tense; as, स भूमिं स्पृष्टा करेगी स्पृश्चात जूते च 'he, having touched the ground, touches his ears, and says.'

875. It may denote 'habitual' or 'repeated' action; as. मृगः प्रासहं तत्र गाला शस्यं खादिति 'the deer going there every day was in the habit of eating the corn;' यदा म मूपिकशान्दं शृक्षोति तदा विडालं संवर्द्धयित 'whenever he heard the noise of the mouse, then he would feed the cat.'

876. It is usually found after याचन् and ताचन् ; as, याचन् मे दन्ता न दुद्धान्ति ताचन् तय पाशं छिन्द्रि 'as long as my teeth do not break, so long will I gnaw asunder your fetters.' (Compare the use of the Latin dum.)

877. The present tense of the root ष्रास्, 'to sit,' 'to remain,' is used with the present participle of another verb, to denote 'continuous' or 'simultaneous' action; as, पञ्चां वर्ष कुद्वैत् श्वास्ते 'he keeps making a slaughter of the beasts;' मम पश्चार् श्वागळत् श्वास्ते 'he is in the act of coming after me.'

878. The particle स्म, when used with the present, gives it the force of a perfect; as, प्रविश्वान्ति स्म पुरीं 'they entered the city;' निवसन्ति स्म 'they dwelt.'

879. POTENTIAL.—The name of this tense is no guide to its numerous uses. Perhaps its most common force is that of 'fitness' in phrases, where in Latin we should expect to find oportet with the infinitive; as, आगतं भयं वीस्य नर: जुन्याद् ययोचितं 'having beheld danger actually present, a man should act in a becoming manner.'

880. It is also employed, as might be expected, in indefinite general expressions; as, यस्य यो भाव: स्यात् 'whatever may be the disposition of any one;' यदा राजा स्वयं न कुर्यात् कार्यः दर्शनं 'when the king may not himself make investigation of the case;' अप्राप्त कार्यः वचनं द्ववन् प्राप्तुयाद् अपमानं 'by uttering unseasonable words one may meet with dishonour.'

a. Especially in conditional sentences; as, यदि राजा द्राउं न प्रणयेत् खाम्यं क्रिमिंग्निन् न्यात् सर्व्वै,सेतवछ भिद्येरन् 'if the king were not to inflict punishment, ownership would remain with nobody, and all barriers would be broken down.' Sometimes the conjunction is omitted; as, न भवेत् 'should it not be so;' न स्यात् पराधीन: 'were he not subject to another.'

881. The potential often occurs as a softened imperative, this language, in common with others in the East, being averse to the more abrupt form; thus, गर्छः; 'do thou go,' for শহু; and অহান্ দকানি, 'let him eat fruits,' for সানু.

882. IMPERATIVE.—This tense yields the usual force of 'command' or 'entreaty;' as, आधानिह 'take courage;' माम् अनुसार 'remember me.' मा, and not न, must be used in prohibition; as, अनृतं मा बृहि 'do not tell a falsehood;' मा लज्जस्व 'be not ashamed;' see 889. The first person is used to express 'necessity,' see example at 796.

a. The 3d pers. singular is sometimes used interjectionally; thus, भवतु 'Be it so!' 'Well!' यातु 'Let it go!' 'Come along!' 'Come!'

883. It is sometimes employed in conditional phrases to express 'contingency;' as, अनुजानीहि मां गन्छामि 'permit me, (and) I will go,' i. e.' if you will permit me, I will go;' आजापय हिम्म हुष्टुजन 'if you command me, I will kill the villain;' अभयावार्य में पन्छ गन्छामि 'if you give me a promise of security, I will go.'

884. FIRST PRETERITE.—Although this tense properly has reference to 'past incomplete action' (see 242), and has been so rendered in the examples given at pp. 198—267, yet it is most commonly used to denote 'indefinite past time,' without any necessary connexion with another action; as, अर्थ ग्रहीतुं पत्नम् अकरवं 'I made an effort to collect wealth,' not necessarily 'I was making.'

885. SECOND PRETERITE.—As observed at 242, this tense is properly used to express 'an action done at some definite period of past time;' as, कोंग्रन्थान्यो नृपितं दशरपं चक्रान्दुः 'Kausalya´ and the others bewailed king Das´aratha.' It is frequently, however, employed indeterminately.

886. FIRST FUTURE.—This tense expresses 'definite futurity;' as, तामु दिशु कामस्य फलं लभाति 'in those regions thou shalt obtain the fruit of thy desire;' but is not so frequently found as the second future.

887. SECOND FUTURE.—This tense, although properly indefinite, is employed to express 'all degrees and kinds of futurity,' immediate or remote, definite or indefinite; as, स्वादु पयः पास्यमि 'thou shalt

drink sweet water;' तत्र अवश्यं पत्नीं दृष्ट्यित 'there certainly he will see his wife.'

- a. It is sometimes used for the imperative; as, यह देवं तह दास्यिम 'whatever is to be given, that you will give,' (do thou give.)
- 888. THIRD PRETERITE.—This tense properly expresses 'time indefinitely past;' as, अभूत नृप: 'there lived (in former times) a king;' see 242.
- 889. It is also employed to supply the place of the imperative, after the prohibitive particle मा or मास्म, the augment being omitted; as, मा कृषा: 'do not make;' मा त्यादी: समर्थ 'do not lose the opportunity;' मास्म अनृतं वाती: 'do not tell an untruth;' मा कुथ: 'do not be angry;' मा जुदा: 'do not grieve;' मा हिंमी: 'do not injure;' मा भियी: 'be not afraid.'
- 890. BENEDICTIVE.—Only one example of this tense occurs in the Hitopadeśa: निसं भूयात् सकल मुखायसित: 'May he constantly be the abode of all happiness!' It is chiefly used in pronouncing benedictions. Also in imprecations.
- a. In the latter case a noun formed with an affix ani is frequently used; thus, अजीविनम् ते भूयात् 'May there be loss of life to thee!' 'Mayst thou perish!'
- 891. CONDITIONAL.—This tense is even less frequent than the last. It is used in conditional propositions, as illustrated by the following example from Manu: यदि राजा दर्शं न प्रस्पयेत् तदा शृले मल्यान् इव अपस्थन् दुवंलान् बलवत्राः 'if the king were not to inflict punishment, then the stronger would roast the weak like fish on a spit;' or, according to the Scholiast, हिंसाम् अकरिप्यन् 'would cause injury.'

SYNTAX OF PARTICIPLES.

- 892. Participles in Sanskrit often discharge the functions of the tenses of verbs. They are constantly found occupying the place of past and future tenses, and more especially of passive verbs, insomuch that an instance of a passive in any other tense than the present or imperative rarely occurs.
- 893. Participles govern the cases of the verbs whence they are derived; as, व्यापं पश्यन् 'seeing the fowler;' अरख्ये चरन् 'walking in the forest;' तत् कृतवान् 'he did that;' शब्दम् आकर्ष 'having heard a noise;' पानीयम् अपीता गतः 'he went away without drinking water.'
- a. In the case of passive participles, as will presently appear, the agent is put in the instrumental case; and the participle agrees with the object, like an adjective.

Present Participles.

894. These are not so commonly used in Sanskrit composition as past and future participles, but they are often idiomatically employed, especially where in English the word 'while' or 'whilst' is introduced; thus, अहं दक्षिणाराये चरन् अपत्र्यं 'whilst walking in the southern forest, I beheld,' &c.

Past Passive Participle.

895. This most useful participle is constantly used to supply the place of a perfect tense passive, sometimes in conjunction with the auxiliary verbs as and bhú, 'to be;' thus, जादिष्टोडिम 'I am commanded;' वयं विस्मिता: स्म: 'we are astonished' (compare 866). Of course the participle is made to agree adjectively with the object in gender, number, and case, as in Latin; and the agent, which in English would probably be in the nominative, and in Latin in the ablative, becomes in Sanskrit instrumental. Thus, in Sanskrit, the phrase 'I wrote a letter' would not be so idiomatically expressed by अहं पत्नं लिलेख, as by मया पत्नं लिखितं or मया पत्नं लिखितं जासीत 'by me a letter was written,' 'a me epistolu scripta.' So again, तेन बन्धनानि चित्रति 'by him the bonds were cut' is more idiomatic than स वन्धनानि चित्रति 'he cut the bonds;' and तेन उक्तं 'by him it was said' is more usual than स उनाच 'he said *.'

- 896. But frequently the past passive participle is used as an active past participle; in which case it may sometimes govern the accusative case, like a perfect tense active; thus, स वृक्षम् आरुढ: 'he ascended the tree;' स गृहं गतः or आगतः' he went home;' वर्षे तीर्थ: 'having crossed the road;' अहं पद्योम् अवतीशिऽस्मि 'I have descended to the road;' अहं नगरीम् अनुप्राप्तः 'I reached the city;' आवाम् आग्रमं प्रविशे स्वः 'we two have entered the hernitage.' But observe, that its active use is generally, though not invariably, restricted to verbs which involve the idea of "motion," and to a few neuter verbs. The following are other examples: पश्चिण उत्पतिताः 'the birds flew away;' स मृतः 'he died;' व्याघो निवृतः 'the fowler returned;' स अश्वितृ प्रवृतः 'he proceeded to eat;' स प्रमुतः 'he fell asleep;' ते स्थिताः 'they stood.'
- a. Occasionally this participle is susceptible of a present signification; thus, स्थित 'stood' may sometimes be translated 'standing,' and भीत 'fearing.'
- b. The neuter of the passive participle is sometimes used as a substantive; thus, दर्ज 'a gift;' खातें 'an excavation;' अर्ज 'food;' दुग्धे 'milk.'

^{*} This instrumental or passive construction, which is so prevalent in Sanskrit, has been transferred from it to Hindí, Maráthí, Guzerátí, and other dialects of India. The particle *ne* in Hindí and Hindústání corresponds most clearly to the Sanskrit $\overline{\bullet}$ *na*, the final letter of the commonest termination for the instrumental case; and this particle can never occasion any difficulty if so regarded.

Active Past Participle.

897. This participle is much used (especially in modern Sanskrit and the writings of commentators) to supply the place of a perfect tense active. It may govern the case of the verb; as, महीं श्रुतवान् 'he heard every thing;' पत्नी पतिम् आलिङ्गितवाती 'the wife embraced her husband;' राज्ञो हस्ते फलं दत्तवान् 'he gave the fruit into the hand of the king;' तत् कृतवती 'she did that.' This participle may also be used with the auxiliaries as and bhú, 'to be,' to form a compound perfect tense; thus, तत् कृतवान् अस्ति 'he has done that;' तत् कृतवान् भविष्यित 'he will have done that.'

Indeclinable Past Participles.

898. The sparing use made in Sanskrit composition of relative pronouns, conjunctions, and connective particles, is mainly to be attributed to these participles, by means of which the sense of a clause may be suspended, and sentence after sentence strung together without the aid of a single copulative. They occur in narration more commonly than any other kind of participle; and some of the chief peculiarities of Sanskrit syntax are to be traced to the frequency of their occurrence.

899. They are generally used for the past tense, as united with a copulative conjunction, and are usually translatable by the English 'having,' 'when,' 'after,' 'by,' see 555; thus, तद् आकर्ष निश्चितम् एव अयं कुक्कर इति मत्वा द्यागं त्यक्ता सात्वा सगृहं ययो 'having heard this, having thought to himself "this is certainly a dog," having abandoned the goat, having bathed, he went to his own house.' In all these cases we should use in English the past tense with a conjunction; thus, 'When he had heard this, he thought to himself that it must certainly be a dog. He then abandoned the goat, and, when he had bathed, went to his own house.'

- a. It is evident from the above example that the indeclinable participles often stand in the place of a pluperfect tense, a tense which does not really exist in Sanskrit.
- b. But although they always refer to something past, it should be observed that they are frequently rendered in English by the present participle, as in the fifth sentence of the story at 930.

900. Another, though less frequent, use of them is as gerunds in do; thus, नरा: शास्त्रास्य स्थीत * भविन परिक्रता: 'men become wise by reading the S'ástras;'

^{*} As the Latin gerund is connected with the future participle in dus, so the Sanskrit indeclinable participle in ya is connected with the future passive participle in ya.

भायों सम् सकायों शतं कृता भर्तेच्या 'a wife is to be supported even by doing a hundred wrong things;' किं पौरुषं हत्वा मुगं 'What bravery is there in killing a sleeping man?'

- 901. The termination त्वा $tw\acute{a}$ of this participle is probably the instrumental case of the same affix of which the infinitive termination (um) is the accusative; see 459. a. There can be little doubt that the indeclinable participle bears about it much of the character of an instrumental case. It is constantly found in grammatical connexion with the agent in this case; thus, सर्द्ध: पशुभिर् मिलित्वा सिंहो विज्ञम: 'by all the beasts having met together the lion was informed;' सर्द्धर जालम् आदाय उद्दीयतां 'by all having taken up the net let it be flown away.'
- a. Another and perhaps stronger proof of its instrumental character is, that the particle घंछं, which always governs the instrumental case, is not unfrequently joined with the indeclinable participle; thus, घंछ भोजनेन, 'enough of eating,' is with equal correctness of idiom expressed by घंछ भुका; see 918. a.

Future Passive Participles.

- 902. The usual sense yielded by this participle is that of 'fitness,' 'obligation,' 'necessity' (see 568); and the usual construction required is, that the agent on whom the duty or necessity rests be in the instrumental case, and the participle agree with the object; as, त्वया प्रवृत्तिर् न वियेषा 'by you the attempt is not to be made.'
- a. Sometimes, however, the agent is in the genitive case; thus, द्विजातीनां भक्ष्यम् अर्न्न 'boiled rice is to be eaten by Bráhmans.' Compare 865, note.
- 903. Occasionally the future passive participle may yield a sense equivalent to 'worthy of,' 'deserving of;' thus, कश्य 'deserving a whipping;' ताउनीय 'worthy of being beaten;' मुसस्य 'deserving death by pounding;' वथ्य 'worthy of death.'
- 904. If the verb govern two accusatives, one may be retained after the future passive participle; as, नयन मिललं त्या शान्तिं नेयं 'the tear of the eye is to be brought to assuagement by thee.'
- 905. Occasionally the neuter of this participle is used impersonally; in which case it does not agree with the object, but may govern it in the manner of the verb; thus, मया ग्रामं गन्तव्यं, 'it is to be gone by me to the village,' for मया ग्रामो गन्तव्यः. So also, त्वया सभां प्रवेष्ट्यं 'by you it is to be entered into the assembly.'
- a. The neuter भवितव्यं (from भू) is thus used, and, in accordance with 841, requires the instrumental after it, as well as before; thus, केनापि कारणेन भवितव्यं 'by something it must become the cause,' i.e. 'there must be some cause;' स्वामिना सविशेषेण भवितव्यं 'a ruler ought to be possessed of discrimination;' मया तव अनुवरेण भवितव्यं 'I must become your companion.'
- 906. Similarly, the neuter of মূকা may be adverbially used, and impart at the same time a passive sense to the infinitive; thus, पवन: মূকাৰ স্থানিদ্ধিনুদ্ সন্ধি for पवन: মূকাৰ &c. 'the breeze is able to be embraced by the limbs' (Sak. Act III). Again, মূকাৰ সন্ধানি সিং ঘানু বানা: 'the breezes are able to be drunk

by the hollowed palms;' विभूतय: शक्यम् ऋवाष्ट्रं 'great successes are able to be

907. It is not uncommon to find this participle standing merely in the place of a future tense, no propriety or obligation being implied, just as the past passive participle stands in the place of a past tense; thus, नूनम् अनेन लुअकेन मृग्मांसार्चिना गन्नव्यं in all probability this hunter will go in quest of the deer's flesh,' where गन्नव्यं is used impersonally; न्वां दृष्टा लोके: किविद वक्कव्यं when the people see you, they will utter some exclamation;' यदि पक्षी पतित तदा मया खादितव्य: if the bird falls, then it shall be eaten by me.' See also the eleventh sentence of the story at 930.

908. The neuter of this participle is sometimes used infinitively or substantively, as expressive merely of 'the indeterminate action' of the verb, without implying 'necessity' or 'fitness.' In such cases इति may be added; thus, वस्तित्वम् इति 'the being about to deceive;' मर्त्रव्यम् इति 'the being about to die:' but not always: as. जीवितव्यं 'life.'

Participial Nouns of Agency.

909. The first of these nouns of agency (580) is constantly used in poetry as a substitute for the present participle; implying, however, 'habitual action,' and therefore something more than present time. They are sometimes found governing the same case as the present participle, but they are always united with the word which they govern in one compound; thus, पुरम् 'city-conquering;' प्रियंवद 'speaking kind words;' नलेचर 'going in the water;' सर्मिन 'lakeborn.' The word which they govern is often in the crude base; thus, तेनस्कर, 'light-making' (see 69), from tejas and kri; मनोहर, 'mind-captivating,' from manas and hri (64); चहुद, 'giving much,' from bahu and dá; स्नान्मइ, 'self-knowing,' from átman and jūá (57. b).

910. The second (581) is sometimes, but rarely, found as a participle governing the case of the verb; thus, वाक्यं वक्का 'speaking a speech;' बहु-मार्ग-गां वोटा 'bearing the Ganges.'

911. The first and second species of the third (582. a. b), like the first, have often the sense of present participles, and are then always united with the crude base of the word which they govern in one compound; thus, मनो हारिन, 'mind-captivating,' from manas and hri; कार्या, साधक, 'effective of the business,' from kárya and sidh. They may sometimes govern the case of the verb whence they are derived, and may then be compounded, or not, with the word which they govern; thus, ग्रामेवासिन, 'dwelling in a village,' or ग्रामे वासिन; मुकुलानि सुमुक 'kisser of the buds' (Ratnávali, p. 7).

SYNTAX OF CONJUNCTIONS, PREPOSITIONS, ADVERBS, &c.

Conjunctions.

912. **\(\begin{align*} \text{`and'} (727) \) is always placed after the word which it connects with another, like que in Latin, and can never stand first in a sentence, or in the same**

place as 'and' in English; thus, परिक्रम्य अवलोका च 'walking round and looking.' Unlike que, however, which must always follow the word of which it is the copulative, it may be admitted to any other part of the sentence, being only excluded from the first place; thus, तनयम् अचिरात् प्राची इव अर्क प्रमुप च पावनं 'and having after a short time given birth to a pure son, as the eastern quarter (gives birth to) the sun.'

- a. Sometimes two cha's are used, when one may be redundant or equivalent to the English 'both;' or the two cha's may be employed antithetically or disjunctively, or to express the contemporaneousness of two events; thus, अहस्य रातिस्व 'Both day and night;' क्ष हरिणकानां जीवितं च स्रतिलोलं क च शराम् ते 'Where on the one hand is the frail existence of fawns? Where on the other are thy arrows?' क्रन्दितुं च प्रवृत्ता स्त्री संस्थानं च ज्योतिर् उतिस्प एनां जगाम 'no sooner had she began to weep, than a shining apparition in female shape, having snatched her up, departed' (S'ak. Act V). Observe—When क्ष, 'where?' is used as in the above example, it implies 'excessive incompatibility.'
- b. Sometimes च is used as an emphatic particle, and not as a copulative; thus, किंच मया परिकोत पूर्वा 'Was she indeed married by me formerly?'
- 913. तथा 'so,' ilikewise' (727. a), frequently supplies the place of च; thus, श्वनागत विधाता च प्रत्युत्तम् तथा 'both Anágata-vidhátá and Pratyutpannamatis' (names of the two fish in Hitop. book IV).
- 914. हि 'for,' तु 'but,' वा 'or' (727. a, 728. a. b), like च, are excluded from the first place in a sentence; thus, पूर्वायधीरितं श्रेयो दुःखं हि परिवर्त्तते 'for happiness formerly scorned turns to misery;' विपर्यये तु 'but on the contrary;' एनां त्यज्ञ वा मुहाख वा 'either abandon her or take her.'
- 915. यदि 'if' and चेत् 'if' (727. b) may govern the potential or conditional (see 891), but are also used with the indicative; thus, यद जीवित भट्टारिंग पश्यित 'if he live, he will behold prosperity;' यदि मया प्रयोजनम् अस्ति 'if there is need of me;' तृष्णा चेत् परित्यक्षा को दरिद्रः 'If avarice were abandoned, who would be poor?'

Prepositions and Adverbs.

916. Of all the internal evidences of the antiquity of Sanskṛit, there is none more decisive than the sparing use which this language makes of prepositions, in expressing the dependence of one word upon another. Indeed, the employment of these aids to syntactical combination may be regarded as a result of modern refinement, incompatible with the simplicity of the most ancient languages. Thus, even the Greek, which is copiously provided with prepositions, made comparatively little use of them in the days of Homer, and was satisfied to express most of the relations of the words in a sentence by the cases of its nouns. But let it not be imagined that few prepositions exist in Sanskṛit. On the contrary, they exist in great abundance, as we have shown at 729. Of these, however, only three are generally used in government with nouns, viz. যা, মনি, and যা; the latter two being usually placed after the word which they govern. Examples will be found at 730.

- a. Other examples of आ are, आ मिखिवन्धनात् 'as far as the wrist;' आमृत्योम् 'till death;' आममाप्रेम् 'to the completion;' आ व्रतस्य समापनात् 'till the completion of his vow;' आ प्रारीर विमोद्यवात् 'till his release from the body;' आ जन्मनस् 'from birth.'
- 917. Adverbs are often used as prepositions, or rather *postpositions*, in government with nouns. The following examples illustrate their construction as described at 731.
- a. न दखाद ऋते शक्यः कर्त्रं पाप विनिग्रहः 'the restraint of crime cannot be made without punishment;' शतं जन्मानि यावत् 'for a hundred births;' सर्प् विवरं यावत् 'up to the serpent's hole;' पुत्रेण सह 'along with his son;' हेतुं विना 'without cause;' अपराधेन विना 'without fault;' विवराद वहिर् नि:मृत्य 'creeping out of the hole;' अवलोकन धाणात् प्रभृति 'from the moment of seeing (him);' जन्मप्रभृति 'from birth;' ततः प्रभृति 'from that time forward;' उपनयनात् प्रभृति 'from the time of investiture;' धनस्य अर्घ, or more usually धनाघं, 'for the sake of wealth;' तस्याः कृते or तत्कृते 'for her sake;' पुत्र हेतोस् 'for the sake of a son;' तन्निमित्ते on that account.' उपिर, with the genitive, occurs rather frequently, and with some latitude of meaning; thus, नाभेर उपरि 'above the navel;' सिंहस् तस्य उपरि पपात 'the lion fell upon him;' मम उपरि विकारित: 'changed in his feelings towards me;' तव उपरि असद्भाव्यवहारी 'not behaving properly towards thee;' पुतस्य उपरि क्रुद्धः 'angry with his son;' नाभेर् कर्ड्ड 'above the navel;' नाभेर् अथस्तात् 'below the navel;' वृह्यस्य अथस्तात् 'beneath the tree;' भोजनाननारं 'after eating;' राज्ञ: समीपं 'near the king;' पितु: सकाशाद धनम् आददाति 'he receives money from his father;' मांसं शुनोऽग्रे निधिष्ठं 'flesh thrown before the dog;' मम समर्थ 'in my presence.' साद्यात may take an instrumental; as, अन्यैः साञ्चात् 'before others;' अस्माकं पञ्चात् 'after us;' प्राङ् निवेदनात् 'before telling;' प्राग् उपनयनाद 'before investiture;' भोजनात् प्राक् 'before eating;' स्नानात् पूर्व 'before bathing;' विवाहात पूर्व 'before marriage.' प्राक् may take an accusative; as, प्राग् द्वादश्समाः 'before twelve years are over;' अभिवादनात् परं 'after saluting;' तदवधर् जहुं 'after that period;' संवासराद जहुं 'after a year,' i. e. 'above a year having expired;' विवाहार अवीक् 'after marriage;' अवीक् मखपनार अस्यां 'after collecting the bones;' फलम् अनारेण 'without fruit;' भर्तुर् अनुमितम् अनारेण 'without the consent of her husband;' वादिकाया दक्षिणेन 'to the right of the garden;' प्राणि हिंसा व्यतिरेकेण 'without injury to living beings.'
- 918. স্থান, 'enough,' is used with the instrumental, with the force of a prohibitive particle; as, স্থান্ত হাঙ্কুমা 'away with fear,' 'do not fear.'
- a. It is also used with the indeclinable participle; as, স্থান বিৰাম 'enough of consideration;' see also 901. a.
- b. It is sometimes followed by an infinitive; as, न अलम् अस्मि हृद्यं निवर्तियतुं 'I am not able to turn back my heart.'
 - 919. मातं 'even,' 'merely,' when compounded with another word is declinable;

as, उत्तरमात न दराति 'he does not even give an answer;' न शब्दमाताद् भेतयां 'one ought not to be afraid of mere noise;' शब्दमातेण 'by mere sound;' वचनमातेण 'by mere words.'

- 920. तथा and यथा, when used as correlatives, are equivalent to the English 'so that,' and the Latin ita ut; thus, यथा खामी जागित्त तथा मया कर्त्रेचा 'I must so act that my master awake,' i. e. 'I must do something to make my master awake.' So also, तं न जानासि यथा गृह्रद्रक्षां करोमि 'Do not you know that I keep watch in the house?'
- a. ईंट्ड्रां, तादृशं, and यादृशं, may be used in the same way; thus, तादृशम् अनायुर्ण न किचिद् विद्यते यादृशं पर दार गमनं 'nothing is so opposed to length of life as attention to the wife of another.'
- b. यत्, as well as यथा, is used for 'that;' thus, स्तयं नूतनो न्यायो यद् स्टातिं हत्वा सन्ताप: क्रियते 'this is a new doctrine, that having killed an enemy remorse should be felt.'
- 921. किं, 'why?' may often be regarded as a mark of interrogation which is not to be translated, but affects only the tone of voice in which a sentence is uttered; as, जाति,मालेख किं कश्चित पूज्यते 'Is any one honoured for mere birth?'
- a. It sometimes has the force of 'whether;' as, जायतां किम् उपयुक्त स्तावत् वर्ज्ञनं मृह्याति अनुपयुक्तो वा 'let it be ascertained whether he is worthy to receive so large a salary, or whether he is unworthy;' मन्त्री वेज्ञि किं गुग्गुमुक्तो राजा न वा 'the minister knows whether the king is meritorious or not.'
- 922. वत् as an affix of comparison or similitude (724) may be compounded with a word in the crude base, which if uncompounded would be in the accusative case; thus, आत्मानं मृतवत् सन्दर्शे 'showing himself as if dead;' आग्रधैवह इदं पश्यित 'he regards it as a wonder.'
- 923. The negative न is sometimes repeated to give intensity to an affirmation; thus, न न वस्मित 'he will not not say' = वस्मित स्व 'he will certainly say.'
- 924. The indeclinable participle of dis with ut is sometimes used adverbially to express on account of, 'with reference to,' 'towards,' and governs an accusative; thus, किम् उद्दिश्य 'On account of what?' तम् उद्दिश्य 'with reference to him.'
- 925. The indeclinable participle of रभ् with आ ('to begin') is used adverbially to express 'from,' 'beginning with,' and may either govern an ablative or be placed after the crude base; thus, निमन्त्रणाट् आरभ्य श्राह्म यावत् 'from the time of invitation to the time of the Sráddha.' निमन्त्रणारभ्य would be equally correct.
- 926. The interjections धिक् and हा require the accusative; as, धिक् पापिष्ठं 'Woe to the wretch!' and the vocative interjections the vocative case; as, भो: पान्य 'O traveller!'

ON THE USE OF THE PARTICLE Efa.

927. All the languages of the East are averse to the use of the obliqua oratio. In Sanskrit it is rarely admitted; and when any one relates the words or describes the sentiments or thoughts of

another, the relator generally represents him as speaking the actual words in his own person.

a. In such cases the particle sta (properly meaning 'so,' 'thus') is often placed after the words quoted, and may be regarded as serving the purpose of inverted commas; thus, शिष्पा जचुः कृत्कृत्या वयम् इति 'the pupils said, "We have accomplished our object;"' not, according to the English or Latin idiom, 'the pupils said that they had accomplished their object.' So also, जलहाजारी इति ब्रूते भत्ती 'your husband calls you "quarrelsome," ' where कलह जारी is in the nominative case, as being the actual word supposed to be spoken by the husband himself in his own person. So again, युप्मान् विश्वास्भूमय इति सर्वे पिह्याणो मम अग्रे प्रस्विन 'all the birds praise you in my presence, saying, "He is an object of confidence," where the particle इति is equivalent to 'saying,' and the word विश्वासभूमय: is not in the accusative, to agree with युमान, as might be expected, but in the nominative, as being the actual word supposed to be uttered by the birds in their own persons. In some cases, however, the accusative is retained before इति, as in the following example from Manu: अर्श वालम् इत् आहु: 'they call an ignorant man "child." But in the latter part of the same line it passes into a nominative; as, पितृत्य एव तु मन्त्रदं 'but (they call) a teacher of scripture "father.", II. 153.

928. In narratives and dialogues इति is often placed redundantly at the end of a speech. Again, it may have reference merely to what is passing in the mind either of another person or of one's self. When so employed, it is usually joined with the indeclinable participle, or of some other part of a verb signifying 'to think,' 'to suppose,' &c., and may be translated by the English conjunction 'that,' to which, in fact, it may be regarded as equivalent; thus, मकेटो घरटां वादपित इति परिज्ञाय 'having ascertained that it is a monkey who rings the bell;' पुनर् अर्थन्दिः करणीया इति मित्र् वभूव 'his idea was that an increase of wealth ought again to be made;' धन्योऽहं यस्य एतादृशी भाष्या इति मनसि निधाय 'reflecting in his mind that I am happy in possessing such a wife.' The accusative is also retained before इति in this sense; as, मृतम् इति मन्दा 'thinking that he was dead.' In all these examples the use of इति indicates that a quotation is made of the thoughts of the person at the time when the event took place.

929. Not unfrequently the participle 'saying,' 'thinking,' 'supposing,' &c., is omitted altogether, and इति itself involves the sense of such a participle; as, वालोऽपि न अवमन्तयो मनुष्य इति भूमिपः 'a king, even though a child, is not to be despised, saying to one's self, "He is a mortal;" सोहाहाइ वा विभुर इति वा मय्य अनुक्रोशात् 'either through affection or through compassion towards me, saying to yourself, "What a wretched man he is;" अयं वराहः। अयं शाहिल इति वन्राजिषु आहिराइनो 'There's a boar! Yonder's a tiger! so crying out, it is wandered about (by us) in the paths of the woods.'

CHAPTER X.

EXERCISES IN TRANSLATION AND PARSING.

STORIES FROM THE HITOPADEŚA TRANSLATED AND PARSED.

930. The following two stories are taken from the 4th book of the Hitopadeśa. A literal translation and grammatical analysis are given to both stories. All the rules of combination are observed, but the words are separated from each other in accordance with 26. In the two cases where such separation is impossible, viz. where a final and initial vowel blend together into one sound, and where crude words are joined with others to form compounds, a dot placed underneath marks the division.

STORY OF THE SAGE AND THE MOUSE.

ist sentence. ऋस्ति गौतमस्य मुनेस् तपोवने महातपा नाम मुनिः। 'There is in the sacred grove of the sage Gautama a sage named Mahátapás (Great-devotion).'

- 2d. तेनाश्रमसिवधाने मूषिक शावकः काक मुखाद् अष्टो दृष्टः। 'By him, in the neighbourhood of his hermitage, a young mouse, fallen from the beak of a crow, was seen.'
- 3d. ततो द्या युक्तेन तेन मुनिना नीवार क्षेः संवर्धितः। 'Then by that sage, touched with compassion, with grains of wild rice it was reared.'
- 4th. तदनन्तरं मूषिकं खादितुम् ऋनुधावन् विडालो मुनिना दृष्टः। 'Soon after this, a cat was observed by the sage running after the mouse to devour it.'
- 5th. तं मूषिकं भीतम् ञ्चालोक्य तपःप्रभावात् तेन मुनिना मूषिको बलिष्ठो विडालः कृतः। 'Perceiving the mouse terrified, by that sage, through the efficacy of his devotion, the mouse was changed into a very strong cat.'
- 6th. स विडालः कुक्कुराट् बिभेति। ततः कुक्कुरः कृतः। कुक्कुरस्य व्याघान् अहट् भयं। तट्नन्तरं स व्याघः कृतः। 'The cat fears the dog: upon that it was changed into a dog. Great

is the dread of the dog for a tiger: then it was transformed into a tiger.'

7th. अथ व्याग्रम् अपि मूधिक निर्विशेषं पश्यित मुनिः। 'Now the sage regards even the tiger as not differing at all from the mouse.'

8th. ऋतः सर्वे तत्रस्था जनाम् तं व्याघं दृष्ट्वा वदन्ति। 'Then all the persons residing in the neighbourhood, seeing the tiger, say.'

9th. अनेन मुनिना मूषिकोऽयं व्याघ्रतां नीतः। 'By this sage this mouse has been brought to the condition of a tiger.'

10th. एतच् छूना स व्याघः सव्यथोऽचिन्तयत्। 'The tiger overhearing this, being uneasy, reflected.'

ाति. यावद् अनेन मुनिना जीवितव्यं तावद् इदं मस स्व रूपां स्थानम् अकीर्त्तिं करं न पलायिष्यते। 'As long as it shall be lived by this sage, so long this disgraceful story of my original condition will not die away.'

12th. इति समालोच्य मुनिं हन्तुं समुद्यतः। 'Thus reflecting, he prepared (was about) to kill the sage.'

13th. मुनिस् तस्य चिकीर्धितं ज्ञाला पुनर् मूषिको भव इत्य उक्का मूषिक एव कृतः। 'The sage discovering his intention, saying, "Again become a mouse," he was reduced to (his former state of) a mouse.'

Observe in this story four peculiarities: 1st, the simplicity of the style; 2dly, the prevalence of compound words; 3dly, the scarcity of verbs; 4thly, the prevalence of the past passive participle with the agent in the instrumental case for expressing indefinite past time, in lieu of the past tense active with the nominative: see 895, with note.

First sentence.—Asti, 'there is,' 3d sing. pres. of the root as, 2d conj. (see 584). Gautamasya, 'of Gautama,' noun of the first class, masc. gend., gen. case (103). Munes, 'of the sage,' noun of the second class, masc. gend., gen. case (110): final s remains by 62. Taporane, 'in the sacred grove,' or 'grove of penance,' genitively dependent compound (743); the first member of the compound formed by the crude noun tapas, 'penance,' as being changed to o by 64; the last member,

by the loc. case of vana, 'grove,' noun of the first class, neut. (104). Mahátapá, 'great devotion,' relative form of descriptive compound (766); the first member formed by the crude adjective mahá (substituted for mahat, see 778), 'great;' the last member, by the nom. case of tapas, 'devotion,' noun of the seventh class, neut. (164): final s dropped by 66. a. Náma, 'by name,' an adverb (713). Munih, 'a sage,' noun of the second class, masc., nom. case (110): final s passes into Visarga by 63. a.

Second sentence.—Tena, 'by him,' instr. case of the pronoun tat at 220. $A\acute{s}rama-sannidh\acute{a}ne$,' in the neighbourhood of his hermitage,' genitively dependent compound (743); the first member formed by the crude noun $\acute{a}\acute{s}rama$, 'hermitage;' the last member, by the loc. case of $sannidh\acute{a}na$, 'neighbourhood,' noun of the first class, neut. (104). The final a of tena blends with the initial \acute{a} of $\acute{a}\acute{s}rama$ by 31. $M\'{u}\acute{s}hika-\acute{s}\acute{u}cakah$, 'a young mouse,' or 'the young of a mouse,' genitively dependent compound (743); the first member formed by the crude noun $m\'{u}\acute{s}hika$, 'a mouse;' the last, by the nom. case of $\acute{s}\acute{u}caka$, 'the young of any animal,' noun of the first class (103): final s becomes Visarga by 63. $K\'{u}ka-mukh\acute{u}d$, 'from the beak (or mouth) of a crow,' genitively dependent compound (743); the first member formed by the crude noun $k\'{u}ka$, 'a crow;' the last, by the abl. case of mukha, 'mouth,' noun of the first class, neut. (104); t being changed to d by 45. Bhrashto, 'fallen,' nom. case, sing. masc. of the past pass. part. of the root bhrans (544): as changed to a by 64. Drishtah, 'seen,' nom. case, sing. masc. of the past pass. part. of the root brans the past pass. part. of the root brans to the past pass. part. of the root brans to the past pass. part. of the root brans to the past pass. part. of the root brans to the past pass. part. of the root brans to the past pass. part. of the root brans to the past pass. part. of the root brans to the past pass. part. of the root brans to the past pass. part.

Third sentence.—Tato, 'then,' adv. (719): as changed to o by 64. Dayá-yuktena, 'touched with compassion,' instrumentally dependent compound (740); the first member formed by the crude noun dayá, 'compassion;' the last, by the instr. case of yukta, 'endowed with,' past pass. part. of the root ynj (670). Tena, see second sentence. $Munin\acute{a}$, 'by the sage,' noun of the second class, masc. gend., instr. case (110). $Niv\acute{a}ra-kanaih$, 'with grains of wild rice,' genitively dependent compound (743); the first member formed by the crude noun $niv\acute{a}ra$, 'wild rice;' the second, by the instr. plur. of kana, noun of the first class, masc.: final s becomes Visarga by 63. Sanvarddhitah, 'reared,' nom. case, sing. of the past pass. part. of the causal form of the root vridh (549): final s becomes Visarga by 63. a.

Fourth sentence.—Tadanantaram, 'soon after this,' compound adverb; the first member formed with the pronoun tat, 'this,' at 220; the second, by the adverb anantaram, 'after,' at 731 and 917. Múshikam, noun of the first class, masc. gend., acc. case (103). Kháditum, 'to eat,' infinitive mood of the root khád (458, 868). Anudhávan, 'pursuing after,' running after,' nom. case, sing. masc. of the pres. part. Paras. of the root dháv, 'to run,' with the preposition anu, 'after' (524). Vidálo, 'a cat,' noun of the first class, masc. (103), nom. case: as changed to o by 64. Muniná, see third sentence. Drishtah, see second sentence.

Fifth sentence.—Tam, acc. case of the pronoun tat at 220, used as a definite article, sec 795. Mushikam, see fourth sentence. Bhítam, 'terrified,' acc. case, sing. masc. of the past pass. part. of the root bhí (532). Álokya, 'perceiving,' indeclinable part. of the root lok, with the prep. á (559). Tapah-prabhávát,

'through the efficacy of his devotion' (814), genitively dependent compound (743); the first member formed by the crude noun tapas, 'devotion,' s being changed to Visarga by 63; the second, by the abl. case of prabháva, noun of the first class, masc. (103). Tena, see second sentence. Muniná, see third sentence. Múshiko, nom. case: as changed to o by 64. Balishtho, 'very strong,' nom. case, masc. of the superlative form of the adj. balin, 'strong' (see 193): as changed to o by 64. Vidálah, see fourth sentence: final s becomes Visarga by 63. Kritah, 'changed,' made,' nom. case, sing. of the past pass. part. of the root kri at 682: final s becomes Visarga by 63. a.

Sixth sentence.—Sa, nom. case of the pronoun tat at 220, used as a definite article (795): final s dropped by 67. Vidálah, see fourth sentence. Kukkurád, 'the dog,' noun of the first class, masc. (103), abl. case after a verb of 'fearing' (855): t changed to d by 45. Bibheti, 'fears,' 3d sing. pres. tense of the root bhi, 3d conj. (666). Tatah, 'upon that,' adv. (719): as changed to ah by 63. Kukkurah, 'the dog,' nom. case (103): final s becomes Visarga by 63. Kritah, see fifth sentence. Kukkurasya, 'of the dog,' gen. case (103). Vyághrán, 'for the tiger,' noun of the first class, masc. (103), abl. case after a noun of 'fear' (814. d): t changed to n by 47. Mahad, 'great,' noun adj. of the fifth class (142), nom. case, sing. neut.: t changed to d by 45. Bhayam, 'fear,' noun of the first class, neut. (104), nom. case. Tadanantaram, see fourth sentence. Vyághrah, nom. case: final s becomes Visarga by 63. Kritah, see fifth sentence.

Seventh sentence.—Atha, 'now,' inceptive particle (727. c). Vyághram, acc. case. Api, 'even,' adv. Múshika-nirviśesham, 'as not differing at all from the mouse,' relative form of dependent compound (762); the first member formed by the crude noun múshika; the second, by the acc. case of the substantive viśesha, 'difference,' with nir prefixed: or it may be here taken adverbially, see 776. Paśyati, 3d sing. pres. tense of the root dṛiś, 1st conj. (604). Munih, see first sentence.

Eighth sentence.—Atah, 'then,' adv. (719). Sarve, 'all,' pronominal adj., nom. case, plur. masc. (237). Tatra-sthá, 'residing in the neighbourhood,' anomalous compound, in its character resembling a locatively dependent; the first member being formed by the adverb tatra (720), 'there,' or 'in that place;' the second, by the nom. plur. masc. of the participial noun of agency of the root sthá, 'to remain' (587): final s dropped by 66. a. Janás, 'persons,' noun of the first class, masc. gend. (103), nom. case, plur.: final s remains by 62. Tam, acc. case of the pronoun tat (220), used as a definite article (795). Vyághram, 'tiger,' noun of the first class, masc. gend. (103), acc. case. Drishlwá, 'having seen,' indeclinable past participle of the root dris (556). Vadanti, 'they say,' 3d plur. pres. of the root vad, 1st conj. (599).

Ninth sentence.—Anena, 'by this,' instr. case of the demonstrative pronoun idam at 224. Muniná, see third sentence. Múshiko, nom. case: as changed to o by 64. a. Ayam, 'this,' nom. case of the demonstrative pronoun at 224: the initial a cut off by 64. a. Vyághratám, 'the condition of a tiger,' fem. abstract noun of the first class (105), acc. case, formed from the substantive vyághra, 'a tiger,' by

the affix tá (80. XXIII). Nítah, 'brought,' nom. case, sing. masc. of the past pass. part. of the root ní at 532.

Tenth sentence.—Etach, 'this,' acc. case, neut. of the demonstrative pronoun etat at 223: t being changed to ch by 49. Chhrutwá, 'overhearing,' indeclinable participle of the root śru (676 and 556). The becomes First by 49. Vyághrah, nom. case: final s becomes Visarga by 63. Sa-vyatho, 'uneasy,' relative form of indeclinable compound, formed by prefixing the preposition saha to the fem. substantive vyathá (769): as changed to o by 64. a. Achintayat, 'reflected,' 3d sing. 1st pret. of the root chint, 10th conj. (641): the initial a cut off by 64. a.

Eleventh sentence. — Yávad, 'as long as,' adv. (713): t changed to d by 45. Anena, see ninth sentence. Jícitaryam, 'to be lived,' nom. case, neut. of the fut. pass. part. of the root jiv (569, 905, a, 907). Távat, 'so long,' adv. correlative to yávat (713). Idam, 'this,' nom. case, neut. of the demonstrative pronoun at 224. Mama, 'of me,' gen. case of the pronoun aham, '1,' at 218. Swarúpákhyánam, 'story of my original condition,' genitively dependent compound (743); the first member formed by the crude noun swarúpa, 'natural form' (see 232); the second, by the nom. case of ákhyána, noun of the first class, neuter (104): m retained by 60. Akirti-karam, 'disgraceful,' accusatively dependent compound (739); the first member formed by the crude noun akirti, 'disgrace;' the second, by the nom. case, neut. of the participial noun of agency kara, 'causing,' from kri, 'to do' (580). Na, 'not,' adv. (717. a). Paláyishyate, 'will die away,' 3d sing. 2d fut. Atm. of the compound verb paláy, formed by combining the root i with the prep. pará (783).

Twelfth sentence.—Iti, 'thus,' adv. (717.e; see also 928). Samálochya, 'reflecting,' indeclinable part. of the compound verb samáloch (559), formed by combining the root loch with the prepositions sam and á (784). Munim, acc. case. Hantum, 'to kill,' infinitive mood of the root han (458, 868, and 654). Samudyatah, 'prepared,' nom. case, sing. masc. of the past pass. part. of the compound verb sam-ud-yam, formed by combining the root yam with the prepositions sam and ut (545).

Thirteenth sentence. — Munis, nom. case: final s remains by 62. Tasya, 'of him,' gen. case of the pronoun tat (220). Chikirshitam,' intention,' acc. case, neut. of the past pass. part. of the desiderative base of the root kri,' to do' (550 and 502), used as a substantive (896.b). Juátvá,' discovering,' indeclinable part. of the root juá (556 and 688). Punar, 'again,' adv. (717.e): r remains by 71.e. Múshiko, nom. case: as changed to o by 64. Bhava, 'become,' 2d sing. imperat. of the root bhú (585). Ity answers to inverted commas, see 927.a: the final i changed to y by 34. Uktvá, 'saying,' indeclinable part. of the root vach (556 and 650). Múshika, nom. case: final s dropped by 66. Eva, 'indeed,' adv. (717).

931. STORY OF THE BRAHMAN AND HIS WEASEL.

101 Past pass. part. of gam, 'to go,' with preposition upa, 545, 896, and see 844.

932. Translation.

'There lives in Ujjayiní a Bráhman named Mádhava. His wife bore him (a son). She, having stationed the Bráhman (her husband) to take charge of the young child, went to perform ablution. Meanwhile a message came from the king for the Bráhman to perform the Párvana Sráddha. On hearing which, the Bráhman, from his natural neediness, thought to himself, "If I do not go quickly, some other Bráhman will take the Sráddha. But there is none here (that I may leave) as a guardian to the child. What then can I do? Come, having stationed this long-cherished weasel, dear to me as a son, in charge of the infant, I will go." Having so done, he went. Presently a black serpent, silently approaching the child, was killed by the weasel and torn in pieces. By and by the weasel, seeing the Bráhman returning, quickly running to meet him, his mouth and feet smeared with blood, rolled himself at the Bráhman's feet. Then that Bráhman, seeing him in such a condition, hastily concluding that he had eaten the child, killed him. Afterwards, no sooner did he come up than he beheld the infant slumbering safely, and the black serpent lying dead. Then looking at his benefactor the weasel, and bitterly repenting (of his precipitation), he experienced exceeding grief.'

EASY SENTENCES TO BE TRANSLATED AND PARSED.

933. Note—The numbers over the words in the following sentences and fables refer to the rules of the foregoing grammar. Those words which cannot be translated by a reference to the rules are explained in regular order at the foot of the page. Observe, that cr. stands for crude base; c. for class or for case; s. for substantive; m. for masculine; f. for feminine; n. for neuter.

SCHEME OF THE MORE COMMON SANSKRIT METRES.

1st class of Metres, consisting of two lines, determined by the number of syllables in the half-line.

Śloka or Anushtubh (8 syllables to the half-line or Páda).

935. The commonest of all the infinite variety of Sanskrit metres is the Sloka or Anushtubh. This is the metre which chiefly prevails in the great epic poems.

It consists of four half-lines of 8 syllables or two lines of 16 syllables each, but the rules which regulate one line apply equally to the other; so that it is only necessary to give the scheme of one line, as follows:—

Note-The mark . denotes either long or short.

The 1st, 2d, 3d, 4th, 9th, 1oth, 11th, and 12th syllables may be either long or short. The 8th, as ending the half-line, and the 16th, as ending the line, are also common. Since the line is considered as divided into two parts at the 8th syllable, it is an universal rule that this syllable must end a word, whether simple or compound*.

^{*} There is, however, one example in the Hitopadesa of a compound word running through a whole line.

The 5th syllable ought always to be short. The 6th may be either long or short; but if long, then the 7th ought to be long also; and if short, then the 7th ought to be short also. But occasional variations from these last rules occur.

The last 4 syllables form two iambics; the 13th being always short, the 14th always long, and the 15th always short.

Every Sloka, or couplet of two lines, ought to form a complete sentence in itself, and contain both subject and predicate. Not unfrequently, however, in the Rámáyana and Mahábhárata, three lines are united to form a triplet.

936. In the remaining metres determined by the number of syllables in the half-line, each half-line is exactly alike; so that it is only necessary to give the scheme of one half-line, or quarter of the verse (Páda).

Note, that in printed books each quarter of the verse, if it consist of more than 8 syllables, is often made to occupy a line.

937. Trishtubh (11 syllables to the half-line).

Of this there are 22 varieties. The commonest are-

There is generally a cæsura at the 5th syllable.

Note—The above 2 varieties are sometimes mixed in the same stanza; in which case the metre is called *Upajáti* or *Akhyánakí*.

941. Jagatí (12 syllables to the half-line).

Of this there are 30 varieties. The commonest are-

944. Atijagatí (13 syllables to the half-line).

Of this there are 16 varieties. The commonest are-

^{*} The mark - is meant to show that the last syllable is long at the end of the half-line, but long or short at the end of the line.

950. Atišakwari or Atišakkari or Atišarkari (15 syllables to the half-line).

949. Vasanta-tilaká, - - 0 - 0 0 0 - 0 0 - 0

9 10 11 12 13 14

Of this there are 20 varieties. The commonest is-

Of this there are 18 varieties. The commonest is-

There is a cæsura at the 8th syllable.

Ashti (16 syllables to the half-line). 952. Of this there are 12 varieties; none of which are common. Atyashti (17 syllables to the half-line). 953. Of this there are 17 varieties. The commonest are-9 10 11 12 13 14 15 16 17 954. Sikhariní, U - -Cæsura at the 6th syllable. 955: Mandákrántá, — — — | 0 0 0 0 0 | 11 12 13 14 15 16 17 Cæsura at the 4th and 10th syllables. Cæsura at the 6th and 10th syllables. Dhriti (18 syllables to the half-line). 9.57. Of this there are 17 varieties; one of which is found in the Raghu-vanéa-1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 958. Mahá-máliká, 🔾 🔾 🔾 🔾 🗸 – 🗸 – – – – – Atidhriti (19 syllables to the half-line). 9.59. Of this there are 13 varieties. The commonest is-1 2 3 4 5 6 7 8 9 10 11 12 | 13 14 15 16 17 18 19 | Cæsura at the 12th syllable. Kriti (20 syllables to the half-line). Of this there are 4 varieties; none of which are common. 962. Prakriti (21 syllables to the half-line). 1 2 3 4 5 6 7 | 8 9 10 11 12 13 14 | 15 16 17 18 19 20 21 | Cæsura at the 7th and 14th syllables.

964. Of the remaining metres determined by the number of syllables in the half-line, Akriti has 22 syllables, and includes 3 varieties; Vikriti 23 syllables, 6 varieties; San-kriti 24 syllables, 5 varieties; Atikriti 25 syllables, 2 varieties; Utkriti 26 syllables, 3 varieties; and Daudaka is the name given to all metres which exceed Utkriti in the number of syllables.

965. There are two metres, however, peculiar to the Vedas, called Gáyatri and Ushuih. The first of these has only 6 syllables to the quarter-verse, and includes 11 varieties; the second has 7 syllables to the half-line, and includes 8 varieties.

- a. Observe, that when the half-line is so short, the whole verse is sometimes written in one line.
 - b. Observe also, that great license is allowed in Vaidik metres: thus in the

which may be regarded as consisting of a triplet of 3 divisions of 8 syllables each, or of 6 feet of 4 syllables each, generally printed in one line, the quantity of each syllable is very irregular. The following verse exhibits the most usual quantities:

but even in the b verse of each division the quantity may vary.

2d class of Metres, consisting of two lines, determined by the number of syllables* in the whole line (each whole line being alike).

967. This class contains 7 genera, but no varieties under each genus. Of these the commonest are—

968. Vaitálíya (21 syllables to the whole line).

There is a cæsura at the 10th syllable.

969. Aupachchhandasika (23 syllables to the whole line).

The scheme of this metre is the same as the last, with a long syllable added after the 10th and last syllable in the line; the casura being at the 11th syllable.

970. Pushpitágrá (25 syllables to the whole line).

There is a cæsura at the 12th syllable.

^{*} This class of metres is said to be regulated by the number of feet or instants in the line, in the same way as the 3d class. But as each line is generally distributed into fixed long or short syllables, and no option is allowed for each foot between a spondee, anapæst. dactyl, proceleusmaticus, and amphibrach, it will obviate confusion to regard this class as determined by syllables, like the 1st.

3d class of Metres, consisting of two lines, determined by the number of feet in the whole verse (each foot containing generally four instants or mátrás).

971. Note—Each foot is supposed to consist of four instants, and a short syllable is equivalent to one instant, a long syllable to two. Hence only such feet can be used as are equivalent to four instants; and of this kind are the dactyl $(- \cup \cup)$, the spondee (- -), the anapast $(\cup \cup -)$, the amphibrach $(\cup - \cup)$, and the proceleus maticus $(\cup \cup \cup \cup)$; any one of which may be employed.

Of this class of metres the commonest is the

Each line consists of seven and a half feet; and each foot contains four instants, excepting the 6th of the second line, which contains only one, and is therefore a single short syllable. Hence there are 30 instants in the first line, and 27 in the second. The half-foot at the end of each line is generally, but not always, a long syllable; the 6th foot of the first line must be either an amphibrach or proceleusmaticus; and the 1st, 3d, 5th, and 7th feet must not be amphibrachs. The cæsura commonly takes place at the end of the 3d foot in each line, and the measure is then sometimes called Pathya. The following are a few examples:

973. The *Udgiti* metre only differs from the *Aryá* in inverting the lines, and placing the short line, with 27 instants, first in order.

974. There are three other varieties:—In the *Upagiti*, both lines consist of 27 instants; in the *Giti*, both consist of 30 instants; and in the *Aryágiti*, of 32.
